WE observe that Mr. J. H. Walker has opened premises in this city to carry on business as special agent for rubber goods. Mr. Walker was for some twelve years manager of the Toronto branch of the Canadian Rubber Company, and has a good connection amongst the trade. He announces that he or his representative will shortly visit dealers in the surrounding country, and meantime he is to be found at No. 88 Bay street, and glad to see any one who wants rubber goods.

JAMES COGHILL, tailor, at Listowel, claimed two or three months ago to possess assets of $2,500, against liabilities of nearly $1,000. Now he assigns, and his liabilities are put down at $1,800, while his nominal assets are $400. In his former statement he may have included four houses that are said to be in his wife's name. This is his second failure.——A. C. McKenzie came from Brechin to Kirkfield in 1886 and opened a general store, and three years later he assigned and settled with his creditors at 35 per cent. In Jan., 1896, John G. Campbell was admitted a partner, and after one year McKenzie retired and Campbell continued the business under the old style. Now we hear of Campbell's assigment.

IN Montreal the following recent failures are to be noted: Philomene Brisson, saloon-keeper, has assigned to the court, owing $2,500.——Ambroise Goulet, a steamboat owner, has consented to assign, and shows liabilities of some $10,000.——Paul Desjardins, dry goods, has made a proposition to pay his creditors 35 cents cash, 37½ cents secured, or 40 cents on time, partly secured.——Joseph Burel, a *restaurateur*, who formerly ran the Board of Trade restaurant, has failed, and is reported an absentee.——W. A. Stuart, a baker of some prominence in the northeast suburbs, who has been making a specialty of a cheap cash bakery business, has not been able to make it a success, and has assigned owing about $16,000.——A. J. R. Bostwick, who has been doing a small agency business in railway and machinery supplies, is reported embarrassed and trying to arrange a compromise.——An assignment has been made by A. Desjardins, a small dealer in musical instruments.

A LETTER from Owen Sound notes the air of activity given to that place by the volume of upper lake traffic passing through both ways this season. It is mentioned that more than a million bushels of wheat, oats and corn, beside some 65,000 barrels of flour, are in these elevators and on the Owen Sound wharves, now awaiting shipment by rail eastward. "This is enough," adds our correspondent, "to keep two 18-car trains a day going all winter. Messrs. Maitland & Rixon, forwarders and lumber dealers, also general agents for the Northern Line of steamers, report having had an active season.——The Wm. Kennedy & Sons, machine shop have been and still are decidedly busy, making propeller wheels and various heavy goods.——Messrs. James McLauchlin & Co., wholesale grocers and manufacturers, have been making additions to their already extensive establishment. A new building has been added to their biscuit and confectionery department, besides additions to their candy department on the second and third floors. Their plant is also enlarged.

THE

BRITISH MORTGAGE LOAN CO.

OF ONTARIO

DIVIDEND NO. 39

Notice is hereby given that a Dividend at the rate of SIX per cent per annum, on the paid-up capital stock of this company, for the half-year ending the 31st Dec., instant, has this day been declared. and that the same is payable at the office of the company, in the City of Stratford, on and after

Monday, the 3rd Day of January next.

The transfer books will be closed from the 16th to the 31st instant, inclusive.

By order of the Board.

WM: BUCKINGHAM,
Manager.

Stratford, Dec. 6, 1897.

ARBUTHNOT BROS., printers, this city, having been unable to effect a settlement with their creditors, the latter are making arrangements to sell the plant, and have advertised same for sale by tender.

THE Weymouth, N.S., *Telephone* says the Bear River lumber cut will be an average one, and will probably aggregate four million feet.

E. A. GIDNEY, Digby Neck, Nova Scotia, is building a factory for fish canning and packing, to be finished during the winter. Mr. Gidney will can haddies and lobsters.

SEVERAL wagon loads of smuggled turkeys were seized on Sunday by the United States customs officials at Plattsburg, N Y., and Berkshire, Vt. French-Canadian farmers have been trying to sell their Christmas poultry without considering Uncle Sam's claim, and as a result some $600 worth of confiscated turkeys have been sold at public auction at Plattsburg. Nearly all of this consignment came from Bedford and Lacolle, in Quebec.

IT is estimated that the catch of herring in the county [of Shelburne, N.S] this fall has been between 30,000 and 40,000 barrels. About seventy-five per cent. of the catch has been sold at prices ranging from $3 to $3 25 per barrel. The balance of the fish has been kept for lobster bait. It will be seen that the big run means a big pile of money in the pockets of fishermen. At North East Harbor alone, it is said, the catch was over 8,000 barrels.—*Shelburne Budget.*

A BUSINESS man who had an active and honorable career in Toronto passed away this week in the person of Robert H. Gray. Born in England sixty years ago, Mr. Gray came to Canada in 1850 and lived first in Dundas. Coming to Toronto, he entered the Hounsfield warehouse on Colborne street, and afterwards he went into business for himself, becoming head of the firm of Gray, Rennie & Co., which was afterwards succeeded by R. H. Gray & Co., then the Gray-Harold Manufacturing Company, and then R. H. Gray & Co., which firm continued in business until the Osgoodby fire, on Wellington street, which totally destroyed stock and warehouse. Of late years he continued to take an interest in the Commercial Travelers' Association, the members of which only last year presented him with his portrait, on the occasion of his retirement from the presidency. Mr. Gray has several sons in active business in various Canadian cities.

A DESPATCH of Tuesday last from Ottawa gives an estimate of the lumber cut in the Ottawa Valley during the season which puts it at about seven hundred and twenty-four million feet, somewhat more than last year, the increase being due to heavy cuts by the St. Anthony Lumber Company and several others. The estimated cuts are as follows: — J. R. Booth, 130,000,000; McLachlan Bros., Arnprior, 70,000,000; St Anthony Company, 70,000,000; Buell, Hurdman & Co., 60,000,000; Hawkesbury Lumber Company, 55,000,000; Gilmour & Co., Canoe Lake, 55,000,000; Gilmour & Hugheson, Hull, 40,000,000; Gillies Bros., Braeside, 30,000,000; Shepard & Morse, New Edinburgh, 18,000,000; Pembroke Lumber Company, 15,000,000; Klock Bros. Aylmer, 14 000,000; Canada Lumber Company, Carleton Place, 12,000,000; Williamson & Sons, 12,000,000; Conroy Bros., Deschenes, 12,000,000; James Maclaren, Buckingham, 12 000,000; Ottawa Lumber Company, Calumet, 11,000,000; Hogan's Mill, Plantagenet, 5,000,000; Giles Bros., Sand Point, 3,000,000; Bronson & Weston, 50,000,000; W. C. Edwards, Rockland, 50,000,000; total cut, 724,000,000 feet.

A VERY creditable showing is made by the Manitoba town of Carberry in the matter of new buildings or improvements to old ones. The amount so expended during 1897 is stated by the *Express* at $36,190. There are four new brick stores, three grain elevators, a number of frame dwellings erected and other buildings improved. And in the country immediately around Carberry there is reckoned up $19,000 worth of buildings, such as new dwellings, barns and stables to the number of thirty.

A CUSTOMS sale at St. John last Tuesday of condemned or unclaimed goods attracted quite a gathering of bargain hunters. Among the goods sold were six bottles of brandy, which cost the owners of the French steamer "Jules Theodore" $33.33⅓ per bottle. This brandy was seized last summer from one of the steamer's crew while attempting to smuggle the stuff ashore, and the owners of the steamer were fined $400. Half of the fine was eventually refunded. The six bottles, which proved so costly to the owners, were bid in for $1.10 per bottle by the customs officer who made the seizure. There was also put up a large quantity of gin on which the unpaid duty amounted to $360. Samples were passed to the crowd and everybody availed themselves of the opportunity to test the quality of the goods.

A REJOICING GATHERING.

Not quite two years ago a number of citizens of St. John, New Brunswick, took luncheon on board the steamer "Lake Superior," then about to make the first of the Beaver line sailings to Liverpool. They were hopeful, but by no means without apprehension as to the outcome. But more freight began to be offered for the line, and the business of the port grew. Larger steamers have been added to the route, the latest being the "Gallia," which carries Her Majesty's mails, and on board which handsome ship a number of St. John citizens, and some Toronto and Montreal people too, lunched on Monday last. Nor were there any apprehensions or regrets at the gathering, which was one of rejoicing over the growth of the port, and of hope for its future. Nearly a hundred and fifty persons sat down, Mr. Campbell, manager of the Beaver Line, in the chair, and the mayor, the president of the board of trade, the members for the city and county, Mr. Andrew Allan, of Montreal, Mr. James Carruthers, of Toronto, among the guests. Among the speeches made was one by Mr. Robertson, the mayor, as to the outlook for St. John; one by Mr. Bosworth, of the C.P.R., who said his road had already booked for shipment via that port 1,300,000 bushels of grain, 1,000,000 bushels of which came from Ontario. The railway also had at Owen Sound a million bushels of American grain. They had contracted to move 9,000 tons of package freight, which would come here for shipment. Since he came on board the "Gallia" he had received a telegram offering the railway 200,000 bushels of grain for shipment from here. He was sorry to say that they would be unable to handle it. This showed how St. John was appreciated in the west.

Mr. Carruthers said he, as a member of the Montreal and Toronto boards of trade, would send to St. John all the grain he could for shipment. But another elevator was needed and at once too. More steamers were also required. Ontario could during the winter months supply grain for five times as many steamers as were coming here. St. John, he sincerely hoped, would progress, and it would delight the people of the west to hear of the success of this place.

SEALED TENDERS addressed to the undersigned and endorsed "Tender for Electric Elevators, Public Building, Victoria, B.C.", will be received until Monday, December 20, next, for the construction of two elevators at the Public Building, Victoria, B.C.

Plans and Specification can be seen and form of tender and all necessary information obtained at this Department, and at the Public Works Office, Victoria, B.C.

Persons are notified that tenders will not be considered unless made on the printed form supplied, and signed with their actual signatures.

Each tender must be accompanied by an *accepted* bank cheque, made payable to the order of the Honourable the Minister of Public Works, equal to *five per cent. of the amount of the tender*, which will be forfeited if the party decline to enter into a contract when called upon to do so, or if he fail to complete the work contracted for. If the tender be not accepted the cheque will be returned.

The Department does not bind itself to accept the lowest or any tender.

By order,
E. F. E. ROY,
Secretary.

THE SITUATION.

The regrettable *embroglio* of the Toronto Board of Trade, over the gratuities payable to the representatives of deceased members may be useful as a lesson. The Board made a mistake when it entered on an experiment which required expert knowledge, without consulting or relying on experts; and now, the error discovered, the best thing to do is to get out of the difficulty, with the minimum loss of credit. There may be legal difficulties in the way. Only a few days ago, the New Jersey Court of Error and Appeals decided that an Odd Fellows' Lodge, which had contracted to pay the members certain benefits, could not reduce the amount, without the consent of the members entitled to receive. The rule would probably hold good here. Inability to meet one's obligations, accompanied by an offer to pay less than the stipulated amount, would be an act of bankruptcy, whether in an individual or a corporation. In the case of the Board of Trade, it is extremely desirable that some way out of the difficulty may be found which is the nearest possible approach to equity. Whatever is done should, if possible, be done with unanimous consent. At present, the feeling excited by the discussion forbids the hope of such a desirable result being obtained. But if all would work for that end, something that now seems impossible might, in a short time, be achieved.

Under discussion, trade preference tends to divide into two kinds: preference on conditions, and exclusive preference between Great Britain and the colonies. For the first, the Government of Canada has declared; for the second, the British Empire League, with Mr. Ross, of the Ontario Government, as chief spokesman. Mr. Edward Blake, balancing between the two, declares for the former. There is, we fear, very little use telling Englishmen, Irishmen and Scotchmen what arguments ought to convince them to put duties on wheat, and beef and lumber for our benefit.

The punitive campaign in India has ended for the season, without putting an end to the revolt of the tribes, if the term revolt can be used of tribes who do not own allegiance to the British crown. Meanwhile, the ground occupied by the British must be held. Whether the occupation is to be permanent, it is too soon to decide. The end, when it comes, will scarcely fail to bring Russia and England nearer together, in that part of the world. The two countries seem destined by fate to come into closer contact there, if such a term can be used where there is no actual contact at all. The tribesmen, on the one side, make war on the British to-day; formerly other tribes, farther north, used to kidnap Russian subjects by hundreds every year, reduce them to slavery, and refuse demands for their restoration. The necessity of inflicting punishment on the warlike tribes, both by Russia and England, has a similar cause. Both advances are justified. If England advances now, Russia will, as she did before, see in the advance a cause and a license for her to do likewise. So the two great powers get closer and closer together. Will the contact, when it comes, necessarily take the form of a death struggle?

In President McKinley's message to Congress no special mention is made of any negotiations with Canada, with a view to commercial reciprocity. The reference to such negotiations applies to several countries, and the fact that Hon. John A. Casson has been appointed to conduct such negotiations with them is mentioned. As Mr. Casson conferred with the Canadian delegates, when they went to Washington, the reference by the President to the subject is made in terms wide enough to include Canada. The hope is expressed that, with some of the negotiating countries, mutually advantageous changes in their trade relations with the United States may be made. Certainly this does not close the door of negotiation against Canada, any more than it offers assurance of success. But it does hold out a prospect of continuing the negotiations. We have, in fact, got back to the state of uncertainty on the subject of reciprocity, which naturally belongs to it, and from which it was never wise to depart, for the pleasure of entering a fool's paradise, filled with allurements of the impossible. Reciprocity may not be impossible, but it was not possible for any Canadian statesman to promise with confidence and certainty, as was so freely done, in the past, that nothing but the opportunity was wanting to insure success in the negotiations for a treaty. If there was any illusion in the matter, the first real contact with the actual facts of the situation was sure to expel it. The fact, which has always subsisted, that without the concurrence of the two Governments, no reciprocity is possible, is as true as ever. This and nothing more.

In dealing with the currency question, President McKinley makes the startling statement that "nobody is obliged to redeem in gold but the Government." This statement is broader than the facts warrant. The statement apparently has reference to the fact that when the Government notes have been redeemed, they are required to be put out again, and as often as they are presented for payment they have to be redeemed. This, whatever may be the objection to the Government doing it, is precisely what all banks that re-issue their notes have to do. Whether bank notes shall be re-issued, as is a common practice, or only issued once, which is the exceptional practice of the Bank of England, is merely a question of printing. The stories about the "endless chain," and the "enormous cost" of the re-issue of the Government notes are largely fictitious. If the notes are re-issued, they are not given away; full value for them is received. The amount of gold put down as an expense due to the notes was the ultimate payment of what the promissory notes were given for in the first instance. "The endless chain" is objectionable, in so far as it tends to keep out, if it does, an undue amount of Government notes. A system which throws upon the Government practically the supply of all the gold required by commerce is faulty. In a time of panic the Government is made to feel the pressure, because people who want gold can most conveniently get it from the public treasury. The banks have to some extent learnt how to protect their gold without an actual suspension of specie payment; but, even if the President had this fact in his mind when he said "nobody is obliged to redeem in gold but the Government," still he went beyond the real facts and far beyond the theoretical.

The President recommends that when the revenue becomes sufficient for the purposes of the Government notes shall only be reissued in exchange for gold. The Bank of England gets much gold in exchange for its notes; in other words, it gets a delivery to it of the gold in exchange for its promise to pay whenever required to do so. Of late, the practice of exchanging gold for Government notes has voluntarily come into vogue, to some extent, in the United States, and the public men at Washington have begun to ask, if the national treasury can, in this particular, do what a corporation of private persons can do, why should the attempt not be made in a systematic way? Another recommendation is that no National Bank notes shall be issued of a less denomination than $10. This would make a void larger than it might be convenient to fill with Government notes and silver, though its proxy, the silver certificate, might get a chance to endanger the gold standard. When this has been done, the President suggests that the National Banks shall be required to pay their notes in gold. Assuredly, all banks, in gold paying countries, ought to be required, except in cases of special and authorized exception, to redeem their notes in gold.

On the sealing question, the one fact learned from President McKinley's message is that negotiations for its settlement are in progress. If the object of the United States politicians were, by wearing out the patience of Canada and England, to make them willing to agree to almost anything to get rid of what is fast becoming a nuisance, they would probably have pursued exactly the course they have followed.

According to Mr. Wm. Ogilvie, an authority on the Klondyke, there is in sight to-day, on the placers alone, $100,000,000 of gold, within an area of about 35 miles by 20. During a lecture at the Canadian Institute here, the other day, he exhibited a bottle containing $93 of gold, taken out of a single pan of earth. If the tests now being made of thawing the frozen earth, by means of a jet of steam, prove a success, a revolution in the process of mining there may be looked for. Capital will play a greater part in the operation than at present, and the gathering of the precious metal will be greatly facilitated. But if individual labor were left to work, in a solitary way, with the cheapest implements, there would still be plenty of employment for capital in working the well-defined gold-bearing quartz veins which Mr. Ogilvie assures us have been located beyond a doubt. It would be almost a pity if the two classes of mining were not carried on in these two different ways; labor getting a special opportunity in the placers and capital doing its proper work on the auriferous quartz veins. But the interest of each will decide what each will do in the development of this remarkable region which Mr. Ogilvie regards as beyond question the richest in the world.

QUEBEC PROVINCE FINANCES.

There was some uneasiness when the announcement was made in the speech from the Throne that a measure would be submitted to the Quebec Legislature looking towards the floating of another loan. People wondered if the Government was about to launch out into profuse expenditure. They were reassured, however, upon learning from the speech of the Premier, Mr. Marchand, who is also Provincial Treasurer, that it was not the intention of the Government to make a loan for a larger amount than would suffice to meet the liabilities of the province existing at the date of their taking office, or the obligations that may be incurred as the result of the action of previous governments. He also stated that "when a loan is made the Government will place it where the best results can be obtained, and will be well pleased if it should be taken in whole or in part by Canadian capitalists."

That a loan is needed is tolerably evident when we find from the public accounts of the province that the 1897 expenditure exceeded the revenue by $979,124, and the net debt is increased $3,346,810 within the twelve months. Not only were the revenue receipts of the year less than those of its predecessor, but the expenditure was larger in almost every department. The clearest mode of showing this will be to place the figures of receipts and disbursements for the two years opposite each other. Ordinary revenue receipts were:—

ORDINARY REVENUES.

	1896.	1897.
Dominion subsidy	$1.231,798	$1,257,183
Crown Lands	1,045,310	879,893
Administration of justice	318,066	236,197
Registration stamps	....	63,875
Licenses	663,087	586,176
Taxes on com. corporations	148,643	134,404
Taxes on persons	17,507	3,507
Taxes on property transfers	184,254	74,856
Manufacturing and trading licenses	79,728	10,393
Duties on successions	163,365	229,441
Legislation fees	11,491	8,391
Lunatic asylums	35,083	9,342
Reformatory schools	12,366	923
Official Gazette	23,182	21,637
Interest	17,437	35,556
Interest on price of Q.M.O. & O. Ry.	333,057	299,395
Casual revenues, public works, rents, civil service pension payments, etc.	21,183	23,630
Miscellaneous	22,341	....
Total	$4,327,910	$3,874,803

There is thus a reduction of $453,107 in revenue from ordinary sources. Other sums of comparatively trifling amount derived from trust funds, sales of property, etc., are not here included. And the receipts on account of loans will be mentioned later. We may now compare the expenditure for the regular services of the province in the two years 1895-6 and 1896-7:

EXPENDITURES.

The expenditures of the two years, 1895-6 and 1896-7 compare as follows:—

	1896.	1897.
Public debt interest	$1,392,724	$1,434,779
Redemption of debt	80,786	84,680
Debt expenses	23,919	13,114
Discount and conversion charges	....	18,299
	$1,497,429	$1,550,874
Legislation	195,549	288,623
Civil government	253,401	277,247
Administration of justice	475,096	567,628
Police magistrates, etc.	22,043	23,123
Reformatory prisons	61,155	62,513
Inspection of public offices	10,249	9,400
Public instruction	370,260	394,260
Literary and scientific institutions	2,499	2,800
Arts and manufactures	10,000	13,000
Agriculture	166,464	230,795
Immigration	4,250	4,000
Colonization	116,100	169,900
Public works and buildings	156,029	342,616
Charities and asylums	326,078	358,616
Miscellaneous	373,581	488,073
Q. M. O. & O. expenses	....	8,888
Payments by revenue collectors	59,518	61,565
	$4,099,707	$4,853,927

Thus the expenditure of last year exceeded that of its predecessor by $754,220, and exceeded the current expenditure by almost a million, the exact amount being $979,124. Besides the items in the above parallel columns there was in each year extraordinary expenditure for repayment of railway interest deposits and for a few items of a petty character. This amounted in 1896 to $285,700, and last year to $396,186. Then there are the railway subsidies, which in 1896 absorbed $280,047, and last year $1,354,830.

It is noticeable that while the Crown lands yielded $160,000 less revenue, and the taxes on persons and corporations, and property transfers, as well as trading and manufacturing licenses, brought in $283,000 less (this last group realizing $809,336, as compared with $1,093,219 in 1896) the succession duties yielded a very considerable increase. Registration stamps, a new impost, brought in $63,875. Reformatories, asylums and other public charities, the expenditure on which did not greatly differ in the two years, yielded much less last year in the way of revenue. This is hardly to be regretted, since it has arisen in pursuance of a policy with regard to these institutions more humane, modern and creditable to the province.

As we have stated, there is an increase in the net debt of the province from $22,213,057 to $25,559,867. In 1896 there was $21,217,282 of outstanding unredeemed and unprovided for bonds, and $995,775 of temporary loans and deposits; a total of $22,213,057 on 30th June last year. The debt was $24,202,654, outstanding, unredeemed and unprovided for bonds, and $1,357,213 of temporary loans and deposits, a total of $25,559,867, of which $700,000 is an advance from the Bank of Montreal, at a shade under four per cent.

There was paid on account of railway subsidies $175,218 to eight companies; and in connection with some twenty railways the sum of $1,135,023, the largest items of which, $232,497, $120,750 and $103,783 were to the Quebec and Lake St. John, the United Counties and the Temiscouata. It is to be remarked that the annual saving of interest by the conversion of four per cent. securities to three per cent. is $18,538—a tidy sum.

THE LUMBER TRADE.

Neither in the United States nor Canada has the year 1897 proved a satisfactory one for the lumber industry as a whole. In Canada, while the eastern dealers whose business is with British markets had little reason to be dissatisfied with the season's trade, the American market was unfavorable and our trade in that direction slow. In the Eastern States, whither our lumber largely goes, the fall season in lumber is reported disappointing and the outlook for next season doubtful. But at Tonawanda there has been a fair demand for coarse and cutting-up pine stock, as well as for high-grade white pine for pattern-making. The revival in trade in the States has of late made demand somewhat better.

In the Ottawa region the prospects are that the cut of logs this winter will show a decrease from the 750,000,000 feet which is estimated as the cut of last season. It is true that Messrs. Buell, Hurdman & Co. have sold their cut for next year at prices equal to those of last season, but neither the Hawkesbury cut for 1897-8, nor that of any other leading Ottawa operator has been sold yet, so far as we can learn. The paragraph in the *Timber Trades Journal* of November 27th, describing a sale of the Hawkesbury deals, planks, and boards, related to the stock wintering at Quebec, and not to any forward transaction. It is to be remarked, however, that the stock of first and second pine, both in Britain and in Quebec, is strictly limited, and in London or Liverpool both qualities seasoned are difficult to obtain. Prices in the old country are meanwhile very well maintained.

In the Georgian Bay the position appears to be that while the Canadian operators are going but lightly into the woods, and will not cut more than half of their usual quantity, the American operators every one are almost feverishly busy. It may be that they dread lest the Ontario or even the Ottawa Government may reverse the free log policy, but whatever the reason, some of those who did nothing at all last winter are now getting out a full stock. One or two Canadian operators in this district are cutting all the logs they can, in order not to manufacture them, but to sell them to the Americans. One concern is getting out 20,000,000 feet for this purpose.

It is agreeable to discover that the market for common pine lumber has changed its condition a good deal for the better during the last two months, and that the congestion of the lower grade stuff is being relieved. This relief first began when the farmers of North and South Dakota, rejoiced by improved grain prices, began to buy lumber as they had not done for several seasons. This made an opening for the Duluth cut, which had been coming through the lakes to Canada, and so relieved the Ontario lumber market. The improvement we have described in the lower grades has had a good effect upon the market generally. People are looking with much interest, it may be added, to see what the Ontario Government will do, or refuse to do, in connection with the anomalous and unfair conditions created by the Dingley tariff.

WOOLEN MILLS BUSY.

The majority of the woolen mills in Canada are very busy. Repeat orders for the spring trade of 1897 are coming in freely, and some of the mills are working overtime to keep abreast of their engagements. The clothiers began to place their orders with manufacturers' agents in May last, while the general trade followed in July. The canvass of the retailers for spring business opened in October, and since that time the prospects for the spring business have each week grown brighter. In this way, it has been found necessary to turn again to the mills with fresh orders. Reports indicate that the autumn trade has been a healthy one, and large quantities of goods are now going into consumption. Jack Frost has been for the past several years tardy in his appearance, but this autumn he has been fairly mindful of the best interests of the dry goods trade. Prices in the retail store have risen as the thermometer has fallen, and with continued cold weather and good roads for the holiday trade, the success of the season is assured. The manufacturers of jackets and capes are, perhaps, more affected by the weather than any other branch of the trade. This has been a great beaver season. About three years ago an Ontario mill began the manufacture of beaver cloths; since that time other mills have undertaken the production of this line, and, as a consequence, although the use of these cloths in the Dominion has greatly increased within the past few years, our imports from abroad have declined. The domestic cloths are well made, durable and of excellent appearance. Their manufacturers deserve success.

THE COTTON GOODS TRADE.

The cotton goods markets of the United States are in a very depressed condition, and in the centres of trade over there large stocks of textiles have been allowed to accumulate. One reason for the accumulation of stocks of cotton goods in New England, according to the Springfield (Mass.) *Republican*, may be found in the lessened exports of cotton piece goods to Canada, which shrank very considerably during recent months. Here are the figures in yards for July, August and September, compared with those of last year, as given by the paper above quoted:—

	1897.	1896.
July	1,477,538	3,774,754
August	832,023	4,310,471
September	809,865	3,997,760

The textile journals of the United States are at a loss to explain this marked falling off in trade. The explanation, however, is simple. A year ago the Canadian duty on the importation of cottonades, denims, sheets, tickings, ginghams and other goods which we are accustomed to purchase in the United States was 30 per cent. ad valorem. In the new schedule of customs' duties that took effect last April the protection to domestic manufacturers was increased five per cent., and this has better enabled our manufacturers to hold their own against American competitors. Large quantities of cotton piece goods were slaughtered in Canada by the New England manufacturers a year ago in their efforts to maintain the home markets, and there is good reason to fear that a duty of even 35 per cent. may not serve to prevent the same tactics if the stocks now held in Fall River and the New England centres of production cannot be elsewhere sold.

The preference of 12½ per cent. given British manufacturers in Canadian markets does not discriminate very severely against the Americans because the products which we are accustomed to buy in the two countries are, in the main, quite different. As evidence of the fact that the British have not gained what the Americans have lost, it may be cited that the exports of cotton piece-goods, gray or unbleached, bleached, printed, dyed, or manufactured of dyed yarns, and all other kinds of piece-goods from the United Kingdom to Canada in October, 1896, were 2,403,400 yards, while in October, 1897, they reached only 2,196,600 yards, showing a moderate decline.

The Canadian cotton mills are very actively employed. Stocks in the hands of manufacturers and merchants are reported to be in a healthy condition. Repeat orders for the spring trade have been abundant, and it is announced that the mills will not undertake to fill orders for fancy lines, such as zephyrs, fancy cotton checks, tartans, ginghams, and the like, before March 15th, 1898. By this date it should be time to begin work on autumn goods. Values in the trade are on about the same basis as last year and have shown no fluctuations for some time past.

DOMINION TRADE RETURNS.

Trade movement in Canada improves, and its volume continues to increase. The trade returns of the Dominion Government for the month of October, which, by the way, ought to be published more promptly, show a considerable gain in the volume of both exports and imports as compared with the same month a year ago. In October, 1897, we imported from abroad: dutiable goods, $5,646,245; free goods, $,4,341,005; coin and bullion, $73,601, or a total of $10,060.851, as compared with dutiable goods $5,046,893; free goods, $4,109,576; coin and bullion, $135,419, an aggregate of $9,291,888 in the corresponding month 1896. The revenue from imports during the first period was $1,684,260, while in the latter it was $1,577,928. The increased value of imports is due mainly to larger purchases of cottons, fancy goods, silks, coal, metals, provisions, leather, and manufactures. We append a table of the main items in the import list:

PRINCIPAL IMPORTS.

	Oct., 1896.	Oct., 1897.
Cottons, including cloths and thread	$230,771	$267,642
Cotton, waste and raw (free)	354,210	406,061
Fancy goods	89,035	123,347
Hats, caps and bonnets	37,068	59,607
Silk goods	114,958	170,101
Woolens, cloths, carpets, yarns, knit goods	376,056	326,505
Wool (free)	89,952	129,999
Furs and manufactures	31,075	35,601
Books and pamphlets	90,430	101,633
Breadstuffs, grain, flour and meal	147,443	108,974
Coal, bituminous	220,480	224,277
" anthracite (free)	715,085	755,290
Drugs and medicines	116,024	131,528
Earthenware	69,146	70,032
Metals and manufactures	30,056	44,808
" (free)	435,698	691,237
Iron and steel manufactures	666,286	976,869
Leather and manufactures	116,372	154,379
Oil and paints	223,008	106,701
India rubber and gutta percha	24,734	25,462
Provisions	71,615	143,479
Sugar	576,081	466,140

The most marked improvement in the trade movement is in connection with the export trade. The exports of the produce of Canada in October, 1897, were valued at $16,680,683, as against $13,427,808; while the aggregate exports, including United States grain in transit, for that month, totaled $18,355,997, as against $14,732,545 in October, 1896. Of fisheries and forest products there was a smaller outgo, but this was more than offset by the great gains in the exports of agricultural products, animals and their produce, and mineral wealth. A feature in the movement worthy of remark is the increased quantity of agricultural products of the United States sent abroad through Canadian ports. We append a comparison of the exports in October, 1896, and October, 1897:

Exports.	October, 1896.	October, 1897.
Produce of the mine	$908,126	$1,369,481
" fisheries	2,381,919	2,269,446
" forest	3,112,400	2,507,092
Animals and their produce	4,730,858	6,346,686
Agricultural products	2,245,170	4,751.992
Manufactures	955,206	905,353
Miscellaneous articles	104,982	35,575
Totals	$14,438,661	$18,185,625
Bullion	46,396	157,757
Coin	247,488	12,615
Grand total	$14,732,545	$18,355,997

This favorable showing is the result not only of an almost general rise in the prices of commodities, but also an increase in the bulk of trade. The transportation companies find their carrying facilities taxed by both through and local freight, and in some instances, we understand, there has been an accumulation of goods at distributing points. Since the beginning of the present fiscal year there has been an almost steady gain in trade. For the first four months of the fiscal year the importations have aggregated $43,051,322, and the exportations $65,740,384. This shows an apparent increase of $1,125,192 in the imports, and $15,485,220 in exports. If the present movement be continued, the total returns of the year should be very gratifying.

COUNTERFEIT LIFE ASSOCIATIONS.

SECOND ARTICLE.

Turning again to the *Independent Forester* and its table of forty societies, we pick out all the younger ones to the number of twenty, to see how their lapses and their death losses look, as compared with the ten old ones previously mentioned. We put the I.O.F. in the list of young societies for the reason that though organized in 1881, it has recently spread out so widely that it still has a very young membership, averaging, perhaps, not more than four or five years away from the medical examiners' hands.

Also, we put in the Maccabees and National Union, for similar reasons :—

Name of Order or Society.	Year started.	New members.	Lapses in 1896.	Death rate.	Membership.
Ancient O. of Pyramids	1895	2,310	550	3.45	3,152
Ben Hur Tribe	1894	6,679	1,374	4.07	8,801
Empire Kts. of Relief	1891	6,502	151	4.60	2,561
Fraternal Aid Association....	1890	4,083	1,841	4.58	8,720
Fraternal Mystic Circle......	1885	3,989	2,532	6.50	11,669
I. O. Foresters, Toronto	1881	24,124	7,280	5.50	102,838
Kts. of Loyal Guard	1894	2,000	1,122	6.75	4,127
" and Ladies of Security..	1892	6,688	2,283	6.00	15.096
" " Golden Star.	1883	364	1,199	12.06	5,265
Legion Red Cross	1885	730	368	10.49	3,972
Maccabees Supreme Lodge ..	1881	46,857	19,911	5.54	223,944
National Reserve Association.	1891	2,353	2,027	3.69	4,336
N. E. Order Protection......	1887	2,929	671	8.46	20,189
National Prov't Union	1883	853	869	15.50	5,912
National Union	1881	5,419	4,843	8.73	46,782
Protected Home Circle	1886	6,056	2,287	6.53	19,589
Royal League	1883	3,157	700	5.07	16.629
Select Friends	1888	1,432	843	6.00	5,287
Woodmen of America	1884	66 699	18,074	4.60	206,536
" of the World	1890	29,156	11,787	5.07	50,110
Totals		215,680	80,712		

Lapses per thousand, only 374, compared with 784 in the preceding table.

Seventeen of these twenty societies had a death loss of less than $9 per $1,000, while in the first list, composed of older societies, only one of the ten had so low a rate as $9 per $1,000 in 1896, and some of them assessed their members for more than double that figure.

The effect of heavy lapses upon a well established fraternal society is strikingly shown in the case of the American Legion of Honor. In 1893 it had a strong membership—53,032—and its death-rate that year was only $8.90 per $1,000. But observe how the increase of death-rate produces :—1st. A decrease of new members ; 2nd. An increase of lapses ; 3rd. A decrease of total number of members, and 4th. Probable early collapse, with loss of every dollar, and leaving many thousands of sad cases of aged and sickly people without the insurance which they had hoped was as safe as "old line" would have been :—

AMERICAN LEGION OF HONOR.

Year, Dec. 31.	New Members.	Total Members.	Certificates Lapsed.	Cost per $1,000.
1883	11,619	53,032	5,436	$ 8 90
1884	7,534	57,005	3,046	9 40
1885	5,630	58,192	3,864	10 10
1886	6,009	60,145	3,459	10 10
1887	6,177	62,111	3,468	12 20
1888	5,969	62,276	4,986	12 20
1889	4,836	62,457	3,872	12 50
1890	5,011	62,574	4,025	13 10
1891	6,022	61,355	6,287	15 40
1892	6,655	60.554	6,456	16 40
1893	7,093	60,076	6,573	16 50
1894	5,112	56,060	8,172	16 40
1895	3,802	53,210	5,647	18 40
1896	2,243	36,028	18,454	21 80

On Dec. 31st, this society had on hand $14.64 per head—nearly as much as the I.O.F.—and yet in six years nearly half its members of 1890 are gone. And with them have gone, practically, the whole 30,927 of new members that came in during the six years. While 30,927 came in, 41,589 went out, and the result is an increased assessment on those left behind from $13 10 in 1890 to $21.80 in 1896, and all the quarterly dues and expenses besides.

QUEBEC DAIRY INTERESTS.

The sixteenth annual convention of the Dairymen's Association of the Province of Quebec, the programme of which we outlined in our last issue was productive of an interesting criticism of dairy methods in Quebec. The causes of the difference in value between the cheese and butter of Ontario and Quebec Provinces was one of the main subjects of discussion. Mr. J. D. Leclair who has been investigating the butter question, made the following recommendations for the improvement of trade in Quebec dairy products :

1. The appointment of commissioners to make our butter better known ; they to live part of the year in England and part of the year in Canada.

2. The appointment of one or two experts at the ports of shipment to approve all butter before it is shipped.

3. The society to choose a number of factories in the Province, which shall send forward their products for one day each week or each month, for shipment to England.

4. The quantity to be shipped to be left to the discretion of the Government.

5. Payment for the butter to be made by the Government at the ruling price in Montreal, after inspection by an expert.

6. The results of the sale to be returned to the Government by the commissioners, and the profits to be divided amongst the contributing factories.

It would be very unfair to attempt to belittle the services that have been rendered by Government officials in building up the Canadian cheese trade. At the same time there is a danger that in the extension of Government assistance in trade matters, the strength of individual initiative will be weakened. A member of the prominent Montreal firm, A. A. Ayer & Co., pointed out that as to the proposal that a commissioner should be appointed to develop the market for Quebec butter in England, the work had already been well done by the business men who had devoted their life to the work.

So long as these firms have a good commodity to offer, they can readily market it at a fair price. The work of the Association should be turned rather to increasing the quality of the butter and cheese made by the members. The Quebec Government has already expended a large sum of money for the purpose of encouraging the dairy industries, and it only remains for the makers to improve their methods. Associations such as that held at Nicolet, Que., last week, bring out in part the information necessary to that end, and supplement the work of the present staff of Government experts. A number of very interesting papers were read at the convention, which from their technica nature cannot be well synopsized. A writer has said that there are three essentials to a successful dairy industry, viz., (1) cleanliness ; (2) cleanliness, and (3) cleanliness, and the papers read before the Quebec Dairymen's Association bear out this statement.

In part, the inferiority of the Quebec cheese and butter must be attributed to the fact that the factories in that Province are smaller and not so well equipped as those of Ontario. The clergy have been of assistance in bringing about an amalgamation of interests in co-operative dairy work, and could be of assistance in continued efforts in this direction. A cheese merchant who was at the convention laid great stress upon packing methods. We quote his words :

"If a cheese is well made and untidily dressed, the cotton put on in a slovenly way, the surface uneven or stained by dirty tables, or if the weights vary from 45 to 70 lbs. in the same shipment, or if the boxes are badly put together, too large for the cheese or not high enough, so that the cheese stands from half to two inches above the box, all or any of these defects reduce the value of the cheese, and so long as factorymen continue to put up their cheese in this way, so long will they fail to obtain the top market price. These same remarks apply to the packing of butter. It is necessary that the outside of the box or tub should be clean and free from dirt. The butter should be packed solidly, no air spaces left, while parchment of good quality for lining the packages is indispensable. The package should be packed full and the top made perfectly smooth, and not rounded off or left with marks of the butter packer. It is not necessary to put salt on the tops ; the parchment lining should be wet with brine before the butter is packed, and a little salt sprinkled or rubbed on the inside of the package. If factorymen can be induced to look well after this matter of "style" in their cheese and butter, I am persuaded with the improvement already accomplished in the make, there will be no longer any question of quality or difference in value between cheese made in Ontario and the Province of Quebec."

THE CRIPPLEGATE OR JEWIN STREET FIRE IN LONDON.

As we were careful to state in describing the great Cripplegate fire in London, England, on Nov. 19th, the losses on that occasion were enormously exaggerated by the earliest cablegrams. Now that we have insurance journals of 24th and 25th ults., and the *Economist* of the 26th, we learn more fully about the actual destruction of property and about the insurance liability. The exaggerations of both by certain London morning and evening papers of the Saturday and following days, and the sensational predictions founded upon them, could hardly have been surpassed by evening journals on this side the water, and indignant comment has been made upon these "providers of false news," these imaginative "reporters who disseminate the wildest rumors." The *Review* of 24th ult. thus holds forth :

"Let us now analyze the remarks of some of the more prominent journals, both of the descriptive reporter who takes a broad view of things, and the so-called city editor, who is supposed to deal with figures. Three hundred warehouses destroyed, says one paper. Mr. Goad, C.E., officially reports sixty-six. Seventeen and a half acres of smoking ruins, says one eminent journal. Official figures give an area of 187 x 93 yards = 17,500 superficial yards [equal to three acres and two-thirds]. Next, consols fell because what are called 'insurance houses' were expected to realize their consols to pay losses. Now insurance companies do not hold much in consols, and they have more loose cash lying around than would pay for several fires of this kind. But for a good wide shot commend us to the *Sunday Times*, which says that the loss, viz., between a million and a half, will largely fall on American insurance 'houses.' This is indeed news. Again, jobbers were blamed for refusing to 'deal' in insurance shares. . . . The fact is, that all the talk about a 'slump' in insurance shares is simply so much foolishness. It is to be regretted that there are no means available for successfully prosecuting the proprietors of those papers which, by means of sensational and false head-lines, frightened many weak persons into parting with their shares at a loss. Discreditable statements of this kind on posters in the streets were, however, scarce. But even respectable papers, in possession of what they consider exclusive information, write curious nonsense."

Referring to the subject of conflagration reserves, the *Insurance Record* of the 26th November, observes;

"It [this great fire] is quite bad enough, when taken in conjunction with the almost simultaneous loss in Melbourne—to point a number of morals. It affords, in the first place, a sufficiently striking object lesson upon the subject of reserves, and demonstrates the wisdom of our leading offices—or, for the matter of that, of every responsibly-managed office in building up an impregnable defence between the trading account and the capital, and in putting the fire fund before the dividend. . . . . The offices that will be able to come up smiling next spring are the offices that have pursued this policy [of reserves] in the past. A £50,000 loss—to put it at that figure—might make a hole in the annual profit of even the leviathan Royal, but it shrinks into insignificance by the side of a three-and-a-half million reserve. . . . Well here, in the very centre of affairs, we have a fire of sufficient magnitude to show that periodical conflagrations are events to be reckoned on and reserved for. The Jewin-street fire—if that is the name by which history will know it—suggests two other morals, which we would respectfully commend to the drapers and the municipal insurance faddists. One is that if retail drapery burns at anything like the same pace as the wholesale article—and we imagine that a draper's shop about Christmas time would burn pretty briskly—it is a poor look out for the Drapers' Mutual; and the other is that municipal insurance will have to show the British public how it proposes to cope with a half million loss before it can be taken into serious consideration.

A table published in the *Economist* to accompany comments on this fire and its results, gives the amounts lost by some 36 fire insurance companies and the effect upon the price of their shares on November 25th, as compared with the 19th. The losses of these companies, ranging in amount from £1,000 or less to as high as £40,000 and £50,000 in the case of the Sun, the Phœnix, and the Royal offices, amount to £445,500, or nearly two and a quarter millions of dollars; and the decline in price of their shares between the dates given was nowhere more than from ½ per cent. to 1½ per cent., with the exception of two offices, the County and the Royal Exchange, which each declined 5 per cent. The *Economist* concludes: "Even as it is, however, the fall is shown to be excessive, even if allowance be made for moderate losses sustained by some of the companies by the Melbourne fire, for, apart from these disasters, the past year has been a relatively favorable one for the companies. As matters stand, except in a very few instances, the losses incurred by the offices will not materially affect their financial position, or interfere with their dividend paying power, although it is possible that one small company may find that ti has been carried beyond its depth. . . . To that risk [conflagration] the fire offices doing business in the city of London, that is all the fire offices of the kingdom, are continually exposed. It is a risk against which they cannot wholly protect themselves, but the probability is that unless something is done to strengthen and increase the efficiency of the fire brigade, they will seek to make further provision against it by materially increasing the rates of premiums which in the city of London have proved inadequate for the hazard incurred."

THE NOVEMBER FIRE LOSS.

The fire loss of the United States and Canada for the month of November, as compiled from daily records of the *N.Y. Journal and Bulletin of Commerce*, amounts in the aggregate to $7,189,800. This is about two million dollars more than the sum charged against the same month in 1896, but nearly three million less than the November, 1895, figures. The following comparative table will show the losses by months:—

	1895.	1896.	1897.
January	$11,895,600	$11,040,000	$12,049,700
February	12,360,200	9,730,100	8,676,750
March	14,239,300	14,839,600	10,502,950
April...............	11,018,150	12,010,600	10,833,000
May	7,761,350	10,618,000	10,193,600
June	9,223,000	5,721,250	5,684,450
July	9,085,000	9,033,250	6,626,300
August	9,929,000	8,895,250	6,454,950
September	10,766,300	8,200,650	9,392,000
October	13,411.500	8,993,000	11,387,500
November	10,131,500	5,211,800	7,189,800
Totals	$119,820,900	$104,293,500	$98,991,000

During the month there were 166 fires by each of which more than $10,000 was lost, while in fifteen disasters the loss exceeded $100,000. It is evident from the table that, unless some conflagration running up into the millions takes place this month, the year 1897 will show a great reduction in fire loss in comparison with 1895, although it will, in all probability, exceed the record of 1896. The journal believes that "the fire underwriters have had a very fortunate year, as they have maintained high rates at nearly all points throughout the United States. Their forthcoming annual statements will probably show that 1897 has been for them the banner year of the decade."

FIRE APPLIANCES VOTED DOWN.

The people in Carberry, Manitoba, who have suffered by fire, and possibly other residents of that town as well, are sorry that the by-laws submitted for the provision of fire appliances have been voted down. Alderman May, of that place, declares that it was through no fault of the municipal council there was no fire protection in Carberry. The ratepayers always voted down any by-law to raise money to expend on fire apparatus. This made the tenth fire the town had had, and perhaps this last one would be the means of bringing all the desired sentiment in favor of a fire engine. So serious a fire in the business quarter must affect the trade of the town. If the residents were so afraid of their pockets that they would not tax themselves to get fire-fighting appliances, they will, perhaps, now see that their pockets are to be affected by the unfortunate results of their ill-timed parsimony. There should be a lesson here for many other places in Canada.

THE INTERCOLONIAL RAILWAY.

There have been a number of items in the western daily papers of late professing to give information about the Intercolonial Railway. We do not mean political items or articles, which were possibly as far astray in one direction as the paragraphs we are referring to are in another. But some one has been furnishing what seem to be specific details as to persons and things in connection with the road, which the very people concerned or mentioned by name know nothing about. What is true is that Mr. A. H. Harris, formerly of Brantford, has been appointed general traffic manager of the road, with headquarters in Montreal: also that Mr. J. H. Hardwell, long with the C.P.R. at Toronto, as chief clerk under Mr. Sutherland and Mr. Tiffin, has been appointed divisional freight agent on the Intercolonial Railway, to take charge, about January 1st, of the district from Montreal to St. Flavie. It is altogether likely that district freight agents will also be appointed in St. John and Halifax respectively, since under the new conditions of competition with the G.T.R. and C.P.R. it will be necessary to provide some such machinery for collecting the business formerly furnished to the I.C.R. at its western end by the G.T.R. There are evidences, at any rate, of energetic re-arrangement of the affairs and personnel of the road.

IMPECUNIOUS CLERKS.

It would appear that there are, in the departments at Washington, Government clerks who run into debt and dodge their creditors with more or less success—just as we have heard of people of a like class doing in Ottawa and other Canadian cities. Indeed, the thing has become such a nuisance in the States that, at last, one of the heads of departments among our neighbors, while he has "declined to make the Treasury Department an agency for the collection of debts contracted by its employees," threatens with dismissal clerks who do not pay their debts. The circular on the subject issued by Mr. Lyman J. Gage, deserves to be quoted in full. It is signed by him as secretary of the Department of the Treasury:

"In all cases brought to the attention of this office, where clerks or employees of this department neglect to pay their bills for necessary family supplies, and creditors seek to enforce their claims by appeals to the department, the following rules will be applied:

"The Secretary will not make the department an agency for the collection of debts contracted by its employees, but where a clerk receiving a stated salary neglects or pleads inability to pay debts contracted after this date for the necessary support of himself and his family, without presenting satisfactory reasons for such action, the department will regard such clerk as guilty of improper practice, and one who ought not to be retained in public service.

"When charges of such nature are made and sustained by proper evidence, the Secretary will take action looking to the removal of the offending person.

"This order does not apply to debts contracted by parties at a time when they were not employed in this department"

The time would appear to be past when people can get unlimited credit from an easy-going tradesman just because they are "something in the Government," as the phrase goes. Even such important—but often impecunious—swells as make a $2,000 show on a $1,000 salary, have to learn that there are limits to their swaggering on other people's money. The grocer and butcher get tired of supplying self-styled gentlemen with goods without pay.

OVER-CAPITALIZATION.

The evil of over-capitalization seems to be prevalent in the United States enterprises Especially is this the case among street railway companies. In many instances this has resulted in re-organization and a general scaling down of values which, indeed, never existed. Too many greedy syndicates have been formed, and entirely too much profit has swelled the pockets of their members. According to the United States *Investor*, no fewer than sixty-four companies have passed into the hands of a receiver during the past three years. These have a floating and bonded indebtedness of $40,608,826 covering 958 miles of track, and 1,910 cars. We observe that one of the railway lines in Chicago, having a mileage of 18 6, owes $10,500,000, and its gross earnings are put down at $711,686. A Syracuse company makes a better showing with 28½ miles of road, which is bonded for $2,236,000, and the gross revenue was $152,027. Some of these companies have been re-organized, and are now on a solvent basis, while others are operated by the courts, and there is still a smaller number that are offered for sale under proceedings of foreclosure Among the causes of difficulty is the enormous profits made by construction companies; paying excessive sums for old railways, in order that some friend might be enabled to receive an extra plum, and the construction of branch lines into districts which produced anything but a fair return on the amounts expended. Notwithstanding all this, the growth of electrical railways during the past five years has been simply phenomenal, and the amount of capital they have been able to attract, nothing less than mavellous.

PROGRESS OF ELECTRICAL SCIENCE.

The growth of electrical enterprise is one of the features of recent years in the world's industrial development. Investment in this direction has grown by millions of pounds sterling yearly. In "The Manual of Electrical Undertakings for 1897" Mr. Emile Garcke shows how large a sum has been placed in telegraph, telephone, traction and manufacturing enterprises in Europe and America. In the 1896 volume were given particulars of 172 undertakings, with an aggregate subscribed capital of £61,109,525; the present issue contains particulars of 274 undertakings, having an aggregate capital in shares and debentures of £69,209,478, divided amongst the various branches of the industry as follows:—

	1896.		1897.	
	No.	Capital. £	No.	Capital. £
Telegraph	23	31,103,254	24	31,272,675
Telephone.............	11	6,482,979	12	6,483,529
Supply (Companies)	38	5,831,073	58	6,647,792
" (Municipalities)..	33	1,967,000	57	3,509,317
Traction	17	6,084,672	30	8,553,173
Manufacturing..........	24	6,596,244	44	8,519;430
Miscellaneous	26	2,944,303	49	4,223,562

This exhibit shows an increase for the current year of more than nine millions of pounds. While the telegraph and telephone enterprises were practically the same in one year as in the other, the supply of electrical energy by means of companies or municipal undertakings showed a very decided increase from £7,700,000 to £10,150,000. And the traction, manufacturing, and miscellaneous employments of electricity grew from £15,000,000 to nearly £23,000,000. It is to be observed that, in respect of what are described as telegraph ventures, Government telegraphs are not included, separate particulars being given of these in the work. The amount expended by Government on purchase of trunk wires and otherwise is not comprised under "Telephone," and for "Supply" the sum given is the amount authorized to be spent by municipalities.

ST. JOHN BOARD OF TRADE.

The annual meeting of the St. John Board of Trade was held on Monday last, Mr. Fisher, the president, in the chair. In the summary of the business of the month, read by the secretary, reference is made to the report of the Maritime Board of Trade, to consideration of the estates of insolvent debtors, the raising and packing of pork in New Brunswick, etc., etc. The following paragraph about Mr. Fisher's visit to the West finds place in the report: "The president was requested by the council to speak before the boards of trade in Ontario on matters concerning the interests of the port of St. John. He spoke at Toronto, Hamilton and London at meetings of the boards of trade at those cities, and much interest and good will towards St. John was shown by those present, and by others with whom he came in contact during his visit to the West."

The council in their annual report notified a gratifying increase in the board membership. Fitting tributes were paid to the memory of the late Robert Cruikshank and Ira Cornwall. The pilotage inquiry and other harbor matters referred to during the year, likewise the life-boat service, the assessment law, the commercial travelers' tax, the needed Intercolonial Railway terminal facilities, marine insurance matters, harbor survey, the load line question, the steamship subsidies, tourist matters and others that had been discussed during the past year

The retiring president, Mr. W. S. Fisher, gave his address, in which he referred with warmth to his reception in Ontario. In his interview with Messrs. Wm. Davies & Co., respecting the suggested establishment in St. John of a branch of their industry, pork packing, he was told by that firm, that if they came to St. John they wanted no bonus, no free water, no exemption from taxation. They would come if at all to go in on business principles. So uncommon and so business-like a proposition evoked applause from the meeting. He recommended the circulation of a pamphlet on St. John and its advantages, and a continuance of the tourist agitation. He believed great benefit would result to the city and province therefrom. As to the pulp industry, one company will begin operations in the spring, and another has a fair promise of starting up in the near future. Thore is, he thinks, great reason to feel content with the winter port outlook.

Officers were elected as under: President, D. J. McLaughlin; vice-president, W. M. Jarvis; members of the council, W. S. Fisher, W. F. Hatheway, W. H. Thorne, John Sealy, S. Schofield, W. C. Pitfield, Thos. McAvity, J. A. Likely, H. A. Drury and Geo. Robertson, these to elect six others at their first meeting. Last year's board of arbitration was re-appointed, with the substitution of H. A. Drury in place of the late Robt. Cruikshank.

On motion of Mr. McLaughlin, seconded by W. M. Jarvis, the thanks of the board were tendered to W. S. Fisher for his valuable work for St. John on his recent western trip. Mr. Fisher acknowedged the vote in fitting terms.

WESTERN ONTARIO COMMERCIAL TRAVELERS' ASSOCIATION.

On Saturday evening last, a general meeting of the Western Ontario Commercial Travelers' Association was held in London, at the office of the secretary, Mr. Alf. Robinson. There was a large attendance of members present, and it was shown that the membership of the body had increased by the admission of 180 new members during the twelve months. The gentlemen whose names follow, were unanimously nominated for the respective offices and declared duly elected by acclamation:

President—Wm. Gray, re-elected.
First Vice-President—C. E. Perry.
Second Vice-President—H. G. Collamore.
Third Vice-President—John Lennox.
Treasurer—Samuel Monro, London, re-elected.

Directors—For London, H. Line, H. S. Wilcox, W. H. Escott, F. H. Crabbe, G. A. F. Jackson, James Granger and J. C. Hazard; for Toronto, F. W. Heath, R. H. Greene and H. Horsman; for Hamilton, R. K. Hope and John Booker; Stratford, James Dow; Brantford, George Watt, Jun.; St. Marys, James Maxwell; Galt, John Wardlow; Ayr, John G. Watson; Oshawa, E. O. Felt; Waterloo, S. Snider; St. Thomas, B. F. Honsinger; Woodstock, F. J. Richards; Windsor, James F. Smyth; Chatham, Charles Hadley; Ingersoll, R. H. Cotter; Sarnia, Wm. Storey; New Hamburg, J. Ratz; Winnipeg, T. Harry Slater; Aylmer, R. G. B. Moore.

The financial statement, read by the secretary, showed receipts and disbursements of $19,903, and balance of assets over liabilities, $49,193.72.

Messrs. J. M. Dillon and R. C. Struthers (ex-presidents) each delivered brief congratulatory addresses, and Mr. Gray thanked the members for re-electing him to the presidency. The annual meeting of the association will be held on Thursday, 23rd December.

MURDER FOR INSURANCE MONEY.

It is a serious fact enough that within the past few days four persons have been in this province sentenced to death for murder. And it is further startling to learn that the motive in the cases of two of the condemned persons, one a woman and one a man, was proved to be connected with insurance on the lives of their victims. One case is that of William J. Hammond, a drug clerk, who married Katie Tough of Gravenhurst, in Buffalo, two years ago. Shortly after the wedding the wife's life was insured for several thousand dollars; applications were placed for $12,000. The evidence shows that young Hammond induced her to take prussic acid, which caused death. The object, it is assumed, was to get the insurance money. The girl was found dead in the streets of Gravenhurst, in March, last year. In the other case, a married woman, Mrs. Olive A. Sternaman, of Cayuga, Ont., determined, as it now appears, to get rid of her husband and make $2,000 at the same time. The man died from poisoning, and she has been sentenced to death for his murder.

Such crimes as these are especially revolting, because in most cases the perpetrators assume great care and affection for the victims whose vital forces they are sapping. It is a matter of cold-blooded deliberation to thus take the life of a relative in order to make money by it. And the wretch who will sacrifice a human being for a few thousand dollars deserves the death penalty, if any one does. The extreme penalty has been meted out sternly to these two malefactors, and it is well that it should be so. Any laxity in dealing with such cases of murder would be a danger to the community. The punishment of taking life for life in such cases, stern as it is, will help to deter other miscreants from "insurance murder."

THE MELBOURNE FIRE.

A list of losses sustained by English insurance companies at the great fire in Melbourne, Victoria, on November 21st, has been published. Sixteen companies are down for a total of $862,500, or an average of something more than $50,000 each. Several have $100,000 each. The figures given are as under. We have no particulars of losses by Australian companies:

Liverpool & London & Globe	$100,000
North British & Mercantile	100,000
Royal	100,000
Commercial Union	60,000
London Assurance	50,000
Sun	50,000
Manchester	50,000
National of Ireland	50,000
Alliance	50,000
London & Lancashire	50,000
Palatine	40,000
Guardian	40,000
Imperial	37,500
Atlas	35,000
Royal Exchange	30,000
Lion	20,000
Total, sixteen companies	$862,500

FARMERS' LOAN AND SAVINGS COMPANY.

The Master-in-Ordinary has called a meeting of creditors of the Farmers' Loan and Savings Company, to be held in Toronto on Wednesday, 15th December, for the purpose of appointing a permanent liquidator. While no definite information of the condition of the company can be expected before this meeting is held, it is generally understood that shareholders must be prepared to lose a part of their share capital. It is known that a large proportion of the investments of this company have been made in Toronto Junction and in outlying parts of this city proper when land values were very much inflated, during the "boom" times, and a loss on this seems inevitable.

INSURANCE ITEMS.

There are seven days in every week. During six of them a strong agent will accomplish a great deal. He is entitled to rest on the other day.

No profession is without its quota of quacks. The quack insurance agent does not achieve permanent success. Moral: Avoid quackery.—*Insurance Press.*

The Northern Assurance Company decided at the November meeting of the directors to declare an interim dividend of £1 per share, being at the rate of 10 per cent., on account of the year 1897.

It is a good thing to have life insurance even if the policy is a small one. Better that than none at all, says the *Register.* It is good policy, too, for the young man to begin with as much as he can afford. If later experience forces him to drop a portion of it, he can easily do so, without loss, if he is careful to have the amount taken divided into two or more policies, so that if the necessity should come he could drop off one or more policies as the case required and hold on to the remainder written when the premium rate was lower by reason of being younger.

Mrs. Tumlins: "Why, William, you surely don't intend to lay off on account of that little scratch! You used to say that you didn't mind such things at all." Mr. Tumlins: "But Mollie, my dear, you seem to forget that my accident insurance pays me $5 a week more for disability than my salary amounts to."

Accident insurance is now so varied in its plans and benefits, that he must be a poor field worker indeed who cannot secure plenty of business in that line. In accident insurance it is not necessary for a man to die to "win." He can handle "the insurance money" himself when temporarily disabled—if he has a good accident policy.

We heartily congratulate the *Insurance and Finance Chronicle,* of Montreal, on its appearance as a weekly instead of a fortnightly journal. Since its establishment as a monthly in, if we remember rightly, 1881, it has maintained a moderate and sensible tone in discussing insurance matters, and has won a deserved place in the ranks of respectable and progressive journals.

Some fraternal and assessment societies in their advertisements ask the question: "Why pay one dollar for insurance, when just as good can be bought for 50 or 60 cents?" We answer, says the *Columbian,* there are no bargains in life insurance. There are no bargains in gold. Consider the fate of the man who buys a "gold brick" at a bargain. It is like the man who buys life insurance at half-price Both men are swindled.

A fire started in the generator of the gas works of the People's Heat and Light Co. in Halifax last week, and pretty well gutted the building in which it started. Damage to the works will probably reach, to machinery about $15,000, and building about $5,000. The acid tower, the scrubber, and the heater were the plant destroyed. The supply of gas will not be affected, because all the gas now consumed in the city is manufactured at the new works at the Arm. From there it is sent into the old works and then distributed throughout the city. The companies which have policies on the works are the Union, Guardian, Sun, Commercial Union, Northern, Western. The risk on this particular building was $2,500, and $13,000 on machinery.

As the frosty weather makes more warmth in the dwelling necessary, the percentage of risk to the average home is increased by the carelessly lighted fires and handling of hot ashes. Because of the frequency of calling out the fire department, especially winter mornings, to extinguish small fires which have been started by the want of forethought, makes it quite proper to warn people given to careless habits in that particular, and observance of the warning might in many instances save from loss by the contingent danger, as when one house is on fire, every other in the city is liable to be burned. Such a possibility may be remote, yet there have been some very great conflagrations started in trivial ways. The prudent will be careful.—*Ins Register.*

Mr. Alexander Cromar has been appointed superintendent of agencies in Ontario for the Royal-Victoria Life Insurance Co., with headquarters at the company's offices, 5 King Street West, Toronto. Mr. Cromar has had an extended and successful experience in life insurance, having been for many years with Mr. David Burke, in the New York Life Insurance Co., when that gentleman was general manager of that company for Canada. Later on Mr. Cromar was manager in Ontaria for the Great West Life Assurance Co., of Winnipeg, and still later superintendent of agencies for the Dominion Life Company, which position he has resigned to accept the appointment with the Royal-Victoria. In appointing Mr. Cromar to that position, Mr. Burke, the general manager of the Royal-Victoria, has made a good selection. It is not too much to predict that Mr. Cromar's knowledge of the business, and the men in the business, will insure for the Royal-Victoria an active and profitable agency organization in Ontario at an early date.

FOR GROCERS AND PROVISION DEALERS.

The Ontario Bee Keepers' Association will hold its annual convention in Hamilton next week, commencing on Tuesday. It will likely last three days. The bee keepers will meet at the St. Nicholas.

The Montreal Grocers' Association invited all the grocers of the city to attend a public meeting in the Monument National, on St. Lawrence street, last night, when matters of importance to all grocers were to be discussed.

Louisianians think that "about the most delicious substance ever invented," is "cuite," certainly first cousin to maple sugar wax. Now-a-days the sap is carefully collected and carried to the house in that state, where it is evaporated in shallow pans over brick arches, great pains being taken to keep the leaves, sticks, ashes and coals out of it, with a view to making good, pure sugar, that will sell for a large price.

There has been an important reduction made in freight rates, which promises to stimulate the shipments of grain and flour from the west. The change takes effect on the Canadian Pacific Railway, from Fort William east, and it is announced as being 8 cents a hundred pounds on grain and flour to Montreal and to all other points taking the same rate. The report of the reduction has been received with a good deal of satisfaction, and the general opinion is that it will prove of much benefit to the eastern grain and flour business, as well as help the Manitoba farmers.

The directors of the Owen Sound Beet Sugar Company have formulated a memorial to the Ontario Government, asking for a bounty of half a cent per pound on all sugar made from beets in Ontario, on condition that the beet growers get $4.50 per ton for their beets, and send a delegate to Toronto to lay the subject before the House. They will also ask the town of Owen Sound for a bonus of $20,000 and some other privileges. They talk of building a factory that will employ about 200 hands and do a business of 300 tons per day, expending for beets and building, machinery, labor, etc., $350,000 during the incoming season, and about $200,000 afterward.

"The West Indies would try to get the British people to do something for them, but if nothing was done they would try to join Canada." So said one of the speakers at last week's meeting of West Indians in London. That opens up a big question, and an old question, too—the question of a British North American Federation, with Ottawa as its centre—a most interesting possibility of the future. At present, of course, "Canada could not take all the sugar the West Indies could send her, but she would in a very few years have the population to consume all the sugar made in the West Indies." And if Canada saw a Federation in the bargain she would, we imagine, know how to deal with preposterous foreign bounties. But, meanwhile, what of this talk of West Indian reciprocity with the United States?—*Canadian Gazette Nov. 25th.*

A representative of the Sackville *Post* recently had a short chat with Capt. Bray, of Shediac, N.B. Speaking of the potato trade in that town this fall, the captain said that the present season was one of the best in the history of the place. R. C. Tait the largest dealer in that part of the county, received over 2,100 barrels into his warehouses one day, and another day over 1,900 barrels. Capt. Bray says a great improvement has been made in the manner of shipping potatoes. A few years ago a hole was cut in the side of the barrel to allow the air to circulate; now the vegetables are headed up tight in nice clean barrels. No cut, scabby or dirty potatoes are shipped. Nearly every variety of potato is taken, but they ship a larger amount of white ones. The greater quantity of the potatoes that have come to Shediac this year were grown in and around Cape Bauld by French people. The captain says these people seem to understand how to grow them better than the majority of English farmers. Of course their ground is well adapted for them, and then they make a liberal use of fish and sea weed, and it is known that this combination greatly aids nature in producing large potatoes.

CLEARING-HOUSE FIGURES.

The following are the figures of the Canadian clearing houses for the week ended with Thursday, December 9th, 1897, compared with those of the previous week:

CLEARINGS.	Dec. 9.	Dec. 2.
Montreal	$12,901,554	$13,523,223
Toronto	8,400,241	8,630,186
Winnipeg	2,480,301	2,275,360
Halifax	1,249,270	1,372,094
Hamilton	792,048	685,134
St. John	670,869	570,608
	$26,494,283	$27,056,605

Aggregate balances this week, $3,754,407; last week, $3,709,613.

AN UNWORTHY PROCEEDING IN ASSESSMENT ASSURANCE.

A suit is in process which ought to interest the people who believe in the trustworthiness of assessment life assurance. Mrs Alice Johnson, of Atlanta, Georgia, is proceeding against the Supreme Lodge of the Knights of Honor on a $2,000 policy which was held by her husband. Johnson was a member of the Order, and had been suspended for non-payment of dues. His wife made application for reinstatement, which was to be acted on after the lodge met at 7.30 p.m.; but the lodge met at 7 o'clock, and by a vote taken at 7.20 o'clock reinstated Johnson. He died five minutes later. The widow now claims that her husband was a member in good standing, having been reinstated; while the supreme lodge claims that he was not, as he should not have been reinstated until after 7.30 o'clock, the regular hour for the lodge to meet. On the morning of the day on which Johnson died, a physician, being summoned, found he was suffering from aconite poisoning. A matter of ten minutes, or rather five minutes, in point of time, appears to constitute the ground of difference between the parties. The lodge voted to place Johnson in good standing at 7.20 o'clock, not having any notion that he was about to die. They wanted his membership (and his money) at 7.20. But as a corpse at 7.30 o'clock they "had no use for him," as the phrase goes, and propose to keep his widow out of $2,000.

—It appears from late cables that the railway men of the United Kingdom are making arrangements looking toward a strike that, if carried out, will cripple the transportation of the British Islands. And this threatens to come upon the top of the sufficiently seriously prolonged engineers' struggle, which is throwing millions of manufacturing trade into the hands of other nations. Then it appears that the cotton operatives will add by their strike to the industrial difficulties of the Motherland and give a further advantage to manufacturers in other countries. Capitalists and employers in Britain are having an unpromising time altogether. The efforts of arbitrators in the direction of conciliation have been of but little avail.

—Our Montreal correspondent, writing on Wednesday night, sounds a cheery note, which accords with accounts from various districts of more active business and improved prospects: "While there is perhaps no immediate change in the business situation since this day week as regards prices in wholesale circles, and while at this time of year the wholesale trade is naturally quiet, the general feeling of cheerfulness in business circles is unimpaired, and an excellent spring trade is looked forward to. With this feeling so prevalent, and money moving so much more freely, a better holiday trade is looked for than for several years past."

—That Scottish banking methods stand in need of reform in certain particulars is quite true, and the character of these reforms we have more than once indicated, says the London *Economist*. But if the Scottish bank shareholders are not satisfied with the dividends they are receiving, and with the market value of their property, they must be wonderfully ill to please. In the ten years the shares of the English banks have advanced from an average premium of 176 per cent. to one of 225 per cent.; those of the Scottish banks from an average of 156 per cent. to one of 226 per cent., and those of the Irish banks from 117 per cent. premium to 196 per cent.

—Recent changes in the staff of the Imperial Bank of Canada are as follows: Mr. S. B. Fuller, manager at Woodstock, long in the employ of the bank, and a very popular man locally, has resigned his position in that institution, intending to devote his energies in another direction. Mr. Fuller's successor is Mr. Raymond, manager of the bank at Welland, who has been with the Imperial since 1876. Mr. G. C. Brown goes from Toronto to replace Mr. Raymond as manager at Welland. We note also the opening at Edmonton, N.W.T., of a branch of the Imperial Bank.

—The liberal crop of wheat in Manitoba and the good price secured for it has given a great impulse to the trade of Winnipeg. This is shown in a very noticeable way by the clearing house returns of that city. Where in 1895 the November clearings at Winnipeg were $8,503,000, and in 1896 were $8,895,000, they reached $13,550,000 in November, 1897. In the weeks ended Nov. 18th and Nov. 11th respectively, the clearings exceeded three and a half millions.

—A New Westminster paper of last week understands that the assistant general manager of the Merchants Bank of Halifax is now on his way to British Columbia to complete arrangements for the opening of branches of that institution in the province. The Vancouver branch is to be opened this week.

—The city of Charlottetown, Prince Edward Island, has accepted the tender of the Bank of Nova Scotia for $10,000 debentures bearing four per cent. twenty years. The number of tenderers was ten, and the price realized for the debentures was a premium of 5⅛ per cent.

Correspondence.

CAUSES OF TYPHOID FEVER.

Editor MONETARY TIMES.

DEAR SIR,—I saw your paper the other day with a story in about a town down in Prince Edward Island and other places, where they were afraid of typhoid fever because the wells are poisoned from the water-closets. There are plenty of wells poisoned in this way, no doubt, in this Ontario of ours.

But I want to tell you about something else that causes typhoid fever. There is a good-sized pond on the outskirts of Uxbridge, and the people of the town took a notion to clean out this pond. There were a lot of cedar logs in it that had been there a long time, and they were all drawn out and laid upon the edge of the pond. They were water-soaked, of course, and had a white scum on the outside. Well, it was not long after these rotting logs were hauled out before every house in the village that abutted on this pond had typhoid fever in it. I don't know how to describe the thing, but somehow the rotten wood or the scum, or something developed the seeds of typhoid fever, and an outbreak of that disease resulted from the hauling out of those logs.

This was quite lately, only a few years ago. Maybe some of the medical journals took notice of it, but I have not seen it anywhere in print; so I just thought I would tell you about what curious things may sometimes cause that horrible disease, typhoid. Yours truly,

J. W.

Uxbridge, Dec. 5th, 1897.

BUSINESS WITH NEW ZEALAND AND AUSTRALIA.

Editor MONETARY TIMES.

SIR,—As I see you give much attention to Canadian export trade, and have occasional articles on Australia, besides a sensible Australian letter quite frequently, I thought I would send you a copy of a memorandum about some matters relating to the Antipodes. This memorandum was given me some time ago by a man who had lived a long time on the Australian continent, and was over here on a visit, having friends and some business in Canada.

"New Zealand takes," he says, "more timothy and clover seed than all Canada exports.

"The people of that distant continent (Australia) use quantities of canned vegetables and canned fruits, which Canada ought to send them. They also import cheese, for they cannot make the high grades of it.

"An important thing to be kept in mind is the alternation of the Australian fruits with ours. Their fruit is semi-tropical, and ripens at different dates. Besides, it does not keep as well as Canadian.

"Then as to timber, for instance Why should not Australia be a good alternative or stop-gap for the Canadian wood merchant? It is a cash market for surplus stock, and your Vancouver or Quebec or St. John timber dealer may ship there at a different season from that at which he sells in Canada or the States."

I send you these memoranda for what they are worth. But I have reason to think they were given in good faith, and I think the writer of them was a man not badly informed on the general subject.

R. C.

Hamilton, 6th Dec., 1897.

BANK CLERKS.

Editor MONETARY TIMES:

SIR,—I have read with some interest the various letters which have appeared in your columns bearing on bank clerks, and beg to add to them the result of my observations extending over the past twenty years from the post of junior to that of manager.

Looking backward and comparing notes with the remarks of "X," I find that we fully agree on many points. For instance, that bank clerks, as a class, usually have the "entree" to the best society, and occupy a higher social plane than do "our bright young merchanting men," referred to by your corespondent "V." Nor do I consider them inferior in intelligence to other young men. The fact of their continuing to hold responsible positions—when they do so—is proof at once that they must be fitted for them, and whilst holding them they are constantly acquiring fresh business knowledge and acumen, as well as other necessary qualifications, in order to fit them for promotion, which, while in some cases obtained partly through influence and interest, is not always so obtained. Banks, like other business institutions, usually promote clerks who are best fitted for advancement. It would be folly for them to do otherwise, which needs no explanation.

The question of salary strikes the key-note with the bank clerk at all times and in all places. I think it will not be denied that, other things being equal, the clerk who dresses well and occupies a good social position, and who makes himself agreeable to the customers, whilst obeying the bank's rules rigidly and living an upright life, is usually preferred for advancement by the bank. It does not necessarily follow that he must be of aristocratic lineage. It is considered that the social standing of the clerk is, to some extent, reflected on the bank itself, and the bank employing what may be termed the "nicest class of clerks" is often the one most looked up to in a community.

Some clerks, whilst ambitious for the standing of their particular bank, as well as for their own interests and advancement, find it quite difficult to make ends meet on a small salary, such as most of them receive. The result, too often, is debt, and eventually dismissal and disgrace.

In very small places the question of salary, on the score of appearances, does not signify so much, but where it is desirable that a certain status be kept up, the salary should be sufficient to maintain that status in reason. I am down on gambling and extravagant living of every description by a bank clerk, but I also think that the time is come when many of the banks could well afford to increase the salaries of their officers and those who have materially aided in placing them in the sound and successful position which most of them occupy to-day. Better esprit de corps would ensue, and the service be improved all round.

December 6th, 1897.

THE ELECTRICAL FIRE WASTE.

The electrical inspectors of the United States have co-operated during the past three years in compiling accounts of the circumstances leading up to all electrical fires and burn-outs which have come under their observation. To-day these records included detailed descriptions of 2,000 such electrical fires. These do not, of course, represent the total electrical fire waste, because so many fires destroy all evidences of their origin, and because much of the territory cannot be heard from promptly. Incomplete as they are, they nevertheless have the advantage of being wholly accurate and of covering portions of the country having different climatic conditions, and somewhat different practices prevalent in the manner of installing electrical systems. The aim in obtaining these accounts has been to secure an approximate comparison of the fires due to different electrical causes, and not to receive accurate accounts of losses. The detailed accounts given of fires in which no loss resulted have proved of greater instructive interest than the ones for which losses were paid, because the exact cause and condition could be more accurately determined. Fires resulting in large losses generally destroy evidences of their cause, and but few large fires are included in the report. Thus for the first year, the reports were collected, the total loss reported amounted to $1,415,610.20, while the average annual electrical fire waste for the past three years has probably been more than twice this amount, or at least one forty-fifth of the annual fire waste due to all causes. For the first three months of this year the proved electrical losses aggregated $625,561.

Other common causes of fire show a greater relative proportion to the whole amount than electricity, but no one deputy of the fire fiend shows such extraordinary versatility. For instance, an indexed comparison of these 2,000 electrical fires starts with thirty-one general headings, subdivides into 100 supplementary headings, giving an average of twenty out of 2,000 electrical fires which it is possible to group as due to somewhat similar specific happenings.

Notwithstanding the complexity indicated by this statement, a careful survey of these causes and groups of causes must prove instructive, for the principles underlying them all are to a certain extent the same. For, with the exception of occasionally extraordinary happenings (such as electrical fires in a dwelling having no electrical wiring or apparatus of any such description within its walls, not even a call-bell circuit, or the peculiar cases of electrolytic formation of metallic sodium from the elements of certain plasters and cements), these groups simply prove certain wrong principles of electrical construction in a variety of different manners.

Listing them in the order of their importance to the underwriter, the general headings under which the majority of these 1,500 fires are grouped would arrange themselves as follows:

1. Crosses of telephone, telegraph, and other signal wires with trolley, electric light and other heavy current wires, resulting in the heavy currents following the signal wires to their connecting apparatus designed for small currents and burning them out.
2. Grounds and short currents on electric light and power circuits due to moisture, metal pipes, nails, screws, awning frames, metal vaults, fixtures, cables, roofs, cornices, metal fronts, structural iron work, and similar materials which were in a position to offer paths of comparatively low resistance to the current and to aid in the breaking down of insulations.
3. Wood used for mounting, current-carrying strips, bars and connections, or for electric light and power circuits, that is, wooden based switches, switchboards, cutouts, hanger-boards, etc. In these fires a loose connection or poor connection results in producing heat, which ignites the wood.
4. Transformer breakdowns, allowing current at 1,000 and 2,000 volts on interior wiring installations designed for only 55 or 104 volts.
5. Sparks from arc lamps igniting various combustible materials (principally cloths and clothing, tailor's goods, etc.)
6. Poor contacts and connections in all varieties of circuits
7. Heating effects of incandescent lamps and short circuits in incandescent lamp sockets.
8. Miscellaneous troubles on cutouts.
9. Miscellaneous troubles on switches.
10. Miscellaneous troubles on rheostats.
11. Miscellaneous troubles on motors and dynamos.—*W. H. Merrill, Jr.*, before the Armour Institute,

THE GRAIN POOL.

The knowledge that a very extensive combination has prevailed in the Manitoba grain trade this season, has led to a very considerable agitation throughout the country. The only thing which has prevented this agitation from becoming a very disturbing movement is the fact that grain prices have been comparatively high this season. It is difficult to raise an agitation when people are prosperous and contented. Agitations thrive, even without good cause, during periods of close times. When discontent prevails, as it invariably will during close times, the most bare-faced professional agitator will always secure a good following. In Manitoba the lot of the farmer has been a particularly happy one this season, and this has been the saving feature this year. Should the same conditions prevail in the grain trade during a season of poor crops and low prices, it is certain that a very unpleasant time would be experienced.

Even as it is, there has been much mutterings against the grain pool, and the agitation seems likely to increase as the winter wears on. We notice by the country press that meetings are being called at different points to discuss the situation. It is a matter for much regret that occasion exists to call forth a movement of this nature. The knowledge that a grain pool exists in the Manitoba grain trade, is sure, sooner or later, to develop very unpleasant consequences. The very word "combination," or "combine," is like flaunting a red flag before a bull, to a great many persons, and with or without reason is sure to lead to denunciation. The most circumspect action on the part of the grain men could not prevent a very active agitation, were the circumstances at all favorable for such.

The movement now seems to be taking the shape of an effort to secure the removal of the so-called elevator monopoly. The term "monopoly" is. of course, quite wrongly applied to the situation in Manitoba. There is no such a thing as an elevator monopoly, strictly speaking. There are certain railway restrictions, however, governing the shipment of grain at many points, by which shippers are obliged to handle their grain through the elevators. Loading on cars is not allowed at most elevator points. There are also certain rules providing that elevators must come up to a certain standard. These elevator regulations, on the whole, we believe, have been a benefit to Manitoba, as they have led to the establishment of excellent grain storage and handling facilities throughout the country, without which our grain trade would be in a chronically congested state during the busy season. The fact that the farmers themselves have gone largely into the establishment of elevators, indicates that they are a great advantage to the farmers.

At the same time, there seems to be something harsh in the regulation that a farmer shall not load his grain directly into a car, providing he wishes so to do and can do it without causing unreasonable delay to traffic, which latter is a very important consideration in our busy season. If farmers and others had the privilege of loading directly into the cars, and were to avail themselves largely of the privilege, it would cause such delay to traffic as would almost paralyze the railways in the busy season. We do not believe, however, that the removal of the elevator restrictions would result in any general movement to go by the elevators in shipping grain The country is now remarkably well supplied with elevator facilities, thanks largely to the elevator restrictions imposed in the past. This being the case, it would seem preferable to abolish the restrictions rather than have another serious agitation in the country. — *Winnipeg Commercial.*

POSTCARD LIBELS.

Chief Justice Armour intimated from the bench yesterday, at Osgoode Hall, that in his opinion some Toronto citizens had become too modest to notice the amusement posters on the bill boards. The comment was in connection with the appeal of George Young, mail clerk, St. Thomas, against the judgment condemning him for libelling Dr. L. J. Mothersill on a postcard. Young was condemned to pay $50 damages and costs, for sending a postcard to Dr. Mothersill reflecting on the doctor's ability and character. He appealed for a new trial, partly on the ground that as it was on a postcard it was not publicly seen, and that Dr. Mothersill sustained no injury. The Chief Justice said that if the court granted the appeal postcard-libelling might become a common practice The appeal was dismissed.—*Mail, Dec. 9th.*

RECLAIMING LOST COAL.

The Reading Railroad Company, it is stated, has begun the work of reclaiming the great masses of anthracite coal, now buried in the mountains of coal dirt scattered all over the Schuylkill coal basin. During the season just closing 50,000 tons of good coal were reclaimed from the coal dirt near Kalmia colliery alone. Kalmia colliery is now abandoned as a coal mine, having been worked out. It was one of the very best of the Reading Coal & Iron Co.'s properties in the west end, and its product was vast in the many years of its active operations. Now the company has turned its attention to reclaiming the coal in the dirt mountain at the colliery. Suitable washing machines were put in, and quantities of first-class coal are being taken out of what was considered a great black mass of worthless dirt. There is no way of estimating the weight of all these mountains of coal dirt in the three Pennsylvania anthracite coal basins, but they are all valuable, especially where there is a plentiful supply of water. In recent years the discovery has been made that pea coal is a first-class fuel They now take out and classify not only pea coal, but buckwheat and rice as well. The company is able to make at least $1 clear profit a ton on this washed coal, which would make $50,000 clear profit on the Kalmia washery alone. Individuals have gone into the business, and are doing very well. In a short time, it is probable many more will be engaged in washing out good coal from these dirt heaps, some of which are 200 feet in height and cover ten acres. At one big dirt bank a very rich find has just been made. During the war the demand for lump coal for United States vessels of war was so great that several of the Reading Railroad collieries could not stop to bother with small coal. The rush for lump and steamboat necessitated the pushing of small coal out of the way in order to hurry up the shipments of the big coal. This small coal went out on the bank and was soon covered up by the dirt from the breakers and buried out of sight, to remain there for thirty-five years. It has now been discovered and it is thought it may prove to be worth hundreds of thousands of dollars.—*Industrial World.*

LONG-LEGGED BOOTS AGAIN POPULAR.

Tanners of common upper leathers, such as grain and wax upper, are noting with a glow of satisfaction, says an American exchange, that the old-fashioned high boots are coming into favor again.

Farmers and men in other callings, who used to wear long-legged boots, began economizing when the hard times set in a few years ago, and took to wearing plowshoes, brogans, etc. These strong and durable shoes are cheap and satisfactory, but at the best they are only shoes, and do not protect one's legs.

Up to a few months ago long boots were the deadest stock carried by country merchants Tanners also suffered, as it takes much less leather for shoes than boots. In consequence, the manufacture of grain and wax upper, particularly the latter, declined considerably. To-day wax upper is in brisk demand, and boot manufacturers have been quite concerned about getting enough for their needs.

The awakening in the inquiry for boots is instructive, and illustrates the workings of an unseen and powerful force that changes the tastes and desires of customers all over the country.

Farmers and other laborers find a satisfaction in wearing long-legged boots. There is more comfort in boots than in any combination of shoes and leggings.

Tanners welcome the call for boots and hope it may live long and prosper.

THE RECALESCENCE POINT IN STEEL.

There are numerous heats at which steel hardens if chilled, but all produce a more or less weak, sandy or uncertain grain, unfit for cutting edges, except one single heat or temperature, for each carbon percentage or temper of steel. This temperatnre, if it can be found by the steel hardener, will produce the refined grain which gives great strength and endurance to cutting edges. The refining temperature coincides with the strange recalescence point. The point of recalescence is that temperature, varying for each carbon percentage, at which cooling steel pauses awhile, gets hotter of itself and again goes on cooling. Gore was the first to note it; Barrett confirmed it, and gave it the name "recalescence." There are two breaks in the cooling. The first is of short duration; the second is a long arrest in the fall of the thermometer, its duration in 1 25 carbon steel being, according to Roberts-Austen, 76 seconds. Osmond states that the reheating of the steel is caused by the heat evolved when carbon leaves its state of solution and truly combines with the iron in steel.—*Sparks.*

LEATHER IN THE UNITED STATES

Although competition to sell leather, etc., is keen, prices as a rule are maintained, owing to the rigidity of quotations for hides and skins. Leather buyers are scouring the country for job lots, and relations that have been pleasant and prolonged between sellers and buyers of shoes and leather have been temporarily strained, owing to sellers being unwilling to abate their terms. Buyers are evidently not entirely confident that leather values will be strictly upheld. They have faced strong leather markets before and conquered them by using a policy of "masterly inactivity." At present the outlook is misty and uncertain, and while the next few weeks may remain devoid of activity, buyers may decide that to-day's prices are about as cheap as they will be for some time to come. Meanwhile the steady call for goods of all kinds carries with it a feeling of confidence that before long the increased ability of people to purchase merchandise of all kinds will cause a welcome broadening of the channels of consumption.—*Hide and Leather.*

MAKING GLASS.

Iron and steel manufacturers will be interested in the news just published of a revolution which is progressing in the art of making glass. Molten glass has long been molded into a great variety of ware, but the blow-pipe driven by air from a man's lungs has been deemed indispensable for shaping jars and other hollow articles as well as window glass. But a recent invention bids fair to deprive the glass blower of his vocation just as many time-honored craftsmen in the iron trade have found their occupations gone. The first use of the new glass-making machines is in the manufacture of fruit jars at Muncie, Ind. One blowing machine is said to do away with the services of three men, and it is estimated that the same product can be turned out with only two-thirds as many workmen employed. The glassblowers are expected to be able to find employment on account of their expert knowledge about glass, but common labor will be affected. The introduction of these machines in glass making is regarded as fully as revolutionary in that trade as was the introduction of the Bessemer converter and the open hearth furnace in the iron trade, the type-setting machine in the printing business, the self-binding harvester in agriculture, the spinning jenny in the cotton trade, the sewing machine among seamstresses, etc. The window glass manufacturers are anticipating the early perfection of blowing machines for their branch of the trade.—*Kuhlow's German Trade Review.*

ANDERSON v. GRAND TRUNK RY. CO.—The defendants were in the habit of selling tickets to, and allowing passengers to get off at, a crossing or junction, the only means of egress to the highway being along the track. A passenger, while walking from the crossing to the highway, was killed. The Court of Appeal decided that he could not, under the circumstances, be looked upon as a trespasser; that the defendants were bound to use reasonable care towards him; and that, as there was some evidence of want of care, a verdict in favor of his representatives could not be interfered with

THE results of the smelting operations of the Hall Mines, Limited, at Nelson, B.C., for the two weeks in November last, were as follows: In thirteen days sixteen hours, 3,283 tons of ore was smelted; yielding 233 tons of matte. Containing (approximately), 107 tons copper, 69,780 ozs silver, and 93 ozs. gold. The furnace was closed down 6th to 19th November inclusive.

UNITED STATES LUMBER MARKETS.

The better conditions in actual demand in this closing month of the year are in the middle west and southwest, though in these favored sections the state of trade is by no means uniform. In the middle west retail dealers in Indiana, southern Michigan and portions of Ohio make more satisfactory reports of sales and collections than in Illinois. This probably arises from the crop results, the good financial condition of the farmers and activity in the manufacturing towns. In no other states of the Union have the industries shown such a revival this year as in the three first named. This is because manufacturing therein is largely of agricultural implements, wagons, railway equipment, and wood products of various sorts, which have been in most active demand. The consequence is that the industrial centers have taken on new life, the working classes are employed and improvements have acquired considerable headway. In the winter wheat belt of southern Illinois there was a large percentage of failure of the crop this season. Since that is the main dependence for a money income in that section, it is not to be wondered at that dealers in some instances report a poorer trade than last year, with corresponding difficulty in making collections. * * In Minnesota the retail dealers generally express disappointment at the results of the fall trade, though there are brilliant exceptions. There has been so much low grade wheat in that state this season that prices realized have not greatly enhanced the ability of producers to pay debts or make improvements. Several localities report very poor collections. * * *

All over the middle west the statement is made that the lumber sold this season has been mainly for repairs, necessary granaries, and corn cribs. To a large extent dealers have purchased only such stock, and mainly in view of what was this season needed for consumption. In September and October a percentage of dealers at the larger points bought an assortment for future trade. This was done under the stimulation of rising wholesale prices. But the downward dip of the bulk stock market after the middle of October has again inclined dealers to a conservative course. . . . .

Reports from retail dealers in the Eastern States are not as cheerful or promising for the future as are those from the west. Several from Connecticut and Massachusetts are to the effect that demand is no better than last year, neither are collections, while the outlook for the winter and next spring is anything but rosy. There are exceptions to this view of the case, however. One report from New Jersey breathes satisfaction and expectancy. Statements from retailers are tinged by local conditions, the state of the dealers' minds, and possibly by that of their finances. The majority statement from the east is that trade is quiet, the results of the fall business disappointing, while the outlook for next season is somewhat in doubt. The most favorable eastern wholesale reports come from Tonawanda, where it is claimed that fall trade has been fair to good, there being an especially active demand for coarse and cutting up stock, barn boards, export lumber and thick, high grade white pine for factory purposes, especially for pattern making. The last named feature is thought to be a sign that manufacturing is enlarging. In New York and the metropolitan district distribution has increased during recent weeks, and dealers have made attempts to realize higher prices, but with scarcely appreciable results. There seems to be a pushing of yellow pine in that market indicative of a desire on the part of mill operators to unload.

Hardwoods move freely, especially quarter sawed and plain oak. In Massachusetts it is acknowledged that white pine is $1 to $3 a thousand higher than at the outset of the season. In respect to the New England spruce trade, the indications are that recent developments in Maine and New Hampshire logging industry tend to render dealers cautious about yielding to a pressure for higher prices. There is great activity on the part of small log operators, as they think that the tariff is to create an active demand for lumber next season. The larger operators, with a wider view of conditions, will be more conservative in their input; yet the aggregate result, it is predicted, will be excessive unless an extraordinary demand shall spring up next season. Prices of spruce remain unchanged, on a basis of $13.50 for frame schedules. Demand for the several kinds of lumber used for building in Philadelphia has been stimulated by a late increase of structural work in that city.—*North-Western Lumberman, Dec. 4.*

TORONTO MARKETS.

Toronto, Dec. 9th, 1897.

Dairy Products.—In dairy butter there has been a liberal supply of large rolls coming forward. Tubs are not so plentiful. The demand is good and the stocks keep well cleared up. Quotations remain as last reported. Creamery is steady. Cheese continues quiet. The egg market has shown little change during the week.

Grain.—There is an active demand for wheat; the principal movement is by way of export. Deliveries at country points have been fair until the past few days, when owing to the bad condition of the roads, there has been some restriction in offerings. Beerbohm estimates the world's requirements of wheat this year, according to his revised list on November 26, at 444,000,000, and the visible supply at 360,000,000, leaving a balance of 84,000,000 bushels to be supplied by Argentina and Australia. For oats there is an easier feeling and prices have fallen Ic. per bushel; the enquiry from abroad has fallen off somewhat. Peas are firm and in demand for export at an advance of Ic. per bushel over last week's quotations. A few sales of barley to local brewers are reported, but otherwise the trade is dull. There is no change in corn. Rye is steady. Buckwheat remains nominal and prices remain as reported in last week's issue. The imports into the United Kingdom last week were 2,520,000 bushels of wheat; corn, 1,400,000 bushels, and flour 345,000 barrels. The imports and the farmers' deliveries made an aggregate of 4,662,900 bushels for the week's supply, indicating an increase of 342,900 bushels in the English visible.

The stocks in store at Port Arthur on Nov. 27th were 1,719,843 bushels, and there were received 533,726 bushels and shipped 1,133,967 bushels, leaving in store on Dec. 4th, 1,109,603 bushels.

VISIBLE SUPPLY OF GRAIN.

The visible supply of grain in the United States and Canada, with comparisons, is as follows:

Bushels.	Dec. 4, '97.	Dec. 5, '96.
Wheat	34,845,000	56,312,000
Corn	39,949,000	17,405,000
Oats	15,462,000	12,297,000
Rye....................	3,553,000	2,464,000
Barley	4,750,000	4,834,000

Wheat increased 1,189,000 bush. last week, as against a decrease of 2,602,000 bush. the corresponding week of last year. Corn decreased 2,109,000 bush.; oats increased 201,000, rye decreased 42,000, and barley decreased 1,141,000 bush.

Groceries.—From the country reports are being received of a very satisfactory trade, and remittances are fairly prompt. For some weeks there has been little activity in sugars, but an advance of 1-16c., which took place this week is expected to revive trade somewhat. In dried fruits and similar goods for Christmas supplies there is an active trade doing. The canned goods trade is quiet. The report from British Columbia of a combination on the part of the salmon packers, which we noted last week, has aroused considerable interest in the trade.

Flour and Meal.—The trade movement has moderated somewhat during the past few weeks. There continues to be a good movement in the local trade. but exporters' requirements are less than they were some weeks ago. A revival is, however, looked for soon. A merchant from the Maritime Provinces, who was recently in Toronto, states that he had an interview with some of the millers at the Board of Trade in reference to introducing their flour in the West Indian markets. The millers, he said, were anxious to secure a footing for their commodities there, and as a result of the favorable prospects brought to their notice, some ten or twelve car loads of flour would be shipped by the next steamer, via St. John, New Brunswick.

The West Indian markets are important, the annual consumption being in the neighborhood of six hundred thousand barrels. Canadians once did considerable trade with these islands, but have lost ground in recent years.

Hardware and Metals.—Trade is still quite active in general lines of both hardware and tinware. In heavy goods there has been an improvement in the volume of trade. Both cut and wire nails are moving more freely. Coil chain is in better demand, principally in the smaller sizes. In some lines of tinware, as the season is now well advanced, orders are falling off. Fall and winter specialties are active. The demand for skates has been excellent, and jobbers have found it difficult to fill their orders promptly. Of hockey skates there is a short supply in certain makes; the quotations have been back ordered, and the goods will go forward on arrival. In metals trade is also good, and prices remain firm. Galvanized iron, tin plate, ingot tin, Canada plate and copper, are the principal lines moving. Sleigh bells, snow shovels, and similar goods are in fair demand. Manilla rope has been advanced ¼ cent per lb. In cutlery there is a fair trade doing; case carvers and similar goods suitable for the holiday trade are going out freely. In window glass prices have been advanced, but the figures are not yet in the hands of the trade.

Hides and Skins.—The local situation remains practically without change. Prices are unsatisfactory to hide merchants as well as tanners. Advices from Chicago, Dec. 7th, are as follows: "Market steady for light hides; offerings limited; heavy hides quiet, closing at 11c. for native steers, 10c. to 10¼c. for heavy Texas, 9½c. to 9¾c. for light do, 10c. to 10¼c. for butt brands, 9¼c. to 9½c. for branded cows, 9c. for Colorados, 10½c. for heavy native cows and 10¾c. for light do." There is little interest in the calfskin markets. The offerings of sheepskins are not large. Tallow shows signs of improvement, but values remain depressed.

Seeds.—There is apparently some dissatisfaction in the country with values and growers are holding back supplies. We quote alsike $2.75 to 4.00; red clover, $3.75, and timothy $1 to 1.25 at outside points. The quotations are wide and cover the range in the quality of offerings.

Wool.—There is little that is new or interesting to be said of the local situation. Values are without change. The London wool auctions closed Dec. 7th, and throughout the sale competition was uniformly keen.

MONTREAL MARKETS.

Montreal, Dec. 8th, 1897.

Ashes.—Nothing doing; prices about as last quoted, viz.: $3.25 to 3.30 for first pots; seconds, $2.90 to 3.00. Pearls steady at $4.75 per cental.

DAIRY PRODUCTS.—There is very little activity in the cheese trade this week. The local market about maintains its prices, finest Ontarios being 8⅜ to 8⅝c.; Eastern Townships, 8 to 8¼c.: Quebec, 7¼ to 7¾c. per lb. The butter market is far from active, choice creamery alone being wanted. We quote:—Creamery, 17½ to 18c.; fine dairy, 15 to 16c,; under grades, 12½ to 14c. per lb. Selected boiling eggs bring 17 to 18c.; No. 1, candled, 13 to 14c.; No. 2 ditto, 11 to 12c. per dozen.

DRY GOODS.—What with stock-taking and the preparations for holiday trade, which is expected to be rather brisker and more varied than usual, the wholesale dry goods warehouses have not been by any means so dull as might have been expected after the close of navigation. Values of textiles are maintained, and in some descriptions of woolens there is activity and a good feeling. Remittances are gratifyingly brisk.

MONTREAL STOCKS IN STORE.

	Nov. 29, 1897.	Dec. 6. 1897.
Wheat, bushels......	71,322	87,363
Corn, "	67,056	84,556
Oats, "	145,794	264,227

Barley, "	25,336	28,486
Total grain	410,941	608,936
Oatmeal	162	85
Flour	13,195	11,662
Buckwheat..........	12,602	18,768

GROCERIES.—There is nothing to be added to our report of last week in this line except that firmness prevails in sugar and molasses. Dried fruits hold their own and nuts are regarded good stock. In canned goods too there is a generally firm feeling. Teas are quiet. Dealers speak very cheerily of the condition of country trade, as shown in letters from travellers and from customers, and money comes in well as a rule. Holiday trade promises to be brisk.

HIDES AND SKINS.—Continued firmness is evident in hides, and an advance is confidently looked for. Present price for green is 8½c. for No. 1, and tanners have to pay 9½c. for cured. Lambskins are quoted at 85 to 90c.

LEATHER.—While black leathers are quiet and firm, there is continued movement in colored leathers and dongolas; sole leather is steady. There are no special features, except that hides are still reported scarce and with an upward tendency. We quote:—Spanish sole B.A. No. 1, 24 to 25c.; do. No. 2, 22 to 23c.; No. 1 ordinary Spanish, 22 to 23c.; No. 2, 19 to 20c.; No. 1 slaughter, 25 to 27c.; No. 2 do., 21 to 23c.; common, 20 to 21c.; waxed upper light and medium, 30 to 35c.; do. heavy, 27 to 30c.; grained, 32 to 35c.; Scotch grained, 30 to 35c.; western splits, 22 to 25c.; Quebec do., 17 to 20c.; juniors, 15 to 17c.; calf-splits, 30 to 35c.; calf skins (35 to 40 lbs.), 60 to 65c.; imitation French calf skins, 65 to 75c; colored calf, American, 25 to 28c.; Canadian, 20 to 22c.; colored pebble cow, 13 to 15c.; russet sheepskin linings, 30 to 40c.; colored, 6 to 7½c.; harness, 24 to 27c.; buffed cow, 12 to 14c.. extra heavy buff, 15c.; pebbled cow, 12 to 13c.: polished buff, 11 to 13c.; glove grain, 12 to 16c.; rough, 22 to 23c.; russet and bridle, 35 to 45c.

METALS AND HARDWARE.—Transactions in heavy goods are confined within narrow limits, but some lighter wares and shelf goods are moving. There are almost no changes in price to note. We quote:—Summerlee pig iron, $18 to 18.50; Carron, No. 1, $18.00; No. 3, $17.25; Ayrsome, No. 1, $17.00; No. 3, $16.50; Shotts, $17.25 to 17.50; Carnbroe, $16.00 to $17.00, ex-store; Siemens pig No. 1, none; No. 2 Siemens, none; Ferrona, No. 1, $00.00; Hamilton No. 1, $16.00 to 16.50; No. 2, ditto, $15.50 to 16.00; machinery scrap, $1400 to 15.00; common ditto, $12.00 to 13.00; bar iron, Canadian, $1.40 to 1.50; British, $2.00 to 2.15; best refined, $2.40; Low Moor, $5; Canada plates—Pontypool, or equal, $2.10 to $2.15; 52 sheets to box; 60 sheets, $2.25; 75 sheets, $2.35; all polished Canadas $2.40; Terne roofing plate, 20x28, $5.90 to $6.00; Black sheet iron, No. 28, $2.25; No. 26, $2.15; No. 24, $2.05; Nos. 17, $2; No. 16 and heavier, $2.15; tin plates—Bradley charcoal, $5.60 to 5.70; charcoal, I. C., Alloway, $3.15 to 3.25; do, I.X., $3.90 to 4.00; P. D.Crown, I C, $3 60 to 3.75 do., I.X., $4.50; Coke I.C., $2 90 to 2.95 for standard, $2.75 to $2.80 for 100 lbs.; coke, wasters, $2 70; galvanized sheets, No. 28 ordinary brands, $4; No. 26, $3.75; No. 24, $3 50 in case lots; Morewood, $5.00 to 5.10, tinned sheets, coke, No. 24, 5½c.; No. 26, tc.; the usual extra for large sizes. Canadian bands, per 100 lbs., $1.75; English ditto, $2; hoops and bands, $1.90 to 2.00. Steel boiler plate, ¼-inch and upwards, $1.85 to 1.90 for Dalzell, and equal; ditto three-sixteenths inch, $2.50; tank iron, ¼ inch, $1 50; three-sixteenths do.; $2.00; tank steel, $1.75; heads, seven-sixteenths and upwards, $2.45 to 2.50; Russian sheet iron, 9c.; lead, per 100 lbs., pig, $3 65 to 3.75; sheet, $4 to 4.25; shot, $6 to 6.50; best cast-steel, 8 to 10c.; toe calk, $2.25; spring, $2.50; sleigh shoe, $1.85; tire, $1.90; round machinery steel $2.25; ingot tin, 15¾ to 16c. for L. & F.; Straits, 15¼ to 15½c.; bar tin, 16½ to 17c.; ingot copper, 12 to 12½c.; sheet zinc, $5 to $5.25; Silesian spelter, $4.75; Veille Montagne spelter, $4.75 to 5.00; American spelter, $4.75; antimony, 9 to 10c.

PAINTS AND OILS—As a rule oils are quiet, but there is a little more enquiry for some kinds of paints. The firmness in glass is marked. Very little change in prices. We quote:—Turpentine one to four barrels, 49c.; five to nine barrels., 49c., net thirty days. Linseed oil, raw, one to four barrels., 43c.; five to nine barrels, 42c.; boiled, one to four barrels, 46c.; five to nine brls., 45c., net 30 days; olive oi machinery, 90c.; Nfld. cod, 35 to 37c. per gal.; Gaspe oil, 30 to 32c. per gal.; steam refined seal, 45 to 47½c. per gallon in small lots. Castor oil, 10 to 11c. as to quantity. Leads (chemically pure and first-class brands only), $5.37½; No. 1, $5.00; No. 2, $4.67½; No. 3, $4.25; No. 4, $3.87½; dry white lead, 4¾ to 5c.; genuine red do., 4½c.; No. 1 red lead, 4c.; putty, 1.55 to $1.60 in bulk, $1.70 to 1.75 in bladders, $2 to 2.10 in tins; London washed whiting, 40 to 45c.; Paris white, 85 to 90c.; Venetian red, $1.50 to 1.75; yellow ochre, $1.25 to 1.50; spruce ochre, $1.75 to 2.00; window glass, (German and Belgian) $1.30 per 50 feet for first

IMPROVEMENT IN THE STATES

Referring to causes of national thanksgiving, Hon. James H. Eckels, Comptroller of the Currency, wrote some days ago:

"The general improved conditions in agriculture, in manufacture and trade have shown themselves in the large volume of exchanges and the greater deposits and increased loans of the banks

"To-day the total resources of the 3,610 national banks alone are 3,705,133,707, the greatest in the history of the system, of which $2,051,009,438 represent their loans and discounts and $388,882,631 money in bank. When is added to this the enormous resources of the State and private banks and trust companies it can readily be seen how great is the banking force of the United States—a force equal to about 30 per cent. of the banking capital of the world

"Within the year the resources of the banks in the national system have increased more than $350,000,000, while the individual deposits are greater by $200,000,000 than a year ago. In all important departments they have reached the highest point, save in circulation, ever known.

"If complete return to proper and natural business conditions could be had, the coming year should show still better things. The confidence of the depositor in the solvency of the banks of the country has been demonstrated—a gain of no small importance.

"With this accomplished it is now necessary to have such proper channels of trade and enterprise opened as will enable the safe and prudent use of the funds entrusted to the keeping of the country's bankers"

SILVER EGGS.

THE MONETARY TIMES' trade commissioner in Australia, who has to be content with the more humble designation of correspondent, suggests to Canadian packers that they can find a market there for all the hogs' bristles they have to dispose of. The business may not be brilliant in its promise of volume or development, but it is the little streams that make the big river. He points out something else. Two years ago a branch of a Canadian business was established in Sydney that was promising the most satisfactory results. Suddenly it was destroyed by increase of freight rates to Vancouver and thence on by our Canadian line of steamers. That was bad policy on the part of the transportation companies. The eggs of this particular goose may have been only silver instead of gold, but better silver eggs than to kill the goose outright. Rates that forbid trade are worse than no rates at all. —*Winnipeg Free Press.*

—Railway companies who look upon the pass system as a nuisance, must look with admiration at the strictness of the English companies in restraining this abuse. The only passes granted are to officials of the company, and shareholders who wish to attend the statutory half-yearly meeting. The shareholder is obliged to attend the meeting and get his pass stamped, or else it is not valid for return. This is quoted by an English paper as an instance of "red tape," but we imagine it is an instance to excite the envy of railway companies on this side of the Atlantic.—*Gazette.*

—On Monday the Licensed Victuallers' Association of the Province of Quebec met in Montreal and considered a number of amendments drafted affecting the license law of the province, to be submitted at the coming session of the Legislature. After some discussion a sub-committee was appointed, with authority of incur all the expenses necessary to advocate the adoption of the proposed amendments before the Legislature, and to appear as a delegation from the society before the committee of the House.

—An Englishman has just completed a journey of 1,600 miles on a motor car through England and Scotland. He was five weeks travelling, and used 114 gallons of oil, which made his travelling cost him three farthings—a cent and a half a mile.

Montreal, Que.

TEN DOLLARS A MINUTE!

This is the average amount being paid to the Policy-holders every minute of every hour, of every day, of every week, the year through, by the

METROPOLITAN
Life Insurance Co. of New York

Assets, ... $25,592,003 78

The Metropolitan has $150,000 in Dominion of Canada registered stock on deposit with the Canadian Goverment, for the protection of Policy its holders in Canada.

Its great feature is its INDUSTRIAL PLAN OF LIFE INSURANCE

5 Cents per week (and upwards) will secure a policy
All ages from 1 to 70 are taken.
Males and Females insure at same cost.
Only healthful lives are eligible.
All policies in immediate benefit.

CLAIMS paid immediately at death.
No initiation fee charged.
Premiums collected by the company weekly the homes of policy-holders.
No uncertain assessments—no increase of premiums.

Think of it! The daily saving of FIVE CENTS will carry policies on the lives of every member of a family of SEVEN PERSONS.

Sixty Thousand Families will receive the proceeds of its Policies this year

Ordinary Department. The Company in this Department issues all the approved forms of insurance (and some novel forms of Policies) for from $1,000 to $20,000, premiums payable yearly, half-yearly or quarterly. The policies are liberal in their provisions, contain no restrictions as to travel and residence, provide for **immediate payment** of claims and the premium rates are extremely low. We invite comparison of rates with the rates of other companies.

Thos. Walmsley, Treas. Hugh Scott, Mgr. and Sec.
Adam Austin, Inspector.

This Company was organized in 1885, specially for the purpose of insuring manufacturing industries, warehouses and contents.

The primary object being to give protection against loss by fire at a minimum cost consistent with absolute security.

The system adopted has been to inspect all risk before acceptance and fix the rate to be exacted equitably in accordance with the hazard assumed.

Assurers with this company have made a saving, upwards of $108,000.00 on the current rates charged, in addition to which, on the rates exacted by us, dividends have been declared to policy-holders amounting to over $24,000.00, together, making the very substantial sum of over $132,000.00 that our policy-holders have saved during the eleven years we have been in operation.

As no canvassers are employed, dealing directly with the assured, those desiring to avail themselves of the advantages thus offered will please address

"INSPECTION, SELECTION AND PROTECTION."

O, the process of inspection as a basis of selection is a very useful section of the underwriter's work ; it encourages protection, fosters wholesome introspection—not a fault escapes detection, if surveyors do not shirk.

"Have you automatic sprinklers, do your rats and mice wear tinklers, is there any wood or brick within the walls you call your own? Is your building fireproof or, are there cats upon the roof or, are your chimneys terra cotta or cement or merely stone?

"Have you ever had a fire, is the hour drawing nigher when you hope a rousing blaze will come and set you on your feet? Did you vote for Low or Tracy, or did Croker's wiles embrace ye, or if Paddy'd only got in, would your joy have been complete?

"Does your wife the banjo torture, is your little boy a scorcher, are there wheels upon your porch, or, do you keep them in your head? Do you dream of wondrous riches ; do you feel within your breeches that you'll be a multi-millionaire some day before your dead?

"Is your ash barrel made of metal ; do you pretty often settle your little bills for milk and groceries, and all your household debts? Do you promise, if you burn out, you will all the proceeds turn out, to pay up what you owe, including fool election bets?

"Are your water pipes in order ; are you sometimes on the border of suspecting that your 'hose' is worn by daughter, wife or maid? Do you use benzine for scrubbing, or gasoline for rubbing? Are your flues so built that they will stand 900 in the shade?

"If you this interrogation answer without hesitation, the rest of your shortcomings we vouch may be endured ; your rate will not be high, sir ; your bill will come quite spry, sir ; see you later by and by, sir—good day, you're now insured!"—*Prose Poet of the Insurance Age.*

SERMON FOR THE UNINSURED.

Satan is a shrewd scoundrel and a diplomat of high degree. Talleyrand, who couldn't hold a tallow candle to him, and Niccolo Machiavelli, who was candor in the concrete when compared with Mephisto, were two of his aptest students. The flagrant tricks the devil plays upon susceptible mankind are not so fragrant, but as thick "as Autumnal leaves that strow the brooks in Vallombrosa, where th' Etrurian shades high over-arch'd imbower." The disguises adopted by the practitioner from Hades are nothing in number or picturesqueness when "neck and neck" with those of Vidocq, Sherlock Holmes, or even Tom Byrnes. In fact, the devil—the modern devil, the "new" devil, is always a gentleman "on the side," clothed in black, *au fait* swallow tail and so on, and frequently sports a white necktie. He never shows up in these times with the regulation vermilion suit, skull cap, horns, cloven feet and arrow-tipped rear appendage.

As we have said, he is a diplomat, and some of his finest work is put in upon husbands and fathers who carry neither life nor accident insurance. When the agent meets with a particularly obstinate man who is as full of excuses for not insuring as Satan is of devices to keep him from it, the agent may not realize that he is really up against the proprietor and manager of Tartarus. But he is.

When a man who is in good health, having a wife and children dependent upon him and having no property, refuses the proffers daily made him to insure his life for their benefit, he is possessed of a devil ; and the agent is not talking to the man at all. Prince Pluto is bossing the job. To induce a man to make no provision for his family after his death, and to supply him with ample specious excuses for the refusal, so that the wife and children may face misery and poverty, and, perhaps, be led into crime, is one of those long-headed and subtle manœuvres for which the party from below has a world-wide reputation.—*The Ætna.*

THE LAKES AND THE ST. LAWRENCE.

The Canadian Minister of Public Works has been West, and informed himself upon the carrying trade of the great lakes, and the enormous vessels engaged in it. He writes to his paper and tells the people of Montreal that they mu prepare their port so that the largest steamers may get there and load their cargoes cheaply, and they will be sure to have an immense traffic by the St. Lawrence route. He has learned that the powerful steamer "Amazon" arrived on 1st Dec. at Buffalo with 205,000 bushels of wheat, which had been brought from Fort William. "I need not tell you," says Mr. Tarte, "that this grain comes from Manitoba. If the Welland Canal was deepened, or if the Parry Sound Railway found at Montreal that accommodation which should have been prepared long ago, this Canadian grain would have been taken to the markets of Europe by the Canadian route."

Lest any one may think the "Amazon" an exception, we append a list of other great steamers and barges plying from Lakes Superior and Michigan to Lake Erie:

Recently there arrived at Buffalo a fleet of grain boats, which for individual and aggregate carrying capacity have never been equalled on fresh water. When the Bessemer steamer "George Stephenson," with her 323,250 bushels of oats, the largest quantity of grain ever afloat in one vessel on the lakes, was added to the fleet in Blackwell Canal, it seemed quite enough to break the record. But a few days later the "Antrim" made her appearance for the first time with 175,782 bushels of wheat. Then came the "Zenith City" with 56,403 bushels of oats, 47,182 bushels of rye and 71,416 bushels of barley ; a total of 175,661 bushels of grain. The list of steamers in the port includes the "Robert Fulton" with 191,300 bushels of wheat ; the "Empire City" with 51,560 bushels of flaxseed and 147,000 bushels of wheat ; the "Polynesia" with 200,000 bushels of corn ; the "Yale" with 240,000 bushels of oats ; the "City of Bangor" with 180,000 bushels of barley ; the "H. H. Brown" with 136,000 bushels of wheat, and the "Onoko" with 120,000 bushels of corn. Here is an aggregate a trifle less than 2,000,000 bushels for the ten boats.

There were other grain boats in Buffalo harbor that would have been called large carriers two seasons ago, but they are fast becoming small affairs, while these record breakers are to be superseded by others still greater next season. To carry the cargo of the "George Stephenson" by rail there would be required nearly 225 of the largest freight cars. During the present season, it is understood, a number of new vessels of larger capacity will be built.

RICHELIEU AND ONTARIO STEAMERS.

Contracts have been signed for two new side-wheel steamers for the Richelieu & Ontario Navigation Company, to be built by the Bertram Engine Works Company at Toronto, in 1897 and 1898. These vessels are to be in all respects equal to the best side-wheel steamers on the lakes. They will be constructed of steel ; length over all, 277 feet ; length of keel, 269 feet ; breadth of beam, molded, 36 feet ; breadth over guard, 62 feet ; depth of hull, molded, 14 feet. Work on one of the steamers, to come out late next summer, will begin immediately, but the second vessel will not be built until next winter. The route of these steamers will be between Toronto and Prescott, leaving Toronto in the evening and arriving at Prescott early in the forenoon of the following day. The run through the Thousand Islands will thus be in the morning, giving opportunity for observation of these waters. The steamers will each contain 140 staterooms, and will be designed to be allowed a full passenger list of 1,500. Engines will be inclined triple expansion, supplied with steam from four Scotch boilers. Mr. Frank E. Kirby, of Detroit, a well-known designer of lake steamers, will supervise their construction. Mr. A. Angstrom is the designer and superintendent for the Bertram works.

CARE FOR THE FORESTS.

Under the caption of "Tree Culture for Wood Pulp," there appeared in the *Chronicle* a few days ago an article written for the latitude of the United States—but applying to Canada as well—setting forth the constantly increasing demand for pulp wood—spruce and poplar—and urging the necessity of re-foresting in many parts of the United States in order that the supply may be equal to the demand. Nova Scotia has many tracts of forest land which produce pulp wood of excellent quality, so that at present there does not appear to be much necessity for re-foresting. Nevertheless the subject is of importance. Manufacture of wood pulp is a growing industry and is bound to make serious inroads into the forests. What owners of forest lands should do is to guard against the waste of their pulp wood resources—keep the cutting of trees under control, prevent the cutting of small trees and vigilantly guard against the destruction of forests by fire. Forest fires have committed great havoc in our wooded lands in recent years, and it is quite clear that if our lumber resources are to be properly conserved, greater vigilance will have to be exercised in preventing the starting and spread of forest fires than has been apparent in the past, otherwise the necessity of re-foresting will be forced upon our people sooner than they expect.—*Halifax Chronicle.*

KLONDYKE ENTERPRISES.

"Booms" may come and "booms" may go, but Klondyke goes on forever We shall soon have to adapt the old song to some such rendering, for this Klondyke rage is really becoming serious. Although British investors have now sunk well over a million in the icy gold fields, America has exceeded that many times, and by this mail we learn that two more important companies have been organized on this side, with a net capital of 18,000,000 dollars. One has already purchased five big ocean liners, and intends to equip a large fleet to control the Alaska steamship service. Meanwhile the London and Globe people on this side will launch almost immediately their British American Corporation, Limited, with a capital of one million sterling, organized to exploit the Yukon and British Columbia. With such monopolist concerns at work, what is to become next spring of the puny £25,000 capital autumn companies, or the individual digger bent on achieving death or fortune?—*London Shareholder.*

A RAILWAY STATION WITHOUT LOCOMOTIVES.

The new Union station being constructed at Boston will be unique in that no steam locomotive will come within a mile of it. Many roads will be accommodated at the new station, but all the locomotives will surrender their cars at a point about a mile out and the remainder of the journey will be made by electricity. Many advantages are expected to be derived from this arrangement, not the least being freedom from dirt, noise and smoke. All the shunting will be done by electric locomotives. A contract for the electric equipment, including locomotives, dynamos, wiring, etc., has just been let for half a million dollars. Railroad men believe that the example of the Boston people will be followed by other roads, and that within a few years the suburban business of the roads at the leading cities will be done by electricity. At present, it is not thought practical to run through trains in this way, as there is a loss in sending the electricity long distances.

TEMPERATURE OF THE KLONDYKE.

It is well to know that the climate of the Klondyke is being maligned. We have indisputable proof of this in a paper contributed to the "National Geographical Magazine," Washington, by a member of the Biological Survey, who has lived at St Michael's for several years. During one of the winters, that of 1880-81, he procured through an agent of the Alaska Commercial Company who was stationed at Fort Reliance, almost the identical site of the present Dawson City, a series of daily observances, with thermometer readings. The Yukon froze over during the night of November 2nd, and on the 14th of May the ice first started. That is not so very different from the record of the Red River, at Winnipeg. . . . . So far as the cold is concerned, anyone who can stand the North-West can stand the Klondyke, as there is not much to choose between them. This is owing to the fact that our isothermal takes a turn up around that region.—*Winnipeg Free Press.*

PUBLIC NOTICE

is hereby given that all persons who take out ordinary participating Policies in the

Canada Life Assurance Company before 31st December, 1897, will at the next Division of Profits, receive

Three Years' Profits

being one year's additional bonus over those policies issued in 1898. Enquiry should be made without delay from LOCAL AGENTS by intending assurers.

The Sun Life Assurance Co.

Money in Insurance WHEN SECURED

ON THE COMPOUND INVESTMENT PLAN OF THE

NORTH AMERICAN LIFE ASSURANCE COMPANY

The special provisions of this advantageous plan of insurance are:

(1) The return as a mortuary dividend of all premiums paid beyond the 10th year, together with the face of the policy should death occur within the investment period selected.

(2) The loan to the insured if desired of all premiums beyond the 10th year, and should death occur after that and within the investment period selected, the full face value of the policy is payable, premium loans, if any, being cancelled.

The North American has a larger ratio of assets to liabilities and net surplus to liabilities than any other Canadian Company.

Pamphlets explanatory of the Compound Investment and other attractive plans of insurance furnished on application to

WM. McCABE,

DECISIONS IN COMMERCIAL LAW.

BARBER v. MCCUAIG.—A mortgagor of land sold the equity and took from the purchaser a covenant to pay off the mortgage which he assigned to the mortgagee, who afterwards, without his knowledge, took by assignment from the purchaser the benefit of similar covenants from sub-purchasers, agreeing to exhaust her remedies against the latter before suing the purchaser. The Court of Appeal decided that the mortgagee had not thereby lost her right of action on the mortgagor's covenant in the mortgage, and if the latter's rights against the purchaser of the equity from him had been impaired by the plaintiff's conduct, that would be matter for damages after inquiry.

In re RUBY—In the administration by the court of the insolvent estate of a deceased partner, the surviving partner is entitled to rank for a balance due to him in respect to partnership transactions and partnership debts paid by him, when apart from his claim there would be no surplus available for partnership creditors, says the Court of Appeal.

MASSEY-HARRIS CO. v. WARENER.—The plaintiff, on the 4th of December, 1893, recovered a judgment against the defendant, which was registered in the Land Titles Office in July, 1896. The defendant, on the 11th of August, 1896, became entitled as a homesteader to a patent for a quarter section, but on the 30th September he signed a quit-claim deed in favor of his wife, in consequence of which the patent issued in his wife's name. At the time of the transfer the husband was insolvent. The transfer was given without consideration and for the purpose of protecting the husband against his creditors, the wife claiming no interest in the land other than as trustee for her husband. The plaintiffs asked for an order directing a sale of the lands to satisfy their judgment. The defendant admitted that the judgment was a charge on the lands, but claimed they were exempt from sale under the Judgments Act, which provides that no proceedings shall be taken under any registered judgment against "the land upon which the judgment debtor or his family actually resides, or which he cultivates either wholly or in part." As the defendant and his family had been living on and cultivating the land ever since he took it up as a homestead, the referee was of opinion that it was exempt from sale, although it did not belong to him, and he dismissed the application. The plaintiffs appealed to the Court of Queen's Bench of Manitoba, where the appeal was allowed, the order of the referee set aside, and an order made for sale of the lands. The court decided that it might be assumed from the evidence that the conveyance from the defendant to his wife was fraudulent and void as against creditors. Still, such a conveyance is not void, but voidable; it is good as between the parties to it, and so, as between the defendant and his wife, the title of the lands was in her and he had no interest in them. The intention is manifest that the lands that are to be exempt from sale under s. 12 of the Act are the same kind of lands that are dealt with in the preceding sections, *i.e.*, lands that belong to the judgment debtor himself, and that would be bound by the registration of a judgment against him at the time the exemption is claimed. The case of a man claiming as his exemption land that does not belong to him and in which he has no interest, is one that is altogether outside the scope and intention of the statute.

Mercantile Summary.

THE assignment is reported of J. & S. Jones, dealers in hardware at Pembroke, Ont. The firm is quite a young one, having succeeded Gibson & Jones in the spring of 1896. Last May they compromised at 50 cents, cash.

THE Toronto Furniture Supply Company advertises its business for sale. This company has been in existence in this city for a number of years, and has developed considerably. The premises at present occupied are in a good section of the city, and well adapted to the requirements of such a concern, while the stock itself is a first-class one.

NAVIGATION of Lake Superior for 1897 closed with the sailing on Monday last of the steamer "Gilchrist." Frank E. Gibbs, Dominion Grain Inspector, has compiled statistics for Port Arthur and Fort William for the last three years in the wheat trade. The totals for these years are as follows: 1895, 10,550,000 bush.; 1896, 12,000,000 bush; 1897, 17,000,000 bush. received at these ports.

ON Tuesday evening of this week a meeting of the Retail Merchants' Association was held in the parlor of Shaftesbury Hall. The system of a business tax was discussed, and by a standing vote those present decided to press the matter strongly before the City Council. Every member present signed a petition, pledging himself to give his support and influence only to those aldermanic candidates who favor the business tax as a relief to retail merchants.

THE enterprising people of the *Inland Sentinel*, at Kamloops, B.C., have published a handy map of the routes from Kamloops to the Canadian Yukon. It shows the auriferous belts of all three districts, Cariboo, Omenica, and Cassiar, as far north as the Teslin Lakes, showing in colors the trail, the wagon road, and the surveyed line of railway. Deposits of coal, mica, iron, copper, and the precious metals are indicated upon it. There are coal outcropping at several places, it appears, between Quesnel and Hazelton.

THE Albion Iron Works at Victoria, B.C., are busy. A river steamer made of three-sixteenths steel is being built there, to be ready by spring for the Canadian Pacific Navigation Company for service on the River Stickeen between Wrangel and Telegraph Creek, connecting with the ocean steamers of this company running northward from Victoria. The new steamer will be 140 feet in length and 27 feet beam. When loaded—she will be capable of carrying 200 tons of freight and 300 passengers—on thirty inches draft. The same works are to build other steamers, probably for the Stickeen and the Yukon. The Hudson's Bay Company are to build a new one, and to rebuild the "Caledonia" when she comes from Port Simpson in January. There is also a story that twelve steamers are to be built in Victoria for a wealthy company, of Boston, Mass., who will use them for service on the lower Yukon. These vessels are to be from 75 to 140 feet over all, and from 17 to 30 feet on the beam, and of exceedingly light draught.

THE extensive match factory of the E. B. Eddy Company at Hull, near Ottawa, is to be remodeled and fitted with the newest American machinery to make new kinds of matches. Mr. Eddy has struck hands with the Diamond Match Company, the gigantic American concern, which has a capital of $7,000,000 and assets of $20,000,000, controls the match trade of the United States, and has factories in England, France South America and Japan. Once upon a time Mr. Eddy measured swords with these people, when he took orders for matches in the United States. This was about 1880. The Diamond Match Company thought he should confine himself to the Canadian market only, so his finished matches were stopped at the border. He then sent match splints to Ogdensburg and started a factory there. Very shortly after the Diamond Match Company found it to their advantage to buy Mr. Eddy out, which they did, and ever since the two parties have respected each other's territory.

AN arrangement which will probably double the output of coal mines in Cape Breton is thus referred to by the New Glasgow *Chronicle:* A contract was signed in Montreal last week between the New England Gas and Coke Company of Boston, and the Dominion Coal Company, for the delivering of 800,000 tons of coal yearly, with the right to receive 1,500,000 tons at the same figure. The New England Gas and Coke Company has a capital of $17,000,000, and is composed of W. L. Elkins, Philadelphia; Hollister & Babcock, New York; Rockefeller & Rogers, H. M. Whitney, and others, of Boston. The contract is said to be signed for a term of twenty years, and will double the output of the mines, and will be a great boom to the Nova Scotia coal industry, as well as to the revenue of the province. It means the average clearance of one large steamer per day from the Dominion Coal Company's wharves at Cape Breton in order to fill the contract of 800,000 tons, or two steamers a day to Boston from these mines in order to fill the contract for 1,700,000 tons.

MERCHANTS and others report business fairly prosperous in the neighborhood of Uxbridge, Stouffville, and Markham, in the Counties of York and Ontario. These towns are surrounded by a good agricultural country, and there is some talk of establishing several butter factories in the vicinity of each town, which will further contribute to their prosperity. A good many improvements have been made also in the stores and other buildings. W. A. Broddy, of Uxbridge, has built a large addition to his store by adding in the rear a two-story building with basement of 75 feet extent, also by refitting the entire building for a departmental store. The front windows, which are of plate-glass, have reflecting glasses, and the interior is handsomely decorated. Mr. Broddy has been in successful business in Uxbridge fourteen years. J. F. Brownscombe, too, is about refitting his store, and when completed will add very much to the appearance of that part of the town. A. T. Button, who is one of the oldest business men in Uxbridge, has a large store, which has been improved also of late.

The GURNEY-MASSEY CO., Limited
MONTREAL

Mercantile Summary.

The first calendar for 1898 to reach us is that of the Morris, Feild, Rogers Company, of Listowel. And we do not expect to receive a prettier one.

The customs collected at the port of Winnipeg during the month of November, amounted to $70,151.23, compared with $47,868.67 in the same month last year.

Many of the retail dry goods stores throughout the country resemble departmental stores in the varied collection of goods which they have prepared for the holiday trade.

It is stated that a branch of the Banque d'Hochelaga is to be established in Sherbrooke in the near future, and that Mr. W. Gaboury, of the Banque Nationale, will take charge of it.

The brick market is looking up, and the Ormstown *Courier* informs us the Crown Brick Co., of that place, had received orders for 250,000. The company will probably build a new kiln next spring.

Mr. J. A. H. Plante, of Valleyfield, who recently sold his business for the purpose of going to Klondyke, had his valise containing $500 stolen on a Milwaukee train, bound for Seattle. He will return to Valleyfield.

Remittances have come in well this fall; better than for several years, in our experience, and this betokens more active business and a better feeling. But there are still several hundreds of subscribers from whom we should like to hear, with a post office order enclosed.

Among companies incorporated by letters patent of Ontario, we observe the London Biscuit and Confectionery Company, Limited, capital $10,000; the Triangle Wheat Company of Ontario, Limited, capital $24,000; the Parkhill Basket Company, Limited, capital $5,000.

The business movement in Winnipeg is active, as shown by the returns of the Bank Clearing House in that city. The increase in the figures over last year continues to be marked. In the week ended Dec. 9th, 1895, the clearings were $1,756,634; in the same week last year they were $1,925,006, and this year they had increased to $2,489,306.

The erection and fitting up of the building for the branch of the Bank of Hamilton at Orangeville, has just been completed. The new building is situated on the corner of Broadway and First streets, and is three stories high with basement. The offices of the bank are, of course, on the ground floor, and the manager, Mr. H. H. O'Reilly, has looked carefully after the fitting up of its various departments, which are tastefully ornamented. The staff will take possession in a few days. The new premises are a decided improvement to that part of the town.

Being lately interviewed by a reporter, John Wanamaker, of Philadelphia, spoke on a subject of which he is well qualified to speak. He was asked if it pays to advertise when times are hard. "When the times are hard and people are not buying," replied Mr. Wanamaker, "is the very time that advertising should be the heaviest. You want to get the people in to see what you have to sell, and you must advertise to do that. When the times are good they come of their own accord. But I believe in advertising all the time. I have tried all kinds of advertising. Having at one time spent a great deal of money in posters and bills, I gave that up long ago and think that newspaper advertising is by far the best."

We are going to be the town of the Maritime Provinces in the future, says the Parrsboro *Leader*. Fine water system, nice school buildings, electric lights, and all modern improvements. Now the town wants a post-office building.

The Vulcan Iron Works, at Winnipeg, have been bought by John McKechnie, who is already practically in possession of that important industry. The *Commercial* says that E. G. Barrett, who has been bookkeeper for the firm for a number of years, will probably take an interest in the business with Mr. McKechnie.

FURNITURE BUSINESS

Mercantile Summary.

A RECENT London cable states that Canadian purchases, especially of textiles, in England are largely increasing. British exports to Canada last month increased 35 per cent., as compared with November, 1896, while British exports to all countries increased only 6 per cent. Canada, on her part, sold in the British produce markets 24 per cent. more in November and 23 per cent. more in the eleven months than in 1896; the percentage of increase in British imports over 1896 was only some 3 per cent.

A DEPUTATION of oatmeal millers, composed of S. Nairn, of Winnipeg; Mr. Ker, of Victoria; A. Kelly, of Brandon, and E. Nicholson, representing Dow & Currie, of Pilot Mound, met the Winnipeg Board of Trade last week concerning the tariff on oats and oatmeal. The council decided to lay the matter before the Government, without suggesting whether the duty should be lowered on oats or raised on oatmeal, but urging that the duty should at least be equalized.

MR. ROBERT SIMPSON, head of one of the large departmental stores of Toronto, died this week, after an illness of some months. Mr. Simpson was a thorough dry goods man. He came to this country from Morayshire in Scotland in 1855, and settled in Newmarket, where he served for a time as a clerk in a store. About 1860 he set up in business for himself in that town. About 1872 he removed to Toronto, and for twenty odd years has done a dry goods business, and of late a departmental store business, with success. He is understood to have accumulated wealth.

In the Quebec Assembly a bill is introduced to amend the Municipal Code. Under its provisions county councils are authorized to acquire machines, stone crushers and rollers to improve and maintain roads, whether local or county, and to arrange with local municipalities to allow them the use thereof for their roads gratis or for hire. An amendment was moved giving to towns of a population of less than 4,000 the right to join with the county councils in which they are situated and buy all necessary machines to improve the roads. With this amendment the bill was passed

A REDUCTION of rates is announced by the Dominion Express Company, on goods from Winnipeg westward to points in Manitoba, the Territories and British Columbia. These reductions will amount to from eight to twenty per cent. The following are the comparative figures to several of the principal points in the west. Brandon, reduced from $1.50 per 100 lbs. to $1.25; Vancouver, $9 to $8; Victoria, $9.50 to $9; Calgary, $5.75 to $5; Macleod, $7 to $6.50; Edmonton, $8.25 to $7.50; Regina, $3.50 to $2.75; Moose Jaw, $3.50 to $3; Deloraine, $2 25 to $2. The new tariff goes into effect at once.

MATTERS are moving in connection with the Intercolonial Railway. Hon. Mr. Blair and the superintendent of the road, Mr. Pottinger, were conferring on Saturday with Messrs. Greenshields and Mitchell of the Drummond Counties Railway, the result of which, it is said, was the decision that the Intercolonial would assume definite control of the Drummond County road on the 1st of January next. The traffic manager of the latter road, Mr. A. Ouillette, was also seeing Mr. Pottinger about the superintendency of the road from Montreal to St. Flavie, eighty miles below Riviere du Loup. It is understood that he has been appointed over this division.

Mercantile Summary.

GRANBY, QUE., has a new industry in a slate paint company. It is stated that the promoters, Messrs. J. L. Dozois, A. Marchessault and others, have already placed orders for the machinery, are erecting their power house, and expect to be in full operation in a few weeks.

SHEWAN, TOMES & Co., of Canton, in their advices under date of October 23, say of the matting market that since their last advices the palming men have again gone on strike, and all Canton palmed matting has to be sent to Lintan to be palmed. Workmen at the latter place are demanding more wages for the extra work, and prices are slightly higher all round.

THE rumors of impending trouble in the Quebec Shoe trade, referred to in our market report of this week, have unfortunately been verified. The suspension of Leclerc & Cote, is now announced. They are said to owe $10,000 to one Montreal house, but general liabilities are not believed to be very large. Another house is also stated to be taking stock with the view of consulting creditors.

WINNIPEG business circles were startled last week to hear of the failure and assignment of the wholesale grocery firm of Turner, McKeand & Co. At first a branch of the Hamilton house of James Turner & Co. it became later an independent business, the principal partners being James Turner and the late Major Mackeand. The latter died several years ago. Mr. Turner has been absent from Winnipeg for some time and Mr. Naismith has been manager of the business. The firm was at one time reported to have a capital of $40,000, and it is said that the statement will show a surplus The assignee is D. R. Michaud, the accountant of the firm. A meeting of the creditors was to be held on December 16th.

THERE were two young men in Listowel who became tired of clerking and joined a farmer named Stevenson to open a general store, under the style of Barber, Watson & Co. None of the three appear to have been possessed of much, if any, available wealth, and their assignment at this early date need not have surprised any one.——An offer of compromise is made by McMurtry Bros. at 35 per cent., payable in cash. They succeeded McMurtry & Gowan, general storekeepers, Midland, in August last. Frank McMurtry had been in business, but never was supposed to have made money. Their offer, however, was declined, and they assign with liabilities of $4,000 and assets of $2,000.——Another assignment is that of Chas. W. Smith, cheese manufacturer, Centralia.——A bailiff is in possession of the general stock of R. E. Porritt at Milton, which was mortgaged a short time ago, and he has since assigned. Porritt has made several changes in his business career. Years ago he was in the flour and feed business in Toronto, from there he went to London, where he tried to organize the Metallic Supply Co. Then he went to Milton, where he appears to have organized the Milton Wire and Roofing Co., in which he has now little or no interest. In November, 1896, he bought the hardware stock of Head & Co., and has assigned as already stated.

THE Board of Trade officials estimate the cost of strikes in Great Britain during this year at $757,000,000.

A SHOE dealer in Yarmouth, N.S., Arthur S. Cook, has assigned to F. Stoneman. Liabilities about $7,500; assets about $4,500. The Amherst Boot and Shoe Company for $1,000 is the only preference claim.

FROM Nova Scotia we hear of the failure of A. S. Cook, a shoe dealer, of Yarmouth, with liabilities of $7,500. Of this amount $1,000 is preferred, and there is also a chattel mortgage of $3,000.——James Cameron, grocer at Springhill, whose affairs have been in the assignee's hands since September, is trying to settle up at 20 cents.——A general store-keeper at New Germany, H. C. Pickles, has been trying to compromise at 40 cents, cash, but the offer has apparently been declined, as the stock has been advertised for sale.——The Eastern Trust Company, of Halifax, has been appointed receiver to the estate of R. E. Sweet, general merchant, Country Harbor. Sweet failed several months ago, making an assignment, but some of the creditors have recently taken exception to the assignee.

THE

BRITISH MORTGAGE LOAN CO.

OF ONTARIO

DIVIDEND NO. 39

Saturday, the 8th Day of January prox.

The Transfer Books will be closed from the 20th to the 31st inst., both days inclusive.

By order.

JAS. C. McGEE, Manager.

Dated, Toronto December 1st, 1897.

A. L. DRAKE, hotel-keeper at St. Stephen, N.B., is reported an absentee. He leased both hotel and furniture, and has left few assets.

THE failures in November were swelled, according to Dun's *Review*, by three of exceptional magnitude, a Minnesota capitalist for $1,470,000, a Wisconsin lumber concern, including several minor corporations, all practically owned by one man, for $1,250,000, and a publishing house in Chicago for $800,000. These failures all sprang from causes quite apart from the existing state of business, and cover $3,520,000 of the liabilities of the month, leaving only $8,090,195 for 1,038 other failures in various branches of industry and trade.

MONTREAL happenings among traders have been as follows since our last: McDonald & Wallace, manufacturers of shoes in a small way, have had to assign. Mr. McDonald was a shoe traveler for a dozen years, and began on small capital in March last year, shortly afterwards taking Mr. Wallace into partnership. The direct liabilities are estimated at about $3,000, and indirect $7,000.——Reynolds & Co., who leased the "Hotel Cadillac" in January last, have not been able to make the business go successfully, and are offering 25 per cent. cash.——Pepin & Frere, a small dry goods concern, composed of two young clerks, who began as "proprietors" in January, 1896, are insolvent.——Odilon Gagnon, who was formerly a journeyman tailor, started a men's furnishing shop three years ago, afterwards branching out into general dry goods He has had to assign, and owes some $9,400.——A demand of assignment has been made upon F. X. St. Amour, a small Montreal grocer, who owes $1,250.

QUEBEC Province country failures have been rather more numerous of late, but, as indicated below, none of them is of an important character. D. J. Evans, of Richmond, who started a small grocery last spring, and also canvassed the surrounding country for tea orders, has assigned at the instance of his principal Montreal creditor; liabilities about $1,800.——Another small grocery concern at Sorel, Thibodeau & Co., by name, have filed consent to assign. Mr. T., because of a former failure, used the cover of his wife's name.——Mrs. O. Lapointe, of Ste. Rose de Degele, is asking creditors to accept 25 cents, cash, for their claims. Her husband, who did a general business, was accidentally drowned in August last.——An assignment has been made by B. Premont & Co., general dealers, of St. Felicite. Mr. P. was formerly of the firm of Premont & Collin, who failed in 1895, since which date he has done business under the above style, using his wife's name.——P. D. Proulx, grocer etc., at Asbestos, has assigned. His wife formerly carried on a small business for some years at L'Avenir, as Miss Jane Gagnon. He married her in 1895, and shortly after removed the business here.——R. Gagnon is an old-time merchant at L'Anse St. Jean, having been in business there some thirty years. Of late he has apparently fallen behind the times, having been complained of as slow for several years past, and he is now seeking a settlement at 40 cents. His business recently has been quite small, and his liabilities are $3,400.——Joseph Godbout, of St. Raphael, formerly a farmer, and doing a small general business, has made a voluntary assignment, owing about $2,000.

THE Slocan News Company, which is not incorporated, evidently has been disposed to do a business too large and diversified for its limited capital. At one time they have had grocery and stationery shops in Three Forks, Slocan City, and Sandon, B.C. The former had been disposed of some years ago. They also had a large transit business. Among their assets, which are put down at $15,800, over $4,000 is made up of horses, sleighs, trucks, etc. Lately they have been reported slow in meeting their bills, and although they claimed a surplus of $12,000, they a few weeks ago suffered loss by fire, and are wanting to compromise. Later reports state that Hammond Bros. & Co., Limited, have taken over the business. C. K. Hammond was the former manager of the concern.

THE SITUATION.

The recent talk of a coalition at Ottawa originated in Quebec, and its echo was scarcely heard beyond the limits of that province. If it was intended as a feeler, the reply negative has been sharp and decisive. It has come in a shrill voice, from opposite quarters of the wind. At present, no coalition is possible. The men who go into open revolt against the leaders, behind whom there is a strong numerical majority, are generally the ones who pass out of the race without leaving any signal achievement as a monument of their exertions. Papineau, long omnipotent in Lower Canada, went out of the race when, in 1848, he refused to put himself in harmony with the new state of things. Sir John Macdonald's success was owing largely to his habit of constantly recruiting his strength from the ranks of the Opposition. Sir Wilfrid Laurier is accused of following this precedent. Sir John's engaging new recruits not seldom raised hostility in the ranks of his old friends; but he had a magic power of convincing them that it was all for the best; whether Sir Wilfrid will be equally successful remains to be seen. That he has promised a governorship to two different persons and left the evidence in writing, is in the last degree improbable. The present condition of things in the Quebec wing of the Government supporters, is to some extent not unlike that under the second phase of the Lafontaine-Baldwin government, with this difference, that besides the friction between the old Liberals and the new, which largely meant those in and those out, there was then a question of principle in connection with the secularization of the Clergy Reserves; now nothing is visible in the commotion but a question of men, of the services they have respectively rendered, and the rewards to which they are entitled.

An interview between the Georgian Bay lumbermen and the Ontario Government has apparently brought the question of the exportation, or non-exportation of logs, under licenses to be issued hereafter, nearer to a settlement. The lumbermen no longer ask that the exportation of logs should be forbidden, under existing licenses. Mr. Hardy took strong ground, as any minister or any court would have been likely to do, against making any restrictions which did not exist at the time the contract was made between the American lumbermen and the Ontario Government for timber limits. This point settled, the chief remaining question is as to the restriction to be put on when future licenses are granted. At present our lumbermen, who look to the American Market for purchasers for their lumber, are under an adverse discrimination of $2 per 1,000 feet. As the possessor of the raw material Canada has the means of restoring the equilibrium, and she is bound to do so, in some form. If the Americans must have our lumber, it is plain that some remedial measure can be made to work; if they can get along with their own Southern pine, nothing we could do would force them to buy ours, except on their own terms. There is very little doubt that ours they must have; and if so, they will be glad to receive it on the best conditions open to them. An instance has occurred which shows the difficulty of enforcing an agreement with a foreign company using Canadian raw material to work it up in Canada. An American company, which agreed to work up nickel in Canada, did much of the work in the United States, and now proceedings are taken to put an end to the privilege, as well as the abuse of it.

Secretary Gage's currency plan is perhaps the most extraordinary of all the thousand schemes that have been hatched, since the American Republic came into existence. He does not respond to the cry that "the Government ought to go out of the banking business," but instead proposes that it should plunge in deeper than ever, to the extent of standing sponsor for all the paper, secured and unsecured, which he proposed to authorize the National Banks to issue. Something may be said in favor of the Government making itself responsible for all the currency of which it permits the issue; but the co-relative of the responsibility is the profit of the operation. His scheme contains a revival of Van Buren's discredited Safety Fund System, modified, however, in such a way that some of the numerous frauds committed under it could not be repeated. But if you permit banks to start with only $25,000 of capital, anywhere in the woods, and to issue notes to the extent of one-third more than the security they deposit, a revival of the old pandemonium of bank frauds could scarcely be prevented. The proposed permission of banks to start with so low a capital is of course a sop to out-of-the-way country places, and is doubtless intended that it shall secure preference to National over State banks. So far as the proposal leaves the profits of circulation, for which the general Government is made responsible, to private corporations, it is sure to meet effective opposition. If it were to be adopted the end would inevitably be that the Government would take both the whole circulation and the profit to itself. There never has been a time since the Congress came into existence when such a plan could have been passed into a law. Whether any other member of the Government accepts Mr. Gage's scheme we do not know; the President gives it only a partial endorsal.

The finances of the Province of Ontario are in a fairly flourishing condition. Owing to the early date at which the financial statement of the Treasurer, Mr. Harcourt, is made, we have, so far, returns for only ten months; during that period the receipts $3,698,280, exceeded those for the previous year by $208,609. The receipts of ten months exceed the estimates for the whole year by $482,000. It was a good sign that the principal increase came from Crown Lands. The average annual receipts from this source for over a quarter of a century (26 years), have been within a fraction of a million of dollars ($978,264) When the Government of United Canada surrendered the license fees, it gave them to the municipalities; afterwards, when Provincial Governments had been created, that of Quebec kept for itself all these fees; the Government of Ontario divides them with the municipalities. An Ontario budget speech is always different from any other budget speech, in that it invariably deals with a surplus, not necessarily a surplus of the year, as at present, but a permanent surplus. What the amount of the surplus is has become the traditional battle ground of party, the Opposition contending, among other things, that the liabilities for annuities sold, to obtain funds to subsidize railways, should be capitalized, and deducted from the surplus. This the Government invariably refuses to do, alleging that though a liability, these annual payments do not constitute an ordinary public debt. The Treasurer puts their present value, if they had to be paid to-day, at $2,732,865. But, he adds, if this were treated as an ordinary public debt, contrary to the practice of all Governments, and deducted from the surplus, the surplus would still stand at $2,525,459. The annuities, in reality, constitute an obligation in constant course of payment, and which, in the stipulated time, are paid off out of revenue. An ordinary debt, on which only interest is paid, unless provided with a sinking fund, becomes a perpetual burthen. This is the difference between the two methods of borrowing.

Mr. Justice Ferguson decides that the city council of Toronto cannot be restrained by injunction from entering into an agreement with the churchwardens of St. James' to enable the latter to obtain property for the purpose of extending the present cemetery. The wonder is that any one should have thought there is any power to restrain the city council from doing what it has express power to do. It will be generally conceded that a cemetery is not a cheerful neighbor, or one that one would willingly build one's house beside. Until recently the existence of a cemetery in a city has been regarded as injurious to health, and the prohibition of intramural interments became the rule. But this is one of the bogies which science has banished forever, and henceforth it will not even be capable of frightening children. If the proposed arrangement be carried out, the city will get, as a bonus, some of the cosy wooded banks of a ravine, in which any citizen can, if he likes, at pleasure find himself at once in the city and in the primeval forest. On public grounds, it is desirable that the arrangement should be carried out. If private property owners in the neighborhood have any rights that will be interfered with, the law will guard them in some form. In all such cases public sympathy goes with the public interest. That is an additional reason why the interests of private parties should be safeguarded.

TAX EXEMPTION.

It requires little argument to show that an increase in the aggregate of taxable property in a municipality, unaccompanied by increased expenditure, will lighten the burden of the individual taxpayer. When we are informed that in the city of Toronto taxes are levied upon an assessment of 127 million dollars, and that 26 million dollars invested in property is exempt from taxation, a natural conclusion is reached that the system of levying taxes among us is very unjust. But a close scrutiny of the interests which are exempted from paying taxes reveals that only a portion of this 26 million dollars is available for the purposes of taxation. We must first make a deduction of $4,537,049 from the exempted property, which amount represents the value of the city's holdings. It would obviously be a loss of an amount equal to the costs of collection to tax this property. The Ontario Government has $3,786,700 invested in property within the city limits, while the Dominion Government owns property valued at $1,251,317. The discussion of the advisability of taxing Government property opens up a very wide question. There is no doubt any plan to this end would meet with violent opposition from the inhabitants of other parts of the province, who already complain that Toronto, by the very possession of provincial buildings, is receiving an undue share of Government assistance. If all the municipalities in the Dominion were to tax Government property, there would need to be a material increase in revenue, and for the provision of this the citizens of Toronto would, of course, be obliged to contribute. Then, again, more than $5,600,000 of the exemption consists of school property, which the greatest enthusiast in favor of exemption can scarcely consider available for the purposes of taxation. These different counts exhaust more than 16 million dollars of the total exemption.

Of the remaining amount, about one-half, five million dollars is church property. The arguments in favor of and against the taxation of church property are familiar to all our readers and need not be repeated. If it be considered advisable to tax the holdings of church organizations, there arises the question of valuation. Many of the older church buildings down town have depreciated in value with the movement of the residential part of the city northward and westward, and there is little doubt that were the exemption on church property removed, strong representations would be made against the present assessment. Charitable institutions, most of them receiving assistance from the city, have property valued at $1,272,000 which could scarcely be taxed. There is, however, about $380,000 which, exempted as cemetery property, might be brought under taxation.

The city by-laws which have exempted machinery, plant and other kinds of manufacturers' property to the value of $2,000,000 have been passed because of competition with other cities in an effort to attract industrial concerns. The principle of the "bonus" system, whatever form it takes, is wrong; but it is a bold man that will take the ground that Toronto is in a position to take a strong stand and fight this evil alone among Canadian municipalities. Anything that is done to relieve the municipalities from the burdens imposed upon them by grants in the shape of loans, gifts and exemptions to industrial concerns, must come from a union of the municipalities, and should take the form of Government legislation.

The exemption of income under $700 in amount is designed to help the poor man by placing the burden of taxation on the rich. In this way $2,355,000 is relieved from taxes; the policy of this provision is questionable, and it may be well considered advisable to impose upon these incomes a moderate tax, though perhaps not in equal ratio with those of people in better financial circumstances.

The announcement has been made that this matter is to be discussed in the few weeks preceding the municipal elections. It is to be hoped that the discussion will be thorough and the question considered in all its lights. Any attempt to misrepresent facts in this connection can but be detrimental to public interest. Grave inequalities in taxation have led to great revolutions, and minor ones must always be the cause of unrest and discontent.

News from Great Britain last Saturday stated that the English Sewing Cotton Company, a combination of fifteen thread concerns in opposition to the Coates', was brought out on the 9th inst., with a capital of £2,750,000, which was twice subscribed in Glasgow.

FARMERS LOAN AND SAVINGS COMPANY.

When we wrote last week about this company and warned shareholders that they must be prepared to lose a part of their share capital, it was hardly suspected by any one outside of the interim liquidator and his staff that such an exposure of the state of its affairs would be made as that of Wednesday, reported elsewhere. The lack of proper system which characterized the management of the company, the viciousness of its methods in dealing with loans in arrear, the curious lethargy or obtuseness of the directors in accepting year after year assurances from the easy-going manager and declaring dividends which were never earned, form a startling page in the history of Ontario loan companies.

According to the report of Mr. Osler, the interim liquidator, a balance sheet had not been taken off since the company was organized, and the method of book-keeping was such that it kept in the background for a long time the fact that a large amount of the company's assets was not bringing in any revenue. The company's method of arriving at profits was "to take the whole amount of capital stock, reserve fund and borrowed money—assume that these brought in a rate of interest, 7 per cent. in earlier years, down to 6 per cent. latterly—take this total as profit, charge the amount up to investment account, crediting investment account with the money actually paid in." Here is rule of thumb, surely! The result of this stupid and deceptive procedure was that the company for years took credit for more income than it earned. It is small consolation to be told that this sort of thing was done in ignorance and incapacity, and not with fraudulent intent. Investment account, we are told, was treated in a way which can best be described by an illustration. Suppose a loan of $10,000 made in 1890, at six per cent. No interest is paid on it for five years. But year by year the interest is added, until the loan stands in the books of the company in 1891 at $10,600; in 1892 at 11,200, and so on until in 1895 it appears in the books of the company at $13,000. But worse than this, it appears that such an account was treated as if theinterest had been paid. It is difficult to understand how the directors permitted the declaration of dividends of late years, when they should have known that many of their loans were yielding no interest. However, can they not be made to pay for their delinquency.

This expose will be tolerably sure to have the effect of making shareholders and investors enquire into the methods by which our mortgage loan companies conduct their business. And naturally they will desire no repetition of Farmers' Loan Company book-keeping. What they may well desire to see done—and it is an eminently proper method of book-keeping, pursued by several loan companies in this city—is separate columns in the ledger of the company for charges of interest and for payments of interest and payments on principal, or whatever equivalent method will show the state of a loan at any given time. Then, at certain periods a clear distinction should be made in the books between loans which are current and on which interest is being received, and loans which are dormant or yielding no interest. Some companies distinguish these respectively as "loans" and "real estate." The actual condition of the company appears to have been a revelation to the late president, Mr. Mulock, and to the other directors, no less than to the public. Mr. Mulock, for the last ten years, kept on steadily increasing his investments in the company, and encouraging his immediate connections to do so, till their joint holdings foot up to $100,000. This was done in the belief that the company was in a sound condition, and earning the dividends it was paying. Mr. E. B. Osler, the interim liquidator, expresses a doubt that "any of the officials of the company knew the position of the company until recently." It may be taken as proved that Mr. Mulock did not know, and this may be true of the other directors. But this excuse can scarcely be available for the manager. A bad system of bookkeeping may be responsible for much; it may have deceived the directors into believing that interest put down in the mortgage registers was interest earned and received; but it is difficult to believe that the manager could have been under any such delusion, for even if he assumed, without detailed proof, that a certain average rate of interest was earned, he could not have failed to know that it was not received. Worse than even this happened, no doubt, without the knowledge of the directors. Somebody received deposits which were not entered in the ledger. The figure of $7,000 is mentioned by Mr. Osler, which seems to fit in here. Further investigation will of course be necessary, for there are 150 depositors' pass-books not yet examined out of 400. In these cases Mr. Osler thinks the directors did not know what the manager and clerical staff, or some of them, had done; it is possible, nay, probable, that his opinion accords with the facts. These revelations open up possibilities hitherto unexpected. Ignorance of the facts, in those who ought to know, may show that there was no intent to sanction wrong-doing; but if used as a defence, where it is necessary to trust to the fidelity of others, it becomes an implied self-accusation of negligence. To constructive negligence the directors of the Farmers' Loan may, and some of them do, plead guilty. One of them, at least, showed his good faith in believing in the statements put before him by constantly increasing his holding of the stock. When such things are possible, there is clearly some want in the system.

Then where were the eyes of the auditors, who year after year certified to having "examined the books and securities of the company" and to have found them "correct and in accordance with the above statements"? One of the statements in question is that the company had investments worth $2,216,510 in 1895, reduced to $2,194,807 in 1897. Another is that the income from investments was from $115,000 to $130,000 in several recent years. What means did the auditors take to ascertain the truth of these? A business-like analysis ought to have shown the unsound condition of the company. And if auditors are not to make thorough enquiry, what are they good for?

WOOL PRODUCT DECLINING.

There has been within recent years a marked decline in the world's supply of sheep. A bulletin of the United States Department of Agriculture issued some months ago placed the aggregate decrease in numbers at 23,458,355 sheep since 1893, to which the United States contributed 9,385,344 sheep, or about two-fifths of the amount. The fact of this falling off in American herds of sheep formed a strong argument in the hands of protectionists, which, as Canadians know to their cost, resulted in a heavy duty upon foreign wool.

Recent statistics obtained from the Ontario Department of Agriculture show that in this province, which from the standpoint of sheep breeders, is by far the most important in the Dominion, in 1896 there were 995,616 sheep over one year in age, as against 1,095,995 in 1895, and 853,732 sheep under one year, as against 926,740 sheep the previous year. The total number of sheep in Ontario in 1896 was estimated at 1,849,348, as against 2,022,735 in 1895 and 2,015,805 in 1894.

This decrease in the number of sheep, besides affecting the meat trade, has naturally a disastrous influence upon the wool trade. The following table will show the distribution and decline of the production of wool in the several districts of Ontario in 1896, as compared with the previous year :—

Districts.	1896. Pounds	1896. Lbs. per Fleece.	1895. Pounds.	1895. Lbs. per Fleece.
Lake Erie	625,055	5.81	702,465	5.71
Lake Huron	775,907	5.75	877,098	5.78
Georgian Bay	730,157	5.65	855,048	5.62
West Midland	1,001,499	5.84	1,130,283	5.87
Lake Ontario..........	934,599	5.96	1,013,661	5.91
St. Lawrence & Ottawa	982,491	5.11	1,090,638	5.08
East Midland..........	352,381	5.38	372,298	5.26
Northern	179,298	5.29	173,326	5.33
The Province......	5,581,387	5.63	6,214,811	5.60

In 1896 there were 991,371 fleeces, as against 1,109,140 in 1895; the decline in fleeces was greater than in the number of pounds of wool, as the average fleece shows a gain of .3 pound in weight. Statistics for an average of the past fifteen years show that in the Lake Ontario district the breeders have accomplished the best work, securing a weight of 5.96 pounds per fleece. It is very unsatisfactory to learn of the decline of the wool industry, and the only comfort that can be obtained is to realize that the conditions in Canada are not peculiar to this country, but are apparently a part of a world-wide movement.

THE LOBSTER FISHERIES.

The Dominion Government fishery officials are said to be about to make certain changes in the regulations governing the taking of lobsters. In the Maritime Provinces it is understood that a regulation prohibiting the taking of lobsters under 10½ inches in length in the Bay of Fundy, is to go into effect on January 1st next. Referring to this, the Yarmouth *Times* says: "The effect of the proposed regulation would be to close every canning establishment on the Bay of Fundy shore, and give a monopoly of the canning business to the eastern part of the province and P. E. Island. Large lobsters are shipped fresh to the Boston and New York market, while the smaller ones are sold to the canning establishments, which could not do business if they had to pay the price large lobsters command. The canning proprietors are practically the outfitters for all the fishermen. From them the fishermen obtain traps, lines, etc., and pay for them in small lobsters used for canning purposes. When they are unable to furnish lobsters enough to pay for their outfits, the charge usually remains against them till the next season. Now there has already been invested in this district fully $25,000 in outfits, cans made, and other preparations for carrying on business, practically all of which would simply be thrown away if the proposed regulation were put in force at the beginning of the fishing season next month."

INFERIOR TEA.

That Canada has for some time been made the dumping ground of inferior teas that could not pass the inspection of United States officials has been frequently alleged. The Dominion authorities are taking energetic measures to prevent this practice. Recently 160 pkgs. of black tea, consigned to a prominent Montreal tea man, was seized by the customs department in that city as unfit for consumption. The owner, however, managed in the end to convince the authorities that it was not of a dangerous character. At present the examiners in the Montreal Custom House have two or three lots in their charge which stand a most excellent chance of either being destroyed or shipped out of the country.

Last week a circular was issued by the Department of Customs to collectors of customs, calling attention to the provisions of the present tariff which prohibits the importation of tea so adulterated as to make it unfit for use. Collectors are directed to forward to Ottawa for approval, samples of all tea imported into Canada from Great Britain or the United States, before delivery of the tea, unless the importer produces a certificate from the British or United States customs, to the effect that the tea has been duly approved for home consumption in the United Kingdom or the United States. When tea is imported on a through bill of lading, or entered for immediate transportation, and not accompanied by a certificate of inspection, collectors are required to exercise due care in seeing that the tea is fit for use, and are to test the tea themselves as to its genuineness. If, after such tests, the collector has reason to believe that the tea is not entitled to be entered for consumption in Canada, samples from the suspected lots are to be forwarded to Ottawa for examination. Another circular to collectors prescribes the nature of the export entry, which is to be prepared in duplicate, in connection with the goods to be exported, in place of the oath which has hitherto been required.

WOOD MARKET IN BRITAIN.

The wood market in Britain is not active, according to latest accounts. The strikes and threats of strikes among workmen of various trades have affected business in timber and lumber, and are still affecting them. Supplies of wood of almost all kinds are ample, and in some cases, as for instance at Liverpool, pine deals and boards, in excessive supply. A Liverpool circular of 1st December says that the arrivals of shipping, timber laden, at that port from Canada during the eleven months of 1897 had been 544,212 tons, which is 62,000 tons in excess of same period, 1896, and 144,000 tons more than the like eleven months of 1895. Stocks of Oregon and British Columbian pine are considerable, in Liverpool, and the supply of pitch pine ample. We append a comparison, showing that of nine varieties of wood mentioned, the only ones in which imports have not increased during 1897 are Norway and Baltic :—

Liverpool Import, 11 mos.		1895.	1896.	1897.
Quebec pine	Logs.	14,821	19,164	21,822
St. John pine..............	"	311	15	96
Pitch pine	"	69,800	83,598	101,722
Baltic and European timber	"	2,336	2,226	3,118
New Brunswick, etc., deals..	Pieces.	4,800,805	7,531,745	9,401,763
Quebec deals..............	"	2,717,530	3,638,859	5,202,356
Baltic deals................	"	841,912	1,495,347	1,345,116
Norway flooring boards	"	3,400,805	4,598,119	4,231,196
Pitch pine planks and boards	"	443,624	617,254	1,338,561

A comparison of the total imports of sawn and hewn timber into all parts of the United Kingdom of Great Britain and Ireland finds its accustomed place in the *Timber Trades Journal*. It gives the figures for the month of October last, and also for the ten months ending with that month. The totals of hewn and sawn are 8,389,618 loads for ten months this year, compared with 7,386,538 loads in the same period of 1896. The increase this year is thus about twelve per cent. There are one hundred and eighteen ports in the list, of which 73 are in England, 29 in Scotland, 16 in Ireland, and increased import is common to nearly all. We copy the figures of a score of the leading ports: Of Cardiff the increase was 21 per cent., and at Liverpool about the same. Grangemouth and Newcastle are the only ports of moment that imported more last year than this. Newcastle took in 1896 more than twice the quantity of this year. A list follows:

Port.	Loads, Hewn and Sawn. 10 months 1897.	Loads, Hewn and Sawn. 10 months 1896.
London	1,718,304	1,551,438
Cardiff......................	775,408	610,950
Liverpool	716,972	572,726
Hull...............	696,212	583,994
Hartlepool West	455,553	348,919
Grimsby	339,015	325.535
Newport, Monmouth	245 124	216,031
Glasgow	205,683	149,853
Grangemouth	179,884	197,091
Belfast......................	172,895	118,537
Bristol......................	148,482	123,232
Gloucester	195,341	155,776
Manchester	166,161	137,205
Sunderland..................	147,411	111,291
Leith	138,551	113.974
Greenock	121,424	102,939
Borrowstounness	110,758	87,705
Fleetwood	110,461	86,387
South Shields	100,464	45,477
Dublin.......................	97,309	72,196
Total at 118 ports............	8,389,618	7,386,538

A NEW CATTLE MARKET.

There has been for some time dissatisfaction with the condition of the Toronto cattle market. Large sums of money have been expended upon the premises, and in order to meet the requirements of stockmen an additional outlay is, we understand, contemplated. A syndicate of local capitalists propose, however, to put before the council a proposition by which a franchise of market privileges shall be given them for a period of years in consideration of their paying the city a certain rate of interest on an amount of money equal to that now invested in the present market. The market would then pass from the control of the city to that of a private company. The present premises would be vacated and a lot north of the Dundas street bridge, with access to both the G.T.R. and C.P.R. lines would be selected. The investment of the city in markets has not proved very remunerative and the council should carefully weigh the new scheme. The promoters say that in the event of their plan meeting with success several large packing houses will be erected in Toronto, which, if guaranteed, should be a strong inducement to accept the project.

TORONTO TRADE FIGURES.

An increase of half a million in the foreign trade of Toronto for the month of November, as compared with last year, is to be noted, and this increase is entirely in imports, the exports being practically the same in value. In November, 1896, imports were valued at $1,274,120, and exports at $508,657; total, $1,782,777. Last month imports were $1,750,118, and exports $504,261; total, $2,254,379. With but few exceptions, all items of dutiable import in the Board of Trade list show increased purchases, the exceptions being leather, glass and china, jewelry and watches, musical instruments. We present our usual list of principal articles :—

DUTIABLE IMPORTS.

	Nov., 1897.	Nov., 1896.
Brass and manufactures of	$ 5,796	$ 3,631
Copper "	426	659
Lead "	5,295	6,678
Iron and steel "	153,965	102,041
Metal and composition	16,222	5,792
Total metal goods	$181,704	$118,801
Cotton, manufactures of............	$51,157	$37,375
Fancy goods, laces, etc.	29,743	30,231
Hats, caps and bonnets............	9,580	6,443
Silk, and manufactures of..........	47,115	28,316
Woolen manufactures..............	66,319	46,039
Total dry goods	$203,914	$148,404
Books and pamphlets	$47,753	$40,199
Bicycles and parts of	......	6,358
Coal, bituminous	29,610	22,010
" anthracite (free)	120,544	140,826
Drugs and medicines...............	25,792	22,171
Earthen, stone and chinaware......	20,552	22,954
Flax	22,640	......
Fruits, green and dried	67,976	48,996
Glass and glassware	24,935	25,271
Jewelry and watches	33,171	35,158
Leather and manufactures of	25,448	36,585
Musical instruments	12,532	12,705
Oils of all kinds	19,650	17,957
Paints and colors..................	10,400	5,972
Paper and manufactures of..........	33,566	29,410
Spirits and wines..................	10,034	7,704
Wood and manufactures of	6,532	7,717

Among Toronto's exports, the gains of the month in manufactures and dead meats have been partially offset by declines in field and forest wealth. Doubtless, the Dingley Tariff of the United States is accountable for this. The totals are as below:

EXPORTS, CANADIAN PRODUCE.

Produce of	Nov., 1897.	Nov., 1896.
The Mine..........................	$ 8	$ 104
" Fisheries	....	....
" Forest	12,258	52 289
" Field..........................	103,394	115 474
Animals and their produce	257,826	215,420
Manufactures	109,833	87,452
Coin and bullion....................	3,979	....
Total	$487,298	$470,739

Free goods were imported in unusual proportion last month. The large items are hides and skins to the value of $116,257; crude rubber, $27,681; tea, $53,996; wool, $26,207; anthracite coal, $120,544; steel rails, $125,345, and the total of free goods was $722,761, to which is to be added $22,768 worth of coin and bullion.

MARITIME COMMERCIAL TRAVELERS' ASSOCIATION.

The annual meeting of the Maritime Commercial Travelers' Association was held in Halifax on 8th December. Mr. Woodill, of Halifax, was the retiring president. The annual report submitted, which is the sixteenth, remarked the continued prosperity of the body, The membership has increased from 299 in 1896 to 315 in 1897. During the year two of the members died, and their beneficiaries received $180, and $160 from the Mortuary Fund, being the amounts to which they were respectively entitled. The financial statement by the treasurer shows an increase in our funds for the year of $2,327.70, and that our total resources now amount to $16,856 89.

"Early in the year an act was introduced into the Legislature of New Brunswick, having for its object the placing of a tax or license on commercial travelers not domiciled in that Province. Efforts were at once initiated by the board [of the M.C.T.A.] to excite the interest of the commercial public against such obnoxious legislation, with the result that the proposed measure was withdrawn. An effort was also made during the year to awaken and develop public sentiment on Prince Edward Island against the law in force in that Province taxing commercial travelers, and although it has not produced any substantial result as yet, the hope is indulged that a broader and juster view of Provincial comity and a stricter adherence to principles of taxation which are commendable and equitable, will ultimately prevail on the island."

A special circular was issued during the year, asking members to assist the executive in their efforts to obtain improved hotel accommodation and service where it is needed, and the necessity for members interesting themselves in this department of the association's work is again urged upon them.

The following officers were elected :

President—Capt. Thomas Douglas

Vice-Presidents for Nova Scotia—R. F. Merlin, B. Quinn, Joseph B. Weir, G. A. Woodill.

Vice-Presidents for New Brunswick—G. F. A. Anderson, Geo. A. Horton, A. R. Melrose, Fred. R. Murray.

Directors—W. A. Emmerson, F. P. Hayden, Frank C. Simson, W. B. Arthur, Geo. E. Davison, I. C. Stewart.

Treasurer—Wm. Robertson.

Auditors—James R. Cragg and Wm. A. Major.

COMMERCIAL TRAVELERS' ASSOCIATION OF THE NORTH-WEST.

A meeting of the Commercial Travelers' Association of the North-West was held in the board of trade rooms, Winnipeg, on Saturday evening, Nov. 27. The principal business of the meeting was the nomination of officers and directors for the ensuing year. All these positions were filled by acclamation and therefore there will be no contest for any office this year. Officers were chosen as under:

President—J. C. Mundie.

First vice-president—F. W. Drewry.

Second vice-president—W. Hargreaves.

Treasurer—L. C. McIntyre.

Directors—A. L. Johnston, A. P. Jeffrey, F. J. C. Cox, Horace Wilson, C. R. Steele, Kenneth McKenzie, G. F. Bryan, R. M. McGowan, J. T. Persse.

After discussion of the form of the annual entertainment of the association, it was decided that a conversazione should be held on Monday, December 27, at the Hotel Manitoba.

FARMERS LOAN AND SAVINGS COMPANY.

Several meetings of shareholders of this suspended mortgage loan company have been held in Toronto during the week, and at the largest of these, held on Monday last, when 87 persons were present, representing, it is said, more than one-half the total shares, a resolution was moved by D. E. Thomson, Q.C., and seconded by J. S. Lovell, and carried, asking that the court defer the appointment of a permanent liquidator until after the court shall have convened a general meeting of the shareholders and obtained their views. This meeting was presided over by W. B. McMurrich, while W. B. Macpherson acted at secretary. At the outset some plain talking was done against the action of the directors, who had asked the courts for a winding-up order, but had not called upon the shareholder for their views.

On Wednesday, 15th instant, at Osgoode Hall, before the Master-in-Ordinary, Mr. Hodgins, a large number of shareholders and lawyers, representing other persons, or debenture-holders, were present to hear the report of E. B. Osler, M.P., interim liquidator. His report is condensed as follows :

The position of the company is due to total disregard and ignorance of the first principles of accounts. No balance sheet had been taken off since the inception of the company. No attempt had been made to keep a proper ledger. Yearly accounts and balance sheets had apparently been arrived at by lump sum entries. The fact was overlooked that a very large amount of the company's assets brought in no revenue.

The method of arriving at profits was to take total amount of capital stock, reserve fund and borrowed money, assume that it brought from 7 per cent to 6 per cent., take this total as profit, charge the amount up to investment account, and credit investment account with the money actually paid in.

Years of this method of book-keeping has resulted in the company having taken credit for more income than was earned, and consequently paying out more than it received for revenue.

This system, I am convinced, has been the result of absolute ignorance and not of fraud, and I doubt much if ever any of the officials of the company had any idea as to the position of the company until very recently.

An examination of the debit accounts reveals the fact that for the last three or four years some moneys have been deposited by customers and not entered in the deposit ledger. The deposit accounts number about 500, of which about 300 have already been verified, and would seem to be correct. In about 50 there are discrepancies, totalling in the neighborhood of $7,000. Nearly 150 pass books have not yet been returned—in many cases no sufficient address being obtainable from deposit ledger.

In this deposit ledger also appears overdrawn accounts, amounting in all to over $12,000, and there are I. O. U.'s and worthless cheques as cash amounting to over $2,000.

LIABILITIES AND ASSETS.

On Nov 1, 1897, the liabilities of the company were $1,406,503.05. The assets, according to the annual statement on April 30, 1897, were $2,194,807.68 in mortgage investments. Deducting credits and adding disbursements and charges, on Oct. 31, 1897, the investments were $2,150,000.

An examination of the records at the registry office showed the amount of mortgage investment to be only $1,789,000, a difference of $361,000. This was one unearned sum, for which credit was taken. The registry office further showed that of the sum of $1,789,000, no less than $363,000 was accrued interest.

The amount of money lent by the Farmers Loan Company on farm lands is $315,000. The total of "town and suburb" loans is about $1,111,000. Of this sum no less than $641,000 was loaned on vacant lands. There are in the hands of the company and from which they collect rents, about 250 small houses and stores. The company's loans are very largely in Toronto Junction and in the suburbs of Toronto. The company's stock consists of 21,145 shares of $50 each. Of these 10,000 shares are paid up, amounting to $500,000, and 11,145 shares upon which 20 per cent. had been paid up, amounting to $111,320. Thus the total paid-up stock is $611,320. There yet remains on unpaid stock $445,000, for which the holders are liable.

Mr. Osler further said that his task had been very difficult owing to the absence of many entries; that many mortgages were on lands on which no taxes had been paid; that no sum had been paid to any bank. He advised the immediate appointment of a liquidator.

Mr. Hodgins, the Master-in-Ordinary called for nominations, and E. R. C. Clarkson, the Imperial Trust Company, the Trusts and Guarantee Company and the Toronto General Trusts were in turn nominated.

A shareholder having objected to the Toronto General Trusts Co. because of Hon. Mr. Mulock's connection therewith, B. B. Osler, Q.C., asked for the appointment of that company, It was the desire of the Scotch debenture holders, who were interested to the amount of $851,000. They had confidence in the General Trusts Company as liquidators, and would not be so likely to press for immediate payment as if an individual unknown to them was appointed.

Rev. Dr. Moffatt asked that an advisory committee be appointed, after which Master Hodgins declared in favor of the Toronto General Trusts Company. That corporation had administered with wisdom and success those estates which the Ontario Government had entrusted to it. He reminded those present that the court was really the liquidator, the Trusts Company being only the means of carrying out the rules laid down by the court. He concurred with Rev. Dr. Moffatt as to the wisdom of appointing advisory committees, and instructed the shareholders to select four good business men and the debenture holders also to select four, who, with Mr. Langmuir, of the General Trusts Company, as chairman, would form a committee.

Hon. Mr. Mulock then read a statement showing that for ten years he had not sold a share of his large holdings of the company's stock, and gave an unqualified denial to the statement made that he had "unloaded" any of his family's bad loans on the company.

A RECIPROCITY RESOLUTION.

If the merchants of Boston or Portland, Albany or Buffalo, Chicago or Detroit, any or all of these cities (who deal with and understand us), and not the rulers at Washington, had the arbitrament of the United States' relations with Canada, there might be a good chance for more intimate trade between the two countries. A week ago, at a meeting of the Boston Merchants' Association, the following resolution was adopted:

"The Boston Merchants' Association reaffirms the resolution unanimously adopted on November 10th, expressing its hope that enlarged commercial intercourse with the Dominion of Canada may result from the negotiations now pending between the United States and Great Britain, and reiterates its firm belief that a speedy adjustment of all disputed questions between Canada and the United States, and the inauguration of a wise reciprocity of trade, will conduce to the greater prosperity and progress of both nations. In reaffirming this resolution, the Board of Directors of the Boston Merchants' Association desire to express unanimous judgment that for the broad interests of the United States and Canada alike, the construction of section 22 by Attorney-General McKenna should stand as the fixed law of the land, as doubtless intended by those who framed the section."

But the politicians, most of whom misunderstand and decry Canada, and think Mexico or Nicaragua of more importance than the Dominion, seem to have more influence than the whole of the northern border States. We have learned, however, that we can exist in spite of Dingley tariffs and the cold shoulder. The New York Board of Trade and Transportation also passed a resolution regarding with "deep interest the overtures made by Sir Wilfrid Laurier and the Government of Canada looking to better relations between that country and the United States. The spirit of comity, equity and good feeling demand that peace and concord shall prevail between this country and our nearest neighbor."

INCREASED MOVEMENT IN THE STATES.

A very encouraging index of the progress of trade and manufacture in the United States are the returns of the bank clearings in the large cities. The bank exchanges for last week at thirteen leading cities in the United States outside of New York were $437,107,293, which is 16½ per cent. over last year and 7.5 per cent. below 1892. Including New York, says *Dun's Review*, the average daily for December to date is 3.2 per cent. below 1892. Exchanges in December, 1892 were unusually heavy, especially at cities outside New York. They exceeded the average for December for the preceding five busy years by nearly twenty per cent., and at New York by ten per cent. They are, therefore, well up in volume this year with other years, under normal conditions. Only cities largely affected by southern trade show important losses this year compared with 1892. The figures for the week and average daily for three months follow:

	Week Dec. 9, 1897.	Week Dec. 10, 1896.	Per Cent.
Boston..........	$107,922,106	$98,551,579	+ 9.5
Philadelphia	73,770,508	57,991,684	+27.3
Baltimore	17,243,231	14,793,196	+16.6
Pittsburg	16,022,963	13,658,201	+17.3
Cincinnati	14,145,600	12,950,850	+ 9.2
Cleveland	6,776,673	5,610,066	+20.8
Chicago.........	111,405,877	90,080,213	+23 7
Minneapolis	12,514,946	10,691,960	+17.1
St. Louis........	30,068,223	26,895,371	+11.8
Kansas City	11,298,131	11,167,208	+ 1.2
Louisville	7,196,933	6,498,431	+10.7
New Orleans	12,493,277	12,030,077	+ 3.9
San Francisco ..	16,248,861	13,010,770	+24.9
Total........	$437,107,293	$373,929,606	+16.4
New York	800,526,093	598,261,252	+33.9
Total all	$1,237,633,386	$972,190,858	+27 3
Dec. to date....	214,164,000	178,660,000	+19.9
November	204,942,000	183,739,900	+11.5
October	198,496,000	153,305,000	+29 5

Compared with same period 1892 increases are shown by Baltimore, Pittsburg, Cleveland and Minneapolis; decreases by all the other ten cities

CANADIAN INSURANCE COMPANIES IN NEW YORK.

A move of some importance has been made by the Western and British America Fire Assurance Companies. After a visit of the president and vice-president of these companies to New York last week, it was arranged that a branch office of both should be established in that city. Accordingly an arrangement has been made by which Mr. Silas P. Wood, who, prior to the purchase of the American Insurance Company of New York by the Manchester, was president of the former company, becomes manager for these two Canadian companies in New York. Mr. Wood thus renews his official relations with the British America, of which company he was secretary some seven years ago. We are told that on the organization of the British American Insurance Company of New York, for which a charter is being secured, that it too, will be placed under the same management. The arrangement outlined above is to come into operation on the Ist of January next, and the offices of the Canadian companies will be at No. 49 Cedar street. It is understood that Messrs. Delesderniers & Cluff, the present New York agents of these companies, will continue to represent a number of American companies, and that Mr. Delesderniers, personally, will manage the business of the Western and British America in Brooklyn, where he is well and favorably known. It is intended also that Mr. J. M. Biggert, who has been in the service of the Western for over twenty years, will be superintendent of agencies in the new department, which will be termed the Metropolitan district.

ANSWERS TO ENQUIRERS.

Clerk, Quebec.—You did not send your name. We do not answer such questions when asked by anonymous letter-writers.

T. G., Barrie.—The address in question, "The Development o Canada," delivered by Mr. George Hague before the Canadian Bankers' Association, was reported in The Monetary Times of September 20th, 1895.

Banker, Wiarton.—Have replied by letter.

S. M., Bathurst, N.B.—Cannot recollect or trace the article you mention. In which issue did you see it?

C. J. L., Detroit.—The Canadian Year Book is the publication best suited to give you such figures and ratios. Write to George Johnson, Dominion statistician, Ottawa.

BANK OF OTTAWA.

A very satisfactory statement was made to the shareholders of this bank at its annual meeting last week. The rate of earning had been well maintained, and the proprietors have the pleasure this month of receiving a bonus over their usual eight per cent. dividend. With reference to the paragraph in the report referring to an increase of 5,000 shares new stock, while that power was given the directors at the meeting, it does not follow that it is intended to issue such stock at once. We understand that immediate action on the premises is not likely. In any case, it would take some months to get through the legal forms and special meetings which are necessary for such issue.

The remarks of the president as to the generally prosperous circumstances of the year for farmers, and the activity in mining, were followed by a paragraph on the lumber trade of a decidedly less pleasing character. And living as he does in a great centre of the lumber trade, Mr. Magee doubtless knows whereof he speaks. One of his sentences has the right Canadian ring about it: "Let us hope the question will be dealt with [by the Dominion authorities] in a manner consistent with the interests of this country only." The general manager called attention to the fact that the aggregate circulation of the banks reached in October the highest point ever known; and that the deposits have increased nearly $23,000,000 in a year. It is interesting, too, to observe that in spite of the reduction of a half per cent. in the rate, Government deposits have continued to increase.

DRIED AND EVAPORATED APPLES.

That Canadians have much to learn of the arts of drying and evaporating apples, all interested in the trade are ready to admit. The Austro-Hungarian Consul-General at New York recently called attention to the position of the Dominion in these industries as follows:

"The dried apple industry in Canada does not occupy the high position which might be expected from the great quantity and the most excellent quality of its fresh apples. There is consequently a lack in that country of distinguished establishments which produce dried apples for exportation to Europe. This is undertaken by a number of small firms, all of whom produce 'evaporated apples,' the quality of which is, however, considerably inferior to the productions of this industry in the United States, principally, perhaps, because the exportation of fresh apples in ordinary years takes away nearly the whole surplus of the finest qualities of the crop, leaving thus only the refuse, which is not fit to be dried for exportation."

This statement, while containing some truth, is not unlikely to convey a false impression of the apple trade conditions. A sharp distinction must be drawn, as everyone in the industry knows, between apples "dried" in the farmhouses and "evaporated" in the factories. The Canadian evaporators have, with a few exceptions, failed to maintain the credit of this country by their productions. Their factories are for the most part small and the machinery incomplete. This is partly the outcome of the uncertainty of the apple crops, as the evaporating machinery is carried from district to district according to the yield of the orchards. In the United States, on the other hand, large factories have been long established, and the smaller ones are, in many cases, under the ownership of an energetic syndicate of capitalists. The methods of the Canadian factorymen are, as a result not usually as thorough as those of their American competitors. Some time ago, the German Government passed a law prohibiting the importation into the Fatherland of apples that had been dried on wire trays. It is said by a trade authority that not more than one-fourth of the Canadian evaporators have discarded the old trays. Where the apples are dried on wood, in many cases by unskillful regulation of the heat or imperfect machinery, the fruit often suffers deterioration through overheating of the wood, whereby the apples contract a burnt odor, and are oftentimes covered with black specks. Appearance counts for a great deal in the sale of apples, and until the Canadian evaporators learn to produce fruit well bleached and of a uniformly bright color they cannot hope to succeed abroad. There is also room for improvement in packing. A number of firms have been painstaking in this matter, and by a tasteful selection of a fancy paper covering and more care and arrangement, the demand for their products has increased.

A comparison of the dried apple trade in Canada with that of the United States is more favorable to this country. The N.Y. *Journal and Bulletin of Commerce* in the course of a daily review of the New York market, Dec. 14th, quotes dried apples as follows:

Apples, sun-dried,		Canada, quarters per lb.....	5	to	6	cents.
"	"	State & W'n, quarters, per lb.	4	"	5¼	"
"	"	Southern, quarters, per lb. ..	3	"	4½	"
"	"	Southern, sliced, per lb.	3	"	4½	"
"	"	Northern, coarse cut, per lb.	4	"	4½	"
"	"	Southern, coarse cut, per lb.	3	"	4	"

It will be seen from these quotations that choice Canadian sun-dried apples are worth from one cent to a cent and three-quarters more a pound than the best United States fruit. The reputation of the Canadian dried apples has been built up only by the hard work of a few merchants. The competition of general dealers who, by way of barter, receive large quantities of dried apples, to secure trade was so great that it was found difficult to get them to insist upon more careful selection and preparation of the apples. The task was undertaken and three means of improvement suggested, viz.: that the fruit should be (1) large quarter cut, (2) bright in color, and (3) dry. The merchants were advised to carefully grade the fruit according to its quality, and above all to make prompt shipment to the wholesale centres. By these means a vast improvement has taken place in the dried apple trade within the past two years. With an abundant supply of choice green fruit available, drying and evaporating apples should be profitable industries in Canada.

BOOKS RECEIVED.

Saturday Night.—This is the Christmas Number; one of a creditable series, and more full than usual of illustrations. "Le Sabre de mon Frere" is a good short story by Mrs. Denison, and the paper on the sporting events and records of the year, with its portraits of our "cracks," will have attraction for many. But the best thing in the issue is Mack's paper, "The Graves of Three Great Canadians." Nor must we forget to mention the two colored lithographs, "The First Harvest in Canada" and its companion picture of the comfortable homestead sixty years after. These alone are worth the price of the paper.

The Choir Invisible.—A delightful story by James Lane Allen, the scene laid in Kentucky; there is much agreeable word-painting in the book, and the landscape scenes are sometimes quite entrancing. The trials and chastenings of John Gray are told with fervor; the result of them the reader must discover for himself. Although uneven in parts, the style is elevated and chaste. It is a book that deserves many readers. George N. Morang, Toronto, is the publisher; 12mo. cloth, $1.25; paper, 75 cents.

The Canadian Churchman.—A new dress of type characterizes the latest number of this weekly, which is the Christmas Number. The literary contents are interesting and the pages pleasant to the eye, careful presswork being evident throughout. The illustrations are numerous and the cover unusually attractive.

Accompanying the December number of the Windsor Magazine ()London: Ward, Lock & Co; Toronto: Wm. Bryce; price, 35 cents), is a 150 page novel, "The Scallywag," by Grant Allen. An article of more than passing interest to Canadians is one on "Masters of Empire," a chat about Colonial Premiers, with illustrations of the Colonial offices, London, and a number of the Premiers.

CLEARING-HOUSE FIGURES.

The following are the figures of the Canadian clearing houses for the week ended with Thursday, December 16th, 1897, compared with those of the previous week:

Clearings.	Dec. 16.	Dec. 9.
Montreal	$13,269,251	$12,901,554
Toronto	8,321,549	8,400.241
Winnipeg	2,158,412	2,480,301
Halifax	1,178,106	1,249,270
Hamilton	667,975	792,048
St. John	585,841	670,869
	$26,181,134	$26,494,283

Aggregate balances this week, $3,501,445; last week, $3,754,407.

IN THE DRY GOODS STORE.

The manufacture of Oriental rugs is of great antiquity; they are made entirely by hand, and with the simplest appliances. Knots of wool are tied into the warp of linen or cotton threads, thus forming the pattern. The greatest care is required in the manipulation of these wool threads so that the proper blending of the various colors may be obtained. It is the soft, harmonious colorings which render these rugs prime favorites with buyers and the public in general.

Cable advices from London regarding the auction sale of feathers now in progress state that Feminas and Spadones are 10 per cent higher than prices ruling at the last series. Whites are very firm. Long black and long drab are 15 per cent. dearer, with medium black and drab showing an advance of 10 per cent over previous prices. Brokens and curls are very high, and in some cases prices have gone beyond the reach of many buyers. The attendance of buyers was large.

In Montreal last week a winding-up order was granted by Mr. Justice Archibald for the liquidation of the affairs of the Canadian Fibre Chamois Company, Limited, insolvent. Mr. F. S. Maclennan was appointed provisional liquidator thereunder. A meeting of the creditors is called for December 21 to appoint a final liquidator. The order was granted on the petition of Dame Lucy Ann McLaughlin, of Brooklyn, N.Y., who, it appears, is a shareholder in the company to the extent of 558 shares.

One of the European correspondents of the *Dry Goods Economist* writes: "The very latest productions in fur capes are quite short, and some smart capes in velvet or cloth, not reaching below the elbows, are in preparation to take their places later on. Sometimes the latter are composed of three graduated capes or flounces cut in form and then slightly gathered. The trimming that carries the day for all descriptions of capes is the band of cross cut velvet or of cloth stitched down in the centre. This simple method of ornamentation enjoys the favor of the important houses, which accounts for my reference to the subject again."

A letter from Leeds contains the following: "The continental purchases made during the last fortnight seem to suffice them for the present, and even the Canadians have curtailed considerably similar operations. But their operations in winter fabrics show a little enlargement, and this gives great satisfaction to many producers of naps, presidents, beavers and reversibles, and stocks have again to-day been reduced to an extent of some importance, and prices in all cases have been strictly upheld. Stocks of low woolens and mixture worsteds are so large as to afford a good opportunity for speculators."

American textile markets show some variation, but prices are on the whole fairly maintained. Cotton is stronger in spite of estimates ranging from 10,100,000 to 11,000,000 bales by well known authorities. Last week the Fall River mills announced a reduction of 11 per cent. in wages, and the strike threatened by the workers, it was thought, would relieve the market from overproduction. But the difficulty is not a temporary one. It results from an increase of machinery, north and south, exceeding the demand for goods. The demand has been much restricted, *Dun's Review* points out, by the idea that the fall of over two cents in cotton must bring a corresponding decline in goods, of which quotations are but 2 per cent. lower than in July, when cotton was selling at eight cents. The demand for woolen goods in the States has clearly improved; more wool has just been purchased abroad and is being imported. While some grades have been sold largely at prices lower than a month ago, quotations are generally maintained.

FOR GROCERS AND PROVISION DEALERS.

Very attractive windows are the order of the day in grocery circles. They are trade winners at Christmas time.

An agent of the Dominion Government creameries in the North-West Territories is reported to have contracted with a Vancouver, B.C., firm for the purchase of close upon 100,000 pounds of butter.

The Minister of Agriculture is sending to all millers in England who grind imported grain, packages containing standard samples of the wheat grown this year in Manitoba and the North-West Territories.

The Dewitt Langlois Milling Company of Montreal, Limited, is asking for incorporation for the purpose of operating grist mills and carrying on business in flour, grain, hay and provisions of all kinds in the several provinces of Canada. The chief place of business is Montreal. The amount of capital stock is $90,000, divided into 9,000 shares of ten dollars each.

The Dairy Commissioner reports that the output of butter from the creameries under Government supervision in the North-West Territories this summer amounted to 478,873 pounds. There were sixteen creameries in operation, whereas in the previous year there were only three. Arrangements are being made to pack the butter from these creameries so that it will be suitable for the Japanese and Klondyke trade. Despite this year's progress the work this season has been hampered by the market conditions, and by the lack of knowledge among the farmers.

The meeting of the Montreal Grocers' Association, held last week, was one of importance. The gathering was unanimous in its resolve to make a fight for the right of selling patent medicines and other family medicines such as castor oil, cod liver oil, Epsom salts, senna, alum, bicarbonate of soda, borax, castor oil, cochineal, cod liver oil, cream of tartar, flavoring extracts, ginger, sulphur, glycerine, gum arabic hops, linseed and linseed meal, which the law does not at present allow them to sell. It is not easy to see why they should be thus interdicted, for most of the articles in the above list are such as any western grocer is supposed to keep in stock and sell. The grocers of Montrea will also oppose the separation of the sale of liquors from groceries. Also they propose to petition the Federal Government that a portion of the salaries of civil service employees be made seizable for just debts; that the inspection of weights and measures be done by an inspector, paid by the Government, and not by the merchants, as formerly, and that a fruit inspector be appointed as soon as possible.

INSURANCE MATTERS.

Last week, the second of the self-propelling steam fire engines recently added to Boston's equipment had its trial for acceptance in the presence of a large group of fire experts and others. It worked at 138 pounds pressure and threw two big streams through 200 feet of hose, to the entire satisfaction of the spectators.

Our thanks are due to the New England Mutual Life Insurance Company for a copy of their calendar, giving an admirable portrait of George Washington, engraved on steel. Any one who desires a copy of this work of art may procure it by sending ten cents by mail to the calendar department of the company in Boston.

Here is the biggest life insurance risk we have heard of. As he was leaving for Europe last week, Geo. H. Vanderbilt, the youngest son of Wm. H. Vanderbilt, took out a policy calling for $1,000,000 in the Mutual Life, New York. The policy is what is known as a twenty-payment life contract, and provides for a premium of about $35,000. After Mr. Vanderbilt has paid that sum yearly for twenty years, the payments cease and the principal becomes due at his death.

Commenting upon a recent statement of the Liverpool *Journal of Commerce* that the marine underwriters have concluded to increase 20 per cent. their insurance rates next spring on the St. Lawrence River trade, and on vessels and cargoes trading to Cape Breton, owing to the disasters which have happened within the last two years, Mr. E. L. Bond, of Montreal, says he has not been advised of any increase of rates. He dwells strongly, however, on the necessity of reform in the pilotage system of the St. Lawrence, citing the case of the "Turret Cape" going ashore at St. Vallier shoals on a bright moonlight night, and after being floated, proceeding to return to Quebec under her own steam. Within a short distance of Quebec, while in charge of the same pilot, she ran ashore at Indian Cove, with the result that she has been abandoned to the hull underwriters.

Five agents for different steam fire engine makers, and two or three agents for rubber hose companies were present before the municipal council of St. John's, Que., last week. The council is considering fire appliances. The Canadian talkers were outnumbered, but we doubt if they were out-talked, for Ronald was there, and he can hold up his end very well. But the Amoskeag and the La France, the Silsby, the American, and the Shand & Mason were all heard from. The council resolved, however, to take a rest and consider all they had heard. They deemed it prudent to defer decision respecting the engine till another meeting, but in the meantime decided to purchase 800 feet of standard 2½ inch hose. Regarding the steamer, it is very possible that the Silsby will be overhauled and rebuilt, as the manufacturers offer to rebuild and guarantee it.

It is certainly a gain to have the chief of the London fire brigade admit that the disastrous fire in Jewin street had taught him something. This is an admission that his predecessor would not have made. He thought he "knew it all," and after a visit to the United States declared that the American brigades could not give him any pointers, or words to that effect. At last week's sitting of the enquiry into the causes of the late fire Commander Wells said that chemical engines were not used at the fire. He had been in New York, he said, and had not seen any such engines there. He declared that there were a sufficient number of fire engines at the fire, and that the supply of water was also sufficient. There was, however, an insufficient supply of coal for the engines. He had had no experience with water towers. The chief admitted that the fire had taught him a great deal, and he was now considering the introduction of reforms, such as telephonic fire alarms, etc.

Meetings.

BANK OF OTTAWA.

The twenty-third annual meeting of the shareholders of the Bank of Ottawa, was held at the bank in the city of Ottawa on Wednesday, 8th December, 1897.

Among those present were J. Roberts Allan, R. L. Blackburn, Hon. G. Bryson, jr, J. F. Cunningham, Alexander Fraser, Geo. Hay, Geo. F. Henderson, Andrew Masson, John Mather, Chas. Magee, D. Murphy, David Maclaren, Sheriff Sweetland, and J. G. Whyte.

On the motion of Mr. D. Murphy, seconded by Mr. Alex. Fraser, Mr. Charles Magee took the chair, and the general manager was requested to act as secretary. The chairman then asked the secretary to read the report of the directors.

REPORT.

The balance at the credit of Profit and Loss account on 30th November, 1896, was .. $		44,289 16
Net profits for the year ending 30th November, 1897, after deducting expenses of management, reduction in bank premises, and making necessary provision for interest due to depositors, unearned interest on current discounts, and for all bad and doubtful debts......		201,483 80
		$ 245,772 96
Appropriated as follows:		
Dividend No. 42 ..$	60,000 00	
Dividend No. 43..	60,000 00	
Bonus of 1 per cent.	15,000 00	
Appropriation authorized for officers' pension fund	5,000 00	
Carried to Rest account..	60,000 00	
		200,000 00
Leaving a balance to be carried forward at the credit of Profit and Loss account of		45,772 96
And making the Rest account.$1,125,000 00		

In view of the fact that the business of the bank continues satisfactory, the directors decided that it would be desirable to declare a bonus of one per cent. with the December dividend, which was accordingly done.

A branch of the bank was opened in Toronto on the 1st of last month, with fair prospects for business.

In order to place the bank in a better position to take up any new and desirable business offering, the directors think it advisable to request the shareholders at this meeting to authorize the issue of 5,000 shares of new stock, to be allotted from time to time if required. A resolution bearing on this subject will be submitted for your consideration.

The offices of the bank have been duly inspected during the year.

The officers of the bank continue to perform the duties assigned to them in a satisfactory manner.

All of which is respectfully submitted.

CHARLES MAGEE.
President.

GENERAL STATEMENT—LIABILITIES AND ASSETS AS ON THE 30TH NOVEMBER, 1897.

Liabilities.

Mortgages on real estate sold by the bank.......		10,594 20
Bank premises		124,000 00
		$10,183,344 14

GEO. BURN,
General Manager.

The chairman then said:

The statement which has just been read by the general manager, is, in the opinion of the directors, the most satisfactory which they have yet had the honor of submitting to the shareholders.

The payment of a bonus of one per cent. in addition to the regular dividend of 8 per cent., and the placing of $60,000 to the rest account out of the earnings of the year, after having made full provision for bad and doubtful debts, besides appropriating $5,000 to the pension fund and writing off $4,000 from the bank premises account, is an achievement which the management ought to be proud of and the shareholders congratulated upon.

If you compare the figures in the balance sheet with those of last year, you will find there is an increase this year in deposits of $754,865, and in loans there is a decrease of $187,059.

The increase in circulation is $76,640, which brings the amount about as near the statutory limit as it is safe to go. You are doubtless all aware that under the Bank Act the circulation is limited to the amount of the paid-up capital and for any over issue the penalty is very heavy. For several weeks in the autumn of the last three years, during the active time of marketing wheat and other grain crops, our circulating power has been inadequate and the bank has had to pay out the notes of other banks. This year the amount assumed quite large proportions.

The opening of a branch in Toronto was an important step, which was very carefully considered by the board. It is convenient and desirable to have the bank represented in the chief business centre of this province, but it is too soon yet to say much about the prospects. It is the intention to pursue a conservative policy and not an aggressive one in seeking new business. The risk of loss will not be great and the chances are the branch will soon be at least self-sustaining.

The paragraph in the report referring to a possible increase in the capital stock needs explanation. At the present time additional capital is not required, and could not be profitably employed. It is not the policy of the directors to increase the capital unless absolutely necessary, and until the advantages of so doing are very apparent, the powers asked for to-day will not be used. It is easier to earn good dividends on a capital of from one to two million dollars than on a large capital. There have been times when the deposits and general resources of the bank have not been as large as they are now, when good and profitable business had to be declined, and should such opportunities occur again, the directors feel they ought to be in a position to take advantage of them by being able to call up additional capital without the necessity of calling a special meeting of shareholders, which would require to be advertised six weeks. Should it be decided to increase the capital by the allotment of shares, the bank would derive some advantage from the increased power of circulation, but not sufficient to warrant an increase of capital for this purpose alone.

All the offices of the bank have been inspected twice during the past year, by one or more of the directors, accompanied by the general manager or his assistant, Mr. Finnie. The business of the bank at all its offices, is in a sound and prosperous condition, and everything points to a continuance of this state of affairs during the year which we have now entered upon. Good crops have been harvested in every province of the Dominion, and owing to a shortage in wheat and rye in almost every European country, our farmers are getting very remunerative prices for their wheat and fair prices for almost every other product.

The development of gold mining in Ontario, British Columbia, and the Yukon district is attracting capital and creating an active demand for manufactured goods.

The lumber trade is not in a very satisfactory condition. The demand for the better grades suitable for the English market is fairly good, but the sale of the qualities usually disposed of in the United States has been affected by the imposition of a high rate of duty which is almost prohibitory on the coarser grades, and as a consequence larger stocks of this class of lumber are being held over in this district, and the mills on the north shore of Georgian Bay have almost ceased manufacturing, and what lumbering is being done in that district this season is in getting out logs for export to Michigan. Lumber is admitted free of duty from the United States into Canada and enters into competition with the products of our forests manufactured in the Lake of the Woods district and in Manitoba.

The question of the regulation of the manufacture of lumber and export of logs and pulpwood is now engaging the attention of the Government and Legislature of Ontario and will most likely be taken up also by the Dominion Government and Parliament next session. Let us hope the question will be dealt with in a manner consistent with the interests of this country only.

I do not think that there is anything else in the report calling for special explanation, although there are a number of topics which might have been touched upon. Meantime the general manager has some figures to submit which may be of interest to you, and we shall be glad to answer any questions, allowing time for discussion before putting the motion for the adoption of the report.

The general manager then said:

The chairman has referred to the improvement in trade generally, and I desire to supplement his remarks by quoting a few figures from the bank returns of October last, compared with that of the year previous, which will be of interest to you, as evidence of the advance in the financial condition of the country. The circulation of the banks reached the highest figure on record in October last, the amount on the 31st of that month being $41,580,000, or about $6,000,000 higher than the year before.

Comparing the deposits for the same dates, we find that they have increased $22,739.000 in all, and that this increase is not confined to one locality is abundantly manifested by the fact that while the banks having head offices in Ontario and Quebec, which draw deposits from all over the Dominion, show an increase of $19,801,000, those having head offices in the other provinces have also gone up $2,938,000.

Last spring the Dominion Government decided that the time had arrived when the rate of interest allowed on deposits in their savings banks should be reduced. They gave notice of a reduction to three per cent. from 1st July last, most of the banks following suit.

This action has been amply justified by the fact that the Government deposits have increased nearly $2,000,000 since the end of June last, and those in the banks $12,363,000, the result, I presume, of the marketing of the bountiful harvest with which the country has been favored.

The current loans of the banks have been reduced during the same period over $5,500,000. The improvement is thus shown in three ways, by the increased circulation, by the increased deposits, and by the reduction in loans.

It was then moved by the president, seconded by the vice-president, and carried:

That the report of the directors just read be adopted and printed for the information of the shareholders.

Mr. J. G. Whyte complimented the directors on the excellent showing they had been able to make, and remarked that in his opinion times of prosperity were to some extent times of danger, in the tendency which at such periods existed to expand business unduly. He moved, seconded by Mr. J. Roberts Allan: That the thanks of the shareholders are due and are hereby tendered to the president, vice-president and directors, for their careful attention to the interests of the bank during the past year.

Carried.

The vice-president, on behalf of the board, thanked the shareholders for the expression of confidence evinced in so heartily passing the resolution, and Mr. Whyte for his timely remarks.

Mr. Sheriff Sweetland expressed his gratification at being present at the meeting, and said that among the many wise acts of the Board of Directors, in none have they displayed greater wisdom than in the selection of their executive staff, of whom he heard nothing but good spoken on all sides. He had much pleasure in moving, seconded by Mr. George F. Henderson: That the thanks of the shareholders be tendered to the general manager and other officials of the bank for the efficient manner in which they performed their respective duties. Carried.

In putting the motion the chairman said that speaking for the board he fully endorsed the sheriff's remarks.

The general manager replied briefly on behalf of the staff.

The vice-president then moved, seconded by Mr. J. Mather, the passing of a by-law which he read authorizing the directors to increase the capital stock of the bank to $2,000,000 at such time as it was thought desirable by them. This motion was carried.

It was then moved by Mr. David Maclaren, seconded by Mr. Denis Murphy: That the ballot box be now opened and remain open until five o'clock for the election of directors for the ensuing year, and that Messrs. J. F. Cunningham and R. L. Blackburn be appointed scrutineers, the ballot to be closed when five minutes shall have elapsed without a vote having been tendered.

The scrutineers presented the following report:

George Burn, Esq., general manager,
Bank of Ottawa:

Sir,—We, the undersigned scrutineers, appointed at the general meeting of the shareholders of the Bank of Ottawa, held this day, hereby declare the following gentlemen duly elected directors for the ensuing year: Hon. Geo. Bryson, jr., Alexander Fraser, George Hay, Charles Magee, John Mather, David Maclaren, Denis Murphy.

(Sgd.) J. F. CUNNINGHAM,
R. L. BLACKBURN,
Scrutineers.

The meeting then adjourned.

At a meeting of the newly-elected board, held subsequently, Mr. Chas. Magee was re-elected president and Mr. George Hay, vice-president for the ensuing year.

GEO. BURN,
General Manager.

LOTTERIES IN KENTUCKY.

With the Frankfort lottery given its deathblow by the Supreme Court of the United States yesterday, will pass away the last and most stubborn survivor of numerous Kentucky lotteries—the last relic of a once common form of authorized gambling.

From 1792 until about 1820 or 1835 lotteries were regarded as a perfectly proper means of raising funds for any public or private need. Though Kentucky inherited from Virginia a statute against lotteries, the custom was to make a grant of special privilege to whoever wanted it. From about 1825 to 1870 lotteries were tolerated, but the Legislature was less frequently called upon to grant the questionable privilege. The last grant of any consequence—that in favor of the Public Library of Louisville—was made in 1871.

From that time to the present the lotteries have steadily lost ground before the awakened moral sense of the people. About ten years ago they began to be continuously harassed by legal procedures, and the water around them was getting steadily hotter. Seven years ago the Legislature made a determined effort to suppress them, announcing heavy penalties for operating a lottery, and repealing every franchise known to be alive in the State. But the indifference of the courts made these laws merely dead letters. The Constitutional convention then assailed the evil, and no clause in the new constitution made more votes for that instrument than did the clause absolutely prohibiting all lottery grants in the future, and revoking all charters then in existence. The Goebel bill, which became a law in 1892, put into operation this constitutional provision.

The Frankfort lottery was comparatively a late comer among the lotteries which have existed in the State. It first came into existence in 1838, but was not actively pushed until after its revival by legislative act in 1869,at which time public opinion was just beginning to form against lotteries. It is the last and greatest of a long, and, in point of parentage and purpose, a somewhat illustrious line of similar schemes.—*Louisville Courier Journal.*

DIRECTORS' RESPONSIBILITY.

An opinion which is of interest in the present activity of mining finance and mining activity the world over, is that of Lord Kindersley, pronounced many years ago, and quoted the other day by the English *Law Journal.* We quote a portion of it below:

The *Law Journal* says that "Long ago Vice-Chancellor Kindersley bequeathed to the enterprising promoter words which have been described as a 'golden legacy,' in which he said that 'those who issue a prospectus must state everything with **strict and scrupulous accuracy.** * * * and must omit no one fact within their knowledge which might in any degree affect the nature or extent or quality of the privileges and advantages which the prospectus holds out as an inducement to take shares;' but excellent as these words are as a counsel of perfection, it would hardly be true to say that they quite accurately represent the law as it stands. It is not every material fact which left undisclosed will render a prospectus false or fraudulent; indeed, if this were the law, hardly a prospectus could stand the severity of such a test; for it is next to impossible for directors, with the utmost desire to be candid, to state every fact which might influence the judgment of an intending investor. The true test comes, therefore, to be this: Is the omitted fact one which, if disclosed, would falsify the statements of the prospectus or render them misleading in the sense in which a half-truth is often worse than a falsehood. An omission of this kind is to all intents and purposes a *suppressio veri* and a fraud."

WELL PAID LABOR CHEAPEST.

Several manufacturers of American machinery established branch factories Germany, England and Scotland a year or two ago, expecting to make their machines at less cost by reason of lower wages, and to save freight charges across the ocean. They sent American overseers to conduct these branch establishments on American principles, using American labor-saving tools. They found by experience, much to their surprise, that while wages are lower both for skilled and unskilled labor, the average output per man, even with American tools and under American supervision, is so much less in Europe than in this country that the cost of manufacture is actually greater. The branch establishments have, therefore, been abandoned. This is a sermon in a few words on the doctrine of the economy of high wages.—*Philadelphia Record.*

AN OLD FRIEND IN A NEW DRESS.

"Some time ago," says an insurance man, "a man asked me to accompany him home, as he had some things there to be insured. When we arrived at his house he showed me 100 boxes of cigars, which he wanted insured. There were 100 cigars in each box, making 10,000 in all, and were valued at 10 cents each, so I insured the lot for $1,000. A few days ago the man came to me and asked for the insurance money. 'You've had no fire at your house,' I replied. 'No, but I've smoked them,' said he, 'and according to the paper, I am entitled to the money, as it reads distinctly that if the goods are consumed by fire, money is paid on application.' As far as the technicalities were concerned he was all right. but I knocked him cold about a minute later by saying, in a very stern manner: 'All right, sir; you'll get the money; but according to your own confession, I will proceed at once to make a charge against you for incendiarism.' 'Well, I'll be hanged!' was all he said, and the room shook violently after he banged the door."—*Philadelphia Record.*

—"The burning issue," said the woman's suffrage boarder, "is not the monetary question; it is not the tariff: it——" "We know," interrupted the Cheerful Idiot, wearily, "The burning issue is, of course, the waste of gas."—Indianapolis *Journal.*

—A man sent this answer to a bookseller who sent in his account for a book some time before delivered: "I never ordered the book. If I did, you did not send it. If I got it, I paid for it. If I didn't, I won't."

—A few weeks ago the popular amusement of the day was golf. Later it was football. Now it is the formulation of currency reform plans.—*The Record,* Chicago.

MONTREAL REAL ESTATE.

The amount of business transacted in the real estate market during the month of November is sufficient to sustain the hopes and expectations of better things after the turn of the year, and real estate brokers generally are quite confident that the new year will see a decided improvement on the somewhat dormant and depressed conditions in realty matters of the last few years. St. Antoine Ward, as it generally does, takes the lead in the amount of sales recorded, while the largest numbers of transfers were in St. Jean Baptiste Ward—12 of them being of vacant land, and the remaining 23 of built properties. Of the 32 transfers in St. Denis Ward, 27 of them were of building lots, of which 15 sales were of lots on Breboeuf (formerly Champlain) street, of 25 feet by 80 feet each, at twenty cents per superficial foot.

Two-thirds of the transfers in Westmount were of building lots, and the prices show that values have been well maintained. From the recent report of the Westmount Building Committee for the year ending 6th November, 1897, it appears that the following buildings were erected during the year:—14 detached and semi-detached houses, 77 terrace houses, 22 tenement houses, and 39 houses divided into flats, making a total of 152 buildings valued at $757,950, being an increase in value of $35,200, over the building operations of the previous year. We also notice with satisfaction that steps are being taken by the council to promote the erection of a finer class of buildings in the town and to prevent the building of unsightly structures.

Money is plentiful and stocks are high, so that under ordinary circumstances there should be a better demand for real estate investments in Montreal. Investors do not quite know what will be the result of the annual borrowing to meet the current expenses of the city. The imposition of an equitable special tax (reaching every voter), to meet the deficiency, would be understood, and would tend to restore confidence in our business methods, but this everlasting borrowing has an unsettling effect that does not help the realty market. The citizens of Montreal will have an opportunity on 1st February next of electing aldermen who will give us an honest and intelligent city government, and it is earnestly to be hoped that they will take advantage of the opportunity. It must not be forgotten that the responsibility for the present state of affairs rests upon the good citizens who have hitherto shirked their duties.

Every man who wishes to have better civic government in this city can do something towards that end by joining at once the Municipal Association of which Herbert B. Ames is the hon. secretary. The civic elections are only about six weeks off, and as the aldermen we elect then will likely be the city charter makers of the next decade of years, it is especially important that the right men be elected.

The sales recorded in Maisonneuve, De Lorimier, Mile End, Montreal Annex, Outremont, Cote des Neiges, Notre Dame de Grace, St. Henri, and St. Cunegonde, amount to about $140,000, of which Montreal Annex contributed $39,000 and St. Henri $35,000.

There were 163 real estate transfers in the city wards and town of Westmount recorded at the registry office during the month of November, amounting to $733,372 28.

St. Antoine Ward, 21	$182,554
St. Ann's Ward, 3	24,124
West Ward, 1	1
St. James Ward, 14	76.741
St. Louis Ward, 6	28,100
St. Lawrence Ward, 8	113,419
St. Mary's Ward, 12	47,872

St. Denis Ward, 32	24,040
St. Gabriel Ward, 8	23,325
Hochelaga Ward, 5	8,020
Westmount, 18	101,145

During the corresponding month of last year 99 transfers were recorded, amounting to $264,926.58.—*Simpson's Record.*

BUSINESS MATTERS IN THE STATES.

The circular letter of Henry Clews & Co., dated New York, on Saturday last has the following:

A substantial advance has taken place in the stock market during the past week, and prices are now approaching a level that will induce realizations unless fresh stimulus to the rise is obtained. This advance has been entirely due to the improvement in political and business affairs, and was thoroughly justified by conditions.

President McKinley's message made an excellent impression. His position on Cuban affairs, which have long been a serious source of disquiet, was eminently satisfactory to men of responsibility and thought. On the currency question he takes the side of progressive reform, and his whole message, if open to criticism at certain points, breathes the spirit of peace and conciliation.

Nor is the improvement confined to political affairs. These have a very close connection with business conditions, but the latter show a recovery of their own. The great foreign demand for our wheat at high prices has imparted a wonderful stimulus to business in the West, which is not likely to subside when that cause is spent. The whole interior is apparently about to start on a new era of development. Kansas cares little about free silver, now that its citizens are getting out of debt and becoming prosperous. The iron trade is confidently looking forward to a very large business in 1898. The South is fairly prosperous in spite of low-priced cotton and the check imposed on traffic by the yellow fever scare.

Railroads are now having their full share of the new prosperity. Earnings, both net and gross, are showing the most gratifying gains. The uniformity and steadiness of these gains is something very unusual. For the last three months the 75 to 80 roads regularly reporting their earnings each week have shown gains of from 10 to 20 per cent. Very few roads reported declines, and these were unimportant. As a result a few dividends have been increased, and others are certain to follow if the roads only refrain from rate-cutting. The preferred stocks of reorganized companies have of course been strong, because under these conditions they would be first to benefit. Some properties have also benefited by funding their debt at lower rates of interest; a process which is likely to find favor with stockholders. The darkest side of the railroad situation is the pooling question. Railroad managers are not in the brightest frame of mind in this respect. They are united in their demand for Congress legalizing the pooling method, but they are very properly not prepared to accept the terms upon which Congress seems willing to act—that of surrendering the rate-making power. Stockholders should make themselves felt in this matter. Thus far they have left the whole burden of influencing legislation to their managers. This is not a very promising means of success.

RECEIPTS of cattle at the four western markets in eleven months this year, says a Chicago journal, have been 5,508.548 head, which is 6 per cent. more than last year, but 7 per cent. less than in 1892.

A ST. JOHN despatch of the 13th instant says that Mr. W. H. Murray has secured a contract to provide a cargo of spruce logs and pulp wood for a steamer from France. This is an experimental move on the part of the French manufacturers.

A BRITISH corporation has arranged to start a shoe factory at Galashiels, Scotland, capable of turning out 20,000 pairs of shoes weekly. Mr. Fleming, the United States Consul at Edinburgh, in reporting the fact to the State Department at Washington, declares that this is the beginning of an attempt to compete with America in shoe-making.

THE commercial travelers of the United States look forward hopefully to their Commercial Travelers' Fair, to be held in New York city February 28 to March 5, under the presidency of Chauncey M. Depew. The purpose of the fair is to raise funds for the completion of the National Home at Binghampton, N.Y., for disabled commercial travelers and their dependent families, and the widows and orphans of commercial travelers.

AN American exchange reminds us that the forty fraternal orders represented in and reporting to the National Fraternal Congress last year, showed an average death rate of 9.79. But it is a significant fact that all the orders of which the death rate was 11 per 1,000 and upwards showed also a net loss in membership. Evidently the members were alarmed at the death rate and deserted the ship. Lapses for last year amounted to $175,543. The combined membership of all the orders at the end of 1896 was 1,780,440, of which number 48,210 were social members.

WITH respect to the bill introduced into the Quebec Legislature, for the purpose of amending the Pharmacy Act, so that grocers may have the right to sell patent or proprietary medicines and common drugs, the Council of the Pharmaceutical Association will oppose any such interference with the Pharmacy Act, but is willing to grant an amendment allowing grocers and general storekeepers, where there are no pharmacies, to keep and sell proprietary medicines and common non-poisonous drugs under permit from the association.

THERE appears to be no end to industrial ingenuity and the application of economic processes. We are now told that it has been found possible to stamp out by machinery the whole of a bicycle frame. This is accomplished in two parts, from a sheet of steel, and the halves are then clamped together. A frame made from tubing which hitherto cost fifty shillings, can be made, it is said, by the new process for eight shillings. If this new invention should prove successful it will be a heavy blow to the tube manufacturers. The new stamping process is about to be applied by a cycle firm in Birmingham.

THE pressure for additional telegraph facilities along the Pacific Coast of Oregon and Washington, and for Klondyke and British Columbia business, has resulted in the starting by the Western Union Telegraph Company, on the construction of a new copper wire from San Francisco to Seattle, to connect with a new wire to Victoria, Port Townsend and points on Puget Sound. "We have been shut out of these places before," said Mr. Martin, the Superintendent at San Francisco, last week. "We expect to have the San Francisco-Seattle wire completed within sixty days, and as fast as a cable can be laid will be sending messages to Victoria. We hope to have Victoria and Port Townsend connected by the 1st of March."

—In selecting a jury in a Southern court a lawyer in a murder case asked a hardy mountaineer: "Do you believe in capital punishment?" "In 'capital' punishment?" "Yes." "Naw, I don't; I'm agin capital wherever I sees it."—*Atlanta Constitution.*

TIMBER AND LUMBER AT LIVERPOOL.

Farnworth & Jardine's wood circular, dated Liverpool, 1st December, 1897, says:

CANADIAN WOODS—*Pine Timber.*—Of waney the import has been light, viz., 5,000 feet, and the deliveries have been fairly satisfactory; stocks are sufficient; there is no change in value to report. Of square there has been no import; the demand continues limited, and there is a large stock. Red pine has moved off fairly well, but values rule low; the stock is light. Oak has not been imported; there has been a fair demand at steady prices: the stock of prime wood is not too heavy. *Elm.*—There has been a fair enquiry, and the stock is now in a moderate compass; there is no change in value to report. *Pine Deals, Boards, etc.*—The import has again been too heavy, and although there has been a fair consumption the present stock is much too heavy; prices are unsatisfactory.

NEW BRUNSWICK AND NOVA SCOTIA SPRUCE AND PINE DEALS.—There has been an import of 8,000 standards spruce, prices show no improvement, and present low values are difficult to maintain; the stock is much too heavy. *Pine Deals.*—A parcel from Bathurst has been imported. The demand is very limited.

BIRCH.—Logs have been imported moderately, and there is a slight improvement in value; the stock is heavy. Planks have been imported freely, there has been rather more enquiry, but prices rule low; the stock is increasing.

UNITED STATES OAK.—From Mobile a small parcel has been imported, there is no improvement in the demand to report and stocks are sufficient; prices rule low. Oak planks have been imported freely, the demand shows a little improvement, and although stocks are still too heavy there is a better consumption going on. Sales are difficult, and there is little improvement in value to report; the total stock is about 302,000 feet.

UNITED STATES STAVES.—The arrivals have been more moderate, and, with a slightly improved demand, values are steady; stocks are not excessive, but sufficient for probable requirements.

OREGON AND BRITISH COLUMBIAN PINE.—There has been no import; the demand continues very quiet, but there is no change in value; stocks are heavy.

SEQUOIA (CALIFORNIAN REDWOOD.)—Recent sales have been in retail quantities on account of the dealers; a large cargo has just arrived and is nearly all landed, and is now on sale on account of the importers.

PITCH PINE.—The arrivals during the past month have been 7 vessels, 7,319 tons, as against 3 vessels. 2,902 tons, during a like period last year. The import of hewn for the month consists of a parcel from Mobile; there has been a fair consumption, and stocks remain about the same. Of sawn the import has been heavy, but the bulk having gone straight into consumption from the quay, we are left with ample though not excessive stocks. Deals and boards have again come forward too freely, and stocks are accumulating; the consumption has been only moderate, showing a considerable falling off from last year. The stock consists to some extent of boards of inferior quality which are difficult to move.

Commercial.

TORONTO MARKETS.

TORONTO, Dec. 16th, 1897.

DAIRY PRODUCTS.—Large dairy rolls continue in fair supply, and if of choice quality meet with a good demand at 14 to 15c. per lb. Dairy tubs are not so plentiful and remain firm at 15c. per lb.; stocks of low to medium qualities have been reduced and are not excessive. Creamery butter is steady at last quotations. The local cheese trade is quiet. Recent advices show a firmer market in the United Kingdom. London *Mail*, Dec. 4th, reports: "There is a decidedly better feeling for Canadian cheese, particularly for choicest on the spot. C.i.f. offers from Canada are higher for this class of goods. Respecting secondary qualities the demand is by no means satisfactory, the relative values being in favor of choicest, colored at the moment being less in quantity than white. From enquiries, it is estimated that the stock of cheese in London at the present time is not more than 50,000 boxes in excess of the corresponding date of last year. The "Rimutaka" has left New Zealand with the first consignment of new season's cheese, consisting of about 280 tons, which is due here about the middle of January." In eggs trade is moderately active. We quote:—New laid, 15 to 16c.; cold storage, 14c.; held fresh, 14c., and limed, 13c per doz.

FISH.—There is a moderate demand met by a good supply in the fish trade. We quote:—Trout, 7c.; Manitoba whitefish, 7c.; steak codfish, 5½c.; lake herring, 4c., and haddock, 5½c. per lb.

FLOUR AND MEAL.—Trade in flour remains as last reported, and quotations are without change, as follows: Manitoba patents, $5.10; Strong Bakers, $4.75; Patents (winter wheat), $4.30, and Straight Roller, $4.05 per barrel. Mill feed is also without special feature.

GRAIN.—The wheat market remains practically where it was a week ago. Values are steady and unchanged. Owing to the wretched condition of the roads deliveries have been smaller than usual this week. The United States Government report made the wheat crop 530 million wheat, which is considerably higher than its former reports indicated, which were as low as 463,000,000. This is based on its revised figures on acreage. This estimate, although bearish compared with previous reports, had little effect upon the trade when announced, as its contents had been anticipated and the results discounted some time ago. The world's wheat shipments last week were: America, 6,005,000; Russia, 2,112,000; Danubian, 816,000; Argentine, none; India (not in); total, 8,933,000, against 9,900,000 last week and 9,519,000 last year. Oats continue steady at last week's decline of 1c. per bushel. Peas remain firm, and the advance of 1c. per bushel a week ago has been maintained. Barley continues quiet. There has been no change in corn.

VISIBLE SUPPLY IN THE UNITED STATES AND CANADA.

Bushels.	Dec. 11, '97.	Dec. 12, '96.
Wheat	34,744,000	54,284,000
Corn	40,681,000	17.461,000
Oats	14,351,000	11,359,000
Rye..................	3,681,000	2,582,000
Barley	4,889,000	5,493,000

The stocks in store at Port Arthur on Dec. 4th were 1,109,603 bushels. and there were received 483,246 bushels and shipped 1,053,115 bushels, leaving in store on Dec. 11th, 1,539,735 bushels.

HIDES AND SKINS.—The trade continues in the unsatisfactory position which has been fully noted in previous reports. Combined with a genuine scarcity of hides, the jealousy of merchants has raised prices above the basis of leather values. Unusually large receipts from country points are reported in this market, as a result of the high prices paid for green hides. Merchants quote 9c. per lb. for green cow hides, and cured at 9½c. per lb. The margin is much too small to cover the labor and cost of curing and admit of profit to handlers. Sheepskins are coming forward in moderate supply, and are quoted at $1 to 1.10 each. Calfskins are nominal. There has been no change in the tallow market. A Chicago advice, December 14th, reports: Demand for hides was limited to small orders, but packers were not forcing business, and prices were quoted steady at 11c. for native steers, 10 to 10¼c. for heavy Texas, 9½ to 9¾c. for light do, 10c. for butt brands, 9¼c. for branded cows, 9c. for Colorados, 10¼ to 10½c for heavy native cows, and 10¾c. for light do.

LEATHER.—Tanners continue to talk higher prices, and in some instances are realizing them. The demand from the shoe manufacturers is thought to be fully up to the season's average, but the makers of special lines of leather appear to be scoring the greatest success. There have been some splits exported from this market recently to the United Kingdom. Sole leather continues firm, and dealers say that nothing under market quotations is being accepted.

HOPS.—There is a very quiet trade doing in the local market, and buyers and sellers continue to be apart in their views as to values. New hops are quoted at a range of 9 to 14c. per lb.

PROVISIONS.—Values continue firm. The bad condition of the roads has interfered seriously with the course of trade this week, but in no branch has there been more injury than in that of meat packers. Only limited supplies of dressed hogs have been brought forward. For these merchants quote: Choice weights (90 to 150 lbs.), $5.60 to 5.70, and heavy weights (over 150 lbs.), 10 to 20c. per cwt. less. There is only a moderate demand for pork products. The Christmas trade in fresh meats is apparently already affecting the provision trade.

SEEDS.—The local market has been very quiet during the week, and there is little that is interesting to report. The bad condition of the roads has interfered with deliveries at country points. We quote alsike $3.25 to 4.50; red clover, $2.75 to 3.75, and timothy $1 to 1.50 per bushel. These prices are paid at country points. the range being one of quality. The N. Y. *Journal and Bulletin*, Dec. 15th, says: Even the semi-occasional export orders for clover seed lately noted are not heard of, so far this week, as was the case last in this market, and quotations are simply nominal asking prices still, as well as for flax and timothy. Quote: Clover, $3.25 to 5.50 for common to fair, and $5,75 to 6.00 for choice to fancy in car and job lots; No. 1 clover, export, $3 40 per bushel f.o.b. New York; $2.75 to 3.00 for fair timothy in car lots, and $3 to 3.25 for high grade. Flax, No. 1 Chicago c.i.f. New York, $1.11.

WOOL.—The market has been quiet during the week as is usual at this season of the year. The receipts of fleece wool are small and confined to stray lots which have been collected by country merchants. The mills are active, and the brisk demand for supplies indicates the growth of a healthy state of trade.

MONTREAL MARKETS.

MONTREAL, 15th Dec., 1897.

ASHES.—Receipts continue very small, and since the close of navigation there has been only one shipment of 17 barrels to the United States. Ideas with regard to pearls are rather firmer, and the quotation is $4.75 to 4.85. No. 1 pots are quoted at $3.25 to 3.30, seconds about $3 per cental.

CEMENTS AND FIREBRICKS—The 5,000 brls. of cement landed from the "Boston City" at Halifax, have arrived in Montreal, but there is a great kick about the rail freight. The goods were bought delivered in Montreal by vessel, and the parties interested naturally enough decline to pay the inland freight, which is nearly double the ocean freight, and represents more than the profit to be made on the goods. The matter is likely to develop into a *cause celebre.* Business is dull but prices firm. We quote Belgian $1.95 to 2.05, British $2.10 to 2.20; firebricks $17 to 22 00 per M.

DAIRY PRODUCTS.—The butter market is in rather firmer shape. Choice creamery is somewhat scarce, as there is some shipping demand, with a steady local consumption; prices are quoted at 18½ to 19c.; finest dairy, 15 to 16c.; medium grades, 12 to 14c. per lb. Cheese is rather slow of movement, though some demand is noted for low grades at 7 to 7½c.; fine Ontario's are firm at 8 to 8⅝c. There have been shipments on local account via Portland and Boston since close of Navigation, amounting to 48,309 boxes, of which 15,563 boxes were shipped last week. Eggs are steady, with good demand; we quote selected boiling stock 17½ to 19c.; No. 1 candled, 13 to 14c. per dozen.

Dry Goods.—There are complaints from the rank and file of the city retail trade that business is not up to what it should be. Probably the wet and disagreeable weather may have something to do with this; but, nevertheless, the big stores seem all full of customers, and it begins to look as if the day of the small retailer were past. The footing up of the year's results still occupies the main attention of the wholesale dealer, but some moderate amount of sorting trade is being done, and the booking of orders for regular spring lines proceeds actively. Travelers are beginning to come in off the road for the revision of spring samples. Payments keep up very well. An advance in blankets is not improbable, as some manufacturers are declining repeat orders except at higher prices.

Furs.—Some very fair lots have been received lately of mink, rats and fox. There has been an active demand for mink fur in New York of late, and rather better prices are being paid for this fur. We quote:—Mink, large dark, $1.50; small, do., $1; marten, $1.50 to 2 00; fisher, $4.00 to 6.00; lynx, $1 00 to 2.00; otter, $10.00 to 12.00 for dark; pale, $5.00 to 7.00; red fox, large, $1,30 to 1.40; small, $1.00; cross fox, $3.00 to 6.00; bear, cubs, $3.00 to 7.00; medium, $7.00 to 10.00; large, $12.00 to 15.00; skunk, 15 to 70c., as to color and stripe; coon, 20 to 75c.; rats, fall, 7c. to 10c. kits, 2 to 5c. Beaver, not quoted, killing being forbidden by law.

Groceries.—There is quite a lively feeling in the sugar market, which shows decided strength. Refiners established an advance of a sixteenth several days ago, making 4 3-16c. the lowest factory price for standard granulated, and just at this writing we are advised that it has been decided to make another similar advance, to go into effect to-morrow morning, making the quotation for round lots of standard granulated now 4¼c.; second grade, 4c.; yellows, 3½ to 3⅞c. The demand has been more active, as is generally the case on an advancing market. The New York market is excited and strong, developing an advance of a sixteenth yesterday, and another one to-day. The demand is reported active there, and the trust have had to go into the market for raws, paying as high as 4c for centrifugals. Molasses is also firmer, and jobbers are asking 28c. per gallon for Barbadoes in single puncheons, and 27c in car lots; it is said Quebec dealers are asking 30c. for Barbadoes. There is little revival so far in the demand for teas, which is hard to understand, but prices continue very steady. In all other lines there is general firmness, and a good steady distribution in progress.

Hides and Tallow.—The hide market continues to show firmness, and the demand exceeds the supply, though receipts, as usual at this season, are very fair. Dealers continue to buy on the basis of 8½c. per lb. for No. 1, and quote 9½c. to tanners, at which figure Quebec tanners absorb about all the local supply. Very few calfskins are offering; lambskins steady at 85 to 90c. Tallow in limited demand, and butchers only realize 1 to 1½c. for their rough stock; rendered, 3 to 3½c. per lb.

Leather.—Rumors of further failures in the Quebec shoe trade are having something of a disquieting effect. A fair business is reported in sole, also good sales of dongolas at firm prices, and of colored sheepskins; black leathers are quiet, but values are stiff, and some holders are asking half a cent advance on pebble, glove grain, etc. Raw stock for dongolas is reported to be still advancing, and a local firm, who made a bid for a large lot in New York, were advised yesterday they could only have the goods at an advance of 25c. a dozen. We quote:—Spanish sole B.A. No. 1, 24 to 25c.; do. No. 2, 22 to 23c.; No. 1 ordinary Spanish, 22 to 23c.; No. 2, 19 to 20c.; No. 1 slaughter, 25 to 27c.; No. 2 do., 21 to 23c.; common, 20 to 21c.; waxed upper light and medium, 30 to 35c.; do. heavy, 27 to 30c.; grained, 32 to 35c; Scotch grained, 30 to 35c.; western splits, 22 to 25c.; Quebec do., 17 to 20c.; juniors, 15 to 17c.; calf-splits, 30 to 35c.; calf skins (35 to 40 lbs.), 60 to 65c.; imitation French calf skins, 65 to 75c.; colored calf, American, 25 to 28c.; Canadian, 20 to 22c.; colored pebble cow, 13 to 15c.; russet sheepskin linings, 30 to 40c.; colored, 6 to 7½c.;

Metals and Hardware.—The past fortnight has been a very dull one, and there is really little available in the way of news. We do not hear of a transaction in pig iron, nor of dealings of note in any line of heavy metals. Values of pig iron remain as quoted, and Scotch warrants are cabled at 44s. 11d., about which figure they have ranged for some time past. Lead is easing off, and is cabled ten shillings lower than three weeks ago, but is still a pound higher than a year ago. We quote:—Summerlee pig iron, $18.00 to 18.50; Carron, No. 1, $18.00; No. 3, $17.25; Ayrsome, No. 1, $17.00; No 3, $16.50; Shotts, $17.25 to 17.50; Carnbroe, $16.00 to $17.00, ex-store; Siemens pig No. 1, none; No. 2 Siemens, none; Ferrona, No. 1, $15.00 to 16.00; Hamilton No. 1, $16.00 to 16.50; No. 2, ditto, $15.50 to 16.00; machinery scrap, $1400 to 15.00; common ditto, $12.00 to 13.00; bar iron, Canadian, $1.40 to 1.50; British, $2.00 to 2.15; best refined, $2.40; Low Moor, $5; Canada plates—Pontypool, or equal, $2.10 to $2.15; 52 sheets to box; 60 sheets, $2.25; 75 sheets, $2.35; all polished Canadas, $2.40; Terne roofing plate, 20x28, $5.90 to $6.00; Black sheet iron, No. 28, $2.25; No. 26, $2.15; No. 24, $2.05; Nos. 17, $2; No. 16 and heavier, $2.15; tin plates—Bradley charcoal, $5.60 to 5.70; charcoal, I. C., Alloway, $3.15 to 3.25; do, I.X., $3.90 to 4.00; P. D.Crown, I. C., $3 60 to 3.75 do., I.X., $4.50; Coke I.C., $2 90 to 2.95 for standard, $2.75 to $2.80 for 100 lbs.; coke, wasters, $2 70; galvanized sheets, No. 28 ordinary brands, $4; No. 26, $3.75; No. 24, $3 50 in case lots; Morewood, $5.00 to 5.10, tinned sheets, coke, No. 24, 5½c.; No. 26, etc.; the usual extra for large sizes. Canadian bands, per 100 lbs., $1.75; English ditto, $2; hoops and bands, $1.90 to 2.00. Steel boiler plate, ¼-inch and upwards, $1.85 to 1.90 for Dalzell, and equal; ditto three-sixteenths inch, $2.50; tank iron, ¼ inch, $1 50; three-sixteenths do.; $2.00; tank steel, $1.75; heads, seven-sixteenths and upwards, $2.45 to 2.50; Russian sheet iron, 9c.; lead, per 100 lbs., pig, $3.65 to 3.75; sheet, $4 to 4.25; shot, $6 to 6.50; best cast-steel, 8 to 10c.; toe calk, $2.25; spring, $2.50; sleigh shoe, $1.85; tire, $1.90; round machinery steel $2.25; ingot tin, 15¾ to 16c. for L. & F.; Straits, 15¼ to 15½c.; bar tin, 16½ to 17c.; ingot copper, 12 to 12½c.; sheet zinc, $5 to $5.25; Silesian spelter, $4.75; Veille Montagne spelter, $4.75 to 5.00; American spelter, $4.75; antimony, 9 to 10c.

Oils, Paints and Glass.—Trade in these lines is of a holiday character, but there is no weakening in any of them. As anticipated by us some weeks ago there has been a sharp advance in glass, first break being put up to $1.40, second $1.50, and third $3.10, with no discounts allowed. We quote:—Turpentine one to four barrels, 49c.; five to nine barrels., 49c., net thirty days. Linseed oil, raw, one to four barrels., 43c.; five to nine barrels, 42c.; boiled, one to four barrels, 46c.; five to nine brls., 45c., net 30 days; olive oil, machinery, 90c.; Nfld. cod, 35 to 37c. per gal.; Gaspe oil, 30 to 32c. per gal.; steam refined seal, 45 to 47½c. per gallon in small lots. Castor oil, 10 to 11c. as to quantity. Leads (chemically pure and first-class brands only), $5.37½; No. 1, $5.00; No. 2, $4.67½; No. 3, $4.25; No. 4, $3.87½; dry white lead, 4¾ to 5c.; genuine red do., 4½c.; No. 1 red lead, 4c.; putty, 1.55 to $1.60 in bulk, $1.70 to 1.75 in bladders, $2 to 2.10 in tins; London washed whiting, 40 to 45c.; Paris white, 85 to 90c.; Venetian red, $1.50 to 1.75; yellow ochre, $1.25 to 1.50; spruce ochre, $1.75 to 2.00; window glass, $1.40 per 50 feet for first break; $1.50 for second break; third break, $3.10.

Wool.—A wool salesman who has just made a pretty complete round of the woolen mills of the country, reports finding manufacturers generally in good spirits. They are all well employed, particularly the knitting mills; blanket manufacturers are also very busy, and in some cases are asking an advance on repeat orders. Stocks of raw wool continue very low; quotations for Cape range from 14½ to 16½c., but very little is to be had at the lower figure; B.A. scoured, 27 to 35c. per lb.

HEAD OFFICE:
Queen City Chambers, Church St., Toronto.

DIRECTORS:
AS. GOLDIE, Pres. J. L. SPINK, Vice-Pres.
THOS. WALMSLEY, Treas. HUGH SCOTT, Mgr. and Sec
Adam Austin, Inspector.

This Company was organized in 1885, specially for the purpose of insuring manufacturing industries, warehouses and contents.

The primary object being to give protection against loss by fire at a minimum cost consistent with absolute security.

The system adopted has been to inspect all risk before acceptance and fix the rate to be exacted equitably in accordance with the hazard assumed.

Assurers with this company have made a saving, upwards of $108,000.00 on the current rates charged, in addition to which, on the rates exacted by us, dividends have been declared to policy-holders amounting to over $24,000.00, together, making the very substantial sum of over $132,000.00 that our policy-holders have saved during the eleven years we have been in operation.

As no canvassers are employed, dealing directly with the assured, those desiring to avail themselves of the advantages thus offered will please address

Millers' and Manufacturers' Insurance Co.,
32 Church Street, Toronto, Ont.

SELF-IGNITION.

Oxygen, one of the constituents of air, is necessary alike to explosion and combustion. When street gas, or kerosene oil vapor, or even very fine organic matter, such as flour, coaldust, etc., is intimately mixed with air in certain proportions, and a spark of fire applied, there will be an explosion like that of gunpowder.

But the oxygen is as necessary as the spark of fire. Plunge a lighted candle into a gasometer of pure street gas, and the effect will be the same as if it had been dropped into water. Liquid kerosene oil never explodes, and when the "lamp explodes" it is the oil vapor and air, mixed, above the oil that causes the mischief. A few years ago we read of a man who was repairing a gasometer, lowering a light into the manhole just at the wrong time; namely, while there was still a little gas remaining, and the entire apparatus was blown up. Had it been full of gas alone, he might safely have lowered his light into the place. Furnaces using coal-dust fuel would go out, should the supply of air be shut off.

Prof. Pepper's interesting experiment along this line is worth giving in this connection. Take a box a foot square and containing a quart or two of fine flour, and nail thereon, for a cover, a fine wire netting, like bolting cloth used by millers. Now shake this box at some open flame, like a burning stick, and in such a way as to send out a cloud of dust upon the flame. If the conditions are all right there will be instantly formed an astonishing volume of flame, resembling the flame from the burning of an open bunch of gunpowder. The flour, being largely carbon, will burn when mixed with air, about as readily as the coal-dust in a furnace, or as the fine particles of coal floating in the air in coal mine explosions, to which most of the violence of coal mine explosions is now believed to be due. A pile of flour is harmless enough, but surround each of its particles with oxygen and apply a spark of fire, and the result will be an explosion. It is, therefore, always dangerous to go about a flour mill with a light of any kind.

Gunpowder is a mixture of carbon and oxygen in solid form, as seen from its ingredients, charcoal and saltpetre, the one supplying the carbon, the other the oxygen. Take out the saltpetre, and a harmless mass is left. In kerosene vapor we have an example of a still finer form of carbon, but in chemical combination, and in illuminating gas and air, an explosive mixture where the ingredients are both perfectly gaseous. A coarse mixture is comparatively harmless because of the difficulty of combining in burning. The form of the mixture, whether solid or gaseous, is immaterial, but the two elements, oxygen and carbon, are essential. True, other combustibles than carbon may be combined with oxygen to form an explosive material. Street gas is, in fact, partly hydrogen. There are a few other substances that will partially take the place of oxygen, but they are usually experimented with in chemical laboratories, and need not be dwelt upon here.

Professor Tobin demonstrates by experiments, that dampness destroys the explosive tendency of fine organic dust, and he recommends that millers use the wet bulb thermometer constantly in their mills, and on its indication of dryness to inject live steam into the atmosphere. And Professor Baehr, of Dresden, has found that the leather belts used for the transmission of energy in mills are such rapid generators of electricity that finely divided forms of dust may be exploded thereby. Many fires have their source in self-ignition. A package of lampblack has been known to ignite spontaneously and fire a building. Oily or greasy waste and rags have been seen to blaze up a few minutes after having been thrown on the floor. Dry rubbish exposed to the sun has been seen to take fire under circumstances which precluded any other possible cause. Sawdust around oily machinery journals has taken fire. Hay heating in the mows has taken fire and burned down many a barn.

Steam pipes will char wood touching them, and fire will result. Hot-air pipes are equally dangerous in contact with wood. Ships that have a cargo of damp goods stowed away, such, for instance, as cotton in bales, are liable to be burned, for spontaneous combustion occurs just as well where dampness is as where only grease or oil is present. This is the reason why hay or grain stowed away while wet, or bales of rags or even heaps of bituminous coal, have taken fire spontaneously. Barrels of damp sawdust, often seen around certain factories, are always liable to cause a fire. Even moistened tin-turnings and chips have been known to take fire.—*Popular Science News.*

BRITISH COLUMBIA MINING STATISTICS.

The annual report of the British Columbia Board of Trade, just issued, is a valuable compilation of information. Its statistics have been prepared with great care, and may be absolutely depended upon as accurate. We quote a few tables taken from the report of the Minister of Mines for British Columbia for 1896:

TOTAL MINERAL PRODUCTION FOR ALL YEARS.

Gold, placer	$ 57,704,855
Gold, lode	2,177,869
Silver	4,028,224
Lead	1,606,427
Copper	254,802
Coal and coke	33,934,427
Building stone, bricks, etc	1,000,200
Other metals	25,000
	$100,931,604

The next table shows the rapid increase in production during the last seven years, the increase for 1891 over 1890 being due to the larger export of coal, the output of which for that year of 1,000,000 tons being the largest ever reached by our collieries. In the year 1892 the influence of the production of the lode mines began to be felt, and since then the very marked increase in production has been carried by the quickly growing value of the gold, silver, lead and copper produced.

Table III. gives a detailed statement of the amount and value of the different mine products for 1895 and 1896, but it has as yet been impossible to collect statistics concerning the amount of building stone, brick, lime, fire-clay, tiles, etc., hence these tables do not contain any particulars this year about the mining of economical materials, which, of course, should be here included.

However, the increase in the value of the precious metals produced, and the baser metals, especially of lead, is marked, and the total increase for 1896 over 1895 very gratifying, the total production of the mines, other than coal, having increased from $2,816,000.

VALUE OF MINERALS PRODUCED, 1895 AND 1896.

	Value.	Value.
Gold, placer	$ 481,683	$ 544,026
Gold, quartz	785,271	1,244,180
Silver	977,229	2,100,689
Copper	47,642	190,926
Lead	532,255	721,384
Coal	2,818,962	2,327,145
Coke	2,260	3,075
Other materials	10,000	15,000
	$5,655,302	$7,146,425

The output of gold and silver during 1897 will show a great increase over 1896, Kootenay alone yielding more by one million than all the rest of the province last year. It is a conservative estimate to say that, excluding Klondyke, British Columbia will yield over $10,000,000 during the current year, and that during the next four or five years the increase will average from three to five millions yearly. British Columbia is entering upon a mining era of which no person can predict the end or estimate the importance; but the evidences "in sight" warrant the prediction that the next five or ten years will be a period of unexampled prosperity, especially in mining, although the development of the great natural wealth of the province in other directions must necessarily follow on an extensive scale.—*World.*

THE DODGE AND GILBERT WOOD-SPLIT PULLEYS.

Litigation has been going on for some months in the United States respecting what is known as the "Dodge wood split pulley patent." About a year ago the validity of the patent issued to Dodge & Philion was sustained by the United States courts at Cincinnati in a suit against the Chattanooga Pulley Company, which was making a pulley substantially identical with the Dodge. Following this decision the Dodge Company, whose works are located at Mishawaka, Ind., instituted a sort of reign of terror among manufacturers and users of wood split pulleys by literally claiming the earth in the matter of infringements. Practically every wood pulley manufactured was claimed to be an infringement of this patent, no matter what the particular construction of it might be.

A great many people, not caring to go to law, made compromises with the Dodge Company, and, if manufacturers, took licenses under the Dodge patent, or if dealers agreed to handle in future only the Dodge pulleys.

This went on until of the three largest manufacturers of split pulleys made entirely of wood in the country, only one remained to fight the owners of the patent. This was the Saginaw Manufacturing Company, of Saginaw, Mich., which makes a peculiar pulley called the Gilbert. Suit had been brought against agents of this Company, as well as against the Company itself, but no efforts were made to prosecute any of them to a final hearing. Our opinion was that the Gilbert pulley was not an infringement of the principle of the Dodge, and we predicted it would be so held. This prediction has been verified sooner than was expected, for on Monday, November 29th, the United States Circuit Court of Appeals at Chicago, consisting of Judges Woods, Jenkins, and Showalter, handed down an opinion in one of the suits upon the Dodge patent, in which it followed the precise line of distinction which was drawn in the article alluded to, between the Dodge pulley and the Gilbert, and held substantially that the Dodge patent does not cover any pulley constructed upon the principle of the Gilbert and embodying the distinction above referred to.

The case in question was an appeal from the decision of the Circuit Court of the United States for the Eastern District of Wisconsin by the Menasha Wood Split Pulley Company. As explained in our former article, the pulley of the Dodge patent is so constructed that when the two halves are placed together, either off or on a shaft, the meeting ends of the rims will come in contact with each other, while the two halves of the hub remain apart from each other.—Condensed from *North-Western Lumberman.*

—Fifteen men in McNair's lumber camp on the Tobique River, New Brunswick, were recently taken seriously ill from eating diseased pork. One of the victims died, but the doctors hope to pull the others through. The pork was taken in last winter, and the carriers, to lighten the load, threw away most of the pickle.

A $1,200 shipment of cats has just been made from Waterville, Me., to a Philadelphia merchant who has conceived the novelty of placing them on sale in his big departmental store in the Quaker City. The shipment included one hundred kittens, and they are of all kinds and colors, the Angora variety predominating.

PUBLIC NOTICE

Is hereby given that all persons who take out ordinary participating Policies in the

Canada Life Assurance Company before 31st December, 1897, will at the next Division of Profits, receive

Three Years' Profits

being one year's additional bonus over those policies issued in 1898. Enquiry should be made without delay from LOCAL AGENTS by intending assurers.

ROBERTSON MACAULAY,
President and Managing Director.

HON. A. W. OGILVIE,
Vice-President.

T. B. MACAULAY Actuary and Secretary.

BOOKLETS

We invite those who intend publishing Booklets to see or write us. We print them.

We have a plant particularly well adapted for the production of first-class work.

We have printed Booklets for many large Canadian firms, and the fact that they do not ask for quotations in competition with other printers proves that our work is satisfactory both in price and quality.

Our presses are now busy on large editions for January circulation; we want orders now for work to be completed by February next.

We deliver work when promised. Kindly let us hear from you.

Not 1 Business Man in 33

leaves his family anywhere near money enough to continue the comforts he has educated them to need and expect. This suggests immediate action on their part, in the direction of Life Insurance.

The Commercial Policy
OF THE
North American Life Assurance Co.

furnishes safe and legitimate insurance at a low cost, thereby enabling business men to build up an estate for their dependents, which otherwise might be left undone.

Head Office, TORONTO

DECISIONS IN COMMERCIAL LAW.

FRASER V. RYAN.—Where a contract for the sale of property is rescinded by the vendor for default of payment of the purchase money, he cannot afterwards, according to the Court of Appeal, recover from the purchaser the amount of a promissory note given by the latter before the default, in part payment. And it seems that moneys paid by the purchaser after rescission cannot be recovered back by him.

HALL V. STISTED SCHOOL TRUSTEES.—The custodian of a child under a "boarding-out agreement," to clothe, maintain and educate him, is not his guardian within the meaning of the Public School Act of 1891, and the trustees of the school section within which the custodian resides need not provide school accommodation for the child, according to the Court of Appeal.

IN *re* CENTRAL BANK OF CANADA; HOGABOOM'S CASE.—Where the liquidators of an insolvent bank have passed their final accounts, and have paid into court the balance in their hands, and that balance is by inadvertence paid out of court to a person not entitled to it, the Receiver-General has such an interest in the fund that he may, even before three years from the time of payment in have expired, apply to the court for an order for repayment into court of the fund. The court has also inherent jurisdiction to compel the repayment into court of money improperly obtained out of court.

CLARRY V. G.T.R.—Judgment of the Chancery Divisional Court on motion by plaintiff to set aside nonsuit entered by Morgan Junior J., in an action by the County Court of York, and to enter judgment for plaintiff, or for a new trial. The action was by a passenger upon defendants' railway for damages for refusal to carry plaintiff for the entire journey, pursuant to contract. Plaintiff bought a ticket from Harrisburg to Stratford, via Galt and Berlin, and the difficulty arose when he changed at Galt, owing to the defendants not being willing to carry plaintiff free in an omnibus from one station to another. This is what plaintiff complained of. Defendants contended they had no power to carry otherwise than by train, and that the damages claimed were too remote. Held, that the contract of the railway company was to carry the plaintiff by continuous journey from Harrisburg to Stratford, via Galt and Berlin. There was a break in the line of the company at Galt, where the river had to be crossed, the distance between the stations being three-quarters of a mile. The company advertised that there was an omnibus transfer at Galt. The import of the whole appears to be that the passenger was to be carried the whole distance; he was not to be called on to walk the three-fourths of a mile, and it was the business of the company to see that he was conveyed over this distance free of expense. The omnibus fare was ten cents, and it would have been reasonable for the passenger to have paid this and made his connection. The damages should, therefore, be only ten cents. Order made setting aside nonsuit, with costs, and directing judgment to be entered by plaintiff for ten cents, with costs appropriate to this branch of the action.

—The Amsterdam Sentinel tells of the cruel hoax a local tradesman played on his patrons: "Several of the devotees of the silent steed were invited to inspect the latest chainless safety by Mr. Davis. They of course accepted the invitation, and upon being ushered into a rear room they were greeted with a hearty laugh as they were shown a common safety pin."

JOHN BARBER

Mercantile Summary.

At Arnprior, last week, burglars relieved Henderson, the jeweler, of ten watches and some other merchandise.

A joint stock company has been formed in Smith's Falls, capital $7,000, to purchase grounds and run a fair in that town.

The loss from prairie fires in Manitoba in October, which occurred principally in the eastern and north central districts, is estimated at $130,295.

The Toronto Board of Trade will co-operate with the City Council in impressing upon Postmaster-General Mulock the advisability of reducing the postage rate on drop letters from two cents to one.

Mr. W. C. Macdonald, of Montreal, has made another gift of about $300,000 to McGill University. Mr. Macdonald's total contributions to McGill amount to about $2,500,000.

The by-law upon which the town of St. John's, Que., voted, in favor of granting a bonus for the removal of the Lefebvre vinegar factory from Montreal, was carried by a large majority.

At Granby, Que., the town council has moved towards advertising for tenders for an electric lighting plant, arc and incandescent. One of the main industries of the place, the Granby Rubber Company, is very busy on western orders. Their output is about 4,500 pairs of rubber boots and shoes per day.

According to official reports, says a French journal, the yield of the vineyards in France this year was 32 million hectolitres, which shows a diminution of 12 million hectolitres, as compared with the yield of 1896, and a difference of nearly 126,000 hectolitres from the average yield of ten preceding years.

Word comes from St. John that the lumber cut this year is not likely to be half that of last season. On the Upper St. John River the crews sent into the woods are much smaller than usual in consequence of the very poor outlook in the British market, which has not been favorable for satisfactory work.

Counterfeit 25 and 50 cent pieces are in circulation in North Sydney. The pieces are intended to represent the Newfoundland money, and so good is the imitation, says the Sydney *Herald*, that it is impossible to detect any difference from the good coin, unless by the sound. Newfoundland issues 20 cent pieces, and it is probable that the counterfeits are probably 20 and 50 cent pieces. Some doubtful Newfoundland 50 cent pieces have been seen in Yarmouth.

We learn from the *Maritime Merchant* that more than 60,000 pairs of skates, made in Europe, arrived in Canada per steamer "City of Boston" not long ago. These, it appears, are "made in Germany" and should have arrived on the Canadian market early in September last. "Most of them are cheap and nasty imitations of the Acme skate which the Starr Manufacturing Co. of this city and Dartmouth were, and are still, the original manufacturers of."

Next year the trunk lines of railway in contending for the export grain trade will have a new form of competition. A fleet of steel barges will be built to run between St. Louis and New Orleans, which will carry grain for 3 cents per bushel, and with equally cheap rates for such return merchandise as may be obtained. This added facility will no doubt largely aid in further building up the advancing export trade of New Orleans, and be of no inconsiderable advantage to the farmers in the Mississippi Valley.

Three big biscuit-making companies in the United States have practically amalgamated, at least only details remain to be arranged for 1st January next. The three companies entering the trust are the New York Biscuit Co., the American Baking Co., and the United States Bakery Co. The latter is now capitalized at $5,000,000, while the other two are rated at $10,000,000 each. But this capital was all too small for the ideas of the Trust, so it has been raised to $55,000,000.

The gate receipts at the Winnipeg Exhibition of 1895 were $5,518, and the grand stand receipts $2,888. The next year receipts at the gate were $7,166, and at the grand stand $3,923. But last year both previous records were eclipsed, for the gate receipts went up to $10,028, and those of the grand stand to $8,814, making a total of $18,842. The capacity of the Winnipeg grand stand is 9,000 persons; the main building of their exhibition measures 240 feet by 90; the machinery building 300 by 30, while the carriage building and agricultural hall are each 100 feet by 50. These figures give an idea of the scale of this enterprise. The subscriptions to the prize list of the association have been on a scale of liberality that speaks well for the citizens, amounting last year to $2,887, in amounts of from ten dollars to one hundred dollars. The sum of $10,429 was awarded in prizes last year. Total receipts in 1897 were $37,414, and there is a balance of $3,507 in hand.

INSOLVENCY LEGISLATION.

At a recent meeting of the Council of the British Empire League, in London, Eng., the following resolution was passed: "That this meeting of the Council of the British Empire League desires to impress upon the present Government of Canada the importance of procuring the enactment of an efficient Insolvency Law applicable to the whole Dominion, which would tend to increase trade between Great Britain and Canada, and strengthen the confidence of British traders to export goods to the Dominion." Several strong speeches were made by those present, the attendance including a number of men of great prominence in trade and in social circles. One of the speakers in supporting the resolution said: "Canada has no bankruptcy law, nor Deed of Arrangement Act. Insolvent estates are administered under deeds of assignment. The trustee is generally the nominee of the debtor—an obvious advantage to the debtor. There is no investigation, and, if there is, it is useless, he surrenders all he then has. He may have traded fraudulently; he may have made settlements out of his estate to his wife in view of his failure; he may have, and often has, an overdraft at his bankers, and he secures them by a first charge upon his book debts; or he may make, and does make preferential payments to cash creditors, or even a preferred trade creditor—still there is no appeal, no Act of Bankruptcy which brings him under the law of the land, and compels banks or cash creditors, or favored trade creditor to disgorge. Can you wonder, then, that British creditors, separated by thousands of miles from the scene of action, and with these most prejudicial conditions prevailing, should regard Canadian credit as utterly unsound and most unsatisfactory? It is within my knowledge that manufacturers and exporters do not seek Canadian business as a natural consequence."

The GURNEY-MASSEY CO., Limited
MONTREAL

Mercantile Summary.

A MAN in Listowel has shipped his first load of hogs for Armour & Co., Chicago, says the Stratford *Beacon*. These were selected hogs and were bought to test practically the superior reputation of Canadian hogs. The load consisted of 141 animals and weighed 27,630 lbs. The price paid was 4½ cents per pound.

THE city council of Fredericton, N.B., had a special meeting to consider a proposed by-law respecting non-resident traders. The measure provided that non-residents doing business in the city should pay a license fee of $50 per week. The Board of Trade and all the merchants of the city were a unit in demanding its enactment, but Aldermen Moore and Farrell protested against the council carrying the principle of protection to such an unreasonable extent, and they resisted the proposed law so forcibly as to prevent its adoption last Saturday, and therefore, it stands for further consideration.

WORD comes from the western part of British Columbia of much recent activity in the free-milling district near Harrison Lake. There is great bustle, we are told, in Fire Mountain Camp, where several companies are organizing and where more than a hundred claims have been staked out. We find the account of the Fire Mountain Mine Company of somewhat unusual interest, for the reason that Mr. Arthur Addison, formerly of Toronto and an old MONETARY TIMES boy, is one of the proprietors. Mr. Addison spent nearly three years in the Klondyke region, and we understand they were by no means barren years. Some of the means he accumulated by hard work up there he has invested in Kootenay or Harrison Lake mines. The machinery in the Fire Mountain mine is to be running in January next. The company is to build a wagon road from the head of Harrison Lake, near Westminster, to where its pack trail is nearest to the old Cariboo road, and will then go on with the road to the mine, as well as across to the old Government road. The Local Legislature will, it is said, financially assist the company to build the road as far as the Cariboo highway. The Fire Mountain Company has all its sheds and tramways completed, and its machinery for the mill covered in.

THE list of country commercial casualties for the week in the Province of Quebec is as follows: E. A. Gauthier, of Papineauville, gave up hotel-keeping last spring to go into storekeeping. Result, assignment.——P. Gagnon, a storekeeper at Grand Baie, on the Lower St. Lawrence, is offering 50 cents on the dollar.——The assignment is noted of H. B. Lafleur & Co., quite important general dealers at Ste. Adele. Mr. Lafleur was one of the first to engage in business in that new section of country when it was opened up by "the apostle of colonization," the late well-known Cure Labelle. He did an active business for a good many years, but failed in 1891, with liabilities of $32,000, subsequently resuming business in the name of a sister.——F. J. Hebert, tailor at Granby, has assigned to the court, owing $3 500.——L. Kert, general dealer, of Calumet, has arranged a compromise at 40 cents, cash. He did a peddling trade, and also had branches in the back townships of Argenteuil, at Harrington and Rivington, and was generally supposed to be doing fairly well.——Frank Lemieux, of Buckland, married the widow of Napoleon Laliberte, who had carried on a small general business for some years. He has now made a voluntary assignment.——The assignment is reported of R. Scott & Co., lumber dealers at Robinson, with mainly local liabilities of about $5,000.

Mercantile Summary.

THE President has appointed Harlan W. Brush, of New York, as United States consul, at Clifton, Ont.; Charles W. Merriman, of Wisconsin, as consul at Brockville, Ont.

THE Canadian Minister of Finance and the Premier of Nova Scotia have, according to a Boston despatch of Monday last, prevailed upon the Dominion Coal Company to modify the determination to shut down the Victoria collieries at Cape Breton.

WE are told that a compromise has been accepted by the creditors of C. & C. G. Wilson, woolen mills, of Cumberland, and that the firm will continue in business. The total liabilities were about $25,000, and Messrs. Wilson are to pay the creditors 25 cents on the dollar.

La Minerve, of Montreal, "the only morning journal published in French," has suspended publication. The news will be heard with regret by many all over Canada who admired an able and scholarly paper, that has had a deservedly good reputation for the long period of 44 years. We hope to hear that its publication will be resumed.

THE jobbing grocery firm of Dunlop & Co. at Moncton, N.B., is reported in trouble, and a proposition of compromise, at the rate of 20 cents on the dollar, has been submitted to creditors. The Bank of Montreal, the principal creditor, for an amount of some $26,000, is said to be secured.——A. H. Hayward, a small trader at Elgin, in the same province, has assigned.

THERE has been a fire in Moncton which resulted in $36,000 loss. It broke out on Monday morning last about the business centre of the town, and burned for ten hours; Reid & Co. wholesale grocers, the Truro book store, Ruddick's block, a fur store, a restaurant, a millinery shop and a residence were destroyed, while George Vye's building is a wreck. Reid & Co. lose $16,000, insured for $13,000; book store, $6,700, insurance $4,000; J. W. Smith's loss on building $6,000, insurance $4,000; Ruddick building $3,000, insurance $2,000; Vye loses $3,000 on building, insured for $2,000: the fur store $1,500, no insurance.

THE following recent failures are reported in Nova Scotia: Horace Hines, a general trader in a small way, in business about two years at Pubnico, has assigned, with liabilities of $750.——C. H. Rowland, in the tailoring business since 1893 at Sydney, is insolvent. His father, who previously failed, is supposed to have been interested in the business. The liabilities are $1,600, of which $525 is preferred, and assets amount to about $600.——H. P. Neily, a small trader, of Nictaux, is reported insolvent.——Murdoch D. McLeod, a grocer of North Sydney, sold his business a few weeks ago to one Elijah E. Moore, and has now made an assignment.

THAT racy and very enterprising British Columbia weekly, the *Province*, has got a libel suit on its hands. It appears that an article published in that journal, and copied into the Victoria *Daily Times*, charged the Provincial Premier and the President of the Council with bribery and betrayal of office. So proceedings for criminal libel are being laid against Senator Wm. Templeman, Hewitt Bostock, M.P., Janbion Coltart, and W. C. Nichol, the last named two being respectively manager and editor of the *Province*. Mr. Templeman is managing editor of the *Daily Times*, chief of the Liberal party of British Columbia, and was appointed senator this year.

MINING INFORMATION.

One of the most valuable finds of coal, perhaps, in Nova Scotia, has lately been found at Choctans Lake, a few miles from Sydney, C.B. Mr. Fletcher, of the Dominion Geological Survey, confirms the story. The seam consists of there benches, of which the largest is five feet six inches thick. It is reported that an English syndicate is being formed by Mr. Kennedy, who is associated with Mr. E. T. Mosely, the finder and owner of the seam, to work these extensive areas.—*Bras d'Or Gazette.*

An American company is establishing an electric power plant at Boonington Falls, in the Kootenay country, to be ready for work by the middle of January. It is capable of producing 2,500 horse-power, and can be doubled at short notice. The wires had been strung from Ross to within two miles of the plant on December 10th. At the crossing of the Columbia River, below Waterloo, the span is 850 feet and the wire is 75 feet above the water. Four working mines in Rossland will be supplied with the power, and this will include the Centre Star, Virginia, Monte Cristo, and either the Iron Mask or War Eagle Mines. "No wire will be strung to Nelson at present, as the business will not justify it. Should the Hall mines, however, adopt electricity as its motive power, the line will be built."

At the Gold Hill mine in North-Western Ontario, the diamond drill has been used with satisfactory results. Messrs. Kennedy & Smith have had their drill at work there for some time now, and have reached a depth of 400 feet. The operations, says the Lake of the Woods *Mining Journal*, have confirmed the permanence and auriferous character of the vein. The vein, which varies in dip from 8 to 14 degrees, was struck at a depth of 303 feet, and the core looked most promising. Drilling at this point has been discontinued and the drill removed to another portion of the property, where it is now at work.

Capt. Triggs has let the contract for sinking a further 100 feet to the 120 foot level on the Triggs mine, according to the Rat Portage *News* of 10th. The work is to be finished by April 1st. The shaft on the Yum Yum is now down over 85 feet, and several tons of ore will be crushed as soon as the new reduction works starts running. The appearance of the mine is most promising, and the diamond drill tests made on the property some time ago were very satisfactory.

A subscriber to THE MONETARY TIMES, living near Kamloops, writes on 16th December: "I am away up in the mountains where mail only reaches me at odd times or I would have answered before. I am working on some claims in this district, and before spring hope to realize something. I like the paper immensely and it goes the rounds of the camps until it is nearly worn out. This is a copper gold camp and is rapidly coming to the fore, and will undoubtedly be one of the best in British Columbia. English and Canadian capital is coming in rapidly; they having already purchased 15 claims and are now developing them.

—At the first general meeting of the shareholders of the Slocan Mines Exploration and Development Company, Limited, held in Montreal last week, the following were elected to the board of directors: J. P. Dawes, director, Merchants Bank of Canada, president; S. H. Ewing, vice-president Molsons Bank; Hon. A. W. Ogilvie, senator; A. C. Clark, broker; G. N. Ducharme, director Jacques Cartier Bank, vice-president; Hon. F. G. N. Dechene, commissioner of agriculture, Quebec; Isaac Waterman, Imperial Oil Company, London; Hon. Thos. McKay, Senator, Truro, N.S. This company has purchased several well-known silver mines in the Slocan district. The Slocan Sovereign has already 900 feet of development work, and the first shipment of ore was made on November 30th. The Iron Crown, San Berdino and Kenneth silver mines are located near the celebrated White water mine, which is now paying dividends at the rate of $30,000 per month. It is stated in the Montreal *Gazette* that the capital of the company is $300,000, of which $200,000 still remains in the treasury.

The lead furnace at the Hall Mines smelter, at Nelson, B.C., is nearly completed and will probably be blown in shortly after January 15th. Some of the lead ores are now being roasted and made ready for the furnace. The company is trying to make contracts for a steady supply of lead ores, and if this has not been done by the time the furnace is blown in, only a short run will be made with the ore now in hand.—*Nelson Miner.*

Exports of Kootenay ores for 1897, up to December 11th, amounted to 47,040 tons, of an average value of $73.62 per ton; value, $3,463,405. The shipments of produce of smelters in the same period was, of matte from Nelson smelter, 2,908¾ tons; from the Trail smelter, matte, 5,044½ tons; total matte, 7,953¼ tons, value, $4,146,655. This makes the total value of ore and matte exported, according to the Nelson *Miner*, $7,610,061, which is a tolerable index of the producing value of the Kootenay mines.

MONTREAL commercial failures for the week are few and of no special importance. Perrault, Perrault & Co., a young firm who began as hatters and furriers last spring, have assigned at the instance of their principal creditor, a Toronto house. They owe $5,400. —— Two small millinery concerns are reported in trouble: Miss E. Jackson has assigned and Mrs. E. Hebert has compromised liabilities of $1,100 at 25 cents.——H. Creed & Son, plumbers, have made an assignment. The concern was unfortunate only a short time back as Creed & Small.—— E. S. Reynolds, hotel keeper, reported last week as trying to compromise, has now assigned. He owes $11,213, $3,600 being for rent.——A demand of assignment has been made upon G. Cussin, coal and wood dealer, who owes $2,500.

FROM the ancient capital we hear of the following business disasters: A demand of assignment has been made upon Pouliot & Page, dry goods men. Quebec. The business was started about two years ago under the style of "La Maison Blanche," with four partners. Two of them went out last September, the business being continued by the above. The liabilities are stated at about $10,000.——Miss Julie Boucher, milliner, has assigned, having small local liabilities.——Joseph Poitras, hotel-keeper, has made a voluntary assignment.—— In the matter of Leclerc & Cote, shoe manufacturers, whose embarrassment was noted last week, an assignment has been made on the demand of Messrs. Dowker & McIntosh, Montreal. Their affairs are said to look worse than at first anticipated, and it is said they have not fully understood the cost of their goods. Liabilities are figured at about $20,000, and there is some talk of a 25 cent compromise.——The affairs of the Adams Shoe Company, are also reported to be in unsatisfactory shape, and it has been thought advisable that a statement should be prepared for the consideration of creditors.

Mercantile Summary.

An illuminated blotter and calendar is the seasonable present of the Atlas Fire Assurance Company to its friends.

The village council of Huntingdon, Que., has resolved to purchase the waterworks and electric lighting plant for $42,500, provided the conditions of the contract and by-law are made satisfactory.

At a public meeting of citizens of St. Henri, Quebec, held this week to discuss a by-law authorizing the erection of a new fire station, the meeting was unanimously in favor of the expenditure, and the by-law was accordingly declared to be carried.

A shipment of Mediterranean dried fruit for the Christmas market, which arrived by the steamship "Carthaginian," left Portland at 1.45 a.m. on Sunday last and arrived in Toronto on the following morning at 5.30, the run of 627 miles being made in 27 hours and 45 minutes. The Grand Trunk has thus placed a fast runto its credit and done a good turn for wholesale merchants here.

McIntosh & Hosegood, general storekeepers, Dauphin, Manitoba, disagree, and have assigned. Sometime ago they endeavored to dissolve partnership and could not agree as to their respective interests. This was one of their reasons for assigning. The firm is supposed to have a fair surplus.——An assignment has been made by K. W. Reimer, general storekeeper and cheese manufacturer at Steinbach, Man. We have not learned the cause of his trouble. His father is said to be a prosperous merchant in the same place.—— In August last W. J. Haliday left Calgary and opened a confectionery store in Nelson,. B.C. Now he assigns to W. Waldie.

In May, 1884, H. Longhurst & Co. succeeded to the stained glass firm of Pennington & Co., Hamilton. Eight years afterwards the firm dissolved partnership and D. Lemessurier retired. Since then it has been a hard struggle with Longhurst, who lacked capital, and at last he makes an assignment.——So does J. McChesney, merchant, Ashley.——The sawmill firm of Loree & Prout at Oil Springs were burnt out early in 1895, without insurance, and N. W. Prout rebuilt the premises with borrowed money. The mortgagees now take possession and Prout assigns.—— After working as a laborer for some time, John Tyne took it into his head to open a furnishing store at Chelmsford. He could not reasonably be expected to make any money in that line of goods in such a small place, and assigns his estate.

The Walkerville Brewing Company sends us a handsomely illuminated calendar.

The Confederation Life Association is sending out to its clients a welcome holiday remembrancer in the shape of copies of the *Canadian Magazine* Christmas number.

"Thoughts of Home and of Home Comfort" is the suggestive headline of an advertisement by the North American Life Company, from which is preached a ten line sermon on the appropriateness of a life policy as a present by the head of a household to his family.

Word reached the city last night of the death, at the age of 64, of Mr. Alex. Ewan, so long known, and so favorably, as a manufacturers' agent, in Montreal.

Early in 1882 Hampton, Pickering & Co. purchased the general stock of J. Watt & Co at Mount Forest. Some years later the firm dissolved, and the business was continued by Josiah and his son, Wm. Hampton, under the style of Hampton & Co. Those were the days when business was prosperous, and they did their share. But they were inclined to overtrade. For several years past they failed to maintain their old position with liabilities of $12,000, with nominal assets of $13,000. At a meeting of creditors they were given until Monday next to make an offer for the estate.——With but little capital, F. C. McLeod attempted to do a tailoring and men's furnishing trade in Stratford, in February, 1893. Lately he has had strong competition, and it now ends in an assignment.——Albert Webber, who keeps a second-hand stock of goods in Hamilton, also assigns.

—Up to November 1st, it is said, the Locust Committee in Argentina had spent about $2,000,000 in the destruction of locusts in the provinces of Santa Fe and Entre Rios, and about 20,000 tons of dead locusts and locusts' eggs had been disposed of. The Buenos Ayres *Standard*, in speaking of this, says: "Our foreign readers can have no idea of the magnitude of locust swarms in some parts of Argentina; in the north of the Chaco, near Las Palmas, a swarm darkened the sky in its passage the whole day. We might go by degrees of latitude in measuring some of these clouds."

The REAL ESTATE LOAN COMPANY OF CANADA, Limited

DIVIDEND NO. 22

Notice is hereby given that a dividend at the rate of four per cent per annum has been declared for the current half-year, ending 31st December, and that the same will be payable on and after Monday, 3rd January, 1898.

The transfer books will be closed from the 20th to to the 31st December, both days inclusive.

By order of the Board.

THE SITUATION.

It is becoming probable that the measures being taken to prevent a famine in the Klondyke will be successful. First, the Canadian Mounted Police induced large numbers to go down the Yukon, from Dawson city, to where supplies of food are known to be stored. Next, the American Government is taking measures to relieve such of its citizens who remained behind in British territory, or who further down, north, may be in danger of suffering from a want of provisions. Congress is showing great alacrity in voting the necessary supplies. Six hundred reindeer are to be used, as Russia uses camels in Central Asia, to carry supplies; and the reindeer, of which there are to be 600, may, like the camels, be found difficult to feed on the way. On one of the Russian winter expeditions, the camels had to take a range of twenty miles to find food, in addition to such portion as it was possible to carry. The loss of camels on the way was enormous; if the reindeer be overloaded and underfed, a similar disaster may happen. Now-a-days much food supplies for man can be carried in concentrated forms, and this will be done now. The State Department of Washington has asked the British Government to obtain from the Canadian Goverment permission to pass over our territory, and as this is an errand of mercy our Government is not likely to interpose any objection; Canada could only object on the ground that the duty is one which she ought herself to perform. It is of course necessary to be convinced of the necessity of any expedition at all. As leave will be asked to have United States soldiers accompany the expedition, as guards, it will be necessary strictly to limit their numbers. The country belongs to Canada, and it is the duty of Canada to provide for its security. This duty will be performed by, if report be true, a considerable addition to the number of Mounted Police already in the Klondyke.

By pleading urgency for the suspension of killing seals at sea, the representative of the American Government, Mr. Foster, sought to detach this question from the list of others awaiting settlement between the United States and Canada, in the hopes of getting such a settlement of that as his country desires, and leaving the others to the chances of the future. In this he has not succeeded. Sir Wilfrid Laurier, in his negotiation with Mr. Foster, gives his reasons for being unable to agree to the American proposal, the chief of which is that the Canadian sealers are preparing as usual for the permitted season of pelagic sealing, and if they were prevented now from following their usual occupation, there would come a demand for damages larger than Parliament would be willing to meet. Besides he does not think that the killing some 6,000 seals at sea would put the herd in jeopardy; a point on which Mr. Foster does not, of course, agree with him. As each seal is said to require ten pounds of fish for its daily food, it would not be amiss if some economist, with a taste for figures, would take the trouble to figure out what it costs in food suitable for man to feed this voracious herd. If the seals were not there to devour this fish, the quantity of food fish available for human substance would probably increase in a proportion at least equal to the whole quantity which the seals now devour. Allowance might be made for the effects of the voracity of the fish themselves in preying upon one another; if this were done, and the account balanced, the world would see what it is paying to keep up this herd, and whether the operation is not a losing one. The men now employed in catching the seals and curing their skins would be available for employment in something else. Mr. Foster volunteers the statement that sealing, both on land and at sea, is now carried on at a loss. If this be so, the sealing, as a pursuit, will soon decide for itself what to do.

The sawlogs question, so far as Ontario is concerned, finds its solution in a resolution requiring the logs to be manufactured in Canada; all timber licenses issued after the 30th April, 1898, are to contain a condition to that effect. Such is the purport of the measure brought down by Mr. Gibson on behalf of the Ontario Provincial Government. The new regulation will be confined to timber lands belonging to the Crown. The township of Aweres, Algoma, is an exception, a contract controlling the timber cut there making a special condition. The larger part of the timber limits now in the hands of Americans were obtained, not from the Crown, but from private holders. In a few years the limits now being worked will give out; and regard being had to the future, it is the crown timber lands that will supply our future needs, both for home use and export. The regulation requiring logs to be manufactured in Canada will probably lessen the price which the Government of Ontario will hereafter obtain for limits. In the revenue from this source there is almost certain to be a decline, not necessarily in the gross amount received, for that would depend on the extent of the area covered by new limits, but in amount per square mile received. For another reason—the lessening of the supply—the opposite tendency may be expected to show itself. But if the one tendency should balance the other, it would be erroneous to conclude that the requirement of local manufacture had not reduced the price of the raw material. This action of the Ontario Government will help, as far as it goes, to solve the sawlog question for the Ottawa Government. No export duty on sawlogs need be looked for. The other provinces can, if they like, take a leaf out of the book of Ontario. It can scarcely be said that, as yet, any strong national impulse for the preservation of our forest resources has been felt. There have been many panicky attempts to create alarm over the alleged near approach of the exhaustion of the supply; but it has often come from persons who were in a hurry to cut all they could, and who looked with jealous eyes on people similarly affected.

On the currency question American opinion shows great diversity. At a caucus of the Democratic members of the House of Representatives an unanimous resolve was expressed to resist the retiring of the greenbacks and the Treasury notes, and to oppose all attempts to extend the privileges of the National banks, including the reduction of the taxes they now pay. The resolution does not go the extent of opposing the convertibility of the notes, and if they are not to be retired, the present practice of re issue must be continued. If the policy of the Democrats were to prevail, it would be impossible to reduce the amount of the greenbacks and Treasury notes in circulation. But that party is in a minority in Congress, and by the law of antagonism the position it has taken may set the Republicans more strongly in favor of currency reform. That these paper issues are redundant the Democrats would probably not admit; but that does not alter the fact that, more than once, it has been necessary to sell bonds to raise gold to continue the convertibility of the notes. The essential thing is to maintain convertibility, and while this is done, the objection to a convertible currency, in this form, is not likely to become overwhelming. Mr. Gage, the Secretary of the Treasury, has mixed up, in one bill, a number of subjects which are not necessarily interdependent. He proposes to reduce the interest on the public debt, so as to save $10,000:000 a year; to redeem the greenbacks and the Treasury notes, and to make great changes in the National Bank system. One thing at a time would point a better road to success. But if it were desirable to legislate on all these questions in one session of Congress they ought to be kept separate. Mr. Gage believes. or affects to believe, that it would be safe for the Government to secure bank notes not specially secured by the banks; that a safety fund of two per cent. would cover the risk. This belief rejects the teaching of experience obtained under Van Buren's original safety fund system. Mr. Gage says the object in giving the guarantee of the Government is only to make more emphatic the guarantee that now exists; but the difference is in the things guaranteed; in the present case, notes specially secured by the deposit of public stocks; in the case proposed, notes not so secured.

A lift for silver, though perhaps not so intended, is to be found in Secretary Gage's currency bill. Under it, silver certificates may be made the basis of the issue of bank notes. If the silver certificate calls only for silver, as some of them do on their face, the question of its value may reasonably be raised. Is the silver in which it might be paid legally exchangeable into gold at the Treasury? If so, why all the juggling with the word "coin" in previous Acts of Congress? The declared aim of Congress has been to maintain the "parity" of the different forms of currency, but the market value of the gold and silver coin is very far from being equal. Suppose a large amount of silver certificates should be made the basis of bank note issues, the question would arise when the Government was called upon to redeem the notes, whether silver certificates should be paid in silver or gold. It is very easy to talk about the "parity" of the two metals when it is possible to get on without exchanging gold for silver; but if that possibly ceased, as it would in the case supposed, the question of paying silver certificates in gold, directly or indirectly, would take a practical shape.

The arbitrators appointed to decide upon the sealing claims of Canadians whose vessels were illegally seized in the Behring Sea, have made their decision in all except two cases, which are reserved. The total amount awarded is $464,000. The lump sum of $425,000 previously agreed upon by the Canadian and American Governments, Congress refused to grant. The United States gains nothing by this refusal and has to pay a larger sum than it would have taken, if there had been no arbitration. Besides, the cost of the arbitration will have to be added.

CHRISTMAS.

In wishing well, as we do, to our subscribers and friends at this Christmas season, it is very pleasing to think that the joyousness usually associated with the present holiday time is enhanced for the business man and those dear to him by improved conditions in the commercial field. There is a more cheery feeling among Canadian merchants and among most manufacturers. And statistics, whether of banking, export or internal trade, show that this hopeful feeling is justified. There is already reason for thankfulness and the outlook for 1898 is a good deal better than it was twelve months ago.

Merrymaking, present-giving, friendly greeting, may for these and other reasons be expected to be upon a freer and larger scale this year. For it is a curious characteristic of the average man that when his pocket-book is fairly well filled his heart is warmer. There are many good people, however, who do not permit even dearth in pocket to interfere with their Christmas expressions of good will, and the solicitude they show towards their poorer neighbors. Let us emulate such people; for interest in others, sympathy with distress, good will expressed in word or deed, are among the higher meanings of Christmas Day.

DEPARTMENTAL STORE BARGAINS.

The departmental store is, in part, the result of the methods of trade adopted by manufacturers and the jobbing houses. In their attempts to do a large volume of business, production is increased beyond legitimate requirements, and after supplies have been distributed to the regular trade, surplus stocks still remain in the warehouses. The usual channel through which they are sold is the departmental store. It is the proud boast of these houses that if they can obtain goods at the right price, they can sell anything from a needle to an anchor, and as a result of a reputation for this sort of thing they have been made the dumping ground of manufacturers who carry excessive stocks. If the manufacturers are asked why they do not offer their "bargains" and "snaps" to the regular retail trade, they will tell you that the average retailer would not thank you for the offer of goods at reduced prices when he has in stock the same merchandise purchased a few months previously at regular rates. There is little consideration for the real interests of retailers in this arrangement, as the goods must in the end be sold in competition with those that he owns. The remedy, however, does not lie in taking surplus stocks to the retail trade, but rather in a vigorous and continued attempt to regulate more evenly supply and demand. If the manufacturers did not increase their output beyond the natural needs of the community in which their goods must be sold, underselling in the departmental stores would diminish, to the general advantage of trade interests. A policy of limiting production to the quantity of goods represented on the order books at the season's commencement is to be encouraged.

—The Chicago *Record* remarks that a few weeks ago the popular amusement of the day in the United States was golf. Later, it was football. Now it is the formulation of currency reform plans.

BANKING REVIEW.

We give below a condensation of the figures of the statement of Canadian banks for the month of November. It is compared with the bank statement for the previous month, and shows capital, reserve, assets and liabilities, average holdings of specie and Dominion notes, &c.

CANADIAN BANK STATEMENT.

LIABILITIES.

—	Nov., 1897.	Oct., 1897.
Capital authorized	$73,258,684	$73,258,684
Capital paid up	62,288,636	62,285,196
Reserve Funds	27,283,999	27,223,999

Greatest amount notes in circulation during month	42,303,141	42,401,336
Loans to directors or their firms	7,562,652	7,079,839

As this is the last Banking Return that will be reviewed this year, it may be well to look back and consider the changes that have taken place since the year opened; that is, such changes as are apparent on the surface of these banking returns.

Passing by the item of capital, which has only increased by about half a million dollars, we come to the important item of circulation. At the beginning of the year, the circulation of the banks stood at $33,100,000 On the 30th of November, it was $40,100,000.

This increase of $7,000,000 during the present year, to which must be added $400,000 for the increase in Government small notes, is a remarkable evidence of the increased volume of our productive interests. We emphasize the words *productive interests*, for it is they that give rise, in a large degree, to the volume of circulation. In the conduct of the large and important business of our wholesale merchants, and largely also in conducting the business of our manufacturers, the circulation of the banks has little or no share.

It is in connection with operations on the land itself, either in the way of raising crops, or feeding cattle, or making cheese and butter, that a large volume of our bank circulation is called into play, especially during the time when such products become articles of merchandise. The operations of lumberers in the forest and at their mills, and also the industries connected with mines, fisheries, railways and shipping, give rise to another large development of circulation. Bearing these conditions in mind, it is clear there has been in Canada, during the year, a largely increased development of productive operations. There has been considerably more produced and sold from the farm, the mine, the forest, and the fishery, than was the case last year. The increase is simply reflected in the figures above given, viz.: $33,100,000 in January, and $40,100,000 in November. It is of interest to compare the volume of circulation on the 30th of November for a considerable number of years back, thus:

1889	$34 900,000	1893	$35,100,000
1890	36 300,000	1894	33,000,000
1891	37,400,000	1895	34 300,000
1892	37 100,000	1896	35,200,000
1897	$40,100,000.		

It must always be borne in mind that the increase in the number of bank branches has a tendency to diminish bank circulation. Facility of communication and transportation has also a similar tendency. This increase in branches does not affect the circulation of Government notes, for they are never sent in for redemption. But bank circulation is directly affected, and in spite of this, we see before us such figures of increase as the above table shows.

DEPOSITS.

But it is when we come to look at deposits that we are most impressed with the remarkable change that has taken place. A year ago bank deposits stood at $205,000,000. On the 30th November this year they have mounted up to $229,000,000. But the total deposits in all the institutions of the country that take deposits and make returns amounted to $286,000,000 a year ago, while now the amount is $313,000,000.

Only one million of dollars of this amount represents the increase in deposits of Dominion and Provincial Governments with the banks; consequently, the increase in the deposits of the public with Canadian banks has amounted to no less a sum than $23,000,000 while the increase in the deposits of the public with other institutions has amounted to three millions more, thus showing that the people of Canada, as a whole, have $26,000,000 more money at their command than they had a year ago.

To show the bearing of all this, we will again go back for a series of years. Deposits of all kinds, at the end of each of the following years are these, viz.:

1892	$251,000,000	1895	$276,000 000
1893	253,000,000	1896	285,000,000
1894	268,000,000	1897 to 30th Nov.	313,000,000

Certainly, a very remarkable record of progress, and indicating in a striking manner: First—That the Dominion of Canada is a country in which the people can steadily grow and prosper; and next, that the people of Canada are an industrious and economical community.

The point to be noticed about this increase is the steadiness of its character. There is no rapid increase at any time, no booming and rising up to an unnatural height, to be succeeded by an equally rapid fall. The steadiness of the rise is the best feature about it, for it is an almost certain assurance that it will be maintained. And certainly the development is remarkable enough for a country like Canada, and one that is very little appreciated abroad, even by those who know something of her.

DISCOUNTS AND LOANS.

With regard to the discounts and loans of the banks, however, we find quite a different development. These have declined a little during the year. On 30th November, 1896, they amounted to $217,000,000, and on the 30th Nov., 1897, to $211,000,000. But this by no means indicates that there has been a decline in commercial business, for we know absolutely to the contrary. The lessened amount of discounts, in fact, is a healthy sign, and indicates the payment of loans in consequence of increased prosperity, and the shortening of credits for the same reason. When the mercantile community as a whole during any given year has realized considerable profits, and has had considerable cash returns from its customers, as has been the case during the last few months especially, the movement is reflected in a reduction of the total of bank discounts and loans. And there cannot be a question that the volume of discounts in many lines of business among us, especially in the importing trades, has been too high. Length of credit directly affects lines of discounts, and it is universally conceded that credits in Canada are too long.

The course of discounts during the last five years is shown by the following table:—

Total discounts	30th	November,	1892..........	$202,000,000
"	"	"	1893..........	207,000,000
"	"	"	1894..........	201 000,000
"	"	"	1895..........	207,000,000
"	"	"	1896..........	217,000,000
"	"	"	1897..........	211,000,000

The relatively small increase in the volume of discount during a period when the trade and commerce of the country and its production have very largely increased is really another evidence of the growth of realized wealth in the community.

It is during the present year that the extraordinary developments of mining activity in the extreme north have become manifest, and made the name of Klondyke familiar to people all over the world. There has been so far no material addition to the realized wealth of the people of Canada; that is, in the shape of actual gold taken out, and not counting the value of mining claims and properties, whatever that may be. But there has already been a considerable amount of merchandise purchased in our mercantile centres and paid for in cash, in anticipation of a tremendous rush of people northward next year. Already we hear of thousands of people flocking over from Australia, and tens of thousands from California. The rush across the Atlantic is also expected to be on an equally large scale, all which must lead to a very large development of business in the shape of transportation by land and water, and all sorts of supplies to be taken into the country in the shape of food, clothing, bedding, lumber, and other materials for house building; in addition to what is required for the mining business itself. The great resources of the Canadian Pacific Railway, both on sea and land, and in inland waters also, are likely to be taxed to the very utmost, and doubtless, that corporation will find it a matter of immediate necessity to provide a practicable access to the Klondyke region before another year is over. When this is secured, express, and telegraph, and postal arrangements will immediately follow, and after that we may look for some banking developments also. The gold developments of the Klondyke, however, are not likely to do as lasting good to the country as those of the older parts of British Columbia. The development of these is really only in its infancy, and when the Crow's Nest Road is finished, doubtless, arrangements for smelting ore will be made on the Canadian side, resulting in largely increased output and all the ramifications of business connected therewith. It would really seem as if Canada was to see on the Pacific slope developments of wealth-producing which could never have been dreamed of when British Columbia was admitted into the Confederation, and such as will repay her for all the outlay that the acquisition of a Province on the Pacific has cost.

On the whole, we can look back with satisfaction on the year that is past, and on the year that is so near at hand with much hope.

ABSTRACT OF BANK RETURNS.

30th November, 1896. [In thousands.]

Description.	Banks in Quebec.	Banks in Ontario.	Banks in the other Prov's.	Total.
Capital paid up	34,819	17,291	9,615	61,725

MANITOBA'S WEALTH.

A glowing account is given by a correspondent in today's issue of the generous yield of this year to Manitobans in grain and cattle. And his letter speaks in warm terms of the capacities and prospects of our prairie country. We may supplement these statements and opinions by some figures taken from the final bulletin of the Manitoba Government, issued last week, showing the quantities of live stock, poultry, dairy produce, etc. From the last revised assessment statistics sent in by municipal clerks, the following statement is compiled: Number of horses in Province, 100,274; cattle, 221,775; sheep, 36,680; pigs, 74,944. No less than 15,000 beef cattle were exported from the Province this season, besides 16,500 stockers shipped to the United States. The number of hogs shipped out of Manitoba on foot or dressed was 12,500. The number received by Winnipeg packers and butchers was 25,000. Total, 37,500.

The value of dairy products for the year approaches half a million dollars. For example, 987,179 pounds creamery butter, average price 18 cents, represents $177,692; 1,410,285 pounds dairy butter, at 13⅜ cents, $188,625; factory cheese, 987,007 pounds, at 8½ cents, $83,895; total dairy product, $450,213. It is to be noted that new farm houses, stables and other buildings have been erected, or improvements made, in Manitoba this year, outside the towns, to a total value of $935,310. Such evidences of progress and accumulation are welcome as proof, if proof were needed, of the character of our western country and the growing comfort of its occupants. Let us see to it that no pains are spared to make the peoples of the old world aware of the facts.

BRITISH COLUMBIA'S MINES.

Some of our Western Canadian friends have wondered, while others of them have complained, that investors in England, who are dabbling in mines all over the world, seemed to take so little interest in the mining development of British Columbia. And the fact has been cited that the financial journals of London rarely have a word to say about enterprises and companies in that Province and in Ontario, which to Canadians, appear well worthy of the attention of capitalists. In a recent two-column article on the "Mineral Resources of British Columbia," the London *Economist* admits that, in the opinion of many experts, the merits of that Province as a producer of minerals are still far from being properly recognized, while the high-flown statements of American journals have caused a Klondyke "boom" that meanwhile overshadows what may be sounder and more easily realized ventures near at hand.

The *Economist* inclines to the somewhat peculiar view, that "the comparative lack of interest displayed by British investors in the progress of mining operations in British Columbia is attributable to the inertness of the Dominion and Provincial Governments." This inertness is shown, it seems, in the failure of these authorities to provide authentic, prompt information about the character and yield of mines in the Kootenay and elsewhere.

> "We certainly do not want them," our contemporary explains, "to be perpetually sounding the praises of their own mineral areas, nor to accept the responsibility of issuing broadcast information of an unauthenticated character; but it would clearly be in the interest of the Province if the policy of publishing monthly statistics of production and values adopted in South Africa and in most of the Australian colonies were followed." At present, the British investor has "practically no means of ascertaining the kind of progress which the British Columbian mines are making, except from the irregular periodical reports of some half-dozen companies, for though the annual statements issued by the Governments of the Dominion and the Province, usually appearing many months after the period they cover has ended, are useful for purposes of comparison, and will later on become valuable as historical documents, they can scarcely be said to possess present interest to the investing public."

Has the British Columbia Government been remiss, then, in not sending to so important a British journal as the *Economist* statistics from the valuable reports of Mr. Carlyle, the Provincial Mineralogist? While the comments made above upon the staleness of Government blue books may sound satirical, they are such comments as have been made, and often deserved, upon literature of the kind in this and other countries. The hint is one that may be taken with advantage, we conceive. It will be worth the time and trouble for the Governments of B.C. and various other Canadian provinces to make brief compends of late intelligence, about mining, for example, print them in clear type, leaded, and on good paper (illustrated, if you like) for circulation in London, Aberdeen, Edinburgh, Hamburg, Berlin, Paris and elsewhere in Europe, so that it shall not be said that the British investor does not know what Canada is doing. We quote a further paragraph from the London journal:

> It is all the more desirable that British Columbia should not hide its light under a bushel, or leave the public to grope for particulars of its industrial progress among more or less unreliable and generally inaccessible reports, for the official data, though late in making its appearance in the eighteenth annual report of the British Columbia Board of Trade, shows that the production of gold and silver, as well as that of the baser metals, is proceeding satisfactorily, and that the results obtained in the year more particularly under review, were decidedly encouraging. In the past seven years the valuation of the mineral production of the province has increased from $2,608,000 in 1890 to $7,146,000 last year, the output for the two years 1895 and 1896 having been as follows:

	1896.		1895.	
	Quantity.	Value. $	Quantity.	Value. $
Gold placer (ozs.)........	27,201	544,026	24,084	481,683
Gold quartz (czs.)........	62,259	1,244,180	39,264	785,271
Silver (ozs.)	3,135,243	2,100,689	1,496,522	977,229

THE COTTON CROP.

Different estimates have been made as to the size and condition of the cotton crop of the United States for 1897-98. A recognized authority, in what is termed a final estimate, places the yield in round numbers at 11,209,000 bales, on 25,718,674 acres, making the average yield per acre .436 bales. Allowing 100 to represent perfect quality of staple, the average quality for the crop stands at 87. The following statement shows, by States, the area harvested, average yield per acre, the approximate production and average quality:—

States.	Area harvested.	Yield per acre. Bales.	Product.	Average quality per cent.
Virginia	52,044	.59	30,700	.94
N. Carolina	1,351,585	.46	621,700	.91
S. Carolina	2,175,496	.41	887,500	.80
Georgia	3,676,435	.40	1,456,500	.88
Florida	264,325	.43	113,700	.88
Alabama	2,915,713	.38	1,107,900	.92
Mississippi	2,920,375	.52	1,543,400	.89
Louisiana	1,382,761	.53	732,900	.80
Texas	7,434,522	.40	2,973,800	.86
Arkansas	1,781,491	.54	973,200	.85
Tennessee	1,103,571	.42	403,500	.88
All others	660,356	.43	283,900	.87
Total......	25,718,674	.436	11,208,700	.87

The proportion of the crop of 1897-8 yet remaining in producers' hands is 47 per cent., or in the neighborhood of 5,200,000 bales, as against about 3,500,000 bales, in the same position, on the corresponding date last year. It is reasonable to expect that, even on such a phenomenal crop, at no very remote period, receipts will gradually fall off; but for the present, at least, they are likely to be full, due to a panicky condition among producers, caused by a fear of still lower prices.

The course of the cotton market has been very discouraging. The *Textile Record* says: "The drop in the price of cotton has been altogether the most remarkable, and in some respects the most painful movement affecting the textile industries during the past two months. The decline ranges in the neighborhood of two cents a pound, and, of course, it has affected the value of millions of yards of fabrics in mills, commission houses and jobbers' hands. Coming at a time when manufacturers were regarding the future with feelings of hopefulness, it has been of an especially discouraging character; but hard as the experience is, the situation will be faced bravely, and with reasonable expectation that the future will soon present conditions of a more cheering character.

THE WOOL AUCTIONS, 1897.

The year in the wool trade, so far as foreign supplies are concerned, may be said to have closed on December 8th, on which day was concluded the sixth and last series of London wool auctions Although many fluctuations have been made in prices during the different auctions, allowing for the poorer condition of the Australian clip, present prices are as high, and if anything higher than a year ago, and the same may be said of Cape wools. We are indebted to Messrs. Helmuth, Schwartze & Co., London, for a report of the statistics of the trade. The total supplies and deliveries of wool during the year, and the distribution, as compared with last year, are as follows:—

	1897.	1896.
Home consumption	837,000 bales,	793,000 bales.
Continental "	1,018,000 "	1,215,000 "
American "	241,000 "	126,000 "
	2,096,000 bales,	2,134,000 bales.

There is a small decrease of 38,000 bales in the total deliveries of the trade, which is partly caused by the fact that 32,000 bales are held over this year, as against 20,000 bales in 1896. It is interesting to note the increased consumption of America and the decline in the purchases of the continent. The first series of 1898 will commence January 18th, and the second March 15th. It is estimated that about 240,000 bales will be on hand for the January auction.

Holiday Reading

A DETECTIVE'S VIEWS AND EXPERIENCES.

"You must see a good deal of the worst side of human nature, Mr. B.," said the newspaper man to the detective. "Do you find the average thief or burglar courageous, or the reverse?"

"Well, the fact is, they are most of them cowards. Once in a great while you come across a fellow who has got daring, a sort of recklessness you may call it, and he is pretty likely to be hard to handle."

"Don't you detectives often have to take your lives in your hands and chase bad men, whom you know to have fire-arms—at night, for instance, as in the case of Policeman Cuddy, of the Toronto police force, who chased a man at night up a dark lane off Queen street and continued to chase him, even after he had fired a pistol at the officer?"

"Not by a jug-full, we don't, as a rule, chase a man in the dark when we know he's got a gun—that is unless he is a green hand, and can't shoot; we would be fools to throw ourselves away like that. Anyhow, there isn't as much shooting as books and the newspapers say. Of course, if you get hot on the scent of a duck of a thief that you know something about, you can probably yank him without any shootin' on either side. Them fellers mostly don't pull a gun when you are close upon them, but come in like lambs. It's the burglar that gits away to a distance and knows you're after him, that will shoot—and they shoot to kill, too, if they can."

"But if you call out to these men and threaten them, won't they rather get to a safe distance than stop to take aim and fire? Or will they threaten you in return?"

"Oh! phsaw! the fellows that curse and threaten loud are not the fellows that shoot; the loud-mouthed fellers are dead easy. It's the sneaky, quiet ducks that do the shootin' when you're not thinkin' about it. There was that Blinkie Morgan, the cuss that shot at Cuddy in Toronto, he would shoot through the side pocket of his coat, and shoot straight. He always went around with his hands in the pockets of his loose sack coat. After he got away from here he went over to the States and turned up in Alpena, Michigan. Two American officers started out to catch him. He shot them both; they were the sheriff and deputy sheriff of the county. After that he shot an officer who was after him in Alliance, Ohio—shot the poor man with the gun pointed, as I am tellin' ye, through his coat pocket. Then the folks over there got wakened up to what a dangerous crook Blinkie was, and they offered a reward of $10,000 for him (they got justice wakened up for once over there). He was caught and executed for this murder. Blinkie Morgan was a bad man from away back—a quiet, sullen, determined sort of crook. There wasn't any song and dance business about him. He was just dead bad.

"But I want to tell you that it's kind of hard on us detective men and policemen the way we are held down by legal or other kind of restrictions. Now, over in the States, if we crawl up on a crook like this I've been tellin' about, an' we see him gettin' his hand down to his hip pocket or his side pocket we let him have the gun, straight, becuz we know he'll shoot—and it's the party that pulls his gun first that has the advantage in a case of this kind. And if you should happen to hit the duck and even kill him (as he would you, for sure) an American jury or judge would say you were all right, and did the proper thing, since it was either shoot or git shot."

"Over here, on the other hand, the law, or more properly speaking, the administrators of the law, are often far more tender on the law-breaking rascal. They won't even let us hammer a rowdy when he's in a fight and poundin' his wife or his pal (if he's drunk) or anybody else."

"But of course, Mr. B., you are allowed to carry firearms in self-defence, when you are sent to make arrests."

"*Allowed*, do you say? Well, somehow, when there is any firearm used, our judges and magistrates and juries are a good deal easier on any crook that pulls his gun than on one of us men who shoots in return.

The Sunday school man of the party here surprised us by bursting impatiently in with a question. Thus: "Are you much troubled in your work by soft-hearted fools who sympathize with the criminal or the suspect, and try to hide him away from you?"

"Um—I don't know as I can say we are. Of course there are folks who would give a pointer to a crook to help him get away from us. But when they try to lie about what they see or know of crooks, we can 'most always tell by a little chat that they are lying, and kind of tangle them up by questions. The worst sort of fellows to interfere with us, I want to tell you, are commercial travelers; although I don't say they mean to. They are so careless and so everlastingly inquisitive that they give us away more times than enough.

"To show you what I mean: I got after a coon once, that was shoving queer bills that he made by photography from clever plates. He was a Swede; I just forgit his name, but he had a lay-out in a little village near Woodstock, Ont. I saw some of his work; and it was well-done work. There were a plate or two of Merchants' Bank bills and two on the Bank Ville Marie. We had some correspondence, the Swede and myself, and I made a bargain to buy some of the stuff from him. But I wanted to get hold of the plates, and that wasn't easy. We got pretty friendly, though, and I arranged to meet him. So I went up West by train, and he got on to the train with me, and we were chatting along, when at the next station there gits aboard a smart Aleck of a drummer, and he seen me chatting with this Swede, and like a blame fool, sings out my name, and says:

"Hello, B——, where in thunder are you takin' this fellow to?"

"Great Scott! you should have seen that Swede's jaw drop. We never found those plates—the game was sprung too quick, like. But he was a man that had some brains, that Swede, and he did good counterfeiting work. He wasn't the same kidney as the old slab-sided farmer up in Simcoe that tried to make ten dollar Bank of Hamilton bills out of $2 Dominion notes, and bungled the job."

"Why, when was this? I don't remember hearing of it."

"You don't, don't you? Well you can bet your life I remember about it, for I had to look after that old galoot. It was made a little hot for him, but he skipped, and we never got him; it wasn't over a year ago. I don't just remember now where he is in Uncle Sam's country. You hear folks say we send our best people over to the Americans, but I want to tell you that they get some of our worst, too. In fact, there's a small army of tramps and crooks comin' and goin' all the time across the line."

"But about this Simcoe farmer; how did he come to be a counterfeiter?"

"Oh, that old rooster had not headpiece enough for the business he took up. He made a poor fist at farming in the first place, and hadn't any property worth speaking of. He had no plates to make the bills with, nor nothin'; all his work was done with a needle. I guess, picking out the '2' or the 'TWO' of the Dominion note and inking in the 'Ten.' He was a retail dealer, as you might call it. But it was a rough job, the imitation so clumsy that nobody but a farmer (that don't often see money) would be taken in by it. A bank teller would spot one o' them quicker'n 'scat.' The old fool didn't make more'n a dozen or two of 'em, anyhow, before they were spotted, and one of 'em sent down to the Department, and then us fellows got after him and he lit out."

"Do you ever have to trace the doings of incendiaries?" I should think that would call for the exercise of some professional skill."

"Yes, sometimes it does, for the clever firebug, or the merchant that makes up his mind to beat the insurance companies generally takes time to scheme out a plan. And he'll most likely cover up his tracks pretty good. But then, again, there's fellows start out to make a blaze and get caught first time, they're so clumsy. There's no doubt about it, though the companies sometimes have themselves to blame for getting caught by firebugs."

"How do you mean?

"They'll insure any blame thing for any sort of a duck that comes along, and no questions asked. I don't know so much about it myself, but I have heard tell of agents that were just falling over each other trying to get farmers to take policies before some other company came along. And they'd cut rates, too, and do any sort of thing to get business. And only some of them knew enough or cared enough to look close at the construction of the premises."

"Now here,"—added the officer, as he drew a match from his vest pocket, and struck it on the nearest available part of his clothing—"here's a wrinkle that I've seen time and again. I don't mean to say it has anything to do with arson, though it may have, too, for it makes that game so much the easier. But see here, there's a dodge that farmers are up to. When an agent tells them that he can't insure a house unless it has a brick chimney, they'll put up a sort of platform of studding five or six feet high inside of their log shack, and build on that a chimney up to the roof. Then they will build a little more chimney *on top* of the roof that looks all right, but the beggars will not connect the two (for fear the roof would leak), but stick to the pipe hole through the end of the house. Now, there isn't one insurance agent out of four that examines for himself how a chimney is built or if it is honest."

Several members of the group fell into talk about the terrorism that once existed in Biddulph township, near London, Ontario, and the more lately notorious Melancthon band of thieves and incendiaries. After we had speculated about the methods of such malefactors and wondered at the duration of a state of things, which in either case was disgraceful to the province, one man said: "I think they were a bad lot, without exception, and should all have been shot." To this bloodthirsty desire no one made immediate response; but the officer, looking down at his pipe, presently said:

"I don't hardly wonder at you saying that, Mr. S——, but you're a little off. Some of those folks were better than the others of the gang, but they got drawn in and couldn't get out."

The young man of the crowd was curious as to this, and wanted to know the how and why and wherefore.

"Well young fellow," explained the detective, "it's this way. I got to know something about how these here firebugs worked the racket, for one of us had to ferret out a gang once. Now, take this Grey County nest, that Joe ——, the Toronto detective, had to do with. There was two niggers in it, you remember, and one of them was a brainy sort of duck—the big fellow. These two devils would keep their eye skinned for a farmer that was getting behindhand with the world, and getting into debt, and the blues, and all that. They would go and talk to him and pretend to be sorry for him, and ask if he had any insurance. If he hadn't they would explain that he had ought to be insured, and if a fire 'happened' he would get $400 or $500, or $1,000 in cash. Well, they would get him a policy, or he would get a policy—that's dead easy, as I've been tellin' you—and the notion about the fire and the insurance money would be soaking in that farmer's mind all the while, don't you see? Next part of the lay-out would be when he would be groanin' about his debts, and so on, the big nigger would say: 'Here, Mac, or Mike, or Tom, you give me so much (naming a sum) and I'll get her touched off fur ye.' And sure enough, the blamed place would burn, somehow.

"Next thing, by Jinks, when Tom or Mac got fixed up happy with his insurance money, this nigger—he was a terror, that big buck—would come round some night to Tom and tell him: 'Say, I'm in a hole. an' I want some money. My barn's insured for $1.200, and I want you to touch her off for me.' Poor Mac would say No—and then the buck would turn on him, and say: 'Here, by the Holy Smoke, if you don't I'll blow the gaff on you mighty quick, and you'll go down to Kingston before harvest.' Then, of course, to save his own skin, Mac would do the job; not that he wanted to, but because, by Gosh! he was like the boy diggin' for the groundhog, he just *had* to do it, or have nothin' for supper."

"You carry some scars, don't you, of encounters with bad men? In a long experience, such as yours, in the detective line, there must have been attempts made on your life?"

"Not many. But, of course, a man can't always get off without some bruises. I got a knife into me once; and I had quite a lively scuffle that time. It used to warm me up just to think of it."

"Tell us about that, won't you?"

"Oh, that was a long while ago, and I was a youngster. They sent me out near Georgian Bay to look for a fellow that had been stealing horses. I came up with him at the roadside, driving a team. He was whittling a whip-stalk with a good-sized jack-knife, blade about four inches long. He didn't know me, and I went up and took holt of him. He used some language, and I pulled a gun. He grabbed for the gun, and got a holt of it, and we were both reachin' for the trigger—it was one of these here old-fashioned Colt's revolvers—and I was blamed scaret it would go off in the scrap, and we none of us knew which way it would shoot. He called to me to let go my holt of him, and I wouldn't, so he made a crack at me with his knife. It went clean through both my coats and my shirts, and got me just where the neck slopes away to the shoulder, but it didn't go deep, only made a scar. Then he broke away from me, and ran hard, with me after him. I called to a big teamster ahead to stop him, and the big, raw-boned Scotchman picked up a pine slab and made for the runaway, who slipped into a ruined house. He fell through the rotten floor into the cellar, and we got him."

"What was done with him?"

"Oh, he had to serve time. I saw him in gaol afterwards, and he was good as pie. Why, bless you, he was rather better than some pies, for when I was up on the C.P.R. near North Bay last summer, they told me that he is Reeve of a township away in the rocky part of the rockiest C.P.R. district up there. Well, it's a hard life, sometimes, pluggin' round after crooks, but I won't deny but what there's excitement in it, and fun, too. If it wasn't for the fun and maybe the pride a fellow takes in doing a good piece of work, I reckon some of us wouldn't hardly stick at it as long as we do. Well, folks, so long. I'll be getting down to my shack. Say where's my lantern? I'll just take another cigar, if you don't mind."

J. H.

DEVELOPMENT IN OUR NORTH-WEST.

Facts and Opinions.

I wish some doubting, fearing people from the Old Country could have witnessed the harvest of this Western country this year as I have witnessed it, field after field, farm after farm.

And I wish some of you folks in the East of Canada could see the wonderful growth in these prairie settlements of late years, and especially the results of the 1897 harvest. It would cure you of half-heartedness about this grand heritage of ours here in the West.

Figures on paper will not give half the impression that a personal visit does as to the capabilities of this country for farming and stock-raising. But to any person who understands figures as being a reflex of facts, there must have been something startling in the result of the inspection of several million bushels of Manitoba and North-west wheat in, I think, September last.

Inspection of the wheat passing through the C.P.R. elevators at Fort William showed that 98 per cent of the 1897 crop of North-west Canada graded Nos. 1 and 2 hard. *There was no frosted wheat*, and practically the whole was sound grain. Compared with this, the Minnesota and Dakota wheat, good as it is, made a much inferior showing. I forget the proportions, but it seems to me that not over two-thirds or three-fourths graded Nos. 1 and 2 in those States, Duluth inspection, it would be.

Then the good prices this year were a Godsend to Canadian prairie farmers. In September and October the wheat was coming to market, and being sold at the rate of 140,000 bushels to 200,000 bushels every day, and the prices paid for it to the farmers were 70 cents and 71 cents a bushel at Regina and Moosejaw, 75 cents at Portage la Prairie, 73 cents and 74 cents at Emerson, and 73 to 76 cents at different points on the Souris branch railway.

Think of the happiness of a farmer who had been in the habit of taking home $14, or perhaps $16 as the proceeds of a load of grain at former low prices; the same man this year would take home $70 or $80, or even $90 after selling his load of wheat at railway points in September or October. A man I know told me he had seen lots of instances of this kind in Manitoba and away in the west of the Territory of Assiniboia, where the prices, however, were relatively less. No wonder the farmers' faces were wreathed in smiles.

And you can readily understand it when you remember that there were in Manitoba 1,290,000 acres under wheat this year, by the Government statistical return, which at 14¼ bushels to the acre (the average yield of 1897), gives the very pretty figure of 18,262,000 bushels. Take this at 70 cents the bushel, and you have fifteen millions of dollars ($15,000,000) from wheat alone. Then there were 10,000,000 bushels oats and three or four millions of barley, besides hay and flax, and a little rye and peas.

I tell you, it is hard to exaggerate the future of this prairie land of ours. If you have ever seen the pamphlet the Government got out lately, under the name of "A FEW FACTS," you would find in it all the testimony that a reasonable man wants from scores and scores of farmers scattered all over Manitoba, telling how they have prospered from small beginnings. Here is what one of them says, who has lived out in South-West Manitoba since 1883, and prospered. This is J. G. Washington, of Ninga:

"I do not know of any country that offers better inducements than Manitoba to good practical farmers with limited means, who are ready and willing to work."

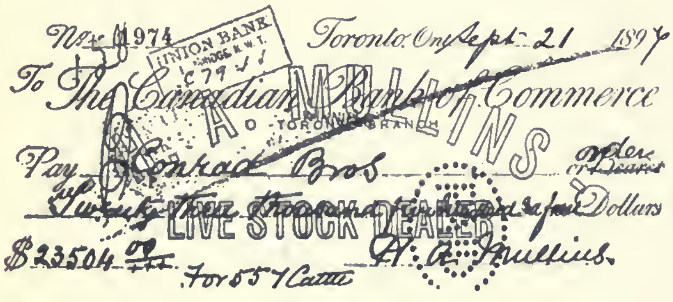
Another man—an Irishman, you could tell it even if he didn't say so—David Carter, of Calgary, in Alberta District, went out there with nothing sixteen years ago, and has to-day 31 horses, 104 cattle, and buildings and plant worth $750. He writes, in answer to questions, e.g., (Would you recommend your friends to come to this country?) "Yes, if they are the right stuff. (What articles should they bring with them?) "Pluck and backbone." (And what should they leave behind?) "Pride and indolence."

Years ago I used to preach to you the same doctrine that I rubbed into Sir John Macdonald, that the policy of giving away the lands of this heritage to great corporations or land companies and speculators was all wrong. We don't want the prairie farmer isolated. He should be *hived*, rather, so as to cultivate sociable life and a home feeling. And then the prairie "will blossom as the rose." We don't want—we never did want, this valuable land given or sold to middlemen, who would hold it at high prices for years. Better give it away and furnish seed to the incoming settler.

Confirmatory of all that I have said, and introducing something not yet mentioned, I saw in the possession of a Western man the other day a cheque for an amount which may surprise you, given for a lot of cattle raised in Manitoba. This cheque for $23,504 was given for a lot consisting of 557 head, and was one of several for large amounts given for North-western cattle this year. You must remember perfectly that it is but a very few years since dead meat had to be shipped in quantity from Ontario to feed the Manitobans. But to-day this valuable Western portion of our Empire sends beeves to feed the world. The man whose name apears on this cheque has been over to England repeatedly on this cattle business.

The above is a recital of facts taken from the lips of Mr. Mullins, who has been the lessor for the last five years of the well-known Binscarth Farm in Manitoba.

Dec. 20th, 1897. HUGH SCOTT.



No 1974 Toronto, Ont Sept 21 1897

UNION BANK

To The Canadian Bank of Commerce

TORONTO BRANCH

A. MULLINS

Pay Conrad Bros order or Bearer

Twenty three thousand five hundred & four Dollars

LIVE STOCK DEALER

$23504 00/100 For 557 Cattle

A. A. Mullins.

Editorial Note.—We have thought the cheque enclosed by our friend sufficiently interesting to have it reproduced above, so that our readers may have an object lesson on the growing magnitude and importance of the West. This one transaction represents between 3 and 4 per cent. of the total number of Manitoba cattle sent east last year. The cheque is dated Winnipeg and endorsed for collection at Lethbridge, but the red stamps do not come out in the reproduction.

THE GRATUITOUS WORK OF A COUNTRY BANK.

An entertaining account of the routine of a country bank in the United States, and the large share of the manager's time which is taken up with matters out of which neither he nor the bank can make money, was given by Charles W. Stevenson in the *Banker's Monthly* a few weeks ago. We give the substance of the paper:

Few persons are aware of the amount of time an officer of a bank must needs spend in looking after the business of others, and how little remuneration there is in it except good will. The cashiers and presidents of country banks in towns of five and ten thousand inhabitants are perhaps the hardest worked men in their communities. In addition to the constant daily grind of their own business, they are referees and advisers for all their patrons and the public as well, and it is considered quite the proper thing to ask of them almost any business favor save the loan of money without interest or security. These favors are freely granted; and but bespeak the honor which banking occupies in public estimation. It would be well, then, if the thoughtless man who has lately been sneering at the bank as an exponent of that hideous monster, the "Money Power," could pass one day of his life behind a bank counter.

The first thing is the opening of the mail and the consequent planning of the day's work. In the mail from day to day, are sight drafts or collections upon local merchants and individuals, sent by wholesale houses and manufacturing establishments from almost every part of the United States. They must all be presented, and if collected, remitted for; and if unpaid, returned with a reason endorsed for the non-payment. This is a regular feature of the banking business, but one in which there is little profit. For one reason or another an average of half these drafts are returned unpaid. In this case the banker is out his time and postage, and receives nothing.

But the mail is many-sided. Here is a letter containing a customer's cheque which the sender says must be remitted for at its face. In deference to a patron this is done. Here is one, enclosing a stamp, asking for a confidential report on the financial responsibility and character of a man who wishes to buy a bill of goods on credit. If the man be a customer, the banker wishes to aid him so far as truth and justice will allow, but extreme care must be taken; and if this party be unknown to him enquiries must be made in a guarded manner or the answer returned: "Have no means of knowing." There is no pay in this.

Another letter contains a deed to be delivered on the payment of money under specific instructions. Only a nominal fee can be exacted for this service, yet it involves really the negotiations of a trade between widely separated persons, who, perhaps, as yet, have not fully agreed upon details. Lawyers must be seen, telegraphing done, frequently an hour spent in explanations, all for practically nothing. A man living in a remote State writes to enquire if there is a "racket store" in town. He wishes to locate. A widow wishes to remove to town, take boarders, and educate her children. Will the banker please recommend an eligible location, and say what will be the monthly rental? Here is a letter containing a note sent at the request of a customer who wishes to pay, and will call. It has been running since 1890 with partial payments, and it takes exactly half an hour to figure the amount due, which is $27.60, for which the customary rate of one per cent. is charged.

A constant stream of inquiries, countless requests for names of "reliable and energetic" agents, the whole flotsam and jetsam of the commercial world comes to the banker. It is the ethics of the business to return courteous and rapid answers, the expense account grows for stamps and stationery, while there is a minimum of profit. The regular machine work of transmission of cheques, drafts, bills of exchange, orders for shipping of money, all the regular features of the daily grind having been entered and checked, which is the banker's real work, the mail may be considered disposed of.

The cashier takes out the daily cash, taking great care as to the denominations of bills, the relative quantity of gold and silver and paper. But notice the calls made during a single day for change. Everybody comes for change, and everybody gets it. Farmers, who never again cross the threshold, come for assorted money to pay harvest hands; street fakirs to change bills; travelling men for a little silver; nickel-in-the-slot men for an abundance of nickels; showmen who are weighed down with Bryan dollars they wish to put in more portable form; all sorts and conditions of men come as a matter of course, for change. No pay in this.

The day's work is suposed to be well begun. Two gentlemen, neither of them customers, but residents of the town, call, and they are in no even frame of mind. There is a dispute over the amount of interest on a note. Each has made the calculation and had confidence in his own estimate. Will the banker in the interest of harmony please make the computation, which will be accepted? He does so, and both are wrong, but go away satisfied.

And now comes one of that never-ending procession of possible customers. The gentleman is on the eve of a trade. In case he makes it, can he borrow at an indefinite future time a certain sum for improvements? Or, again, he is thinking of feeding in the fall. In the event that he should, what would be the chance to get some money? "How are money matters now?" asks another. "Thought maybe I might want a few hundred later on." All the possible projects of the brain must be met. Nine-tenths of them are never realized, and many of them were chimeras. Perhaps the most astonishing one of these was the man who wanted to borrow money on a mad-stone; and the one most easily satisfied he who wanted to borrow on a twenty-dollar gold piece.

There enters now the most inquisitive man who ever comes to a bank. He may pay his way or he may not, he certainly imparts much information that you know or need. He is the agent of Bradstreet or Dun, and wishes to verify his report. Before he leaves town you are at least well acquainted, and maybe not sorry to see him go.

Under the impression that a cheque is a cheque, no matter by whom drawn, or on what bank, a stranger, dressed in homespun, walks up and lays one down without a word. The signature is unknown, the bank in an adjoining county. Explanations as to identification and endorsement follow at some length, and the man had hardly left the door when in comes the commercial traveler. He has been on a similar errand before He is off his regular route, doesn't know a soul in town, is dead broke, and has a cheque for expense money he would like to have cashed if possible. Here are his correspondence, his railway tickets, and the laundry marks on his linen; are these sufficient indentification; and the house, of course the house is good. The payment would be a real favor. And the payment depends—in the end mostly upon the banker's judgment of human nature. A quarter, however, does not pay for the risk, and is small wages for the time expended.

An old lady hobbles in. If not too busy, a private interview is desired. The lady has quite a sum of money on deposit for a long time. She is old and crippled, and her affairs have taken a bad turn. Will the banker kindly, in view of the previous use of her money, loan this sum on safe security? He will, but there is a tinge of regret about parting with a good account, just the same.

"Can you obtain for me the name of a good commission house in the city?" You do. Banks have a way of knowing good business men the world over, and they trade information with each other; what could be a more reasonable request than this? But does the merchant realize what a vast intelligence bureau this banking system is? Before this letter is finished, for you sit down to write at once, you become aware that two men have seated themselves in the president's room and are waiting. You join them and are as affable as a man of unlimited leisure, for are you not "the banker," and is not this gentleman who is "looking round" a friend of your friend? Nevertheless, your letter of inquiry is deferred a full half hour, on a busy day!

Enter an old man, trembling. His wayward boy is in trouble; can you telegraph money? You do, conscious in your heart that the spendthrift is "working" an indulgent father. You are cautious, however, telegraphing money is dangerous, everything must be according to approved business regulations, though never a cent comes back to you. "Will you kindly examine this deed and see if it is in proper form?" The banker does; he is usually conversant with legal forms and modes of land transfer. The banker has now presented to him a contract, or deed in escrow, or cheque to be delivered on conditions, and valuable time is taken up in ascertaining the exact terms, that they may be fulfilled to the letter.

Several members of a family, wearing customary mourning, now engage his attention. A father has died. The heirs cannot agree upon an administrator. Will the banker consent to take charge? Then will he recommend a trustworthy man who can make a good bond?

Here is a committee. The spokesman says they are promoting a small manufacturing enterprise. The local board of trade has promised aid, but parties are loath to subscribe stock. The profits are all right. Will the banker take stock and head the list? He will not. Then it is possible the new enterprise, such a boon to the city, will fail. It does, and it ought to, and a lot of good money is saved.

Meantime the daily business goes on, despite the many interruptions. Cheques are paid and deposits taken, in which seems to be an almost constant stream, for business is heavy. The hours wane and preparations are made for the final balance.

At exactly two o'clock a committee of ladies call. There is to be a collection of money for a great and worthy charity. Of course the bank will do all the attending work free of charge, but for fear of mistake or misunderstanding it would be well to explain. The explanation occupies seventeen minutes. It is particular, if not lucid. The banker listens most patiently, and bows his adieu with grace—and gladness.

Returning to his counter, the banker meets a commercial traveler, just arrived, never made the town before, wishes to know, in confidence, of course, for the house, if certain parties are good for a small bill, say $25? Then follows a list of merchants half a yard long—the man sells yeast powder on the teaspoon plan!

And now, after giving advice to a newly-married couple, as to the desirability of the purchase of a certain property, the banker meets the straw which ought to break the camel's back, a committee of citizens to talk over certain local improvements, and while the matter of paving a street is under consideration the closing hour strikes, and with due solemnity the committee vanishes.

Then this old skinflint and living picture of the money power sighs, and begins to gather up the tangled threads of his day's work, hoping he can reach home at six o'clock, at least, for the School Board meets at night, and there is a vacancy to fill which he hopes to secure for the fatherless daughter of an old friend.

MONTREAL'S BUSINESS FOR 1897 AND OTHER AFFAIRS.

A Christmas letter for a strictly financial and commercial journal is not an easy task to attempt. And yet I am supposed to make a departure from the usual weekly routine record of transactions and prospects. You do not exactly ask me to "please be funny," as the Down East editor did Hosea Bigelow, but a sort of holiday tone is permissible. It is, nevertheless, no easy undertaking to juggle with the bare facts and commonplaces of business, and make interesting reading for this festive season.

It will be only right, by way of preface, to remark that there is decidedly more of a Christmassy feeling (if it be permissible to coin such a word) general among all classes, than for several years past. One seems to feel it in the air, and cannot fail to note it in the larger crowds surrounding the brilliantly dressed shop windows, and the thronged counters, while in office and warehouse throughout the business quarter there is an active interchange of confidential enquiry as to "What shall I buy for the good lady and the bairns?" The wide-awake retailer, always on the *qui vive* for evidences of this kind, has noted the general disposition to loosen the purse-strings so tightly drawn during the recent years of depression and enforced economy. Never have the windows of the big stores in Montreal made such elaborate displays, while the stocks have been liberally bought, and evidently with the expectation that Christmas buying will not run so much to the cheaper lines of goods, as has been the case of late years. The printer certainly benefits by all this: the Montreal *Star* of last Saturday shows about 55 columns of special Christmas advertising, while the other city dailies have their proportionate share, and so the paper-maker gets more orders; also the ink and the type manufacturer, the machinist and mechanic in different lines benefits more or less indirectly, and so on, down to the poor habitant in the back country, who gets out his few cords of pulpwood for the big paper mill.

And this reminds me, Mr. Editor, to ask you if you have yet read Dr. Drummond's just-published book of poems, illustrating the country life and surroundings of the French-Canadian farmer. It is entitled "L'Habitant," and written in the broken crude English as attempted by that simple individual. If you haven't, there is a pleasure in store for you, I know, as wel as for anyone who has ever rubbed up against Jean Baptiste; not so much the city French-Canadian, nor the galvanized Yankeefied specimen, who has returned after several years spent in a New England mill town, but rather the true habitant, as he is still to be found on his 3 by 30 farm in this province, honest, simple-minded, happy as the day is long on very little, in politeness a model, and whose one authority, in matters temporal as well as spiritual, is *Monsieur le Cure*.

The proneness of the average traveled French-Canadian to try and anglicize his speech, and even his name, is the source of innumerable mirth-provoking stories. The writer well remembers some years ago, when living in a small town outside Montreal, having to catch an early train one unusually sharp morning, and on the way to the station met a man evidently in a hurry about something. This man was hailed by a shop-keeper just opening up, but not abating his rapid pace, explained his hasty errand by shouting across the road:

"Je suis bien presse, je m'en vais pour le plumber; les waterpipes sont toutes buste."

You will have seen, for it was published in some Toronto papers, Drummond's satiric poem, in which Jean Baptiste Trudeau goes to the States for a year or two and comes back as John B. Waterhole. This is probably as true as what I once wrote you about the brickmaker, who went to Vermont as Noel Vien, but changed his name to "Christmas Coming," which is the literal meaning in English of his name as baptized.

But I imagine I hear you say, "What has this hotch-potch got to do with business?" Well, I plead guilty of digression, but you have kept your readers so well informed from week to week on the state of trade, and the general improvement in business conditions, as compared with what they were a year ago, that there is not much untouched ground in the above respects, and to be candid, I am really glad that I have already taken up so much of your valuable space allotted to me, that there is not room left for any detailed review of Montreal business for the year just closing. However, it may be interesting to make note of some few special features which will help to show the general trend of improvement in our city's commerce.

And first it would be only proper to note that the season of navigation recently closed has been a particularly active one as regards exports, and shipping men are satisfied with the results. Inward freights have not been very large or profitable, some vessels, indeed, coming out in ballast, and cattle freights have been low, but with the exception of apples (for which last year was an exceptional one) flour, and cased meats, exports have been much heavier than usual. A few statistics may be permissible. A good idea of the shortage in the apple crop may be formed, when it is shown that there was a falling off in the shipments of apples of 556,568 barrels. Grain shipments, however, were over 27,000,000 bushels, as against 18,870,000 bushels for 1896. Compared with last year there was an increase in the shipment of cheese of over 26,000,000 lbs., in butter, of 62,000 packages, and of eggs, 15,500 cases. As showing how Montreal now tops New York as a cheese-shipping port, it should be gratifying to all Canadians to know that the shipments of cheese from Montreal this season reached the immense total of 147,000,000 lbs., as compared with New York's eleven months' shipments of 45,141,000 lbs. The export lumber trade has been also markedly active, and the shipments the largest in the history of the port. In all, the lumber exports totalled 300,420,000 feet, one house alone having handled ninety-eight million feet, and the increase in exports over 1896 is about eighty million feet. The above figures are mostly taken from a very complete review of the Montreal export trade for 1897, which has just been issued by the *Gazette*, in the shape of a pamphlet of about 75 pages, replete with data of the most detailed character.

There have been some notable additions made to the lines of steamships trading to this port, magnificent specimens of the shipbuilder's and engineer's art, and beside which such well-known and popular vessels in their day as the "Sardinian," "Peruvian," etc., appear almost as pigmies. First of these new visitors was the "Canada," of the Dominion Line, the largest vessel, apart from the "Great Eastern," that ever came to the St. Lawrence. Unfortunately, negotiations for a satisfactory bargain with the Government fell through, and this vessel was put on the Boston route, where she has since established the record for the fastest time between that port and Liverpool. The "Milwaukee," of the Elder-Dempster line, which made two voyages to this port this season, is the largest actual cargo-carrier that ever loaded in Montreal, being of the enormous burthen of 12,000 tons. She and a sister ship, the "Monarch," are expected to trade here again next year. The same company also put on two other very large new freighters, the "Montrose" and the "Montcalm," each of 8,000 tons. The Donaldson and the Thomson lines, represented by Messrs. Robert Reford & Co., also made important additions to their fleets, the former putting on a fine new steamer of 6,000 tons, the "Kastalia," and the latter the "Devona," and the "Cervona," new vessels of 5,500 tons each. The Allans made no new additions to their St. Lawrence fleet this season, but they will have the "Castillian" here next spring, a vessel now building, half as big again as the well-known "Parisian."

Our bankers seem fairly satisfied with the results of the year, but look forward to 1898 with hopeful anticipations of improved conditions and larger earnings. Money has been cheap during 1897, with call loans obtainable for a while at 3½ per cent. and gilt-edged paper done at 5½ per cent. in some cases, but on the whole, net earnings have warranted the continuance of dividends at the old rates. There has been a general cleaning-up process in progress. Weak, uncertain accounts and assets have been now pretty well weeded out, and the clouds that have obscured the financial horizon for several years past are now considered to have pretty well rolled by.

Montreal, 22nd December, 1897. A.M.

THE DWIGHT BANQUET.

The demonstration of Wednesday night at the Toronto Club in honor of Mr. H. P. Dwight, president of the Great North Western Telegraph Company, on the occasion of his completing fifty years of service in connection with telegraphy in Canada, was a striking tribute to a worthy gentleman. The banquet was splendidly novel, the dining room being transformed into a forest, lit with colored lights, and the table containing a charming representation of "The Shanty" and of hunting scenes in Dwight Camp, Muskoka. But the warmth and unanimity with which the sixty gentlemen assembled expressed their regard for Mr. Dwight must have touched the recipient deeply.

The chairman of the occasion, Hon. Senator Cox, in introducing the main toast, made interesting reference to his own long acquaintance and association with the guest of the evening. Sir Frank Smith, Mr. Mayor Shaw, who brought a message of congratulation from the Governor-General, Professor Goldwin Smith and other speakers dwelt upon Mr. Dwight's characteristics of enterprise, capacity, public spirit and warmth of heart. The address of Mr. B. E. Walker, in presenting Mr. Dwight with an elaborate album of portraits of those present, was delightful in its sincere fervor and its exact appreciation of the manifold services Mr. Dwight has rendered to Toronto and to Canada. The sheaf of letters, every one of them containing some kindly word, sent by those who were unable to attend the dinner, among them Sir Casimir Gzowski, Sir William Van Horne, Col. Clowry, of Chicago; Mr. O. S. Wood, of New York; Mr. Gilman Cheney, of Montreal, gave further proof of the general esteem.

Mr. Dwight's acknowledgment of the honor done him was in keeping with the modest directness of the man. The brief *resume* which he afterwards read of his connection with the Montreal Telegraph Company, and his predictions of the still wider use yet to be made of electrical energy, is published in full in the daily journals of the city.

Altogether, the affair was, in the broadly representative character of the gentlemen present, in the universal warmth of their eulogies, in the charm of the surroundings, one long to be remembered. Among those associated in the testimonial were: Edward Gurney, president of the Toronto Board of Trade; W. F. McLean, M.P.; E. H. Keating, city engineer; Thos. Long, director Merchants Bank; Henry Pellatt, stock broker; John Cowan, iron and steel manufacturer; Fred. Nicholls, managing director General Electric Co.: Major Cosby, manager the London and Ontario Loan Co.; J. J. Kenny, managing director Western Fire Office; H. D. Warren, president Gutta Percha and Rubber Company; R. D. Gamble, general manager Dominion Bank; W. R. Brock, president Electric Light Company; Charles A. Tinker, general supt. Western Union Telegraph Co.; Z. A. Lash, Q.C.; H. N. Baird, grain merchant: W. D. Matthews, director Canadian Pacific Railway: C. H. Gooderham, president Freehold Loan Co.; W. C. Matthews, manager The Mercantile Agency; Wm. Robins, director, Hiram Walker & Sons, Limited; A. S. Irving, president Toronto News Co.; Jas. Bain, junr., librarian

Toronto Public Library; E. A. Wills, secretary Toronto Board of Trade; E. Pope, Quebec; W. B. Powell, Montreal; Geo. Black, Hamilton, district superintendents G. N. W. Tel. Co.; R. F. Easson, press superintendent, G. N. W. Tel. Co.; J. T. Townsend, inspector Grand Trunk Telegraphs; Arthur Cox, treasurer G. N. W. Tel. Co.; H. C. Hammond, Messrs. Osler & Hammond; John L. Blaikie, president North American Life; Robt. Jaffray, president Globe Printing Company; Adam Brown, postmaster of Hamilton; Geo. Gooderham, president Bank of Toronto; Hon. G. W. Allan: John C. Kemp, manager Can. Bank of Commerce; Geo. D. Perry, secretary G. N. W. Tel. Co.; D. Kemp, secretary Synod of Toronto; J. K. Kerr, Q C., and a dozen gentlemen in the wholesale trade of the city.

FOR GROCERS AND PROVISION DEALERS.

Windsor bakers last Saturday made an arrangement to advance the price of bread one cent per large loaf, charging six cents retail and five cents wholesale.

The Klondyke trade is beginning to be a factor in unexpected directions. Our Montreal market report to-day refers to a marked advance in the price of canned vegetables caused by brisk demand for these goods for shipment to the Klondyke. Tomatoes and corn are both in request for those regions. Canned lobsters, it appears, are scarce and higher.

The fruit merchants of the United States complain of an unsatisfactory season. Speaking of this a prominent New York merchant says: "In fact one fruit house has been compelled to divert its attention to an entirely different business, and is now engaged in shipping dogs to Klondyke, which is certainly a case of the fruit business 'going to the dogs.'"

The Hon. Sidney Fisher, Minister of Agriculture, is arranging to send about one thousand samples of Canadian wheat to the country millers of Great Britain. The wheat will be selected from the different Canadian grades, and will be obtained from the boards of commissioners who fix the standards. In this way no mistake will be made in the variety or quality of the wheat. This form of advertising should give a good account of itself.

As a result of the profitable outcome of the tobacco crop in Essex County this year, it is almost certain that the acreage under that plant will be greatly increased next year. It is a pleasing feature of this industry that the laboring men by renting several acres of land each are able to share in its advantages. The Leamington correspondent of a Western exchange says: "The tobacco crop was marketed at a lively rate last week. On Saturday, Maxon & Maxon, bankers, paid out $18,000 for the Quebec tobacco firms. When the crop is all sold they will have paid out $70,000. Farmers, who in other years were very scarce of money, are receiving from $200 to $700 each. Robert Wigle got nearly $2,000 for the tobacco grown on twelve acres. 'Talk about the Klondyke,' said G. M. Maxon, 'why the goldfields are not in it with the tobacco fields.'"

FOR DRY GOODS MERCHANTS.

Mr. Brown—"Terrible tragedy at a bargain counter. A woman who had secured the last five yards of cheap silk was shot by another woman who had been waiting from midnight without having a chance to get any." Mrs. Brown—"Poor thing! Surely they won't do anything to her, will they, John?"—*Harlem Life.*

Last week, at the annual meeting of the Montreal Dry Goods Association, Mr. E. B. Greenshields was in the chair, as retiring president. A report of the business transacted by the association during the year was submitted and adopted, the members present expressing their satisfaction with the good work that had been done. The election of officers resulted as follows:—President, A. Racine; vice-president, James Rodger; treasurer, George Sumner; directors; Messrs. E. A. Small, Frank May, Thomas Brophy and R N. Smyth,

As is mentioned by our Montreal correspondent in speaking of textiles, a rise in domestic woolens is deemed not improbable. Notwithstanding the higher prices for raw wool, as compared with last year, there has been no general revision in the prices of manufactured goods from the low and unprofitable level so long complained of, but now that many of the mills are so full of orders for heavy goods, such as mackinaws for Klondyke trade, blankets, knitted goods, etc., with prospects of continued good demand, it is only reasonable to expect that some revision of quotations may be expected. Indeed it is hinted from well posted quarters that such a change is actually in progress.

Canadian footwear manufacturers are obtaining some advantage from the boom in western gold mining, and their efforts to meet this trade are very creditable. In conversation with a representative of the Canadian *Shoe and Leather Journal*, a Montreal manufacturer describes his leader for the trade as follows: "It is tough as wire and light as kid. It is a prospector's boot without an ounce of needless weight. Made of unlined rawhide, laced to top, fifteen inches high, with bellows tongue; absolutely waterproof, and weighs only twenty-four ounces. It has doubly strong Goodyear welted soles made of drab horse hide, mineral tanned. Cone hob nailed. It is tan colored. Two pairs of rawhide laces with every pair of boots. The price is $8."

CLEARING-HOUSE FIGURES.

The following are the figures of the Canadian clearing houses for the week ended with Thursday, December 23rd, 1897, compared with those of the previous week:

CLEARINGS.	Dec. 23.	Dec. 16.
Montreal	$12,910,094	$15,269,251
Toronto	7,567,398	8,521,549
Winnipeg	2,141,510	2,158,412
Halifax	1,140,573	1,178,106
Hamilton	661,738	667,975
St. John	572,120	648,977
	$24,993 433	$26,244,270

Aggregate balances this week, $3,338,844; last week, $3,534,879.

—For a specimen of speedy work in its line, the opening of the branch of La Banque d'Hochelaga at Sherbrooke, last week, may fairly take prominent mention. Upon the solicitation of an influential *chentelle*, the directors of that bank contemplated opening a branch about the 15th of January, but owing to some pressure of circumstances it was hastily decided last week to open up in that city at once. On Friday morning last, Mr. Prendergast, the general manager, left Montreal for Sherbrooke, accompanied by a temporary staff. He arrived about noon; by two o'clock premises had been rented, and the sign painter was at work painting signs in the building. The same afternoon a circular was printed and distributed among the merchants, stating that the bank would be opened for business at ten o'clock the following morning, and between that hour and closing, at one o'clock, quite a tidy business was done, and several thousand dollars in deposits received.

—The Treasurer of Ontario, Hon. Richard Harcourt, in his budget speech of Tuesday of last week thus described a portion of the administration of the cabinet: "If we take all our expenditures of a single year, we will find that out of every $100 the Province spends, $19 93 of it is spent for maintaining our public institutions, $16 95 for purposes of education, $15.12 for public works and buildings, $9 74 for administration of justice, $5.61 for railway aid, $4.34 for agriculture, $4.22 for hospitals and charities, $6.18 for civil government, $3.55 for legislation, $2 87 for colonization roads, $2.48 for charges on Crown lands, $2.06 for repairs to public buildings, 18 cents for immigration and $4 89 for the many various unclassified items which make up what we call miscellaneous expenditure."

—A Detroit paper finds amusement in some paragraphs found in so staid a publication as the *Bankers' Almanac*: The London & Westminster Bank, for example, a huge institution, with a capital of $70,000,000, publishes the following notice: "The officers of this bank are not allowed to receive any Christmas boxes or gratuities." Another item which this writer finds curious is that several English banks gravely announce that their "officers are pledged to secrecy as to the transactions of customers." The London & Yorkshire Bank advertises that "current deposit accounts may be opened and conducted on terms to suit customers, either with or without commission, interest being allowed on the balance at credit."

—Intelligence comes from Newfoundland of the acquittal of the directors of the Commercial Bank of Newfoundland. It will be remembered that they were proceeded against criminally for mismanaging the bank and causing its failure, also for conspiracy and fraud in declaring dividend. Their names are James Goodfellow, Edwin Duder James Hitts, Frederick Goodridge, George Hutchings and Henry Cooke. Sir David Chambers, the judge for the occasion, in his charge, took ground favorable to the defendants, and on the verdict being reported in court, expressed his concurrence therein. The trial lasted two weeks.

—That an appropriation has been made by the Dominion Parliament for a statue of the late premier, Hon. Alexander Mackenzie, is satisfactory news. He was of the honest, sturdy, steadfast type, whom opponents as well as friends admired.

STATEMENT OF BANKS acting under Dominion Gov't charter, for the month ending Nov. 30, 1897.

			CAPITAL.					LIABILITIES.					
			Capital authorized.	Capital subscribed.	Capital paid up.	Amount of Rest or Reserve Fund.	Rate per cent. of last Dividend declar'd	Notes in circulation.	Bal. due to Dom. Molsons and Imperial Banks bonus of 1%, making dividend of 9%

J. M. COURTNEY, *Dep'y Min. of Fin.*

Mercatile Summary.

At a meeting of the city council of Charlottetown, P. E. Island, held on the evening of Dec. 13th inst., Mayor Dawson announced that the $10,000 worth of city debentures, recently placed on the market, bearing interest at 4 per cent. per annum for a term of twenty years, and payable half-yearly, had been sold at 105⅛. This is a creditable price, and as an evidence of the financial standing of the city, reflects credit on the gentlemen who control its monetary matters.

A number of timber berths on the northwest Miramichi River, New Brunswick, were offered for sale last week at the Crown Lands Office, and a number of them bought by the Sulphite Fibre Co. There were seven miles, for which $50 an acre was paid. Two miles on the Madawaska River were sold to M. Duke. Four and a half miles on the Kouchibouquac, and two blocks on the Nepisiquit, were sold to T. B. Winslow. Three six mile blocks on South Nepisiquit were sold to S. Adams. Michael Walsh bought a two mile block on the southwest Miramichi.

At the annual meeting of the Winnipeg Industrial Exhibition Association held some days ago, the President, Mr. D. Smith, moved the adoption of the annual report, and reviewed at length the work of the association for 1897. The report included a recommendation of an increase of $500 in the salary of manager F. W. Heubach, which shows that the capacity of that gentleman is recognized by the directors. The following board of directors was elected: F. A. Fairchild, G. F. Galt, L. A. Hamilton, Geo. J. Maulson, D. E. Sprague, F. W. Thompson, Wm. Brydon, A. J. Andrews, J. T. Gordon, G. H. Greig, R. H. Agur, James Redmond, T. A. Anderson, D. Smith, Wm. Martin, J. A. Richard and Stephen Nairn.

A year ago the general store firm of Paquette & Poltras, at Nelsonville, in the Algoma district, dissolved partnership, and E. Paquette continued the business, but owing to lack of capital and strong competition an assignment could not be longer delayed.——Early in the year 1894, Fred. C. Davey left Toronto and opened a jewelery store in Deseronto, with a nice little stock supplied by a Toronto house, which is secured. Davey has assigned.——Another assignment is that of a furniture dealer, at Roseneath, named John McMillan, who started business in the fall of 1883. Previous to this date he was a farmer——G. W. Cline, fruit grower, Winona, and the Hamilton painting firm of Stamp & Laidlaw have assigned.

QUEBEC BOARD OF TRADE.

The fifty-sixth annual general meeting of the Quebec Board of Trade was held last week and there was a large attendance, nearly a hundred members being present. The annual report, which was of considerable length, treated of a number of important matters. For example, the building of the Parry Sound Railway, the extension of the I.C. Railway, the Quebec Bridge scheme, and also the Drummond County Railway, which is thought by the board to be of disadvantage to the interests of the Quebec business men. On the election of officers being proceeded with, the result was found to be the election of the following gentlemen to the respective offices mentioned: Ed. Dupre, president; J. Joseph, first vice-president; G. Tanguay, second vice-president; J. Brodie, treasurer; N. Levasseur, secretary. The council remains the same as last year, with the exception of two members, Messrs. N. Rioux and D. Arcand.

CONTRACT BY TELEGRAM.

A question was recently decided by the Appellate Court of Illinois, Fourth District, which shows that a bank should be careful in the wording of a letter or telegram. A bank held the note of one Luff, which note was about to mature. He telegraphed the bank: "Will you extend note for thirty days? Answer at once." Bowman, the bank's president, replied by telegram: "Would prefer money if you can raise it conveniently." The debtor promptly sent the interest in advance for the month. The bank returned the interest and treated the maker of the note as in default, and sold the collateral. The court says:

"We are of the opinion that the telegram from Bowman to Luff which stated, 'Would prefer money if you can raise it conveniently,' which was an answer to Luff's telegram asking the bank to renew the note for thirty days, amounted to an offer to renew the note if the money could not be raised conveniently, which could not be withdrawn after prompt acceptance and tender of interest unless the whole amount due on the note could have been conveniently secured. Manifestly, Luff could not raise the money conveniently, and when he sent the interest to the bank, the contract for the extension of time was completed." Shobe v. Luff, 66 Ill. App., 414.

SOUND MONEY LEAGUE.

The Executive Committee of the National Sound Money League, in session at New York November 9, adopted the following:

"International bimetallism, as a world possibility, is dead. Let us recognize this. The International Bimetallic Commission, appointed under the St. Louis pledge of the Republican party, have made strenuous efforts in behalf of this policy. These efforts have proved futile. The commercial necessities of the world have demonstrated that a dual standard is commercially unacceptable, and in the present stage of civilization, impossible.

"The hour has come, it seems to us, when a national recognition of this fact is necessary. The situation demands a definite, clear, unequivocal declaration that international bimetallism is a dream of the past. The United States must proclaim their acceptance of a world-fact, and plant themselves firmly on the single gold standard. The proclamation of this monetary position will quicken our commerce, increase foreign investment, and make permanent the prosperous conditions which have begun to manifest themselves in our country. We invite the friends of sound money and all who would contribute to the well-being and safety of our commercial life, to join in bringing about the unmistakable declaration that now and henceforth the monetary system of the United States shall rest on the single gold standard."

ALUMINUM IN THE ARTS.

When the metal aluminum was first separated and its properties began to be understood, great things were expected of it. Its lightness, durability, adaptability to a variety of purposes, and its freedom from the tendency to rust or tarnish makes it a very desirable metal in many of the arts. It cannot be said, however, that all that has been promised of it has been realized, for in strength it has been found inferior to iron or steel. One of the great obstructions to its widespread entrance into the common arts was its great cost, which until very recently was as high as five dollars per pound, and in 1889 such advances were made in the production of the metal that it has dropped to about fifty cents. This drop in price is due to the happy discovery made by one Charles Hall, who worked for years on the problem, whereby the pure metal could be extracted from its native impurity at a fast and inexpensive rate. Aluminum abounds in the common clays of the country, but no process has yet been discovered to obtain it from this source at a low cost. Hall, however, used bauxite, a variety of clay which contained less foreign substances, and by means of the electric current was able to reduce it in large quantities at a low cost. At Niagara Falls a plant is being erected which will turn out an immense amount of the pure metal at a very low cost. It has already been used as plates for vessels in place of copper, and it promises to work a great change in the cost of sheathing vessels. As to its general adaptability for the purposes to which steel is put time remains to reveal.

A GOLDEN OPPORTUNITY.

According to the official estimates of the Director of the Mint, the stock of gold in the United States has now reached the unprecedented amount of $712,660,417. The additions made since the first of August are nearly $16,000,000, and more is sure to be imported. This increase is due to trade conditions, which are entirely natural and wholesome, but some of which will necessarily not be permanent.

Will there be any better time, can there be any better time, to reform our currency and to guard against any undue confusion when the conditions change? There is not a single interest in the country that would be injured by a law providing for the gradual reduction of the Government demand notes and the issue of a sound and elastic bank currency. There is no large body of people who would even fear that they would be injured by such a reform. And when once the change were made the inflow or outflow of gold would go on according to the requirements of trade without a ripple of excitement or apprehension as to the effect upon our currency or our credit.—N.Y. *Times*.

HEMLOCK AND LEATHER.

It is said that the demand for hemlock lands in the upper peninsula of Michigan is increasing. Pennsylvania leather manufacturers are beginning to see that there eventually will be a limitation of the bark supply in that State, and that it will be well to make provision for a future supply in the north-west. Exactly stated, it is probable that there still are worlds of bark, so to say, in Pennsylvania, but at the same time there are operators who are running out of timber, having exhausted it, which deprives tanneries dependent on certain lumber operations of a bark resource. With such individuals or concerns the question is as to whether they had better relocate in Pennsylvania or move west and establish their plants in the midst of a bark supply that has been as yet scarcely touched, and which promises a resource that shall last many years.

In other respects than the mere ready access to an abundant bark supply, the placing of tanneries in the midst of the hemlock regions of Michigan and Wisconsin might be considered an advantage. The demand for leather in the great interior, and the nearness to the hide centres of Chicago and other western points, should render manufacture as profitable in the west as in the east. In fact, all things considered, it is not to be wondered at that Pennsylvania tanners are inclined to transfer their plants to upper Michigan and Wisconsin whenever their bark supply in the old locality becomes exhausted.

Now that the hemlock lumber business is receiving a new impulse and development, the time is ripe for the establishment of leather manufactories in the newer districts. In respect to lumber and leather the success of one branch of industry is dependent on the other, and they should grow up together. That the growth will thus take place there is little doubt, late developments strongly indicating that result.

DOMINION C. T. MUTUAL BENEFIT ASSOCIATION.

The Commercial Travelers' Mutual Benefit Association held its annual meeting in Montreal on Saturday last. The annual report showed that during the year $14,000 had been paid in death benefits. From the foundation of the society $57,205 was paid. In consequence of the large number of deaths the association was obliged to borrow $4,330 from its reserve fund in order to meet its obligations. A committee was appointed to consider the best means of putting the company on a good basis, and the following officers were elected: President, David Watson; vice-president, John T. Dwyer; treasurer, M. G. O Stanton. Directors, 1897-98, A. S. Campbell, B. Reed, E. H. Copland, B. Birks and J A. Morin. Directors, 1898-99, William Goslin, Fred. Hughes, Thomas Harris, James Gilmour and Charles Gurd.

TRAVELERS' BENEFIT SOCIETY.

A general meeting of the Commercial Travelers' Mutual Benefit Society was held Dec. 18th, in Toronto. The following gentlemen were elected by acclamation:—President, Hy. Goodman; vice-president, L. R. Wickett; treasurer, Warring Kennedy. The three Toronto trustees whose term expires this year are Messrs. J. A. Ross, H. Lamont and D. A. Rose. They all seek re-election, and five other gentlemen were nominated. For the Hamilton ones there will also be a poll. The trustees for other cities were elected by acclamation. The annual meeting will be held Jan. 22nd.

—Collegiate Education.—A father recently wrote to Oxford University: "What are your terms for a year? And does it cost anything extra if my son wants to learn to read and write as well as to row a boat?"

THE CASH SYSTEM.

In reply to the question, "Why don't you adopt the cash system of doing business," a subscriber of the *Grocery World* says:

"The cash system is the only safe and profitable way of doing business, and it costs some of us hundreds of dollars before we can become convinced of this fact. If manufacturers and jobbers would insist on spot cash, the retailers would soon fall in line.

"Those who contemplate making a change from credit to cash might be interested in our experience. We had done a general merchandise business in this place for about seven years, our annual sales being between $50,000 and $60,000, and always carrying $8,000 to $10,000 on our books, giving credit to nearly everybody that asked for it, and getting good prices for everything. But there came a change—a bright, nervy, and up-to-date firm started in opposition to us. They upheld the doctrine 'Goods sold for cash only,' and we smiled and said they would not last six months. Of course, the new store cut prices, and you can judge of our dismay and consternation, when we saw our old-friends and customers—people whom we had accommodated and trusted, and carried on our books when sick and out of work—saw them going over to the cash store.

"We thought the matter over and finally decided to adopt a cash system ourselves. We announced in the paper, and also mailed notices to our customers that on a certain day we would begin to sell for cash only, and stated our reason for so doing. We found, to our surprise, that the people were in a measure prepared for it, and some of our best trade, people that we were afraid of losing, complimented us on the change; and have traded with us continuously.

"When times were good, money plenty, and we were all getting good prices for our goods, then a credit business was profitable, but when it came hard times, money scarce, and many out of employment, then was the proper time to make a change. You may struggle along and try and carry these people, but you will find that if there is a cash store in the same town that your customers are comparing their prices with yours, and instead of being grateful to you for carrying them, they are figuring out how much profit you are making, and when they have run up a bill of $40 or $50 they then quit you, and go to the cash store.

"Of course, in making a change from a long-established credit system one must not be too radical, but use common sense. For example, the first three months we had several cases where good old customers would come in and say that they needed a bill of goods, but could not raise the money for a week or so, and in such cases I lent them the money, that is, I took their note for it, and they always came around the day the note was due and paid it.

"The retailer who wants to succeed should adopt as his motto, 'I buy and sell for cash only.' If this is done you either have the goods on the shelves, or the money in the bank instead of on your books. A dealer who is known as a cash buyer and can handle reasonable quantities, can get prices that the credit buyers never hear of, no matter what his rating is; that is our personal experience. We are now buying at least 10 per cent. cheaper than formerly."

TWO IMPORTANT DECISIONS.

The Supreme Court gave judgment yesterday in two important cases, in which London merchants are interested. The first was an action brought by Burns & Lewis, of this city, against the Sanford Manufacturing Co., and one Wilson, of Hamilton, to set aside a chattel mortgage for $4,600, given to Wilson, the proceeds of which went to the Sanford Co. The court below held, following the previous case of Gibbons v. Wilson, that where an independent third party advanced cash, which was paid to a preferred creditor, there was no remedy. The plaintiffs contended in this case that as Wilson, the mortgagee, held a guarantee from the Sanford Co., he was a mere creature of theirs, and that the chattel mortgage should be treated as if made direct to the Sanford Co. The plaintiffs failed before the trial judge, and before the Court of Appeal, but pluckily carried their case to the Supreme Court, where they were rewarded by their apeal being allowed, the chattel mortgage being set aside with costs. Mr. Gibbons, Q.C., acted throughout for Messrs. Burns & Lewis, and Mr. Ritchie, Q.C., and Mr. J. J. Scott, of Hamilton, for the Sanford Co. and Wilson.

The other case was that of Halsted v. the Bank of Hamilton, tried in London about eighteen months ago before Mr. Chief Justice Meredith. This was an action brought by J. A. Halsted, of Mount Forest, as assignee of one Zoellner, to have certain warehouse receipts claimed by the bank, aggregating the value of $8,000, declared to be void as against the assignee, on the ground that the same were irregular and in contravention of the true spirit of the act. The law permits the bank to take these securities for present advances. In this case the bank opened two sets of accounts and credited the supposed advances in one account. In a second account they credited the proceeds of business paper discounted, but would not allow the debtor to withdraw monies deposited in No. 1 account except as he discounted business paper in No. 2. This contrivance the learned Chief Justice held was a mere attempt to get around the act and obtain security for an old debt. The plaintiff also succeeded in the Court of Appeal, and the defendants took the case to the Supreme Court, where their appeal was dismissed with costs.

A number of London wholesale people, notably the Hobbs Hardware Co., were interested in the decision. Mr. Gibbons, Q.C., appeared for the respondents throughout.

SCRAPS OF FACT AND FOLK-LORE

Under old European law, wrecked crews and passengers could be enslaved and their property forfeited to the crown, or to the lord of the coast upon which their vessel perished.

Five is the great sacred Chinese number. There are five virtues; five colors (yellow, white, green, red, and black); five household gods; five planets (Saturn, Venus, Jupiter, Mars, Mercury); five ranks of nobility; five tastes; five cardinal points (the middle, east, west, south, and north, respectively) and five tones.

Gold was known much earlier than silver, and was at first the cheaper of the two metals, but the price of silver was lowered by the discovery of silver mines in Cilicia, Spain, and Laurium.

The value of an ox in Egypt, about a thousand years before the Christian era, was one kat of silver—about a hundred and forty grains.—*Harper's Young People.*

A NEW MINERAL.

Under the title "Asbestos and Asbestic," a paper was read the other day before the British Society of Arts, says *Chamber's Journal*, last month by Mr. Robert H. Jones, who gives some account of the discovery of the latter at Danville, in Lower Canada. The asbestos mine at Danville had been given up as a non-paying concern, when it was taken over by a new proprietor, who was struck by the remarkable appearance of the rock in which the asbestos fiber was found, quantities of which were lying about as waste. After a series of experiments he erected expensive machinery for pulverizing this rock, and the product is found to be suitable for quite a variety of employments. It is described as a fluffy, fibrous material of immaculate whiteness. It makes splendid wall plaster, for it needs neither hair nor sand, and this plaster is fireproof, heat proof and sound proof. Asbestic will also make a fine roofing material, which is proof against all climatic influences, and lastly, it is a most valuable aid to the papermaker, and has now taken the lead in the United States of all the various fibers employed in paper mills. Discussing the paper read, the chairman, Prof. Silvanus Thompson, remarked that the introduction of wood-pulp for paper had degenerated that manufacture to such an extent that a century hence the books now being printed would have disapeared into powder. This new material gave them a paper which was more imperishable than the best linen paper. On this the *Miner*, of Rat Portage, Ontario, remarks: "Inasmuch as asbestos of a poor quality is found in the rock cut in the limits of this city, and in other localities in these gold fields, it might be worth the while of prospectors to inform themselves as to this new material with a view to locating it in this region."

A CHRISTMAS LETTER.

Dearest Phyllis: Pray remember when you're making up the list of your presents for December (unless I am to be missed), that I've slippers, picture brackets, smoking sets of various types, half a dozen smoking jackets, 37 meerschaum pipes, 20 patent "kid glove menders," collar boxes by the score; of embroidered silk suspenders forty-eleven pairs or more! That each year since I was twenty, I've received a paper weight, have penwipers, ink stands plenty, paper cutters—twenty-eight. That I've Browning and Longfellow by the hundreds—every kind; Shakespeare—black and blue and yellow; Milton till I'm nearly blind!

So there's just one present only that I'm wanting in this year of my bachelorship so lonely—that's yourself, my Phyllis dear.

THE NATIONAL BANKS.

The returns of the National banks to the Comptroller of the Currency, showing their condition on October 5, 1897, invite attention to the situation which confronts that system of banking. As far as number of banks and capital are concerned the system has stood still for seven years, the number of banks now in existence being 3,610, or but little more than at the beginning of 1891, while the capital is less than $631,500,000 the smallest since February, 1890. The number of National banks has decreased 220 since May 4, 1893, and the aggregate capital has been reduced $58,000,000 since December 9, 1892. In the five years prior to May, 1893, the number of banks increased 723, and the capital $103,000,000. The circulation of the banks has been steadily declining since December, 1896, when the notes outstanding of banks in active operation aggregated nearly $210,700,000, and now are less than $199,000,000. In December, 1873, the highest amount of circulation was reported more than $341,000,000, equal to 55 per cent. of the capital and surplus. In October, 1890, it had fallen to less than $123,000,000, or about 15 per cent. of the capital and surplus, and now it is less than 23 per cent. In one particular the National banks have recently shown evidences of prosperity, in the growth of individual deposits, which now exceed $1,853,000,000, the largest amount ever reported. In September, 1892, the total reached $1,765,000,000, but in October, 1893, it had fallen to $1,451,000,000, since which time the deposits have increased $402,000,000.—*Banker's Magazine.*

—The use of petroleum is becoming common in China. As a result, lamps and oil stoves are being imported heavily. Most of them come from Japan and Germany.

FOREIGN TRADE INFORMATION.

The expansion of consumption of India and Ceylon tea is apparently keeping pace with the increase of production, as may be seen from the following table, showing the consumption in the United Kingdom and elsewhere of British-grown teas during the first nine months of the current and three preceding years:

	United Kingdom.	Foreign and Colonial Markets.
1897...........	£157,312,173	£34,859,215
1896...........	147,941,832	28,250,96
1895...........	138,761,454	25,002,230
1894...........	139,282,435	20,995,531

These figures show a total for the first three quarters of the current year of 192,171,388 lbs., as against 176,192,793 lbs., 163,763,684 lbs. and 160,187,966 lbs. for the corresponding periods of the three preceding years respectively.

To Great Britain the value of the exports of American wheels in 1897 was about 300 per cent. more than in 1896. The next most important market for the American bicycles is Germany; the third, British North America, and the fourth is Australia. To these four markets it is expected that business will make even a better showing than it has during the last two fiscal years, which increase was as follows:

	1896.	1897
United Kingdom	$613,000	$2,376,000
Germany	146,000	1,026,000
British North America ..	496,000	730,000
Australasia.............	85,000	693,000

The demand for machinery in Mexico, according to the *Revue du Commerce Exterieur*, Paris, is encouraging. The development of the mines has occasioned a field for all sorts of machinery and materials. There is also an opening for milling machines and those employed in the manufacture of sugar, distillation and brewing, in dyeing, spinning and weaving. Fire engines, motors, machinery for constructing canals, railroads and ports appear to meet with success.

In the Island of Elba there are six iron mines, which run along the coast in the western part of the island, and they are known as Rio Albino, Rio, Vigneria, Terranera, Ginevro, and Calamita. It is calculated that in the space of five centuries, down to the end of the first half of this century, eight million tons of ore have been exported from these mines, and that between 1850 and 1895 four million tons were exported, whilst it is calculated that the ore still existing reaches to nearly eight million tons.

The glass industry in the kingdom of Poland has made considerable progress recently, and there are at present twenty-nine glass furnaces (seven with direct wood fuel and twenty-two with gas) and eight fan furnaces at work. The total value of the productions in 1896 amounted to about 3,520,000 roubles, of which 690,000 were for crystal glass and articles of luxury, 450,000 for pressed glass, 780,000 for superior articles of lighting, viz., lamps, balls, tulips, screens and cups, and 718,000 roubles for hollow glass, wine, beer and brandy bottles, and window glass.

—When a boy hears people talking of "useful Christmas presents," he knows somebody is getting up an excuse for giving him something he doesn't want.—*Chicago Record.*

—Last year the United States produced 15,465,000 bushels of buckwheat, most of which was consumed at home. There are about 4,600 cakes in one bushel, making a total of 70 billion cakes in the whole crop.

Commercial.

MONTREAL MARKETS.

MONTREAL, 22nd Dec., 1897.

ASHES.—No transactions are reported for the week, and business is likely to continue very dull for the next several weeks. Stocks are thought to be small, however, in Britain, and some better demand is thought probable after the holidays. We quote first quality pots $3.25 to 3.30; seconds, $3; pearls, $4.75 to 4.85 per cental.

CEMENTS AND FIREBRICKS.—A very quiet week has been experienced in these lines, but some enquiry is likely to develop for firebricks after the holidays, when the usual annual repairs to furnaces, etc., will be in order. We quote: British cement, $2 10 to 2 20; Belgian, $1.95 to 2 05; firebricks, $17 to 22.00 per thousand, as to brand.

DRY GOODS.—Bright cold weather, with a moderate snowfall, has materially helped the Montreal retailer, and country stocks are also reported to be moving off very freely. Travelers are mostly at home getting spring samples revised, and the wholesale warehouses are not very busy, though some houses report quite a good sprinkling of letter orders for fancy lines of merchandise suitable for Christmas trade. In value of textiles, there are no present changes to be noted, but an advance in woolens may be looked for at no distant date.

FURS.—Receipts of raw furs are becoming somewhat freer, and moderate lots of fall rats, skunk, fox and mink, with some few bear skins, are reported. Prices continue according to the list revised last week. We quote:—Mink, large dark, $1.50; small, do., $1.00; marten, $1.50 to 2.00; fisher, $4.00 to 6.00; lynx, $1 00 to 2.00; otter, $1.00 to 12.00 for dark; pale, $5.00 to 7.00; red fox, large, $1.30 to 1.40; small, $1.00; cross fox, $3.00 to 6 00; bear, cubs, $3.00 to 7.00; medium, $7.00 to 10.00; large, $12.00 to 15.00; skunk, 15 to 70c., as to color and stripe; coon, 20 to 75c.; rats, fall, 7c. to 10c. kits, 2 to 5c. Beaver, not quoted, killing being forbidden by law.

MONTREAL STOCKS IN STORE.

GROCERIES.—A good sorting distribution is still in progress, more particularly in holiday goods. The feature of the moment is the further strong advance in canned vegetables. It is reported that a sale of a 1,000 case lot of tomatoes has been made at $1 a dozen tins for the Klondyke trade. In canned corn there is also increased firmness, 70c. being asked for some brands. A telegraph order to a western packer for a car lot of corn at an advance figure was declined, on the plea that a San Francisco house had made an offer for their balance of stock for Klondyke trade. Canned mackerel are quoted at $4.65 to 4.75. Lobsters are very scarce. It is said there is only one lot in first hands here, being about 250 cases of extra quality whole meats in parchment-lined tins, which are held at $9 20. Gallon apples are high; a recent sale of a 2,000 case lot is reported at $2.25. Evaporated apples are firmer, and 10 to 11c. is asked in quantity, and for dried apples 5½ to 6c. An advance in currants is cabled from Patras, and dried fruits generally are steady. Sugars are not in such active demand, but the advance noted last week is firmly held and is likely to continue so, as the high winter freights are unfavorable to the importation of German refined. For cheap Japan teas there is rather a better demand, and the action of the Government tending towards a closer inspection of importations of low grade goods, is calculated to benefit holders of medium to cheap lines.

HIDES.—There has been some further strengthening in the hide market, and butchers are now generally realizing 9c. per lb. for their No. 1 hides, being an advance of half a cent. The demand is good from tanners, dealers quoting 9½ to 10c. Lambskins steady, at 85 to 90c. each; few calfskins are coming in.

LEATHER.—While business is not active at the moment, some of the larger shoe manufacturers are reported to be fair buyers of sole and dongola, and also some moderate lots of splits, pebble, and glove. Cable enquiries for sole are reported from England. Some dealers claim to be getting an advance in black leathers, and the market is a strong one, the further advance in hides helping to stiffen things. We quote:—Spanish sole B.A. No. 1, 24 to 25c.; do. No. 2, 22 to 23c.; No. 1 ordinary Spanish, 22 to 23c.; No. 2, 19 to 20c.; No. 1 slaughter, 25 to 27c.; No. 2 do., 21 to 23c.; common, 20 to 21c.; waxed upper light and medium, 30 to 35c.; do. heavy, 27 to 30c.; grained, 32 to 35c.; Scotch grained, 30 to 35c.; western splits, 22 to 25c.; Quebec do., 17 to 20c.; juniors, 15 to 17c.; calf-splits, 30 to 35c.; calf skins (35 to 40 lbs.), 60 to 65c.; imitation French calf skins, 65 to 75c.; colored calf, American, 25 to 28c.; Canadian, 20 to 22c.; colored pebble cow, 13 to 15c.; russet sheepskin linings, 30 to 40c.; colored, 6 to 7½c.; harness, 24 to 27c.; buffed cow, 12 to 14c.; extra heavy buff, 15c.; pebbled cow, 12 to 13c.: polished buff, 11 to 13c.; glove grain, 12 to 16c.; rough, 22 to 23c.; russet and bridle, 35 to 45c.

METALS AND HARDWARE.—A quiet time is reported in these lines, and until after the turn of the year no special enquiry can be expected. We hear of a sale of 50 tons of No. 1 Hamilton iron at $16.50, but of nothing in other lines. Glasgow warrants are cabled noticeably firmer at 45s. 6d. Domestic bars remain unchanged, but there seems to be some anticipation that easier quotations may prevail after the new year. In wire nails there will likely be some little advance. Plates of all kinds are dull, and in tin, lead, copper, etc., there is not enough doing to warrant any change. We quote:—Summerlee pig iron, $18.00 to 18 50; Carron, No. 1, $18.00; No. 3, $17.25; Ayrsome, No. 1, $17.00; No 3, $16 50; Shotts, $17.25 to 17.50; Carnbroe, $16.00 to $17.00, ex-store; Siemens pig No. 1, none; No 2 Siemens, none; Ferrona, No. 1, $15.00 to 16.00; Hamilton No. 1, $16.00 to 16.50; No. 2, ditto, $15.50 to 16.00; machinery scrap, $1400 to 15.00; common ditto, $12 00 to 13.00; bar iron, Canadian, $1.40 to 1.50; British, $2.00 to 2.15; best refined, $2.40; Low Moor, $5; Canada plates—Pontypool, or equal, $2.10 to $2.15; 52 sheets to box; 60 sheets, $2.25; 75 sheets, $2.35; all polished Canadas, $2.40; Terne roofing plate, 20x28, $5.90 to $6.00; Black sheet iron, No. 28, $2.25; No. 26, $2.15; No. 24, $2 05; Nos. 17, $2; No. 16 and heavier, $2.15; tin plates—Bradley charcoal, $5.60 to 5.70; charcoal, I. C., Alloway, $3.15 to 3.25; do, I.X., $3.90 to 4.00; P. D.Crown, I. C., $3 60 to 3.75; do., I.X., $4.50; Coke I.C., $2 90 to 2.95 for standard, $2.75 to $2.80 for 100 lbs.; coke, wasters, $2 70; galvanized sheets, No. 28 ordinary brands, $4; No. 26, $3.75; No. 24, $3 50 in case lots; Morewood, $5.00 to 5.10, tinned sheets, coke, No. 24, 5½c.; No. 26, etc.; the usual extra for large sizes. Canadian bands, per 100 lbs., $1.75; English ditto, $2; hoops and bands, $1.90 to 2.00. Steel boiler plate, ¼-inch and upwards, $1.85 to 1.90 for Dalzell, and equal; ditto three-sixteenths inch, $2.50; tank iron, ¼ inch, $1.50; three-sixteenths do.; $2.00; tank steel, $1.75; heads, seven-sixteenths and upwards, $2.45 to 2.50; Russian sheet iron, 9c.; lead, per 100 lbs., pig, $3.65 to 3.75; sheet, $4 to 4.25; shot, $6 to 6.50; best cast-steel, 8 to 10c.; toe calk, $2.25; spring, $2.50; sleigh shoe, $1.85; tire, $1.90; round machinery steel $2.25; ingot tin, 15¾ to 16c. for L. & F.; Straits, 15¼ to 15½c.; bar tin, 16½ to 17c.; ingot copper, 12 to 12½c.; sheet zinc, $5 to $5.25; Silesian spelter, $4.75; Veille Montagne spelter, $4.75 to 5.00; American spelter, $4.75; antimony, 9 to 10c.

OILS, PAINTS AND GLASS.—Business in these lines is very dull, as is only natural at this season, and no changes are to be noted in values. Glass is very firm at the advance last noted, with no discounts for 50 box lots as is usual. As showing the strength of the situation in this line, wholesale dealers are talking of entering into an agreement whereby they will decline to book import orders for less than 5,000 feet. We quote:—Turpentine one to four barrels, 49c.; five to nine barrels., 49c., net thirty days. Linseed oil, raw, one to four barrels., 43c.; five to nine barrels, 42c.; boiled, one to four barrels, 46c.; five to nine brls., 45c., net 30 days; olive oil, machinery, 90c.; Nfld. cod, 35 to 37c. per gal.; Gaspe oil, 30 to 32c. per gal.; steam refined seal, 45 to 47½c. per gallon in small lots. Castor oil, 10 to 11c. as to quantity. Leads (chemically pure and first-class brands only), $5.37½; No. 1, $5.00; No. 2, $4.67½; No. 3, $4.25; No. 4, $3.87½; dry white lead, 4¾ to 5c.; genuine red do., 4½c.; No. 1 red lead, 4c.; putty, 1.55 to $1.60 in bulk, $1.70 to 1.75 in bladders, $2 to 2.10 in tins; London washed whiting, 40 to 45c.; Paris white, 85 to 90c.; Venetian red, $1.50 to 1.75; yellow ochre, $1.25 to 1.50; spruce ochre, $1.75 to 2.00; window glass, $1.40 per 50 feet for first break; $1.50 for second break; third break, $3.10.

TORONTO MARKETS.

Toronto, Dec. 23rd, 1897.

Dairy Produce.—The butter trade is fairly active. The principal receipts have been large dairy rolls and creamery pound prints. Butter of good choice quality is in active demand, and merchants' stocks are well sold up. Creamery is firm, and possibly a little higher prices are being obtained for butter. The export business is more satisfactory, and choice Canadian creamery is competing with Australian for the shilling a pound trade. Dairy prints remain steady, without advance in prices. Receipts are quite equal to the requirements, with 14 to 15½c. quoted. Some little improvement has been made in the cheese trade, and within the week several enquiries from exporters have come to hand. They are offering 8¼ to 8¾c. per lb.. while local jobbers are quoting 9 to 9¼c. per lb. The demand in the egg market continues good, and prices steady. Supplies are apparently in small compass. Deliveries of new laid eggs are small, and meet with a ready market at 17 to 18c. per doz. Pickled eggs are in demand at 13 to 14c.; while cold storage and held fresh are more difficult to sell at the same quotation.

Dressed Hogs and Provisions.—Values in dressed hogs are in dispute between buyers and sellers. For light selected weights (90 to 150 lbs) shippers are asking $5.90 to 6.00 per cwt., and for heavy weights $5 75 per cwt. Packers are not willing to give within 10c. per cwt. of these figures, and maintain that dressed hogs are proportionately higher than live hogs, the latter when quotations are reduced to a basis of dressed hogs, selling according to present live stock quotations at $5.45 per cwt. for heavy weights. Deliveries are free, or rather large quantities of hogs are being offered here. Provisions are quiet, as is usual at this season of the year. The *N. Y. Journal and Bulletin*, Dec. 20th, says: "There has been a material, change in sentiment, if not in the situation, of the markets the past week. First, the receipts of hogs have been very disappointing falling far behind daily estimates, and even behind a year ago, since early in the week at the leading packing points and especially at Chicago. Second, packers have changed generally from the bear to the bull side or have been getting off the short side of the market, indicating that they think it is either unprofitable or dangerous to remain there longer, in view of the gradual and healthy, though slow advance in the speculative products, in spite of their opposition, without outside buying until the latter part of the week, and without inside support, except from the shorts."

Grain.—The roads have improved in many parts of the country and, as a result, deliveries have been freer. The approach of the holiday season is, however, beginning to affect the trade, and the market is expected to assume its usual semi-stagnant holiday character next week. The New York *Journal and Bulletin* says: "The export demand for wheat has run largely on Manitoba for the United Kingdom, and No. 2 red and No. 2 hard winter, chiefly the latter, for the continent, France still being the chief buyer, notwithstanding the report of mid-week that the French duty would be removed, though not confirmed as yet, but believed to be likely so soon as the French crop is marketed." Oats are steady. Peas continue unchanged. Barley is quiet, and transactions are limited in numbers and amount.

The stocks in store at Port Arthur on Dec. 11th were 1,539,735 bushels, and there were received 140,236 bushels and shipped 1,799,205 bushels, leaving in store on Dec. 18th, 661,890 bushels.

Groceries.—Holiday trade has been active, but retailers are now too busy to receive travellers or visit the wholesale houses. There is every prospect of a good season's results. A wholesale merchant reports that a retailer in a northern Ontario town, after having placed an order for a variety of goods, wired "Double my order." Business had evidently been better than anticipated, and time did not permit a minute examination of the list. In dried fruits business has been very active. According to late mail reports from Smyrna, there were remaining there but 4,000 tons of Sultana raisins, which is considered a light supply for this season of the year. Advices from Greece report a very strong feeling in the market for currants, stocks there being reduced to about 25,000 tons, against 60,000 tons on hand at this time last year. It is thought that after the rush of the holiday trade has subsided local dried fruit stocks will be found in narrow compass. Sugar has been active at unchanged prices.

Hides and Skins.—Hide merchants continue to render their services to the trade with little or no return in profits. There has been the usual increase in the quantity of hides offered incident to the Christmas trade. For green hides, No. 1, merchants are paying 9c. per lb., and cured are quoted at 9½c. per lb. Sheepskins are steady at unchanged prices. Calfskins are dull. Chicago advices, December 21, state: "The market quiet, but prices unchanged and steady, closing at 11c. for native steers, 10c. for heavy Texas, 9½c. for light do., 9¾c. for butt brands, 9½c. for branded cows, 9c. for Colorados, 10¼ to 10½c for heavy native steers and 10½ to 10¾c. for light do.'

Leather.—The year is now about closed, and tanners are attempting to find out what its results have been. The movement in general lines is fairly active for the season, but values are not yet on a satisfactory basis.

Poultry.—In the early part of the week the market was bare of stock, offerings selling as follows: turkeys, 10 to 11c.; geese, 6½ to 7c. per lb.; chickens, 40 to 50c., and ducks 60 to 70c. per pair. On Thursday deliveries were large, indicating that poultry had been held

back at country points, and 1 to 2c. reduction took place. We now quote: Turkeys, 9 to 10c.; geese, 6½c. per lb.; chickens, 30 to 40c.; ducks, 50 to 60c. per pair. With continued large receipts a further decline in value may be looked for. The market is largely dependent upon weather conditions, but it seems almost certain that these will be favorable.

SEEDS.—The recent heavy snowfalls have had the effect of increasing deliveries, and trade is of a larger volume. We quote:—Alsike, $2 to 4; red clover, $2.50 to 3.75; and timothy, $1.80 to 1.75 per bushel. The range of quotations is according to quality.

WOOL.—There is an unchanged situation in the wool trade, and little can be said of it that is interesting. The mills report fair activity, and are taking into consumption a moderate amount of wool.

BRITISH MARKETS.

Gillespie & Co.'s prices current, dated Liverpool, December 10th, 1897, say:—

Sugar.—Raw is firm. Refined in better demand at higher prices. Rice is steady at about 9s. per cwt. for usual good quality. *Chemicals.*—Prices are fairly maintained, but the demand continues inactive. Citric acid is a shade easier at 1s. to 1s. 1½d. per lb. Cream tartar offers on spot at 74s. to 75s per cwt., less 2½ per cent., with a firmer tendency. *Oils.*—Olive, very steady. Palm is dearer at £18 10s. per ton for Bonny, and £21 per ton, less 2½ per cent. for Lagos. Castor oil, 3 5-16d. per lb. for good seconds Calcutta. Freights remain as last indicated. Montreal.—Groceries, 18s. 6d to 23s. 6d.; chemicals, 18s. to 25s. 6d.; oils, 22s. to 22s. 6d. Toronto.—Groceries, 20s. to 25s.; chemicals, 20s. to 29s.; oils, 20s. to 30s. Hamilton or London.—Groceries, 20s. 6d. to 26s. 6d.; chemicals, 22s. 6d. to 30s. 6d.; oils, 22s. 6d. to 31s. 6d. Halifax, N.S., 12s. 6d. to 15s. St. John, N.B., 10s. to 15s. for any.

—There are in the world persons so dull-witted or lacking in sensitiveness that sarcasm is thrown away upon them. An amusing illustration of this has just transpired in England. With the object of putting a check upon vandalism, the authorities at Darston Head had placed at the entrance to an enclosure containing antiquities, two stone slabs, bearing this inscription: "Persons who are anxious to write their names will please do so on this stone." A number of persons accepted the invitation in good faith, and forthwith proceeded to inscribe their names.—*Can. Architect.*

WANTED TO ADVERTISE HIS TRADE.

A verdant youth dropped into a jeweler's, and after gazing at some fraternity pins in the show case, said to the proprietor:

"Them's mighty nice breastpins you got there, mister."

"What kind of a pin would you like to look at?"

"How much is this one with a pair o' compasses and a square?" pointing to a Masonic pin.

"Five dollars."

"Five dollars, eh! You haven't got one with any handsaw on it, have you. I'm just outer my time. and as I'm going to set up as carpenter and jiner, I thought I'd like to have somethin' to wear, so folks would know what I was doin'. Well, I'll take it, though I'd like one with a handsaw, but I guess mebbe that's plain enough. The compasses is to mark out your work, and the square is to measure it when marked out, and any durned fool knows G stands for gimlet."

—Dollar wheat by no means marks the highwater mark of Dingley prosperity. In the Klondyke, for instance, flour is $2 a pound.—*Philadelphia Record.*

—An author sent a Christmas poem to an editor with this line: "Isn't this worth a good Christmas dinner?" The editor replied: "No; but it captures a free lunch, for which one nickel is inclosed, and for which you will please receipt."—*Atlanta Constitution.*

Established 1885.

HEAD OFFICE:
Queen City Chambers, Church St., Toronto.

DIRECTORS:
AS. GOLDIE, Pres. J. L. SPINK, Vice-Pres
Thos. Walmsley, Treas. Hugh Scott, Mgr. and Sec
Adam Austin, Inspector.

This Company was organized in 1885, specially for the purpose of insuring manufacturing industries, warehouses and contents.

The primary object being to give protection against loss by fire at a minimum cost consistent with absolute security.

The system adopted has been to inspect all risk before acceptance and fix the rate to be exacted equitably in accordance with the hazard assumed.

Assurers with this company have made a saving, upwards of $108,000.00 on the current rates charged, in addition to which, on the rates exacted by us, dividends have been declared to policy-holders amounting to over $24,000.00, together, making the very substantial sum of over $132,000.00 that our policy-holders have saved during the eleven years we have been in operation.

As no canvassers are employed, dealing directly with the assured, those desiring to avail themselves of the advantages thus offered will please address

Millers' and Manufacturers' Insurance Co.,
32 Church Street, Toronto, Ont.

BOOKLETS

We invite those who intend publishing Booklets to see or write us. We print them.

We have a plant particularly well adapted for the production of first-class work.

We have printed Booklets for many large Canadian firms, and the fact that they do not ask for quotations in competition with other printers proves that our work is satisfactory both in price and quality.

Our presses are now busy on large editions for January circulation; we want orders now for work to be completed by February next.

We deliver work when promised. Kindly let us hear from you.

Robert Hampson & Son, General Agts. for Canada, MONTREAL.

There is the Same Aristocracy

Among musical instruments as in the circles in which they are used. This is an undeniable fact.

It is equally incontrovertible that the BELL PIANOS occupy the highest position among Canadian products. The very fact that all other piano manufacturers have adopted the phrase, "It's as good as the Bell," proves its value; for a criterion is equally a model for imitation.

The BELL PIANOS are sold by every responsible dealer in the Dominion. Every instrument is guaranteed, and the Company holds itself responsible.

DECISIONS IN COMMERCIAL LAW.

REG. v. WALSH. — Judgment by Common Pleas Divisional Court, on motion to quash summary conviction of defendant by the Police Magistrate of the City of Ottawa, for "disposing" of intoxicating liquor upon the defendant's licensed premises during prohibited hours. The question raised was whether, under the Liquor License Act, upon the facts found by the Magistrate there was an offence at all. The Magistrate found that the defendant gave the liquor away to friends in his hotel on a Sunday; that there was no sale or disposal in nature of a sale, and no request from the persons to whom it was given. Defendant contended that the words of the section "sale or other disposal" did not include such a gift. The Court held that the word "disposal" was to be taken in its natural sense, uncontrolled by the word "sale" which preceded it, and so taken was wide enough to include a gift. The object of the enactment was to keep licensed premises closed in certain hours, to forbid any intoxicating liquor to be poured out in such hours. The provisions of the Act, with regard to liquor on polling days and liquor on boats, were in *pari materia*, and a construction must necessarily be put upon those sections which would forbid the giving away of liquor on polling days or on ships. Motion dismissed with costs.

MILES v. ANKATELL. — Judgment by the Chancery Divisional Court on appeal by defendant, William T. Ankatell, from judgment of Armour, C.J., in favor of plaintiff in an action upon a mortgage, in which he claimed foreclosure and a declaration that certain erections upon the mortgaged premises, placed there by the appellant, the husband of the owner of the equity were affixed to the freehold and part of the mortgaged security. The erections were wooden shops or houses, placed there, as the appellant contended, for a temporary purpose, by the license of his wife and without the intention on his part that they should become fixtures. The premises are in Shirley street, in the City of Toronto. The building in question is a wooden structure of thin clapboard lathed and plastered, and divided into three rooms, placed on loose bricks laid on the soil, which was, perhaps, somewhat levelled to make a foundation for it. It was first used as a shop or store, and then turned into a dwelling-house, and this was rented for a while by the mortgagor and her husband. The building could easily be moved and little or no injury would be done to the soil. Held that it was not in fact affixed or annexed to the soil, but was merely a chattel, which might be moved at any time. If it is a chattel, then, according to the rule, the onus is on the plaintiff to show that it cannot or ought not to be removed as against him. So far he shows nothing, and the evidence of intention with which it was placed on the ground by the husband, and the other circumstances of its temporary and unsightly character, repel the conclusion that it is to be deemed constructively attached to the freehold. Appeal allowed and judgment below reversed on this point, and appellant to be at liberty to remove the chattel at his own expense.

A NUMBER of Ainprior citizens have been granted letters patent for the Diamond Park Mineral Water Co., Limited., capital, $20,000, to sell mineral water, put up baths, etc. The parties are John A. Macdonald, R. G. Moles, Wm. Allan, J. G. Cranston and Claude McLachlin.

JOHN BARBER

Mercantile Summary.

During the fiscal year 1897 the receipts for electric light inspection in Canada amounted to $6,895 and the expenditure to $9,021, of which but $1,830 was for salaries.

One of the Cramps, of Philadelphia, denies the published statement that the William Cramp & Sons' Shipbuilding Company intends constructing a shipbuilding plant at Seattle.

A building 40 by 50 feet is in course of erection at Hartville, Hants county, N.S., in connection with the St. Croix Paper Mills, for the reception of machinery to be used in the manufacture of tar paper.

Shipments of cotton to Japan from the States continue in increasing volume. They are practically double what they were last season. There are said to be 15,000 bales in San Francisco awaiting shipment.

The Klondyke craze is warm even in December. Word comes that the steamship "Elder" has sailed from Portland, Oregon, for Dyea with 125 passengers and 500 tons of freight. Fifty horses and 400,000 feet of lumber were refused.

A Yokohama telegram of Tuesday last, says that owing to its failure to reconstruct under the Premiership of the Marquis Saigo, the remainder of the Cabinet has resigned. The newspapers demand the formation of a strong Ministry capable of coping with the situation in the east.

At a meeting of the British Columbia lumbermen held in Vancouver, B.C., December 27, a resolution was passed that the Canadian Government should place a duty on shingles and lumber, unless the United States places them on the free list, as the Canadian Government has done.

The season for ore shipments that has just closed has established a new record for Lake Superior iron mines. Almost 2,000,000 tons more was shipped by water than in 1895, when the unprecedented record of 10,233,910 tons was made by the ore docks of Lake Superior and Lake Michigan. This year's total has gone quite beyond expectations.

In January, or at the latest by February, a new industry is to be established in Halifax. Messrs. J. P. Carritte, of St. John, and J. C. Patterson, Montreal, have contracted with the People's Heat and Light Company, for the company's total tar output, and will have a factory on the Northwest Arm for making tarred roofing and building paper, and all bi-products of tar.

The Great Northern Railway will establish the same rates now in effect to Trail, Nelson, Kaslo, Ymir and Sandon, to Rossland, thus putting the latter city on an even footing with other Kootenay points. The freight rates to Rossland have always been higher than to any other point in the Kootenay district. The new rate will take effect on January 1st.—*Vancouver World.*

A big consolidation of woodworking interests in the States took place last week under the laws of New Jersey. The capitalization is $4,000,000. The concerns interested comprise the following: Rowley & Hermance of Williamsport, Pa.; the Glen Cove Machine Co. of Glen Cove, L. I.; the Williamsport Machine Co. and the Lehman Machine Co. of Williamsport, Pa.; the Milwaukee-Sander Co. of Milwaukee; Hoyt Bros. & Co. of Aurora, Ill.; Goodell & Waters of Philadelphia, and C. B. Rogers & Co. of Norwich, Conn.

A new branding ordinance, it is thought, will give a good deal of trouble to ranchers in the North-West Territories. It provides, amongst other things, that on and after the first day of July, 1898, all brands heretofore recorded under the provisions of any ordinance shall be cancelled as recorded brands, and that any brand recorded prior to the passing of ordinance may (with the approval of the Minister) be allotted to the owner thereof if application for such allotment is received by the recorder on or prior to the thirteenth day of June, 1898.

An order-in-council has been passed approving the terms of settlement of the dispute between the Dominion and British Columbia in regard to the administration of lands in the railway belt in that province. The lands were transferred by British Columbia in 1883 to the Dominion and it has been decided that sales or *bona fide* pre-emptions in the tract made previous to the period by the province shall be confirmed. A compromise has also been agreed upon as to the right to money received for land previous to and subsequent to that date, as well as in regard to land covered by cancelled titles.

Upon the demand of Messrs. Hudon, Hebert & Co., wholesale grocers, Montreal, an assignment has been made by Kearney & Faulkner, in general business at Papineauville, Que. They began business in 1893 on small capital, buying out two stocks, besides store premises, assuming a liability in all of about $18,000, under which they have been staggering ever since.——R. Gagnon, general store, L'Anse St. Jean, Que., has arranged a settlement at 40 cts. on the dollar, and Philibert Gagnon, storekeeper, Grand Baie, has also settled at 50 cts.——The assignment is reported of Mrs. A. Roy, milliner at St. Lin.——Edouard Roy, general store, L'Anse St. Jean, has secured a cash settlement at 40 cents on the dollar, on liabilities of $3,500.

A prominent Toronto firm recently received the following letter, which although of few words, contains many errors:

> "Dear Sir,—The estatements received from You Yesterday was presanted to the commity to-day and considred more than they could Stand and was theirfor declined. Yours truly."

This letter was typewritten, evidently by a tyro, but the gentleman whose name it bears must shoulder the responsibility. It emphasizes the care that every business man should exercise in selecting his employees, and in reviewing letters that may be submitted by them to him.

The New York *Shipping and Commercial List*, one of the most newsy and welcome of our exchanges, is about to be transformed from a weekly into a daily under the title of the *New York Commercial*, the change to take place at the New Year. The trade journal which thus leaves the ranks of weeklies, has the distinction of being the oldest commercial paper on this continent, descended directly as it is from the *N. Y. Price Current*, established in 1795, and it has further the deserved reputation of being editorially able, outspoken and worthy of respect. The owner of the new daily will be Mr. D. O. Haynes, the publisher of the paper of which the new daily is the outgrowth, and also of the *Pharmaceutical Era*. Its editor will be Albert C. Stevens, a competent man, long with *Bradstreet's*, of which for ten years he has been editor. His associate will be Charles R. Buckland, for the past five years editor of the *American Economist*.

The GURNEY-MASSEY CO., Limited
MONTREAL

Mercantile Summary.

A CARLOAD of turkeys has been shipped over the Lake Erie & Detroit River railway to Boston, from Essex county, Ont.

THERE is a story that Folger Brothers of Kingston have bought the steamer "Shrewsbury," to ply in opposition to the Richelieu & Ontario Navigation Co., between Clayton and Montreal.

THE Hamilton Acetylene Gas Co. has been formed and incorporated; capital, $45,000. Dr. Geo. S. Bingham, Mrs. Adele Sequin, F. A. Carpenter, W, R. Moore, and S. D. Biggar are the parties.

ALL the classes in Montreal controlled by the Quebec Council of Arts and Manufactures closed on Christmas Eve, to reopen 10th January. The attendance has been larger this year than last.

A CHANGE has taken place in the old-established dry goods house of Wm. McLimont & Co., Quebec. Mr. Henry J. McLimont retires, and the business is continued under the old style by Messrs. John C. and Wm. McLimont.

THE Perth Woolen Company, Limited, has been incorporated: capital, $25,000; parties, George Douglas Ross, of Montreal; T. A. Code, Hon. John Haggart, Mrs. Millar, and Mrs. Code, of Lanark, to make yarn, cloth and knitted goods, and to deal in the same.

THE building of the six light draught steamers ordered by the C. P. R. to ply in Alaskan waters will be commenced by the Bertram & Polson works early in January. The steamers will be of wood, plated with steel and will have a length over all of 156 feet, with a beam of 30 feet.

MR. E. R. C. CLARKSON, liquidator of the Ontario Express and Transportation Company, has been instructed to pay the preferred claims in full. It was expected that these claims would be paid at the rate of 50 cents on the dollar The preferred claims are in the neighborhood of $13,000.

JOHN F. CARMODY and Kate Carmody, of Dunnville, Ont.; Daniel W. Murphy, of Toledo, Ohio; James Hardy and Norman Shaffer, of North Baltimore, O,, have received letters patent of incorporation in Ontario as the Producers' Oil, Gas, and Mining Co., of Welland, Limited; $10,000 capital.

IT is reported from Ottawa that E. B. Brown, a prominent retail grocer of that city, has arranged a compromise at 33⅓ cts. on the dollar. Mr. Brown was unfortunate in being seriously entangled in the failure, four years ago, of Wm Donahue & Co., wholesale grocers, Montreal, when he had to ask indulgence from creditors, and has apparently not fully recovered his position since then.

COLSON HUBBARD, of Caraquet, N.B., engaged in the general store and fishing trade, has made an assignment to James Young, barrister, of Bathurst. The fisheries have resulted rather poorly during most seasons of late, and Mr. Hubbard was obliged to seek indulgence from creditors both in 1894 and 1896 Of late he has been sued several times.

THE weekly contingent of Montreal failures is as follows: A demand of assignment having been made upon J. C. Murray, ship-liner and lumber dealer, he has assigned to the court, owing $11,700.—— J. E. Fleury, a small trader in the East end suburbs, has assigned, owing $1,400.——A demand of assignment has been made upon Dame Marie Aime Brehaut, doing business in the dry goods line under the style of O. Chayer & Co. The concern as above constituted only dates from last summer, but Mr. Chayer had been in business before unsuccessfully.——Paul Desjardins, dry goods, lately insolvent, has arranged a cash compromise of 37½ cents on liabilities of some $15,000.——Clovis St. Louis, the former representative of some Toronto dry goods houses, who started in business on his own account two years ago, in a pretentious way for his small capital, has got into deep water. A receiver was put in charge in the interests of creditors several weeks ago, and he has now assigned upon the demand of Messrs. Thibaudeau Bros. & Co. His liabilities are placed at about $22,000.

– FROM Truro, N.S., we hear of quite a heavy failure, that of Bligh & Prince, extensive dealers in carriages, agricultural implements, etc. The liabilities in all will reach to some $75,000 or $80,000, we are told, of which some $36,000 is preferred, and the general creditors will fare poorly it is feared. Some Ontario manufacturers are said to be interested deeply. ——C. R. McLeod, of Glace Bay, N.S., who removed thither from Prince Edward Island in 1894 to engage in the produce trade, has made an assignment.

THE announcement was made on Monday that Horace C. Burt, third vice-president of the Chicago and Northwestern Company, is chosen president of the Union Pacific Railway Company. The board of directors is to include the following: Winslow S. Pierce, chairman; James Stillman, Marvin Hughitt, Roswell Miller, E. P. Harriman, Louis Fitzgerald, Henry B. Hyde, John W. Doane, Otto H. Kahn, T. J. Coolidge, jr., George J. Gould, Oliver Ames, George Q Cannon, Jacob H. Schoff. Oliver W. Mink is to be vice-president, in charge of the New York office.

THE American railways are able to show vastly improved traffic in 1897. The gross traffic receipts of 131 roads for November show an average increase of 20 per cent. over those of 1896. For the first eleven months of the year, 124 roads show an increase of $30,800,000, and most of the gain has been made within the last six months. It is noticeable, too, that the increase on net earnings has been in a higher ratio than on gross. For the first ten months of the year, the net business of 118 roads shows an increase of 11.12 per cent, whilst the gain in the gross earnings was only 5.2 per cent. Better management clearly comes into play here.

WE were able to make, last week, only the brief announcement of the death of Mr. Alexander Ewan, of Montreal, who had been a resident of that city since 1864. Mr. Ewan was an Aberdeenshire man, and possessed the qualities of earnestness and persistency that characterize so many of the natives of that locality. Having been grounded in business in the Granite City, he came to Canada at the age of about 32, and was engaged by the wholesale dry goods firm of William Stephen & Co, of which Mr. George Stephen, now Lord Mountstephen, was then the head. He was for a number of years of the firm of Cantlie, Ewan & Co., manufacturers' agents, and finally established a business on his own account. For the last seven years he has been sole agent of the Merchants' Cotton Company, handling the whole of the products of this mill. The deceased gentleman was an all-round business man, but he found time for something besides business, and out of a warm heart gave both energy and money to philanthropic work. His uprightness and straightforwardness during a long residence made him respected and admired among an unusually large connection.

Mercantile Summary.

—The Omaha *Bee* tells of a clergyman who was catechizing a Sunday school, and, after informing the children that the pastor of a church is its shepherd, while the members are the sheep, he asked: "What does the shepherd do for the sheep?" To the amusement of those present a small boy in the front row piped out, "Shear thm!"

APPARENTLY Henry Westcott, formerly a hardware merchant at Beaverton, has had some old claims hanging over him since he disposed of his business in April, 1896, for he now assigns. — In the autumn of last year Alfred Christian began business as a grocer in London East. Previous to this he had been a clerk and saved some ready cash which he invested in the business. Now this is all gone and an assignment is made.

THE firm of McKenzie & Campbell, general storekeepers at Kirkfield, who assigned two weeks ago, are now offering creditors . 40 per cent. of their claims, and it will probably be accepted.——John Jesse, grocer in Hamilton, has assigned.——At a meeting of creditors of Hampton & Co., general dealers, Mount Forest, their statement showed assets of $14,000 and liabilities $13,000, An offer is made to creditors by a local banker for the assets, and if accepted it is thought 60 per cent. of the claims will be paid.

THE firm of Cline, Mavor & Keith, marble dealers, Hamilton, dissolved partnership on the 7th inst, the latter two purchasing the former's interest. At the time of the dissolution they owed $2,500, and had an unavailable surplus of $1,200. They were granted an exten sion of time to pay past due wages and some other liabilities. Being unable to carry out this arrangement, an assignment followed. — J. F. Aitkin went to Watford from Waterford last June, and purchased the grocery stock of R. Hasket, amounting to $1,500. Having little knowledge of the business, and meeting strong competition, the result of his operations cannot be surprising; it is an assignment.

TOBACCO GROWING.

The prospects of tobacco culture are engaging the attention of Western Ontario farmers and merchants. Louis Wigle, Esq., of Leamington, was recently invited to lecture in Ridgetown on tobacco culture. The lecture was a great success. Many attended. Mr. Wigle went into details of sowing, growing, gathering and curing the weed, and exhibited the necessary apparatus in the way of racks, etc., to those present. He also distributed samples of seed so that many in the community will this coming year take up tobacco culture either as a means of revenue or by way of experiment. And, as Mr. Wigle explained, there is money in it. An acre of good ground will produce from 1,200 to 2,200 pounds of leaf, and this leaf will yield from 10 to 15 cents per pound, according to quality. A fair return to the acre Mr. Wigle estimated at $200 to $225. And yet with such a return in view our farmers will continue to ignore tobacco culture at $200 per acre and raise wheat or peas. So long as the Government taxes tobacco at the present rates, the industry should be profitable.

—"Do you know your orders, sentinel?" was asked of a not overbright Irish soldier on guard duty recently at Fort Logan, Col. "Yis, sor," was the reply. "Know the points of the compass?" continued the officer. "Yis. sor." "If you face the rising sun, your left hand would be on the north of you and your right hand to the south of you. What would be behind you?" "Me knapsack, sor," sententiously answered the soldier.—N.Y. *Tribune.*

SEC'Y BOARD OF TRADE,
New Westminster, B.C.

Mercantile Summary.

Parliament is summoned for the despatch of business on Thursday, 3rd February.

A SEWING machine agent, of Quebec, named A. Letourneau, who has been running a small grocery business for two years, attended to mainly by his wife, is reported to have compromised at 25 cents in the hundred.

IT seems that the ballot taken by the striking engineers, as the outcome of the recent conference between the representatives of the employers and the men, results in a rejection of the offered compromise by a hundred to one; while the trade unions' proposal of 51 hours weekly, instead of 48 has been rejected by a majority almost as large. The lock-out, presumably, will now become operative.

HERE is a little group of additional Nova Scotia failures: Mrs. Joseph A. Weeks, who started a millinery business at Amherst about a year ago, has assigned. A bill of sale recently granted will probably cover all her assets.——Mrs. H. L. Clark, also in the millinery line, at Annapolis, is in deep water, and her solicitor writes on her behalf, offering creditors 50 per cent. cash.——Wm. Gorman, doing a small tinsmith and plumbing business at Canning, has assigned.

COMMENTING on the frequency of accidents in passenger elevators, and the lack of skill of those in charge of them, the *Insurance Press* says, very pointedly: "As a rule, we read that an 'elevator boy' had charge of the machinery. Why are boys placed in charge of elevators? Is it boys' work? Are boys found in charge of trolley and cable cars? Of course, business greed prompts the procuring of cheap labor. The safety of elevator passengers is, apparently, a secondary consideration. Boys should be banished from the elevator business."

THE attention of Chairman Dingley, of the Ways and Means Committee, has been called to the fact that logs sawed into stave lengths are made dutiable at 10 per cent., while the same kind of timber brought in for conversion into hoe, rake and other handles is admitted duty free. This was evidently an oversight, and Mr. Dingley, it is reported, has promised to correct the discrepancy, if anything shall be done in the way of revision of the tariff law during the present session of Congress.

WE were told (at election time in Toronto) that we were to have cheap ocean postage, beginning next week. But now, it is announced, that, owing to certain unforeseen difficulties which have arisen, it is found advisable to postpone the carrying into effect of the proposed reduction in the postage on letters addressed to the United Kingdom and all other parts of the British Empire, which it was stated in the November supplement to the *Postal Guide* would go into operation on the 1st of January next. Letters, therefore, addressed to the United Kingdom, and to British colonies and possessions generally, will continue until further notice to be subject to the present rate of five cents per half ounce.

WRITS for a hundred thousand dollars damages each have been issued against three Montreal journals by the dry goods importing firm of Fitzgibbon, Schafheitlein & Co., of that city, who complain that they have been libelled in these papers. One of these is the *Shareholder*, which a week ago had an article headed "Customs Frauds," accusing by name the firm above-mentioned, of being charged with entering goods at the Custom House under value, fraudulent ces repared in Germany having been used, the extent of the undervaluation reaching some $400,000. The firm's solicitor says there has been information given by one of his clients' discharged employees in Germany, that the firm courts investigation, and has made a deposit of $7,000 with the Government.

AMONG the books which should have been noticed last week is an instructive little pocket volume from the Toronto News Co., entitled "Tim and Mrs. Tim: a story for the Club and 'Society' man and the 'New' woman." The story is a satirical account of the trials of a wife who was burdened with a husband who was a "society" fiend. He joined so many societies that he never spent a night at home. How his wife cured him the story tells. The next book on our table is "Kit's" fascinating story of the Queen's Jubilee celebration in London. There is no need to praise Mrs. Watkin's sparkling style of narrative. Those who have read "Kit's" letters in the *Mail* will want a copy of this book, published by Geo. N. Morang, Toronto, as a memorial of a never-to-be-forgotten occasion. But another edition will have to be printed, for we understand the first is exhausted.

ONE or two of the curiosities of lumber movement in the region of the Great American Lakes are noted in the last issue of the *North-Western Lumberman*. For example, one Saginaw mill concern received 3,500,000 feet of Washburn, Wis., product, coming down from that Lake Superior port by steam and tow barge to Bay City, Mich., which illustrates the great change that has taken place in sources of supply and movement within recent years. A peculiarity of the shipment was that the lumber was to be taken by rail from Bay City to Saginaw, 200 car loads in all. Another curiosity was the shipment to Chicago (on the western side of Lake Michigan, and close to the great Wisconsin lumber woods) of several million feet of lumber from the Saginaw River, Lake Huron, 500 or 600 miles away, by water. "This is cris-cross work," says our contemporary, "but it is all in the drift of the trade. It is the speculative feature, like that in wheat, which pulls and hauls for supplies in every direction."

—The first profit-sharing plan to be adopted in Boston was started on Monday by Jordan, Marsh & Co. The plan is to allow each of their employees one per cent. of their individual sales in addition to their regular salaries. The announcement to this effect was made to the employees at the close of business on Saturday last, and was greeted with cheers and other demonstrations of approval. The managers said that they had determined to adopt the plan in order to give the employees an additional incentive to make sales and to work in the interest of the firm.

A FRIEND in Brockville who had read the story in last week's issue about "A Detective's Views and Experiences," writes: "Your last week's paper hit it off very well in the detective's yarn about barn-burning and the like. I daresay he is likely right about the way these things are sometimes worked. We have had a case going on here for some days back where a man named Johnston was charged with burning the dwelling and barn of T. K. Scovill, in Portland, last month. A fellow named Laing, who was with Johnston in the job, turned round and gave evidence to save his own skin; and what he says is that Scovill and Laing planned ogether to burn the place for the insurance Scovill was at the trial (before a magistrate) and was arrested when it was finished, charged with conspiracy to a felony. He was bailed for $4,000, and Laing the same, to be tried at March assizes."

THE SITUATION.

Messrs. Petersen & Tate have made the second deposit required of them for the due fulfillment of their contract in connection with a swift Atlantic line of steamers. If they had definitely failed to do their part, as so often announced by irresponsible persons, they would not have made deposits which failure would forfeit. Whether this brightening of the prospect will be followed by entire success a little time may serve to show. Mr. Dobell claims that the new vessels will be superior to any now on the Atlantic, which is saying a great deal.

Mr. Sifton, the Canadian Minister of the Interior, has been discussing and arranging, at Washington, to facilitate the relief expedition to the Klondyke. It is understood that Mr. Sifton went to Washington because Mr. Alger, the United States Secretary, is ill and unable to come to Ottawa. Most of those in need of succor will be found north of the Canadian line, but the relief expedition will have to pass through Canadian territory on its way to the objective points. A representative of the Canadian Government will accompany the expedition and serve as a guide. Mr. Sifton who has personal experience of part of the route, fully understands the difficulty of the undertaking. He is, no doubt, right in the belief that great difficulty will be encountered in passing the narrow defile with a large number of reindeer. To what extent these passes will be incumbered with snow is not known; on the Peace River, where the climate is much milder, snow in the defile shas sometimes been found twenty feet deep. Whether the snow, if found to be deep, will be solid enough to carry the animals is not known. Russian experience in Central Asia, is that the camels sometimes sank in the snowy defiles, in large numbers, never to rise again. A pass may, in this way, become incumbered with dead and dying animals. Such things have happened as that expeditions, not unlike this, failed to get through. Mr. Sifton seems to be not entirely free from the fear that something of this kind may happen to the Klondyke expedition. The Canadian Government has not been able to get through twenty-five tons of provisions sent on some time ago. To feed 600 reindeer a great deal of food will have to be found, and what cannot certainly be picked up on the way, will have to be carried. As a compensation for this the reindeer would, if necessary, serve for food, either at the end of the journey, if it were completed, or on the way in case of a breakdown. The expedition itself is not likely to perish. That it may be successful is the fervent wish of three countries.

Lord Salisbury, with whom rests the decisive word, declines consent to the proposal of the United States to suspend for one year the capture of seals at sea. The ground of his decision is the attitude of Canada, which is that of objection; her interest in sealing being larger than that of England, determines the issue. Before the decision of the English Premier was formally given, the United States, knowing that the refusal of Canada would be decisive, took steps to close the American market to the skins of seals caught at sea. Congress passed an Act authorizing the prohibition of what are known as pelagic seal skins: skins of seals taken at sea, sent to England to be cured, and some of them thence exported. Confiscation is the penalty for infraction of this law. How are such skins to be distinguished from those taken on the Pribyloff islands? They are assumed to be all branded, being caught when young for that purpose. The branding injures the fur to some extent; and as the seals become the property of their captors, the injury done is to unknown persons. Under what rule of international law the mutilation could be justified, no one has taken the trouble to show; the right of exclusion in the United States, or in any other government, is clear; the wanton branding of animals that do not belong to the branders but become the property of their captors when they swim off a prescribed distance in the ocean, remains equally without defence or justification. The bill of seal exclusion with its penalty of confiscation has not yet been signed by the President; interested parties have asked him to delay that act just a few days to allow them to get into their possession the soon-to-be-forbidden skins, and when they have got what they want, to close down on rivals with the best pace executive speed can attain. The President is said to incline to meet the wishes of these enterprising open-and-shut petitioners, and to be likely to time the signing to their fervent desire. That is evidently one of the things presidents are made for. This measure will somewhat restrict the purchasers of Alaska seal furs, though perhaps not much, for American buyers may be trusted to find some means of getting what they want on the best terms.

One of the deputation who waited on President McKinley to induce him to sign the pelagic sealing prohibition bill, on a particular day, and not before, Mr. Hugo Jaeckel, does not like the clause which threatens confiscation of all pelagic sealskins, whether raw, dressed, or manufactured. The manufacturers do not give up the hope of being able to disguise these skins in made-up garments, and so evade the penalty. But this clause, Mr. Jaeckel thinks, may prove a menace to the American fur trade, in that particular. Importers will have to prove that their skins come from the seal islands. All the skins have to be sent to England to be prepared, including those of the Alaska Company, and it will be necessary to keep the two kinds separate there, and to present documentary evidence to the American custom house that the animals were not caught at sea. It suits Congress to try to secure a monopoly of the American market for that company. To this we, as outsiders, have nothing to say, though we regard it as bad policy from the American point of view. Another thing which Congress proposes to do almost deserves our thanks. Our neighbors have been suddenly struck with the cruelty of killing seals at sea, and think that all sea-going seals should be reserved for the pleasure of being slaughtered on their return to the American Islands. Before the Paris tribunal of arbitration we heard of the shocking immorality of killing seals at sea; but the arbitrators did not accept the new moral code, which was presented with so much unction. Canadians, we may say, have not yet been converted to the new sealing humanitarian morality. We have an old-fashioned notion that killing seals, whether on sea or land, is part of the inheritance of the dominion given in primitive times to man over the rest of the animal creation. But we are prepared to respect the contrite view of our tender-conscienced neighbors; and we should be ready to bless Congress for leaving all the seals to us, if we did not know that they will send their sealers, under our flag, to do what their consciences will not permit them to do, under their own.

For some time past the attention of the whole world has been rivetted on what is going on on the coast of China. That Russia desired a port far enough south not to be ice-bound, for her great Siberian railway, has long been known, and that she was at liberty to occupy such port without protest from England was no secret. Now when she occupies Port Arthur no one is taken by surprise. At the outset her press declares, with brutal frankness, that the occupation will be permanent. Germany comes forward and seizes another Chinese port, on pretence of seeking compensation for the murder of two of her subjects, who went to China in the character of missionaries. She made the seizure before she made the claim. The pretext is the thinnest of disguises. France, jealous of Germany, takes a finger in the pie, equally without notice and without leave seized the island of Hai-Nan. The first reports represented, as usual, that England was shut out, isolated, and given the cold shoulder all round, when all at once comes a rumor that a British fleet of twenty vessels has reached Port Hamilton, and is beside a Japanese fleet of equal number. The object of the demonstration is to back a protest against the dismissal of a British financial agent for Corea, and the appointment of a Russian in his place. Japan fully concurs in the British demand for the restoration of the English agent. The menaces of a partition of China have a cold-blooded aspect and no foundation of right. If, like Turkey, China had given provocation for such treatment, the menaces would have some semblance of justice; in the actual circumstances they have none. Canada, with one coast on the Pacific, may look forward to the building up of a considerable trade with China, and any partition of that country would give us several countries to deal with, where there is now but one. In this respect, our interests in China are the same as those of England and the United States. When England acquires foreign territory, she leaves the whole world to trade with it on the same conditions as she does herself. For this reason, the nations with two scales in the tariffs of their foreign possessions can never become general favorites; it is this fact that makes Germany, with its single tariff, less objectionable as the holder of foreign territory, than France with her double scale, reaching out to all her possessions.

A great trust has been formed to supply New York with milk. It has obtained control of 300 wholesale and 200 retail dairies; 1,500 red and gilded wagons, with rubber tires and floor tanks, air-tight and dust proof, will daily distribute 950,000 quarts of lactial fluid. As one journal remarks, "the milk trust is a fine and clear example" of a distributing trust, capable of indefinite extension in other directions. There is no denying that this is the way the world is going and is likely to continue to go. If promises be realized, New York will be better served under the Milk Trust than at present, and at lower prices. Of these promises, the first is likely to be realized; of the second, it may, with so much past Trust experience before us, be permitted to doubt. There is, perhaps, nothing in which so great a proportionate saving can be made as in a monopoly delivery of milk. Milk delivery is a standing illustration which the Socialists are never tired of quoting, to show the wastefulness of present methods. But while they are talking, the trusts of the old pattern are acting. The creation of a huge milk trust emphasizes the fact, in a way to make a decided impression, that the methods of the Trusts and the Socialists are absolutely identical in the main features, the difference being that the Trust is capitalistic, and the other plan socialistic. Does it follow that the Trust will prove to be the forerunner of a socialistic *regime?* That is the problem of which the next century may bring the solution.

OUR FOREIGN TRADE.

Ottawa authorities have about completed their returns for the trade of the Dominion for the year ending June 30th, 1897. The value of imports during that period is about the same as in the previous year; the revenue, however, shows a falling off, while the exports show a remarkable expansion, the result of higher prices for farm products and a larger volume of trade. The total imports entered for consumption were $111,294,021, as against imports of $110,587,480 the preceding year. The duty collected amounted to $19,891,997, as against $20,219,037, a decrease of $327,040. The rate of duty remains almost without change, standing at an average 17.8 per cent. if spread over the aggregate imports, or 30 per cent. if only the dutiable imports are considered.

The distribution of our trade still continues unsatisfactory, from the standpoint of those who appreciate the advantage of commercial relations with Great Britain. During the year we purchased goods in the United States amounting to a total value of $61,649,041 or $3,075,023 in excess of the previous year; while in Great Britain we bought goods valued at $29,412,188, a decrease of $3,567,554 as compared with 1895-96. Notwithstanding this unequal distribution of Canadian purchases, Great Britain took of our exports $69,533,852, while the United States received commodities valued at $43,991,485. The balance of trade in 1896-7 as between Canada and Great Britain is in Canada's favor by $40,121,664 for the year. As between Canada and the United States, it is in favor of the Americans by $17,657,556.

It remains to be seen what effect the preferential tariff may have upon our trade relations with these two countries. If anything can be said on economic grounds in favor of building artificial trade channels it would seem reasonable to believe that while creating a temporary disadvantage it is bound, in the course of time, to be a source of benefit to Canadian trade. According to the statistics of the Government, upon the total imports of British goods there was collected duty to the amount of $6,205,367, an average rate of 21 per cent.; upon total imports from the United States the sum of $8,147,075, an average rate of but 13 per cent., while upon the dutiable portion of imports the average duty on American imports was only about 26 per cent., as against 30 per cent. on imports from Great Britain.

That the exports from this country in the fiscal year 1896-97 exceeded those of the previous year by $17,581,086, amounting to an aggregate of $123,959,838 in value, is a cause for general satisfaction. Compared with 1895-

96, there was an increase of $9,531,057 in our exports to the United States, and of $6,815,911 in our exports to Great Britain. If the rate of increase be maintained that has marked the five months of the present year, a considerable gain on these figures may be looked for in 1897-98.

DEFECTS IN THE CREDIT SYSTEM.

The waste arising from a too wide extension of the credit system in trade has made itself felt in the United States, and efforts are being made to correct it. The credit men of that country, by which phrase is meant the supervisors of credit connected with the wholesale houses, have formed an association, with branches in different States or cities. These bodies meet periodically, and the central association has had, as our readers know, several annual meetings at different places. At these gatherings views are exchanged as to the best means of regulating credits and minimizing losses by bad debts, a subject which may well attract the attention of Canadian merchants and manufacturers. More than twenty local branches of the National Association of Credit Men discussed the subject of "fake advertising" in their November meetings.

Methods of counteracting such advertising were discussed, among them the prosecution of those who falsify in their advertisements, or announce to the public the falsity of such advertisers' claims. In some cases the newspapers were asked to refuse to accept such advertising. Other subjects connected with merchandising were discussed, such as "fire sales," "bankruptcy sales," "damaged goods sales," "special bargain sales," etc., and received much consideration at these meetings.

A matter which has not seldom proved troublesome in Canada, and has been discussed in THE MONETARY TIMES, is that of remittance made for small amounts by country merchants to the cities, or *vice versa*, by means of personal cheques, which cheques are subject to a discount of, say, 25 cents each. Profit on trifling transactions is often swallowed up by this discount, and there is no wonder that people cry out against it. The United States association, by its secretary, Mr. F. R. Boocock, sent out in October the following letter: "We are desirous of so agitating as to the best method of making remittances as to bring about a reformation in the use of personal cheques by out-of-town merchants. Will you kindly advise the writer as to the amount it costs you annually in the way of exchange on country cheques? Statistics of this character will be very valuable in correcting this abuse of credit."

The replies to this circular indicate that very many merchants suffer from this abuse and want it stopped. Houses in New York, Chicago, St. Louis and elsewhere are agitating the matter. It has long been the custom for a local merchant to pay bills with his personal cheques. Wholesalers are obliged to pay collection charges on these from 2 to 2½ per cent. On small sums the charge is very heavy. New York banks are not so strict about the collection as are smaller banks elsewhere, particularly at the South. It is proposed to address the New York Clearing House formally, asking it to bring the subject before its members, and the National Credit Association will request the individual banks in the association to take united action. We understand that the remedy proposed in the premises is that remittances shall be accepted only from banks with the bank's draft.

—The Government of New Brunswick asks tenders for $910,000 in the three per cent. debentures, forty years to run, intended to replace current ones at higher rates. Also for $100,000 in threes to provide for building permanent bridges in the province.

A SCHEME OF TAXATION.

A pamphlet on "Taxation in Halifax," by Mr. F. H. Bell, assumes that the portion of the taxes levied on real estate is paid in the first instance by the owners and then by degrees distributed over the whole community, "in a proportion that is bound to be just, because it is necessarily in proportion to the extent to which the individuals ultimately paying it choose to avail themselves of the advantages of civic life." This is the axle on which the pamphleteer rolls, as he supposes, triumphantly through the world. Let us consider, just for half a minute. If the proposition of redistribution be true at all it is subject to exceptions numerous enough to break the rule. How are taxes on vacant land shifted from the owner to somebody else? How is the owner of all the property which, in consequence of a great decline in value, no longer leaves anything after the interest on mortgage money is paid, to unload his taxes on some one else? How are the owners of all the thousands of lots, in many of our cities, sold for taxes to recoup themselves, not for the land, but the taxes? How is the owner to recoup himself, when the whole price obtainable for the land at auction is not equal to half the taxes? How are loan companies with lands left on their hands, as a result of foreclosure or private transfer to them as mortgagee, to get back the taxes they have paid on land which brings in no rent, the houses being vacant and for which there is no sale? Who, in the actual condition of many of our cities, will consent to put the landlord in a position to get back taxes he has paid on his land and houses? To do so, it would be necessary to voluntarily offer him a good deal more rent than he is willing to take or than he thinks of asking. In all these cases and many more, as a rule in fact, in the actual state of things, it is a gross fallacy to assume that taxes paid on houses and land, in our cities, redistribute themselves by some automatic process. It is on this fallacy that most theories of the confiscation of rent are based. We warn owners of other kinds of property to beware of the trap: close behind the followers of Henry George press the full blown Socialists, of the two sets, certainly the more philosophic, who deny not only the right to rent, but to interest and profit.

GOING INTO BUSINESS.

The notion of becoming a merchant, a buyer and seller of varied merchandise, a correspondent with other cities, and perhaps foreign countries, has attractions for a great many young men. They mostly ignore the difficulties and risks of a merchant's life, being taken only with the glamor of the active and apparently successful business. Nor will they be warned by the experience of others that the way before them is a rough one. Full of hope and eagerness, they resolve that in *their* cases, at any rate, failure will not be admitted. Statistics of the proportion of storekeepers who are unsuccessful have no deterrent effect upon those who are resolved to get into business.

We are pleased to find the subject of "Going into Business" made the subject of a lecture to the young men of Winnipeg by the president of the Board of Trade of that city, Mr. D. W. Bole. And he has treated it with a breadth of view, and yet with a fullness of detail, that render his lecture not only interesting, but extremely serviceable to those who will take time to study it. Why do so many people fail in business? Mr. Bole asks, after he has given statistics to show that nine-tenths do fail. And his reply is one of the aptest we have seen to that often-asked question: "Most people go into business before they are prepared for the responsibilities of business life." There is no need to explain or enlarge upon the reason here given. To the man of observation and experience it is sufficient.

The encouragement given by importers, manufacturers, banks, by the mercantile community generally, in fact, to unprepared people who start in business in this country is thus scathingly rebuked by Mr. Bole:

"If a medical student, after a single year's study, fell a victim to that peculiarly fatal malady called a "swelled head," and presumed to practice his profession, he would soon find the law intervening. Why should the law say that Dr. Swellhead should not set broken limbs and quiet palpitating hearts? Simply because he is not prepared for the responsibilities of that high calling. People would go through life with twisted limbs, others would die, who in more skillful hands might have lived. Dr. Swellhead is a failure, and the law is right in protecting the subject against the man who is likely to fail. Do lawyers practice law before they have a knowledge of law? No, and the state is right in protecting the subject against incompetent lawyers. Druggists and dentists and land surveyors are prohibited from practicing their various professions until they have demonstrated their fitness for these various duties. Proficiency in these branches means two things. It means a living, or perhaps riches, for the individual and usefulness to his fellow-men. An ignorant physician is not only incapable of providing for himself and family a living, but is positively dangerous; incompetent lawyers and bungling land surveyors complicate the business of their clients, multiply litigation and generally work destruction; in a word, they are failures, and their failures result in loss, inconvenience, distrust and unrest." One of the chief factors in our advancing civilization, he points out, "is the element of co-operation, one man helping another, all men helping themselves by means of the help they receive from one another; but the help must be intelligent, well directed and efficient. The law makes these things reasonably possible in the professions I have named by insisting upon certain standards, but the law takes no notice of the attainments of business men, the incompetent of whom create greater loss and inconvenience, distrust and commercial unrest, than if all the lawyers and surveyors in the land were dolts."

Some statistics are given, for which we have not room, but which are in the main a repetition of such as have been given on a score of occasions in THE MONETARY TIMES, showing how many hundreds of thousands have tried the role of business men unsuccessfully in the United States and Canada in the last thirty years. The object of the lecturer in using them is "to show the young men of our country that business life is a stormy dangerous sea, and the voyage should not be undertaken unless their seamanship is unquestioned." Quoting the causes to which the mercantile agencies attribute failures of traders, Mr. Bole thinks that of the eleven tabulated, namely, Incompetency — Inexperience — Lack of Capital — Unwise Credits — Outside Speculation — Neglect of Business — Extravagance — Fraudulent Disposition — Disaster, such as Fire, Flood, Panic—The Failure of others—Undue Competition: at least six should be sub-divisions of the general cause, incompetency. "Lack of capital which is credited with 31 per cent. of failures is surely a species of incompetency; so also is the sister cause—trying to do too much with capital employed. A striking instance of this latter cause is well known to the wholesale trade of Winnipeg. A bank clerk (not from Winnipeg) went into business in a western town with a capital, largely borrowed from friends, of $2,000. In two months he had a large stock of merchandise, was running a line of steamboats, operating a saw-mill, and running a hog ranch, all at one time, on a capital of $2,000. In less than six months after he started he made an assignment and his estate did not pay a farthing." To this cause may be added: Unwise Credits—Outside Speculation—Extravagance—Neglect of Business—Inexperience—*all* are species of *incompetency*, and it is plain that there is room for a higher standard. Should the law raise the standard? If the laws raised the standard for lawyers, as they have done, for the protection of the people, "why not raise the standard of business men?" Exactly. There is much to be said in favor of the recognition by the State of a duty to withhold a license to go into business until the candidate shows his fitness for the responsibilities of that place.

Does anyone say that to attempt such a regulation would be to interfere with the freedom of trade? It may be replied that the freedom and safety of those already in business is sadly interfered with by the pressing forward into the ranks of established traders of thousands of incompetents who cut prices, grant excessive credits, sell below cost, and in fifty ways violate the common sense procedure of those who aim to do business upon a legitimate basis. Rule-of-thumb methods have wasted capital in millions. The damage done in Manitoba by incompetent business men in years past, Mr. Bole tells us, cannot be estimated. "We have educated men in business who are not educated business men. I have met men who have come into the city to interview their creditors who could read Greek, but who could not make an intelligent statement of their business affairs. When a man is despatched to their place of business to take stock of their affairs, they are horrified to learn from a balance sheet, which they have seen perhaps for the first time in their lives, that they are hopelessly insolvent."

CANADIAN VS. AMERICAN BACON.

We have frequently commented upon the fact that Canadian hog products bring much higher prices in Great Britain than those of the United States. As everyone interested in the trade knows, the superiority lies not so much in the method of packing as in the difference in the hogs upon which the packers of the two countries work. An attempt is being made in the United States to arrive at the bottom of the controversial question of feeding hogs.

The Chicago *Drovers' Journal* reports that on Wednesday, December 15th, Armour received a double deck of choice Canadian bacon hogs direct from Ontario. Duty on all these 180 to 210-pound hogs is said to have cost $3 per cwt. laid down in Chicago. It is proposed to make a test of them, together with an equal number of the best United States bacon hogs, and carefully brand the meat as American bacon. The product of the two lots will be kept separate, and it is desired to see how they will sell on the English market. The *Journal* says:—"If the hogs grown upon ground pea, barley, rye and shorts produce much better results than the western corn-fed hogs, an effort will doubtless be made to get our hog growers to produce bacon hogs in the same or a better way." There is not, in the minds of Canadians who have made observation of such matters, any doubt that hogs which have been fed upon peas, rye and barley, make more satisfactory bacon than those fed on Indian corn.

TOBACCO GROWING IN ONTARIO.

The cultivation of tobacco is engaging, as our readers have been informed, the attention of farmers in several countries of Ontario. And there is good reason why this branch of agriculture should be looked after, since it pays well. Mr. Lewis Wigle of Leamington, told an audience at Ridgetown, before whom he lectured on the subject last week, that an acre of good ground, properly tilled, will yield 1,200 to 2,000 pounds of tobacco leaf, which sells at from 8 to 14 cents per pound, according to quality. To take an average this means $150 to $170 per acre to the farmer, which is vastly better than $25 or $35 per acre from grain.

Describing last week the marketing of the tobacco crop in the county of Essex, the Amherstburg *Echo* relates that one banking concern paid out $18,000 for the Quebec tobacco firms, and when the crop is all sold they will have paid out $70,000. Robert Wigle got nearly $2,000 for the tobacco grown on twelve acres. The acreage of tobacco will be largely increased next year. A number of laboring men of Leamington are renting land from farmers in the vicinity of the town to grow it. The leaf is principally shipped east for the manufacture of cigars. A carload went last week to the Empire Tobacco Co., of Granby, Que. The car contained over 18,000 lbs., for which about $2,000 was paid, at prices ranging from 8 to 12 cents per lb. The largest lot was bought from C. Lajeunesse, of Canard River, 4,600 lbs., while Wm. Borrowman had 3,200 lbs.; Albert Fox, 4,000 lbs. This is the thirtieth carload of tobacco that has been shipped from the county by Lewis Wigle during the past two weeks, in all about 600,000 lbs. There is, it appears, still about 200,000 lbs. in the county yet to be shipped.

HARDWARE MERCHANTS MEET.

The Hardware Merchants' Association of Montreal are anxious to secure lower rates from the railway companies and shorter credits from the trade. At the annual meeting, the members were almost unanimous in stating that travelers' fares were excessive, while the charges for their samples were altogether too high. In order to remedy the matter, if possible, the association has asked the Board of Trade to take action. Another important matter which the association took up was the question of terms of credit, and the association supported a movement towards shorter time. The following resolution was drawn up and adopted :—"The Montreal Metal and Hardware Association, understanding that an agreement is being signed limiting the terms of credit on hardware to four months or 3 per cent. off for cash, hereby endorses such action of the hardware trade and trusts that the limit of credit stated above will become general."

The election of officers for the ensuing year resulted as follows :—President, Mr. George E. Drummond; vice-president, Mr. J. B. Learmont; treasurer, Mr. J. W. Pyke; directors, Messrs. Charles Cassills, Frank Caverhill, Robert Gardner and C. L. Letang. Reference was made to the death of Mr. F. Fairman, and the following resolution was adopted :—"The members of the Montreal Metal and Hardware Association regret to note the death of their late confrere, Mr. F. Fairman, and in doing so desire to bear testimony to his business ability, his universal courtesy and his many other estimable qualities." Before the meeting adjourned it was agreed that Mr. J. D. Pyke should be again nominated to represent the association on the council of the Board of Trade.

DOMINION COMMERCIAL TRAVELERS' ASSOCIATION.

The twenty-third annual meeting of the Dominion Commercial Travelers' Association was held in the offices in Montreal on Saturday evening, December 18th. The annual report shows a substantial addition to capital account during 1897. The total income for the year was $35,840.11. Of this amount $4,641.80 was paid for working expenses, and $25,761.40 in death and indemnity claims, leaving a surplus of $4,196.91 for the year, making the gross surplus $153,792.55.

The number of new applications for membership was 350, the average age being under 31 years. Two hundred and fifty-three failed to renew their application, making the present membership 2,809, a gain of 97 over last year. The obnoxious tax which was imposed on commercial travelers at Woodstock, N.B., has, by vote of the town council, been terminated, thus leaving Prince Edward Island the only province in the Dominion where this relic of the past is still enforced.

At a preliminary meeting of delegates, at which representatives of the Toronto, London, and Winnipeg associations were present, it was decided that only one demand be made, viz.: a reduction in excess baggage charges. This was put in the form of a resolution, and at the meeting with the passenger agents was presented. During the past year 28 members of the association were removed by death. The annual dinner is to be given on Wednesday 29th December. Contest for the presidency between Mr. J. B. Rolland and Mr. Max Murdock was close. At the close Mr. Rolland was elected by 139 votes. The poll stood :—Rolland, 914; Murdock, 798. The contest for treasurer between Mr. Fred Birks and Mr. Thomas L. Paton was carried by Mr. Paton by a majority of 161 votes. Mr. Levasseur was chosen vice-president, and the following were elected directors: Messrs. G. Harries, J. G. Lanthier, William Brewster, J. E. Wright, G. A. Mann, for the year 1897-99; Messrs. J. Croil, L. O. Demers, J. T. Dwyer, J. Taylor, and J. S. N. Dougall.

—A Vancouver despatch of Monday last announces the arrival in that city of representatives of Molsons Bank. Their errand is the opening of a branch of that institution in Vancouver, which will then possess branches of no less than six chartered banks.

NATIONAL BANK OF SCOTLAND, LIMITED.

The annual meeting of this bank was appointed to be held in Edinburgh on December 21st current. The profit and loss account shows the gross profit of the year ended 1st November as £332,884, which, added to £20,022 brought forward, makes £352,906. Deducting £139,845 for charges of management there remained to be dealt with £213,061. Sixteen per cent. on the capital of one million pounds paid up was divided. £30,000 added to reserve fund (now £880,000) and £23,060 carried forward. Such profits as these may well make Canadian bankers envious. The balance sheet of the bank, which we reproduce elsewhere, shows that the current account balances and deposit receipts amount to no less a sum than £14,777,181. The total assets are £18,640,373, a handsome figure; and of this total £1,336,383 is specie, coin and bank notes; £5,100,024 Government securities and call loans.

THE FIRST UPPER CANADA PAPER MILL.

An interesting reminder of the founding, near Ancaster, more than seventy-seven years ago, of a paper mill, comes to us in the shape of a sheet of foolscap, yellow with age, bearing upon it, in the handwriting of the founder of this and other industries, the advertisement of the new enterprise. It will be observed that he advertises for rags—not for straw, or wood pulp, or asbestic, the new mineral substance, allied to asbestos, which is much in demand by American paper makers. He wants rags, and will pay as much for them as the Yankees, the aim being to keep the money in the country that would otherwise be paid out for American-made paper. Possibly the allusion to "patriotic motives" may cause a smile in these more material days. But there existed, in 1820, a warmth of patriotism among the then scanty population of this province that we of to-day cannot afford either to belittle or despise.

The advertisement is as follows :—

> ADVERTISEMENT.
>
> The subscriber having in view the erection of a Paper Mill at this place, to be in Operation in the cource of the Month of May ensueing, Solicits the Patronage of the Public in supplying RAGS sufficient to keep the same in full employment—for which he will give as high a price as is usually given by the Paper Makers in the adjacent parts of the United States, and means will be taken to send for the same, wheu a quantity is collected at any one point in any part of the province—which will be paid for either in Money or Paper, as may best suit the proprietors.
>
> The advantages to this Colony from the Establishment of a Paper Mill are so obvious and so numerous that the subscriber hopes that persons to whom the value of RAGS may be no object, will (from patriotic motives) lend their assistance in securing a domestic supply—Otherwise one great object in establishing such a Manufacture, namely that of keeping Money among the colonists, will be defeated.——67—3 months.

A GREAT NORTH-WEST WORK INTERRUPTED.

A work of peace which required for the carrying of its material and subsistence twenty-four steamers and vessels; which needed the labor of five hundred men and great trains of horses and mules; which proceeded over a track eight hundred miles in length, much of it unknown or imperfectly mapped, was a work of no slight magnitude. And yet how few have heard of this work of thirty years ago in British Columbia, the partial construction namely, of a line of telegraph, which was intended to reach overland from the Strait of Fuca, Vancouver Island, to Behring Strait, and there connect by cable with a Russian line, the western end of which should be at St. Petersburg, 7,000 miles away.

This was the once famous Intercontinental Pacific Telegraph, projected by an American named Perry Collins in 1861, and taken hold of with extraordinary energy by the Western Union Telegraph Company in 1864. At the date first mentioned a line of wire was being built from San Francisco to Oregon and Vancouver. The route from the last-named point—or properly, New Westminster, for Vancouver did not then exist—was 1,800 miles in length, extending to Behring Sea by way of Sitka, Alaska, thence another 1,000 miles to the mouth of the Russian river Amoor. The Governments of both Russia and the United States lent cordial approval to the scheme, and each detailed a warship for the expedition along both shores of the Pacific. Russia engaged to build a land line of telegraph from St. Petersburg to the mouth of the Amoor River, which, indeed, was at that time already built to Irkutsk, Siberia, three-fourths of the distance, besides giving exclusive concessions to the enterprise for a period of 33 years, and granting a rebate of 40 per cent. on all messages.

The shares of the company, or rather the "Russian extension stock," as it was called, issued for the purpose to the extent of $2,000,000, commanded in 1865 a premium of from 30 to 60 per cent., so glowing was the prospect of international telegraphy. A land service corps was organized, and divided into the American and Siberian divisions. Frank N. Wicker was chief of the land service, of which Frederick Whymper was the artist. The chief of the Siberian division was a Russian, M. Serge Abasa, and connected with it as quartermaster was George Kennan, who long afterward wrote an account of his remarkable observations in Siberia, and of their social and political bearing. Chief engineer of the expedition was Charles S. Bulkley, a military officer, and under him was Frank L. Pope, chief of explorations in "British America"—for Canada did not then extend to the Pacific. When the marine service was organized, seven steamers and barques were purchased, also five other minor ones for carrying material, and three small steamers for river use.

The survey of the territory between Vancouver Island and the River Yukon was confided to Mr. Pope, a vigorous, practical electrician. He traversed the 300 miles of forest and prairie from Fort Alexandria to Fort St. James, and thence through the chain of lakes from which the west branch of the Fraser River flows. From Lake Tatla, accompanied by Mr. Blenkinsop, of Victoria, and two Indians, Pope traversed the 500 miles of unmapped mountain wilderness lying between the headwaters of the Fraser and the Stikeen. This took them seventy days, and the little party suffered great hardships, escaping starvation almost by a miracle.

Up the great rivers of British Columbia flowing into the Pacific the auxiliary vessels freighted supplies of food as well as wire, insulators, and instruments, for the hundreds of men who, starting at New Westminster, carried on the work of construction through a territory theretofore nearly untraveled. Fort St. James was the first point aimed at, thence north-westward to the Rivers Skeena and Stikine: and along this route poles were erected and the wire strung during 1865 and 1866, the point on the Stikine marked "Telegraph Creek" on present-day maps being the principal reminder of the formidable work so courageously carried on and so soon to be abandoned. There are other reminders, however, to Klondyke voyagers of 1897, in the poles and rude forest stations, the bundles or coils of wire, and the piles of pins or caps or other telegraph material scattered along the remote and lonely routes, rusting or rotting with lapse of thirty years. The route from the Stikine was along the foot-hills to the north, toward Fort Pelly Banks, a station of the Hudson's Bay Company, and thence along the waters of the Yukon and Kvitchpack rivers.

Nor was progress lacking on the Asiatic portion of the line. Mr. Abasa reported in January, 1866, that he had surveyed and determined the route of the line all the way from Anadirsk to Okhotsk in Siberia and done preparatory work at five points with almost unpronounceable Russian names, en route.

The situation of Telegraph Creek, it may be remarked, since the name, once so prominent, begins to be heard familiarly again by northward travelers in British Columbia, is not far west of the great canyon of the River Stikine. This creek is almost at the head of navigation on the river, 140 miles from its mouth. The route of the telegraph exploration of 1865-66 runs thence north-west along the valley of the River Tahltan to its head, and thence across the sources of the Tuklin. The Lynn Canal, so much heard of, is 200 miles up the coast from the mouth of the Stikine, and the town of Dyea is about 170 miles from Telegraph Creek, as the crow flies.

In the midst of all this labor and progress, however, the "Great Eastern" was laying the Atlantic cable, which became *un fait accompli* in 1866, and thereby ruined the great project of the Intercontinental Pacific Land Telegraph. "It was a question of two thousand miles of cable, against sixteen thousand of land line," says J. D. Reid, "half of which was along an unpopulated coast. The advantage to the cable was too palpable." Orders were therefore issued recalling the men and fleets employed in this vast telegraph scheme, and announcement of the abandonment of the undertaking was promptly made. The sum expended on this gigantic enterprise was $3,170,292, and the Western Union Telegraph Company assumed the loss.

"In the course of our journey along the coast, by way of the Lynn Canal and thereabout, when surveying for the C.P.R. route in 1874," said Mr. William Jennings, the Canadian Government engineer, "we often came across reminders of the great telegraph enterprise of 1866. The quantities of wire and various other telegraph supplies, remnants of that expedition, have been a boon to the Indians. They made nails and fastenings of the wire, they used it for making fish-hooks, they employed it for traps. Every now and then we would pass on the trail a huge bundle of wire."

There were great difficulties encountered by the workers on that early northward line, details of which can be had in Reid's "Story of the Telegraph," and elsewhere. And privations for the explorers, too, which we have mentioned. But now-a-days we make light of such things—at least some people do. Here is Mr. Hosmer, of the C.P.R. telegraphs, a cheerful optimist, who, like his chief, Sir William, likes to brush away difficulties, declaring (last month) that "we, the C.P.R., are going to build a line to the Klondyke. There is now a Government telegraph line from Ashcroft on our mainline, to Quesnelle, B.C., a distance of 200 miles, and we propose to extend this along the line surveyed by the Government in 1866-67, via Telegraph Creek, a distance of about 1,500 miles. This line was projected to cross Behring Straits to Siberia, and it runs right through the Klondyke district." In the proper spirit of faith and hope, proper, that is, for a modern Canadian, Mr. Hosmer assures us: "There are no serious difficulties in the way, beyond that of transportation. The country is covered with small timber suitable for poles, most of the route. The difficulties due to snow and sleet have been much exaggerated and can be overcome by the use of copper wire."

Thus we are to see in another year a telegraph line extending through the interior of Canada to Dawson City and all points in the gold-bearing valley of the great Yukon River, whereby merchants in the Klondyke metropolis will be able to telegraph their orders for grub, miners can sell their claims by wire and get remittances in the same expeditious manner. In fact, the Arctic circle is to be, as a Western man put it, as close to civilization as any other circle.

REMINISCENCES BY A MUSKOKA GENERAL MERCHANT.

Editor Monetary Times.

Sir,—Maybe you would like to know how a backwoods storekeeper learned his business and got on. I mean, supposing I know my business, for it looks as though a man has to be learning all the while, and even then he comes across things that sort of stick him.

Well, I had a good trade and worked at it for some years, and saved up some money; not much, but I thought it was enough to start on. So I came up here in the year 1884 and found a shanty full of cobwebs and dust, and old paper, and empty packing cases, and made a shop out of it. My wife she slicked it up inside, and I took a broom and a pail of water and sloshed it down outside; we fixed up the windows and put up a home-made sign. I'll tell the truth, and say I didn't know much about goods, either to buy or sell, excepting boots and shoes, and them I ought to know something about. But we went at it in a half guess-work sort of style, my wife and me, I paid money down for about $500 worth of all sorts.

My wife says to me, then, "Joe, we must try and be sure to make profit on what we sell, and get the money, too," and she kept at me all the time for not to give away our stuff on credit. *I wish I had* stuck to cash business, but it did seem as if we couldn't do that all the while. The railway was building along here about that time, you see, and we sold quite a heap of stuff to the navvies. Italians they were, black-looking, quarrelling folks, too. And then the settlers had to have goods, and they used to worry us to buy all sorts of farm truck. I don't hardly know how we got along at first, for we had never lived on a farm. But the wife, she was smarter nor I was at trading and trucking. Profits was good enough, but we did not sell a great deal at first. It was slow work for a while, and reminds me now of a sort of song I heard:

> "Small were the profits of our tedious trade;
> Slowly the shillings dropped into the till."

But we kept our health, thank the good Lord, and it did not take much to support us, for we both knew how to live cheap. And then we lost but little by credit. Of course we had not the heart to say "No" to a poor devil of a settler with a large family, and poor returns from his farm. And I am bound to say they did the square thing with us, mostly, when times mended with them. Sometimes the folks round us from England would get money sent out from the Old Country, and then, good Lord! they would buy *anything* and nearly everything, far more than they needed or there was any sense in, and pay us good prices, *cash down*, mind you. Some of them never seemed to know the value of money—until they spent it or lost it.

There was one chap lived up near us, from London he was, and not a bad sort. He was very fond of music, and could play on lots of things. Well, sir, he got £50 sent him one Christmas, and if you believe me, he went clear down to Toronto and spent about $60 for a flute, and a fiddle, and a pile of music—they hadn't nothing in a musical kind except a concertina before that—and never a thing did he buy for his wife, excepting the makings of a silk dress, and her a delicate woman, too, and the winter cold hard on her. My wife she was madder than a wet hen, as the saying is, when she heard about it, and she got hold of him one day and gave him a setting out. And as sure as you live, she made him get his wife some good underclothing and wraps, and buy them from us, too. He wasn't unkind or stingy, the man wasn't, only just that thoughtless, and his wife thought the world of him. He was fond of dogs and shooting and all that, was the husband, and liked good things to eat. But the wife she liked books, and could paint awful well. But she was lonesome as a lighthouse on a rock, staying up there in the woods.

Well, you'll be thinking this don't tell you how we got on. The little business what we had began to grow, and we learnt, little by little, and slow by slow, for to know what folks wanted. We bought as cheap as we could in Hamilton and Toronto, and we never let them commercial travelers load us up with a many goods we couldn't sell. It took some time, I tell you, to learn how "taking discount for cash" was a good thing in the way of profit, and I got some good ideas from one or two Toronto houses I used to buy from. It was queer how the country filled up round about us with settlers, so that we used to wonder where the people came from. By and by we wanted help in the store. Being as we had no children of our own, my wife got a little girl from a settler. Poor devil, he had nine young ones. And she was a good deal of a help to us, was this child.

We bought fur skins, and game, and butter and eggs, and fish, and what farm stuff we could sell, wool and poultry, and such like. And we sold goods to the trappers and lumbermen, as well as the farmers. And after a few years we were not so green as we had used to be. Then we got some agencies, for insurance, and for money-lending, and for wool-buying, and what not, for my wife she seen that those sort of things *paid*. It was hard for me at first to make out the returns for these things, for I never was a book-keeper. But it is curious to look back on it now, to remember how much of a clear head my wife had about such matters, although she never had no training, as you might say, in business. She helped me out, many a time.

Lots of times we would have calls from city people going hunting, out north of us, and they would buy all sorts of things for to make presents of to their guides or the settlers: penknives and pipes and tobacco, and lanterns. Some of those people were just the nicest kind; and some of them again were as mean as cats' meat. I mind one man—and they said he was rich, too, what do you think he did?—but I think I will not tell on him, for all he was so mean. The Americans that used to come were free-handed folks. They wanted the best of everything, so they said, and the best of fun, too. And upon my soul, I think they had it. They used to call me "Boss," but my wife was always "Madam," with them in their talk. Happy-go-lucky people they were in their way, and as I said before, they were free-handed with their money, and kind when they heard of poor people in distress up there.

I could tell you some stories of curious things that happened round about us, and sometimes to us. But mayhap you woud not think them so curious. My wife was dreadful frightened of the wild animals round in the woods, but after all we never took any harm from them. We used to get awful frights from bush fires once or twice, but thanks to the good Lord, we were never burned out, as some were, and we were never robbed, not to say by burglars, anyhow. There was an Irish settler used to come in and trade once in a week or two, that was funny. He had a way of saying, when he came in the door, "God save all here!" And then he would tell us about "the childer" and the "missis," but I don't think we ever saw the missis, that was his wife, but once, and then, poor soul, she was going down to Toronto to see a doctor, and she did not live long. Con would say, when he was leaving us: "Well, well, may yez do well, an' the Virgin bless yez both." He was a warm-hearted soul, and liked to talk to anyone he could find in our shop; and he was always telling us about Ireland, and would finish up with his "Well, well," and his bit of prayer to the Virgin.

We were happy through it all, generally speaking, and we got so used to our quiet kind of life that when we went to a city it seemed strange, and used to make my wife's head ache with the noise. After we had made enough to live quiet and take it kind o' easy, I wanted to go to a large place, but we finally concluded to stop up here near where we had been so comfortable and done so well. So I am living here, and have a little business as you know, only it ain't store business any more that we're in.

Now maybe you are thinking this is not much of a story, but it's the way we managed to get on, and I would not wonder but you can find more storekeepers with lives of the same kind in the back woods, and maybe they could tell their story better than I can, because I am not much used to writing.

My wife says your letter wanted to know what our principle or manner was in doing business, and what was the main thing that made us get on so well. I forgot to answer that part. Seems to me, looking back and wondering at it, like I do sometimes, that there was not any particular plan about it at all, except that we tried always to get a profit, and that we both worked very hard, and did not cheat anybody, and that it did not cost us much to live. Of course, we did not make a big fortune. Some of your city merchants would say it was nothing but a pittance, but it makes us comfortable, and we don't need as much as a city man does to make him comfortable. I don't know as we could stand city ways and style, and late hours like you have in cities, although I guess you have often nice things like lectures and sermons, and so on, that we don't have in small places. Anyway, you are welcome to my experience, and if it helps anybody else that is trying storekeeping and finds it slower work than what we did, maybe it is because the times have changed.

Yours truly,
JOSEPH ——.

Orillia, December, 1897.

THE COMMERCIAL TRAVELERS' DEFENDER.

"Why did you do that, when you didn't mean it?" said the Squire.

"Do what?" asked the astonished storekeeper.

"Why did you tell that commercial traveler to call again before he left town—and then add, in the same breath, 'I hope to goodness he won't, for I don't want to see him.'"

"Oh, well, that don't matter. D—n the travelers, anyway, they're as thick as flies on a cheese, and you can't hurt their feelings much; begging your pardon, Squire, for swearing."

"My dear sir," pursued the Squire, gently, "you are bound in justice to consider whether you are treating this objectionable man quite fairly. He is trying to do his work and earn his salary, no doubt." And then the good old Squire made quite a touching picture of the hopes aroused in the traveler's mind by the request to call again—of his disappointment when the storekeeper wanted nothing—of the derangement to his plans caused by stopping over a train to make this very call—of the increased expense he was put to, or rather his firm, by a piece of deliberate untruth on the part of this merchant.

The storekeeper didn't like it, and grew red as he answered the old Squire: "Well, it takes us all our spare time, and more, too, answering these fellows, thick as bees round a May hive, and yet we've got to be civil to them. If you just say No to them, blame me if they'll take it for an answer. They'd just hang on like molasses to a measure in winter."

"Pardon me, dear sir," went on the Old School gentleman. "I cannot admit that your explanation suffices. Nothing justifies a violation of the truth, and I regret your lack of frankness in dealing with this young man. You have done yourself a wrong, morally, for, pardon any outspokenness, you told him what was not true; and you did him a material wrong, for think of his hotel bill, and his loss of time."

The storekeeper could not trust himself to say all he felt under this moral lecture, for the Squire, with his high notions and his plain-speaking, was a good customer. But he had a conscience, this storekeeper, and was driven to remember some advice that he had read in a paper. It ran in this wise: "Don't give a drummer an order, and as soon as he leaves send a postal to his house countermanding it. If you don't want the goods the better plan is not to buy, as your order may be telegraphed and have been shipped before you have time to stop it by mail." Let us hope that he was led to reflect somewhat upon the Golden Rule, and to consider that even a commercial traveler has some rights as a man and a brother that country storekeepers are bound to respect.

AN ADDRESS, AND AN UNDELIVERED SPEECH.

At the request of a subscriber in Ottawa we have pleasure in printing to-day the address presented to Mr. H. P. Dwight, president and general manager of the Great North Western Telegraph Company, at the banquet given in his honor at the Toronto Club last week:—

> DEAR MR. DWIGHT,—In August, 1847, you came to Canada to enter the service of which you have been for many years the chief executive officer. Of these fifty years of continuous residence in the country of your adoption, forty-seven have been spent in Toronto.
>
> In the course of your long connection with the telegraph system of Canada you have seen it grow from small beginnings to its present large proportions, and it has been your fortune to aid, more than any other individual, in its great development.
>
> While seeking to honor you for your persistent devotion and signal ability in enlarging the use and extent of this wonderful machinery for diffusing information, we desire more warmly still to honor that quality of unselfishness which, while you held no public office, and sought no reward, has prompted you throughout a long life to do innumerable public and private acts of usefulness and kindness. Nor can we forget that there are many persons scattered over this continent, besides those gathered here, who have long admired your energy in a great and arduous work, your steadfastness in trying circumstances, and your consistent uprightness of character throughout.
>
> We have, therefore, invited you to be present with us to-night, in order that this small section of your host of friends may drink with you the loving cup in commemoration of an eventful year in your life, and as a token of our personal affection.

On an occasion such as that described, it was natural that many more persons than those actually heard from should have desired to say a few words appreciative of the guest. We have reason to know that there were several of such "Rejected Addresses" prepared, but the night sped on so fast that room, or rather time, could not be found for them. Among those who desired to pay a tribute of the sort, but did not get the chance, was the estimable press superintendent of the company, Mr. R. F. Easson, whose humor is less known than his modesty. We have with some difficuly obtained permission to print what Robert intended to say, and print it herewith:

I engaged as message boy with the Montreal Telegraph Co. in this city in 1849. I was then not quite 12 years of age. I had been in the employ of the company about six months, when Mr. Dwight came up from Montreal and took charge of the office. Although forty-eight years have elapsed since that time, I have very pleasant recollections of his coming. My salary had been $1 per week, and the first notable, perhaps I should say the first laudable, act of Mr. Dwight after his installation was to increase my salary to a dollar and a half per week. At that time Mr. Dwight and myself comprised the entire working staff of the Toronto office. Mr. Dwight received and sent all the messages, kept the books, took charge of the cash, waited on customers and, in a word, transacted all the business of the office. I delivered the messages and performed other simple routine office work. The messages for city delivery were few in number and were mostly for persons living a long distance from the office; business men had not yet got into the habit of using the telegraph as an aid to commerce, and the majority of messages were for private individuals and of a social nature. I have sometimes made two trips to the garrison in one day, besides scurrying around in other sections of the city. There was nothing, therefore, of a "snap" about a messenger's job. A bike in those days would have been a peculiarly serviceable institution.

Mr. Dwight always insisted upon neatness and order in his office arrangements; he also insisted upon punctuality in his assistant. Part of my duties were to sweep out the office, dust the desks and light the fire. Matters were managed very economically in those days, and to facilitate lighting the fire and save the company any expenditure for kindling wood, I was in the habit of cutting up a quantity of chips at my own home and carrying them down to the office wrapped in a newspaper, each morning. I am afraid that I sorely tried Mr. Dwight's patience by occasionally arriving at the office too late. He at first adopted the usual methods for correcting this bad habit in his stoker and chief of the delivery department, but without effecting a permanent remedy. One winter morning, when I arrived at the office slightly behind time with my bundle of chips under my arm, as usual, I was almost petrified to find Mr. Dwight sitting at a brightly-blazing fire reading a paper. The fire was burning more cheerily than usual. The floor was more carefully swept, and not an atom of dust was visible on any of the desks. Everything looked unusually inviting, tidy, and ship-shape. I took in the situation at a glance. Mr. Dwight had taken my place for that morning, and I felt very uncomfortable, but nothing was said until about noon. Mr. Dwight then, in a quiet, but firm manner, drew attention to my numerous sins of omission and commission, dwelling at some length on what my procrastinatory tendencies would lead to, and winding up the lecture by giving me the *grand bounce*. I retired reluctantly to the hall, while a feeling of degradation and utter hopelessness crept over me. Before I got out of the building, however, Mr. Dwight came along, and after being further admonished I was re-instated. This settled the matter, and I was for ever afterwards cured of my dilatoriness in the morning.

In the course of a year or two I became a full-fledged operator, and in the spring of 1853 set out for Chicago. There were no railroads in Canada in those days, and the route to Chicago lay across Lake Ontario to Lewiston per steamer "Chief Justice Robinson." From Lewiston to Buffalo by stage, from Buffalo to Detroit by steamer, and from Detroit, via the Michigan Central Railway, to Chicago. The Michigan Central was not quite finished into Chicago at that time, and dropped its passengers ten or twelve miles out, in the neighborhood of what is now Jackson Park, where the World's Fair was held in 1893. Chicago and Toronto were then about the same size. If anything Toronto being the larger of the two. It certainly was much the prettier and cleaner place. I had no difficulty in procuring a situation in Chicago. Mr. Ezra Cornell, the founder of Cornell University, at Ithaca, N.Y., who held controlling interest in many of the telegraph lines in the Western States at that time, giving me employment. After I had been in Chicago for some time Mr. Cornell one day took occasion confidentially to tell me that he was not in need of an operator when I applied for a situation, and that he engaged me mainly because I had a good recommendation from Dwight, so that even in those early days Mr. Dwight's reputation as a manager of telegraphs had already reached Chicago. I returned from Chicago to Toronto at the invitation of Mr. Dwight in 1855, forty-two years ago, and with the exception of one year, which I spent at Father Point before the Atlantic cable was laid, I have been in Toronto office ever since.

I should, therefore, know Mr. Dwight pretty well. He is a many-sided man. A man of forceful and distinctive character, and exceptional administrative ability and unlimited capacity for work. He was always an insatiable reader, and more than that, encouraged others to read and to seek knowledge. Although naturally of a serious turn of mind, he possesses a keen sense of humor. He is kind-hearted, and the deserving needy are never turned away empty-handed. During the 48 years which he has spent in Toronto, it is no exaggeration to say that thousands have benefited by his unostentatious generosity. He always took a great interest in athletic sports, and 25 or 30 years ago was an excellent gymnast. Skillful with the foils and a finished and enthusiastic boxer, Fitzsimmons would have found it no easy matter to "land" on him when at his best. Mr. Dwight is, as everyone knows, an expert fisherman and he is also fond of shooting. Not so many, however, know him as a venturesome horseback rider. But all the same 30 years ago, at different periods, he owned two of the best "cross country" horses in the city. One of these horses was named "John Collins," but whether the exhilarating beverage of that name was called after him I know not. I think likely it was. Both had lots of "go" in them. Gordon Brown, no mean judge of men, had an excellent opinion of Mr. Dwight's abilities. Speaking to me 25 or 30 years ago, he said that Mr. Dwight was "precocious" as a young man, and that he possessed administrative qualities which would have brought him distinction in any walk of life. An eminent lawyer, who as a student boarded at the same house with Mr. Dwight 45 years ago, told me recently that Mr. Dwight read law and Latin with him when a student, and that had that gentleman given his time to law he would, no doubt have been a Chief Justice ere this.

Mr. Dwight seems to have discovered the secret of perpetual youth, and notwithstanding his long and busy life, is still full of vigor and vim and enterprise. Approaching three score and ten his eye is not dimmed nor his natural force abated. I often wonder if it will be with Mr. Dwight as with Tennyson's "Brook" and that "men may come and men may go," but he will "go on forever," and were such a thing possible I would like to be counted in, too, that is if I were able to keep up with the procession. I see a good many old time telegraphers present to-night. They also, no doubt, will want to go along; and those telegraphers present who are not oldtimers, so called, but who vie with them in their respect for and loyalty to Mr. Dwight, will, of course, continue to keep right alongside. I thank you Mr. Chairman, for permitting me to make these few remarks. I cannot express to you how happy I feel to see such a large company among whom are men of distinction, men of power and influence, assembled to do honor to Mr. Dwight.

FOOTWEAR PARAGRAPHS.

The retail shoe trade has been very quiet during the past several weeks. But at present the combined influences of a heavy snow fall and the near approach of New Year s have brightened up trade and the stores are well filled.

"There is no branch of the shoe business that gives us more difficulty than the slipper trade," said a salesman in a prominent Yonge street store the other day. "The whims of women are so great in the matter of evening slippers that it is all but impossible to please them, while the few Canadian manufacturers have turned their best efforts in this direction."

"Women are wearing larger, heavier shoes than ever before," said a well-known New York dealer. "Calfskin boots are not so popular as they once were, simply because they cannot be cleaned with the ordinary liquid shoe polish, and women have found it pleasant to patronize boot blacks in public, and sending out their footgear to be cleaned is not convenient. So they have returned to the dull dongola or the enamelled leather."

The tariff of 15 per cent. levied on hide imports into the United States is in practice proving of serious injury to the trade. The *Review* ssys of it: "A hide tax is wrong in theory and pernicious in practice, and the enormity of the offence they have committed will be patent to the politicians when an outraged public rises at the next general election and sweeps from office every legislator who refuses to unequivocally commit himself to voting for free hides."

Fashionable shoes leave no excuse for women to suffer with their feet. The walking shoe for this winter has a thick sole, a low, broad heel, and a round toe. "Bulldog," by the way, is the name for the shape of toe now most worn. This shoe is made on a man's last. In other words, it is built on lines that conform to those of the human foot, and men think the new style very pretty. The new shoe does not look large or clumsy, but has a style to it that is impossible to obtain in a pointed-toed boot with a sole no thicker than heavy paper and a high heel.

FOR GROCERS AND PROVISION DEALERS.

The use of boracic acid as a preservative in butter is a subject of contention between handlers and the English public authorities.

It is reported that the stock of domestic sardines at packing points and in jobbers' hands is very much smaller than last year, and an advance to $3 for ½ oils is looked for by February 1st.—*Merchants' Review, N.Y.*

A disappointing feature of the local hay market for those who have not disposed of their hay is that the Montreal people are offering their hay at $9.50 per ton delivered at points in the northern section of New Brunswick, which takes the best markets our shippers have had of late. The above prices mean about $6 for our hay here.—*Sackville Post.*

The New Zealand Government is again showing its anxiety to encourage the frozen-meat trade with England. It has just given its adhesion to a proposal to erect new cold stores at the Victoria Dock of the London and India Docks Joint Committee, at a cost of £40,000, the New Zealand Government finding a sufficient sum to provide interest and other charges, estimated to amount to £8,000 annually. Cold stores are already in existence at Victoria Dock, but their capacity is not nearly large enough for the trade, and in consequence great delay and inconvenience have been caused in the distribution of the frozen meat on its arrival.

The C.P.R. have announced that on or about the 1st of January they will make a reduction in the rates on grain and flour, and on grain products from Ontario to New York, Boston, West St. John, Moncton and Halifax. The reduction will, generally speaking, amount to about two cents per 100 pounds, and is really a restoration of the rates in effect prior to October 15th last. The change has been rendered necessary by the reduction in the rate from Chicago to New York.

THE DRY GOODS STORE.

The manufacturers of colored cotton goods are working out their samples for the last year of the present century. The selling agents of the Canadian Colored Cotton Mills Company predict that their samples for the spring of 1899 will be the most complete in the history of the trade. At present, the cotton mills are busily producing goods for the coming season, and there is little indication that they feel the financial depression which so keenly affects the trade in the United States.

In a recent issue of this journal, the statement was made that: "about three years ago an Ontario mill began the manufacture of beaver cloths; since that time, other mills have undertaken the production of these cloths." We are informed by a Quebec woolen mill owner that to that Province belongs the credit of first introducing beaver cloth into Canada The industry is now well established, and the two Provinces are both obtaining considerable advantage from it.

There is such a vast difference between the manufacture of cotton goods and knitted garments, that it is impossible to see how lessons can be drawn from one industry for the regulation of the other. Successful combination is almost impossible in industries that do not require the investment of a large amount of capital in plant and premises. The manufacture of cotton goods is carried on only by the expenditure of large sums of money, and in this way the chances of ruinous competition on the part of "outside" interests are limited. A knitting mill that can produce good wares on a fairly economical basis may be established for a comparatively small amount of money, and if a combination were formed and prices advanced, the natural result would be the building of numerous mills in all parts of the country. Some of the good points of a trade combination have already been realized, in that a number of the large Canadian mills sell their products through one firm of selling agents.

CLEARING-HOUSE FIGURES.

The following are the figures of the Canadian clearing houses for the week ended with Thursday, December 30th, 1897, compared with those of the previous week:

CLEARINGS.	Dec. 30.	Dec. 23.
Montreal	$10,357,193	$12,910,094
Toronto	6,812,242	7,567,398
Winnipeg	1,816,264	2,141,510
Halifax	1,061,433	1,140,573
Hamilton	613,962	661,738
St. John	504,185	572,120
	$21,165,279	$24,993,433

Aggregate balances this week, $2,978,792; last week, $3,338,844.

—Once again we hear of "France and Canada," the necessity of a *rapprochement* commercial and financial between Old France and her daughter. But it does not come. However, the bulletin of the Chamber de Commerce Francaise de Montreal, announces that a French capitalist of good standing and connected with the "Compagnies des Bateaux a Vapeur du Nord," of Dunkirk, whose steamers run from the latter place to Marseilles, has put in a tender with the Dominion Government for the $50,000 subsidy for a Franco-Canadian steamship line. The bulletin hopes, as before, "that the tender will be accepted, and that regular and sustained business relations will be inaugurated between France and Canada."

—Among the latest events in banking circles is the opening in Montreal of a branch of the Imperial Bank of Canada. The inspector of the bank, Mr. Edward Hay, is temporarily in charge of it. The Imperial has also opened, we understand, at South Edmonton.

NATIONAL BANK OF SCOTLAND LIMITED.

BALANCE SHEET AT 1ST NOVEMBER, 1897.

Liabilities.						
Capital stock of the bank ..				£ 1,000,000	0	0
Reserve fund				880,000	0	0
Dividend of 13 per cent.....	£130,000	0	0			
Extra dividend, or bonus, of 3 per cent..	30,000	0	0			
				160,000	0	0
Note circulation				914,259	16	0
Deposit receipts, and current account balances				14,777,181	13	10
Drafts outstanding				100,117	15	11
Acceptances by the bank—						
On account of banking correspondents	£431,726	14	1			
On account of other customers	354,027	7	5			
				785,754	1	6
Balance of profits carried forward				23,060	7	3
				£18,640,373	14	6
Assets.						
Gold and silver coin, notes of other banks, and cash with the Bank of England and other London bankers				£1,336,383	10	3
British Government securities (£883,230), and loans at call and short notice in London				5,100,024	7	3
Bank of England, metropolitan board of works, the bank's (£3,413, 10s. at *par*), and other stocks and investments				2,202,304	5	11
Bills discounted...........				2,676,753	8	5
Loans on railway stocks and other securities for short periods................				2,175,042	4	4
Advances on cash credit and current account...				3,933,111	16	10
Acceptances, *per contra*....				785,754	1	6
Bank buildings at head office, London office and branches				164,000	0	0
Heritable property yielding rent				267;000	0	0
				£18,640,373	14	6

In addition appeared the Profit and Loss account. The following certificate was appended:

EDINBURGH, 8th December, 1897.—We, the auditors appointed by the shareholders of The National Bank of Scotland, Limited, beg to report—in terms of the Companies Act, 1879 that in our opinion the above is a full and fair balance sheet, properly drawn up, so as to exhibit a true and correct view of the state of the bank's affairs as at the 1st November, 1897, as appearing from the books. We also report that we checked the gold and silver coin, and notes of other banks then on hand at the head office in Edinburgh, and at the London and Glasgow offices; as also the certificates and vouchers of the balances with London bankers, Government securities, and other investments of the bank, and found the same in order.

GEO. TODD CHIENE, C.A.
J. M. HENDERSON, F.C.A.

POOR SWELLS.

"I never saw so much genteel poverty before as exists in Washington, D.C.," writes a Cabinet member's wife to a New York paper "You have no idea how many of these Department clerks tremble in their boots for fear of losing their positions with a change of Administration and enforcement of the civil service rules. The Departments unfit both men and women for any other occupation. You would be surprised to know how many of the fashionable society men are Department clerks. Some of the most attractive among them get a majority of their meals out of society. They rent a room for a small amount, and dine out every night, frequently getting a lunch or a breakfast from a friend. In return, they make it their business to be entertaining and always in a good humor, ready to be of service and to initiate new people into the etiquette of the place."

PARIS, THROUGH AMERICAN GLASSES.

"For a month I have been in this city of limited republicanism; this extraordinary example of outward beauty and inward uncleanness; this bewildering cosmopolis of cheap luxuries and expensive necessities; this curious city of contradictions, where you might eat your breakfast from the streets—they are so clean—but where you must close your eyes to the spectacles of the curbstones; this beautiful, whited sepulchre, where exists the unwritten law, 'Commit any offence you will, provided you submerge it in poetry and flowers'; this exponent of outward observances, where a gentleman will deliberately push you into the street if he wishes to pass you in a crowd, but where his action is condoned by his inexpressible manner of raising his hat to you, and the heartfelt sincerity of his apology; where one man will run a mile to restore a lost franc, but if you ask him to change a gold piece he will steal five; where your eyes are ravished with the beauty, and the greenness, and the smoothness and apparent ease of living of all its inhabitants; where your mind is filled with the pictures, the music, the art, the general atmosphere of culture and wit; where the cooking is so good, but so elusive, and where the shops are so bewitching that you have spent your last dollar without thinking, and you are obliged to cable for a new letter of credit from home before you know it—this is Paris."—*Lilian Bell, in Ladies' Home Journal.*

GOLD ON THE BRAIN.

The astonishing ease with which British attention is aroused and British capital secured for any "company" or venture that has to do with the Klondyke region of North-West America, has made many a man on this side the water smile. And the eager haste with which many unthinking persons in the States and Canada will leave comfortable homes and safe, if small, incomes, to risk life and limb in digging gold in a dreary region, a thousand miles from civilization, is enough to make us wonder. The *Canadian Mining Review*, apparently impatient of the folly of both these classes, hits out in the following fashion in the December number, under the above title:

"Whatever of veracity, or the lack of it, may be in current reports as to the gold deposits in far-away Alaska, one thing is evident, that the public mind has been fired with an easily ignited zeal to secure what there may be of the yellow metal stowed away under the Alaskan icy apron. All kinds and conditions of men, with or without money or experience, are being inspired with Alaskan ambitions. As is usual in such cases, common sense, prudence, and a candid investigation of the situation are, for a time, laid aside with shoes needing mending, and collars in need of soap. Men otherwise of a practical and sagacious turn of mind are suddenly illuminated with golden visions, and with or without good reasons, join in a stampede, that may end in chasing a rainbow or making a fortune, with the chances in favor of the rainbow. In the present instance, the gold fever is not without its precedents, and is only phenomenal when placed in contrast with the supposed increased intelligence of the times. Of other like fevers burning in men's bones, all of us are more or less familiar. History is a box of such skeletons as in the quest of the precious metal have become lunches for buzzards, or victims of boomers and transportation companies. The curtain has not yet been dropped on the stage where comedy and tragedy join hands in the great and never-ending drama of gold on the brain. In this particular phase of what sometimes seems to be temporary insanity, Ballarat and Bendigo in Australia, Kimberly and the Rand in South Africa, and places beyond enumeration in the United States and adjacent territory are in prim evidence. The apple of fortune has dropped in certain baskets, but of empty hands and disappointed men no census has or ever could be taken. Everybody knows this, but the first report of a nugget turning on the end of a pick, or of a diamond gleaming on a shovel, sets men walking on their heads and talking with their heels. It may be folly, but it is human nature, and as the house-fly of to-day finds the sore place on a horse and the molasses in a store, just the same as his ancestors did when Moses was a boy, and Solomon knew less than his schoolmaster; so in the nineteenth century as in the first, a golden finger beckons the crowd to fortune or to ruin. The crowd is never missing from the Klondyke to the Orange River, or from Peru to Australasia. In many cases the pilgrimage of the prospector has been the precursor of states and kingdoms. New country has been exploited and settled, and civilization behind a pick has made as rapid a march as behind the cannon. All this may be historically true, but it in no sense justifies a man in neglecting to look before he leaps.

"We are of opinion that some blind leaps may be made in the present Alaskan craze, and what looking is done, will be that of the traditional dog who let go the bone in his mouth for its shadow in the stream. It may or it may not be that Alaska is richer than Threadneedle Street or the Bourse, but the wise man will certainly count the cost before making the experiment. As of old, so in the year of our Lord, 1897, the boomer will display his splendid abilities in making mountains of mole-hills, and paradises where a rat would miss his dinner, and transportation companies will collect fares from men, who if they ever get back at all, it will be with a sore memory, thin shoes, and a hobo's satchel. On the other hand, Alaska may wear a golden shirt under its furs, and make many millionaires of adventurous shoemakers, and men who never owned a house or rode in anything else but a wheelbarrow may build palaces and drive thoroughbreds, but if it is left to a turn of the dice-box and not to a well-planned and well-justified enterprise, it will be an accident to the few, and a vanished dream to the many. It would be well if in this movement to Alaska men should use common sense as in buying a pair of shoes, and be sure of a fit before paying the bill. Gold on the brain does not always reach the pocket."

RECOVERY IN AMERICAN TRADE.

Henry Clews & Co., in their latest circular, argue that according to the reports from trade circles and from the manufacturing centres, there is good reason for expecting that the commercial recovery of 1897 will be more than equalled in 1898. "Advices from the agricultural States indicate the prospect of a more active business than has been realized for many years, and suggest a probability of the liquidation of an important amount of farm mortgages, with the effect of creating a demand from the mortgagees for other securities to take their place. The iron trade, which is accepted as the best barometer of the condition of business at large, continues its remarkable increase of activity. The best evidence of the magnitude of the current increase in this industry is afforded by the fact that the lake shipments of iron ore for 1897 amount to 12,200,000 gross tons, against 9,600,000 in 1896—showing a gain during the twelve months of 2,600,000 tons, or nearly 30 per cent.; and yet there is a probability of a still larger movement in 1898. Our exports of steel rails and railroad equipments, and also of electrical plants, are assuming very extraordinary dimensions; and there are indications of an increase in the home construction of railroads, to say nothing of the undertaking of long-deferred repairs and improvements and purchases of rolling stock. * * * It is not easy to overestimate the importance of this growth in our export trade. The total foreign shipments of merchandise for the last eleven months exceed those of the same period of 1896 by $86,000,000, and of 1895 by $242,300,000. This gain has been largely due to our extraordinary shipments of breadstuffs; but, judging from the fact that our winter wheat acreage sown this year is estimated to exceed last year's by 7 per cent., while the European acreage is reported to be under that of 1896, there seems to be a probability that next year also we may have a large surplus of wheat for export. Thus, so far as the business of next year may depend upon our export trade, the outlook for business in 1898 is most hopeful.

The operations of the railroads continue to exhibit an extraordinary increase of earnings.

KEEP AT IT.

Life agents frequently have a long siege with some of their customers. We know of one who followed up a recalcitrant subject for nearly two years. But the agent "landed" him at last, and after paying two semi-annual premiums he died, leaving his family $10,000. Which reminds us of a little story. At a New York telegraph office the operator (a young man), after repeated calls on the instrument to a young lady operator, at last got a response. He telegraphed back to her vehemently: "I have been trying to catch you for the last hour." In a moment came the reply: "Pooh! that's nothing. There's a young man here who has been trying to do that for a year, and hasn't got me yet." *Ins. Press.*

LUMBER AND OTHER MARKET CONDITIONS.

As might be apprehended, reports from all the markets this week reflect the subsiding state of demand and movement peculiar to the closing days of the year. Yet there is a cheerful and expectant expression in strong contrast with the mood in the later years previous. Conditions have so changed for the better since midsummer that there is growing confidence that trade is to rise soon after the advent of the new year. It is also believed that prices will tend to increased strength as the spring demand develops. One encouraging feature of the situation is the comparative ease with which collections are made over the wider sweep of the country. The exceptions to this rule are in the small minority. Another favorable feature is that more cash trade is observable, especially in the west, than has been the fact since the panic of 1893. The cause of this is clearly to be seen in the better condition of the farmers and stock-growers. Wheat and beef cattle have lately commanded good prices, and there has been some enhancment of value in other farm products. The agricultural class have to a large extent liquidated their indebtedness. They also seem to have turned over a new leaf about making further debts. What they now buy they largely pay for in cash. This is a powerful influence toward the restoration of good business conditions in the country at large. It is a leaven that is working in the mass, possibly not fully recognized in stock exchanges, boards of trade, and in money centres, which, if uninterrupted. is bound to bring prosperity in spite of adverse political, legislative, or diplomatic obstruction, which cut such a figure and make such a noise in the newspapers. The most encouraging features of the present conditions are the evidences of rising prosperity in the agricultural class. This is a reliable basis of expectation that outclasses all others.

In the northern pine fields the season for moving stocks from the mills to the wholesale yards along the lakes is at an end, and inventories and estimates are being made. It is evident that at the foot of Lake Erie and in Chicago there is more lumber in stock than at the close of navigation a year ago. At the same time there is less at the mills. In no case are stocks in the wholesale yards excessive when compared to what has been carried into winter in former years. The increase this year is by comparison to stocks on hand at the close of 1896, when supplies were low. Stocks in the wholesale yards and at the mills are not equal to a full supply, providing demand next season is to be normally active. The feeling is one of confidence, and the inclination is to a steady holding of prices during the winter. Shortages prevail in 12-foot boards, piece stuff generally, and in shingles. There is likely to be much enquiry toward spring, and a free movement by rail from interior mill points to market centres before spring. The situation in respect to shingles is now in a conjectural stage. Stocks on hand are light; production during the winter will be large. It remains to be seen how the market will open in the spring. It is probable that the present supply will be worked off in the trade, at about present prices, before the new supply shall become a burden on the market, if, indeed, it shall prove a burden.—*N. W. Lumberman.*

GOOD FAITH NEEDED IN MACHINE SHOP AND FACTORY.

During the Pullman strike, many very good and intelligent people could not understand why the Pullman Company would not agree to arbitration. It is very common still to hear the company, and the late Mr. Pullman especially, condemned for their attitude. We have frequently pointed out the inadequacy of arbitration between employers and employees. The principle of it is all right, but the practical difficulty lies in the fact that the employer can be held to an acceptance of the judgment of arbitrators, while the employee can act at his own sweet will. If there is perfect good faith on both sides arbitration may be effective, but in such cases it would generally be unnecessary. Where the interests involved on the side of the employer are not too greatly imperilled by such a course, it may be worth while for him to submit to arbitration, because in such cases the party refusing to abide by the decision deprives itself of public sympathy. An interesting case in point has just occurred. A manufacturing establishment at Moline, Ill., had a difficulty with the employees of one of its departments over the rate of wages paid. The matter was submitted to the State Board of Arbitration. The board reported that the day wages involved were higher than those paid by most of the company's competitors, and that their piece-work prices were quite as high. The decision was read to the employees on Tuesday of this week. Did they accept the finding in good faith, as the employer would certainly have done? Not at all. They promptly threw down their tools and walked out. This does not necessarily prove the failure of arbitration. It does prove, however, that it is not a sovereign remedy. Furthermore, we undertake to say that if any legislation were in contemplation providing means of enforcing arbitration, the employee class would vigorously denounce and oppose it. Property can be bound, but persons cannot be held to the fulfillment of arbitration or other business agreements.—*Railway and Engineering Review.*

NORTH-WEST COMMERCIAL TRAVELERS' ASSOCIATION.

The annual meeting of the North-west Commercial Travelers' Association was held Saturday evening in the Board of Trade room, Grain Exchange, Winnipeg, President A. L. Johnston occupying the chair.

The fifteenth annual report was submitted, and after discussion adopted. It referred to the progress of the association, the membership being the highest that we have yet attained, namely, of 432, a gain over last year of 63. The amount of mortuary benefit insurance carried by the association is $62,703.66, and there have been no calls on the fund during the year 1897. The directors have urged, with good results, the better equipment of writing rooms for commercial travelers in the various hotels throughout the country, and have also directed their efforts towards bettering the sanitary conditions of hotels, through the medium of the hotel license departments. There have been some reductions of passenger fares and some increase of baggage privileges on the Pacific division of the C.P.R. Reference is also made to the conference of the various commercial travelers' associations in Canada, with the railway passenger agents, which took place in Montreal.

The treasurer's report was read and the members were pleased to learn that the financial standing of the association was so satisfactory. After full discussion the report was adopted as read.

FARMERS' LIENS.

A bill to give a farmer a lien on the produce he sells has been introduced in the Quebec Legislature. Any such enactment seems more likely to be mischievous than beneficial in its effect. It might easily lead to gross injustice and to the injury of trade, as the act giving workmen liens on the buildings they had been engaged on did some years ago. There is no apparent need for such a measure. The farmer's losses in selling his merchandise generally result from his desire to get a little more than the market price, leading him to accept the offer of a sharper in preference to that of a responsible trader. It is no part of the Legislature's duty to protect any set of people against the consequences of a lack of common sense, at the expense of another set.—*Montreal Gazette.*

SHOES POLISHED BY ELECTRICITY.

Many efforts have been made to devise a shoe-polishing machine with only indifferent degrees of success, but one recently put in the baggage lobbies of the more enterprising hotels of London, which is propelled entirely by electricity, seems to be the nearest approach to the perfection of automatic "shiners." It is a small affair, readily shifted from one spot to another, the connection being made with any ordinary lamp socket. There are several circular brushes arranged to form one long flexible brush. One end of the brush is supplied with hard bristles for the purpose of thoroughly cleansing the shoes, and this revolves at the rate of 1,500 per minute, and the brushes for supplying the blacking and then drying the shoe work at a lower speed. After these have passed over the shoe the polishing section of the brush passes along and completes the operation of shining. The shoe is thus quickly disposed of, the machine being kept in operation by merely pressing a convenient button. This released, the machine stops.

—When Andrew D. White was United States Ambassador to Germany, nearly 20 years ago, he received some queer letters from Americans, asking for his influence in their behalf in court circles. Perhaps the funniest of all was a very mandatory epistle from an old lady living in the West, who enclosed in her letter four pieces of white linen, each some six square inches. "We are going to have a fair in our church," she wrote, "and I am making an autograph quilt. I want you to get me the autographs of the Emperor, the Empress, the Crown Prince, and Bismarck, and tell them to be very careful not to write too near the edge of the squares, as a seam has to be allowed for putting them together."

—A man asked Jones the meaning of the Latin phrase, "Cum grano salis." Jones replied that he was informed by an old salt that it was an expression now much in the mouths of Europeans, and chiefly addressed to this country, and that it meant, "Come, sell us grain."—*Boston.*

—In his Essay on Man, Alexander Pope spoke of "the enormous faith of many made for one." A good definition for genuine mutual life insurance, says Geo. Moffat, one of the prophets of life assurance.

—Two glasses of a temperance drink served to a London doctor by a teetotal family contained so much alcohol that the doctor was unable to walk straight across the room. He is now lecturing against ginger ale and root beer as intoxicants.

KOREA THE REAL STORM CENTRE IN THE FAR EAST.

The German coup de main at Kiao Chow has distracted attention from a complication in another quarter of the Far East which promises to become far more serious than any that is likely to grow out of Kaiser Wilhelm's theatrical seizure. It is a significant fact that the British squadron in the Eastern Seas has not been ordered to the coast of Shantung, the scene of the piratical exploit of Germany, but has unexpectedly appeared at Port Hamilton Island, off the Korean coast, accompanied by a detachment of the Japanese fleet. The immediate cause of this naval demonstration was an appeal for aid from Mr. McLeavy Brown, a British subject,and until recently the financial adviser of the Korean Government, who had been dismissed from his post and superseded by M. Alexieff, an official of the Russian Ministry of Finance. Mr. Brown had been guilty of the unpardonable offence (in Russian eyes) of bringing order out of the chaos of Korean finances. The regeneration of Korea would have been incompatible with the Muscovite policy to help along the decadence of neighbor States which are intended to be absorbed by the Northern Colossus. Mr. Brown's abrupt dismissal, however, involved more than a mere change of men; for it was coincident with the signature of an agreement made between the Korean Minister of Foreign Affairs and the Russian Envoy at Seoul whereby Russia has been put practically in control of the Korean Government.

This precious document, a translation of which has just been received by the latest trans-Pacific mail, gives the new Russian Financial Adviser of Korea power to appoint a Superintendent of Customs; to make provision for taxation, revenues, and expenditures and frame the budget, and to supervise the affairs of all departments of the Korean Government. It also provides that no person other than a Russian or a Korean shall be appointed to the post of Financial Adviser, and the concurrence of both Governments is required to confirm such appointment. Finally, "in view of the friendly relations existing between the two countries, and as no occasion, therefore, exists to fix a term of years, the period of this engagement is to be unlimited." Thus by express terms of this document Russian control of Korean finances, which is to say the whole civil administration of the country, is to be perpetual. Inasmuch as Russia has lately obtained from Korea the concession of Deer Island for a coaling station on the Japan Sea; that the Korean army is to a large extent officered by Russians; that the arsenal at Seoul is in charge of a Russian officer, and that the Minister of Foreign Affairs is a Russophile Korean, the agreement, if it should be permitted to stand. would practically reduce Korea to a condition of vassalage to the Czar.

The bold stroke of Russia for supremacy at Seoul was well-timed. Japan is in the throes of a political crisis, owing to the resignation of the Progressist Count Okuma from the Foreign Ministry and to the contentions between the popular Parliamentary elements and the ruling ultra-conservative Satsuma faction. * * * In any event, both Great Britain and Japan are committed to the policy of maintaining the independence of Korea. Not very long ago Under Secretary Curzon declared in the British House of Commons that it was in the interest of Great Britain to "see that Korea be not territorially or administratively absorbed by the Empire of Russia, and that Korean territory or Korean harbors be not made the bases of schemes for aggrandizement so as to disturb the balance of power in the Far East and give to one power maritime supremacy in the Eastern Seas." In the treaty made with Japan at the close of the Chinese war Russia agreed to assist the former power in maintaining the independence of Korea, and not to countenance any act that might abridge or jeopardize Japanese influence at Seoul. Lest treaties should be made waste paper, and governmental declarations of policy in the House of Commons be regarded as mere vanity and striving after effect, something more than a mere passive demonstration of naval power will be required from Japan and Great Britain. Korea, not Shantung, is the storm centre in the extreme Orient.—Philadelphia *Record*.

Commercial.

TORONTO MARKETS.

TORONTO, Dec. 30th, 1897.

DAIRY PRODUCTS.—Butter is in active request and supplies are well sold up. There have been fairly free offerings of large dairy rolls, and all have been readily absorbed by the local market. Reliable mail advices, December 17th, from London, Eng., report "Canadian supplies are coming forward in somewhat increasing quantities, while United States butter has almost ceased as an import, though there are large quantities in cold store, which are unmovable. It would not be at all surprising if next season much less butter was put into cold store than in this, for while a few buyers may have benefited to a fair extent, a large number have made scarcely any profit by the transaction. When it is remembered that the increase in the imports of butter for the last four years has averaged 4,444 cwts. per week, it would appear that the present fall in values cannot be attributed to large imports, and it is most improbable that it is due to the home make. The only two factors that appear to have brought about the present situation are the effects of the engineers' strike and the 'funk' of the Australian shipping agents now in England, shown by their sudden and unexpected lowering of prices to effect a clearance of Australian." There is a fair jobbing demand for cheese at 8½ to 9c. for autumn makes. The foreign market has shown more confidence in the situation and values are somewhat improved. Strictly new laid eggs are wanted, but supplies are limited, dealers quoting 18 to 20c. per doz. Other descriptions are in moderately active request. We quote: Held fresh, 14c.; cold stored, 14c.: limed, 13½ to 14½c. per dozen.

GRAIN.—The market in general is very firm. Deliveries of wheat have been light owing to bad roads, but the last few days have shown a little improvement. There is a good demand for wheat from abroad and large shipments are going forward. As a result of the active foreign demand values are up 1 to 2c. per bushel. The Liverpool *Corn Trade News* has this very significant outlook on the wheat situation: "The annual requirements of the importing countries may be placed at 46,000,000 quarters as a minimum. In the coming season of 1898-99, the importing countries will in all likelihood require something between 46 and 52 million quarters. How then are these requirements to be met in an ordinary way? If by America and Southeastern Europe alone, as is being done at present, then it will probably be with prices at a high level. It is true that next season the Danubian Principalities may be favored with good crops as in 1896, but, on the other hand, America will be absolutely bare of stocks before the next crop is reaped, while the yield in 1898 may not be so satisfactory as it is proving this season. Russia may have a better crop next season, but will have smaller reserves—for this season she is shipping as liberally as if her crop had been a good one, and next season could hardly do better however large her crop. If France has a fine crop next season, still it would be safe to reckon the wants of importing countries at fully 46,000,000 quarters between 1st August, 1898, and 31st July, 1899, and if the Indian and Argentine surplus is to be requisitioned this cereal year it will mean simply a deferment of the day of scarcity into another season." Barley is firm both for local malting purposes and for export abroad. Very little barley has gone forward to the United States this year. Peas are firm and in active request for the United Kingdom. Oats are firm at an advance of 1 cent per bushel over last week's quotations. There is a dull market in buckwheat. Corn is higher by 1 cent per bushel than a week ago, and there is a firm local trade. Rye is firm and wanted for export.

The stocks in store at Port Arthur on Dec. 18th were 661,890 bushels, and there were received 25,050 bushels and shipped 7,903 bushels, leaving in store on Dec. 24th 679,127 bushels.

GROCERIES.—General lines of grocery supplies still remain in good demand in spite of the abnormal movement prior to Christmas Day. Values are firm. Sugars remain in fairly active request, with values steady at the recent advances. Considerable interest is being shown on the street in the proposed sugar-selling arrangement. Stocks of choice dried fruits have been brought into fairly small compass. A recent cable from Patras quotes a very firm market for currants, with prices showing an upward tendency. Retailers in various parts of the country report a good trade, but in a number of districts poor roads interfered withb usiness.

HIDES AND SKINS.—Little that is satisfactory can be said of the hide trade. Merchants are paying 9 cents for green hides, Toronto inspected, and quote cured at 9½ cents. Values are much too high for leather market conditions. Several Ontario tanners have recently imported English and Irish hides and report that they can do so with advantage. It is impossible to export Canadian hides to the United States at the present basis of values. A despatch from Chicago, Dec. 28, says:—"Market was firm. The recent large purchases made at the four points, it was stated, will amount to at least 100,000 hides, of which about 80,000 were taken by the company. The market closed firm at 10c. for native steers; 9¾c. for Texas; 9¼ to 9½ for light; 9¾ to 10c. for butt brands; 9½ for branded cows; 8¾c. for Colorados; 10¼ to 10⅜c. for heavy native cows and 10½ to 10⅝ for light do." There is little doing in skins on the local market. Tallow is quiet and unchanged.

LEATHER.—Trade conditions remain unchanged. Most of the tanners have completed stock-taking, and it is said results have not been in all cases very satisfactory. Prices remain steady; in some cases tanners maintain they are securing advances.

PROVISIONS.—Large quantities of dressed hogs are coming forward and are readily absorbed by the market. Prices are firm, packers paying as high as $6 per cwt. for choice weights. The deliveries are as a rule very satisfactory and range between desirable weights. A number of heavy hogs have been sent in for holiday display, one packing house exhibiting a hog weighing 584 lbs. The actual demand for provisions is slow. Fresh meats and poultry at this season of the year usually crowd out pork products. The last issue of the Cincinnati *Price Current* says: "There is a continued liberal marketing of hogs, the total of Western killings for the week being 530,000, compared with 520,000 the preceding week, and 585,000 two weeks ago. For corresponding time last year the number was 505,000. From November 1 the total is 3,595,000, against 2,865,000 a year ago—increase, 730,000. Prices at the close average about 5c. per 100 pounds higher than a week ago. While the current information suggests good supplies of hogs remaining in sight for winter marketing, it is hardly likely the rate of increase will be maintained. In the provision market the position of values has been well sustained."

SEEDS.—Bad roads combined with holiday festivities have had the effect of reducing the deliveries of seeds at country points within small compass. We quote:—Alsike, $2 to 4.50; red clover, $2.50 to 3 50, and timothy, $1.50. For choice lots, these prices are subject to an increase. Choice unhulled, flail-threshed timothy bringing $1 75. Advices from the United States are not particularly interesting, and show a weak export demand.

WOOL.—Trade is quiet as is usual at this season of the year. The Canadian mills are very active, and some of them are said to be working overtime to catch up with orders. Only occasional lots of fleece wool are being marketed. Some dealers say that prices for next spring's clip will certainly be low, but as the season develops they may alter their opinions.

MONTREAL MARKETS.

MONTREAL, 29th Dec., 1897.

ASHES.—Receipts for the past several weeks have been very limited, and business very restricted, there being practically no export demand at the moment. A good deal of variation in quotations exists at present, first pots ranging from $3.25 to 3.40; seconds, $3 to 3.15; pearls, $4.75 to 4 80 per cental.

BOOTS AND SHOES.—The boot and shoe factories of the city are not running very actively just now, a good many of the French Canadian operatives being engaged in keeping their usual lengthy holiday, which extends till after Epiphany, or old Christmas. The season's trade with retailers has been a moderate one and accounts from the country go to show that good remittances may be looked for, and probably an active spring trade—but that is a little far to look ahead. Prices of leather are firmly maintained.

CEMENTS AND FIREBRICKS.—There is next to nothing doing in these lines at present, and quotations are entirely without change. We quote British cements at $2.10 to 2.20, Belgian, $1.95 to 2.05; firebricks, $17. to 22 per thousand.

DAIRY PRODUCTS.—There is no export business in butter at the moment, but for best grades there is a steady local consumptive demand. We quote fine creamery 18½ to 19½c., fine dairy 15 to 17c., roll butter 15 to 15½c. The cheese market is showing some little gain in firmness. The English market is quiet at the moment, but improved demand is looked for after the holidays, and local holders are evincing stronger views. Fine makes may be quoted at 8⅝ to 8¾c. For eggs there is good enquiry; really fresh stock is scarce. We quote selected boiling stock 18 to 19c., limed 13½ to 15c., No. 1 candled 13 to 14c.

FURS.—Receipts of raw furs show some increase with the advent of snow and colder weather. In quotations there are no further changes. The great London January sales of the Hudson Bay Co., and Lampson & Co. began on the 23rd prox., and already some Canadian buyers have left for the other side. We quote:—Mink, large dark, $1.50; small, do., $1.00; marten, $1.50 to 2.00; fisher, $4.00 to 6.00; lynx, $1 00 to 2.00; otter, $1.00 to 12.00 for dark; pale, $5.00 to 7.00; red fox, large, $1.30 to 1.40; small, $1.00; cross fox, $3.00 to 6.00; bear, cubs, $3.00 to 7.00; medium, $7.00 to 10.00; large, $12.00 to 15.00; skunk, 15 to 70c., as to color and stripe; coon, 20 to 75c.; rats, fall, 7c. to 10c. kits, 2 to 5c. Beaver, not quoted, killing being forbidden by law.

Oatmeal.............	218	285
Flour	12,636	——
Buckwheat..........	27,017	34,827

GROCERIES.—The sugar market has developed further strength, and refiners have established another advance of an eighth of a cent since last writing. This now makes the factory price for round lots of standard granulated 4⅜c., while the lowest figure in yellows is now 3⅝c., ranging up to 4c. The outside markets for raws keep advancing, and it is deemed not at all unlikely that some additional advance may be established in the near future; quotations for raw beet have advanced 4½d. within a few days, and in New York 4¼ is quoted for centrifugals. It seems to be generally recognized that there is a very light supply of molasses on spot, a state of affairs reported as likely by us a couple of months ago, and prices are steadily going up. Barbadoes in quantity is now held at 28c., and the jobbing price is expected to be advanced to 30c. any day. A sale of 300 puncheons of Porto Rico was reported a few days ago at 26c., and a lot of Antigua is now held at 22c. Teas continue singularly quiet as regards demand, but there is no weakening in prices. The excitement in canned goods continues; the general asking price for tomatoes in quantity is now $1.15, and one house claims to have obtained $1.25 for a round lot. Salmon, which has ruled low, is also said to be showing some signs of improving values.

HIDES AND TALLOW.—A good deal of slaughtering of beeves is now being done in the country, and receipts of hides from this source are a good deal larger than usual; in city supplies there has been some falling off. The advance is maintained, the general paying price for No. 1 being 9c. per lb., though 9½c. is reported as being paid in some cases. Quotations to tanners range from 9½ to 10c. Lambskins are quoted at 90c.; of calfskins there are none coming in. Tallow is, if anything weaker; 3 to 3½c. is the nominal quotation for rendered, but some cutting is reported, and it is said offers have been made below the above inside figure.

HOPS.—Business is quiet, and only occasional sales of moderate lots are reported. Choice Canadians range from 12½ to 15c.; yearlings slow of sale at 6 to 8c. per lb.

LEATHER.—The shoe men are holding off buying just at present, many of their hands being holidaying for a week or two. Conse-

quently there is not much doing in leather, but prices continue very firm, indeed, it is intimated that the sole leather association contemplates an advance of half a cent. We quote:—Spanish sole B.A. No. 1, 24 to 25c.; do. No. 2, 22 to 23c.; No. 1 ordinary Spanish, 22 to 23c.; No. 2, 19 to 20c.; No. 1 slaughter, 25 to 27c.; No. 2 do., 21 to 23c.; common, 20 to 21c.; waxed upper light and medium, 30 to 35c.; do. heavy, 27 to 30c.; grained, 32 to 35c.; Scotch grained, 30 to 35c.; western splits, 22 to 25c.; Quebec do., 17 to 20c.; juniors, 15 to 17c.; calf-splits, 30 to 35c.; calf skins (35 to 40 lbs.), 60 to 65c.; imitation French calf skins, 65 to 75c.; colored calf, American, 25 to 28c.; Canadian, 20 to 22c.; colored pebble cow, 13 to 15c.; russet sheepskin linings, 30 to 40c.; colored, 6 to 7½c.; harness, 24 to 27c.; buffed cow, 12 to 14c.; extra heavy buff, 15c.; pebbled cow, 12 to 13c.: polished buff, 11 to 13c.; glove grain, 12 to 16c.; rough, 22 to 23c.; russet and bridle, 35 to 45c.

METALS AND HARDWARE.—Another very quiet week has to be reported in these lines, and no revival of enquiry is expected for a fortnight or so. We do not hear of a change as regards quotations, The annual meeting of the hardware association was held this week, when it was resolved to make uniform credit terms of four months, or three per cent. off for cash. Heretofore six months time has been general on certain lines. We quote:—Summerlee pig iron, $18.00 to 18.50; Carron, No. 1, $18.00; No. 3, $17.25; Ayrsome, No. 1, $17.00; No. 3, $16 50; Shotts, $17.25 to 17.50; Carnbroe, $16.00 to $17.00, ex-store; Siemens pig No. 1, none; No 2 Siemens, none; Ferrona, No. 1, $15.00 to 16.00; Hamilton No. 1, $16.00 to 16.50; No. 2, ditto, $15.50 to 16.00; machinery scrap, $1400 to 15.00; common ditto. $12 00 to 13.00; bar iron, Canadian, $1.40 to 1.50; British, $2.00 to 2.15; best refined, $2.40; Low Moor, $5; Canada plates—Pontypool, or equal, $2.10 to $2.15; 52 sheets to box; 60 sheets, $2.25; 75 sheets, $2.35; all polished Canadas, $2.40; Terne roofing plate, 20x28, $5.90 to $6.00; Black sheet iron, No. 28, $2.25; No. 26, No. $2.15; 24, $2.05; Nos. 17, $2; No. 16 and heavier, $2.15; tin plates—Bradley charcoal, $5.60 to 5.70; charcoal, I. C., Alloway, $3.15 to 3.25; do., I.X., $3.90 to 4.00; P. D. Crown, I. C., $3 60 to 3.75; do., I.X., $4.50; Coke I.C., $2 90 to 2.95 for standard, $2.75 to $2.80 for 100 lbs.; coke, wasters, $2 70; galvanized sheets, No. 28 ordinary brands, $4; No. 26, $3.75; No. 24, $3 50 in case lots; Morewood, $5.00 to 5.10, tinned sheets, coke, No. 24, 5½c.; No. 26, etc.; the usual extra for large sizes. Canadian bands, per 100 lbs., $1.75; English ditto, $2; hoops and bands, $1.90 to 2.00. Steel boiler plate, ¼-inch and upwards, $1.85 to 1.90 for Dalzell, and equal; ditto three-sixteenths inch, $2.50; tank iron, ¼ inch, $1.50; three-sixteenths do.; $2.00; tank steel, $1.75; heads, seven-sixteenths and upwards, $2.45 to 2.50; Russian sheet iron, 9c.; lead, per 100 lbs., pig, $3,65 to 3.75; sheet, $4 to 4.25; shot, $6 to 6.50; best cast-steel, 8 to 10c.; toe calk, $2.25; spring, $2.50; sleigh shoe, $1.85; tire, $1.90; round machinery steel $2.25; ingot tin, 15¾ to 16c. for L. & F.; Straits, 15¼ to 15½c.; bar tin, 16½ to 17c.; ingot copper, 12 to 12½c.; sheet zinc, $5 to $5.25; Silesian spelter, $4.75; Veille Montagne spelter, $4.75 to 5.00; American spelter, $4.75; antimony, 9 to 10c.

OILS, PAINTS AND GLASS.—Not a particle of news can be picked up with regard to these lines, but values are all well held. As regards business, there is really nothing doing. We quote:—Turpentine one to four barrels, 49c.; five to nine barrels., 49c., net thirty days. Linseed oil, raw, one to four barrels., 43c.; five to nine barrels, 42c.; boiled, one to four barrels, 46c.; five to nine brls., 45c., net 30 days; olive oil, machinery, 90c.; Nfld. cod, 35 to 37c. per gal.; Gaspe oil, 30 to 32c. per gal.; steam refined seal, 45 to 47½c. per gallon in small lots. Castor oil, 10 to 11c. as to quantity. Millers' & Manuf'rs Ins. Co

ESTABLISHED 1885.

HEAD OFFICE:
Queen City Chambers, Church St., Toronto.

DIRECTORS:
AS. GOLDIE, Pres. J. L. SPINK, Vice-Pres.
THOS. WALMSLEY, Treas. HUGH SCOTT, Mgr. and Sec·
Adam Austin, Inspector.

This Company was organized in 1885, specially for the purpose of insuring manufacturing industries, warehouses and contents.

The primary object being to give protection against loss by fire at a minimum cost consistent with absolute security.

The system adopted has been to inspect all risk before acceptance and fix the rate to be exacted equitably in accordance with the hazard assumed.

Assurers with this company have made a saving, upwards of $108,000.00 on the current rates charged, in addition to which, on the rates exacted by us, dividends have been declared to policy-holders amounting to over $24,000.00, together, making the very substantial sum of over $132,000.00 that our policy-holders have saved during the eleven years we have been in operation.

As no canvassers are employed, dealing directly with the assured, those desiring to avail themselves of the advantages thus offered will please address

Millers' and Manufacturers' Insurance Co..
32 Church Street, Toronto, Ont.

THE SECRET OF LONGEVITY.

What is the secret of longevity? Sir James Sawyer has been confiding it to a Birmingham audience. Like so many other secrets, it consists in "paying attention to a number of small details." Here is a schedule of them, collected from the reports of Sir James Sawyer's lecture :—

1. Eight hours' sleep.
2. Sleep on your right side.
3. Keep your bedroom window open all night.
4. Have a mat to your bedroom door.
5. Do not have your bedstead against the wall.
6. No cold tub in the morning, but a bath at the temperature of the body.
7. Exercise before breakfast.
8. Eat little meat, and see that it is well cooked.
9. (For adults)—Drink no milk.
10. Eat plenty of fat to feed the cells which destroy disease germs.
11. Avoid intoxicants, which destroy those cells.
12. Daily exercise in the open air.
13. Allow no pet animals in your living rooms. They are apt to carry about disease germs.
14. Live in the country if you can.
15. Watch the three D's—drinking-water, damp and drains.
16. Have change of occupation.
17. Take frequent and short holidays.
18. Limit your ambition, and
19. Keep your temper.

Keep all these commandments, and Sir James Sawyer sees no reason why you should not live to be 100. An interesting point in vital statistics, was incidentally brought out by Sir James Sawyer, the death rate during the last 200 years has been enormously decreased, but the decrease has all been between the ages of birth and 35.

Those who passed that age had not so good a chance of living as the people who lived 200 years ago. The meaning was that now the weaklings among the young were less easily killed off than they were 200 years ago. With regard to those of 35, those who lived in the olden days had the advantage that there were no telephones, telegrams, trains, daily share lists, or daily newspapers.

FISHERY BOUNTIES.

The Maritime Provinces are interested in Fishery regulations. The regulations of Aug. 24th, 1894, governing the payment of fishing bounties are cancelled and new regulations issued. To entitle a man to bounty he must be engaged in deep sea fishing for at least three months, and catch not less than 2,500 pounds of sea fish, but no bounty will be paid to men fishing in boats measuring less than 13 feet keel. Registered Canadian vessels of ten tons and upwards are entitled to bounty calculated in registered tonnage, this bounty to go to owner. The owners or masters intending to fish and claim bounty must first procure license from the nearest collector of customs or fishery overseer, such license to be attached to the claim and sent on the records of catches and localities where the fish taken must be kept. The ages of claimants must be given. The amount of bounty to fishermen and owners is to be named by governor in council. The vessel fishing under bounty license is to carry a distinguishing flag.

AVERAGE LAKE FREIGHTS.

An exhaustive summary of lake freights, prepared by the *Marine Review*, shows the effect of 6,000-ton ships on carrying charges. Rates on ore, grain and coal, the principal items of freight, are the lowest ever recorded. Improved rates during the closing months of 1897 helped to advance the averages for the season, but as compared with 1896, which was not a very profitable year with most vessels, there is still a marked difference in all lines of freight. Vessels that had contracts at 70 cents a ton for moving ore from the head of the lakes to Ohio ports were certainly very fortunate, as the average of daily rates from the head of the lakes was only 57.2 cents. The few season contracts that were made on ore from Marquette were at 5 cents. The average of daily rates from that port was 54.6 cents. Before the season opened, a number of vessels that had interests in common with ore concerns secured Escanaba contracts at 50 and 55 cents, but 45 cents was the rate governing the only Escanaba contract in which ore interests were not concerned. The average of daily rates from Escanaba was 45.3 cents. The ore dealers were the principal gainers by the low rates that prevailed during spring and summer months. They moved the great bulk of their ore before heavy shipments of coal were crowded into the two last months of the season.—*Cleveland Marine Review*.

CANADIAN LOGS TO MICHIGAN.

A Saginaw, Mich., despatch says: "One year ago it was estimated that the quantity of Canadian logs to be rafted to Michigan mills during the season of 1896 would not exceed one hundred and seventy-five million feet owing to the depression of the lumbering industry. The action of Congress in reference to the lumber schedule, however, stimulated the log-rafting industry, and the figures largely exceeded the original estimates of the quantity to be rafted. Official reports obtained from the customs houses at points to which logs were imported from Canada during the past season show the quantity received to have aggregated over two hundred and fifty-two million feet. A comparison of the quantity of logs rafted from Canada to the Michigan mills shows as follows :—

1893	184,500,000
1894	301,000,000
1895	279,229,743
1896	274,388,654
1897	252,344,532

It is estimated that fully three hundred and fifty million feet of logs will be imported from Canada next season to Michigan mills, and the figures may exceed that quantity when made up a year hence. American firms will put in all the logs they can get into the waters of the streams tributary to Georgian Bay, and numerous Canadian firms are putting in logs to be rafted to this side and sold or manufactured. These will make business good next season for the mills and a large force of workmen on this side.

SELLING GOODS.

A commercial traveler when first he went upon the road to attempt selling goods got the following advice from the head of the firm: "John, my son, you are going out to sell goods; let me give you a point or two. Don't overeat in order to keep even with the hotels. Post your letters yourself, don't leave them with the hotel clerk. You will find a surprising number of the country dealers you want to see are away on a jury, or are at home sick, or gone to the city to buy goods, are gone a-fishing or to a funeral or a pic-nic. But peg away, and don't get discouraged. When you catch your men they will tell you that times are hard and the season backward—that you have come too early, or too late—that they have just bought—that your styles are old and unpopular—that Brown-Jones offered the same goods last week for less money, etc., etc. But don't you get rattled, don't write home as if you had made a discovery; it is an old story. You go out to sell goods. Peg away. Do the best you can, and you won't fail. Good-bye and good luck to you.

—We see it advertised in the Rodney *Mercury* of last week, that "good old London light-weight"—as Cool Burgess used to call it—is sold there over the counter at five cents per loaf. This bread is made by a London baker or bakers, and is sent by common carrier to the village of Rodney. The question occurs, if Rodney can get the regulation loaf for five cents, why are London people asked six cents?—*London Advertiser.*

—The marine post-office on Detroit River closed last Friday night, with a record of 224,000 pieces of mail delivered, as against 175,000 last year.

THE WEEK IN THE STATES.

The weekly reports show a remarkably large holiday trade, at many points the largest for five years. Moreover, at the season when wholesale business usually shrinks, the pressure of demands for immediate deliveries, which results from unprecedented distribution to consumers, keeps many establishments at work that usually begin their yearly resting spell somewhat earlier. Instead of decreasing, the demand for products shows an unexpected increase in several important branches. Foreign trade continues satisfactory, even in comparison with the remarkable record of a year ago when exports exceeded $117,000,000 in December. At New York the movement in three weeks has been not $2,000,000 or 7 per cent. smaller, while from cotton and Pacific ports it has been larger this year. Imports at New York, over $1,900,000 less than last year, indicate an excess of exports approaching $60,000,000 for the month. Foreign exchange has broken, and gold imports begin again with $1,000,000.

The outgoing flood of grain is not checked by Chicago speculation, though more corn than wheat has been moving. Wheat exports, flour included, have been in four weeks 15,766,895 bushels, against 9,039,587 last year, while corn exports, for the week, 4,540,828 bushels, against 1,751,740 last year, have been in four weeks 14,420,151, against 8,176,073 last year. Last year's corn movement was by far the greatest ever known, and this year's wheat movement for the half year nearly ended has been close to the maximum reached in 1891. Wheat has varied little, closing three cents higher for the week, after deliveries of surprising magnitude at Chicago, and corn closes nearly a cent higher. Cotton has also been moving largely, and has risen a sixteenth.

Cotton goods have further declined in prices of bleached, which meet active Southern competition, and the Fall River spinners insist upon a reduction of one-ninth in wages, other New England mills joining. Out of 101 New England works 45 have passed dividends, 14 at Fall River, with 15 others paying 1 per cent. for the last quarter. The fall in the price of cotton, when mills were holding heavy stocks of goods, placed this industry in a most embarrassing position. Woolen mills have begun buying domestic wool heavily, especially Montana and Territory, as if assured of large business for the season about to open. Contracts of unknown magnitude have been made, it is said, many at previous prices, but others at a moderate advance. Wool is more firm, traders having disposed of 3,300,000 lbs. territory and 1,500,000 other domestic at Boston, and sales at three cities reached 7,809,100 lbs.

Shipments of boots and shoes from the East in December have been 23 per cent. larger than last year, then the greatest for that month, and 37 per cent. larger than in 1892. This unprecedented movement for two months has been almost wholly to meet urgent demands caused by sales greater than dealers anticipated, so that nearly all orders for January and later months have been met by supplementary shipments. New business for the next season is very small, and few works have more than three weeks' business ahead, but with such a consumption in progress are not apprehensive. Buying of leather is closely confined to necessities, and prices have changed but slightly, though speculation appears in Union with some large sales, and one of 3,000 sides satin at 11 cents is reported. Hides at Chicago are weaker, and on calfskins one cent lower, with the decision against the duty of two cents.—*Dun's Review*, 25th December, 1897.

—The treasurers of the Lowell cotton mills, at a meeting held recently, voted to reduce the wages of their employees on and after January 17. The causes of the reduction are the same as those which led the manufacturers in Fall River, Manchester, Suncook, N.H., and other places, to lower the wage scale. About 15,000 operatives in that city will be affected.

PUBLIC NOTICE

Is hereby given that all persons who take out ordinary participating Policies in the

Canada Life Assurance Company

before 31st December, 1897, will at the next Division of Profits, receive

Three Years' Profits

being one year's additional bonus over those policies issued in 1898. Enquiry should be made without delay from LOCAL AGENTS by intending assurers.

BOOKLETS

There are not enough Booklets. Advertisers forget, or overlook, or do not realize how much a good Booklet will do. A Booklet should be well written and well printed. It ought to be printed on the best paper you can afford. It ought to have a cover with a snappy design on it, a design that will not discourage anyone from looking inside—a design which will awaken expectation. It should tell just one short, simple tale, and when it is through it should stop.

Your Booklet, then, written rightly, properly printed and embellished, should go into every package and every envelope that leaves your office.

Kindly write us about the printing of your Booklets.

Money in Insurance WHEN SECURED

ON THE COMPOUND INVESTMENT PLAN OF THE
NORTH AMERICAN LIFE ASSURANCE COMPANY

The special provisions of this advantageous plan of insurance are:

(1) The return as a mortuary dividend of all premiums paid beyond the 10th year, together with the face of the policy should death occur within the investment period selected.

(2) The loan to the insured if desired of all premiums beyond the 10th year, and should death occur after that and within the investment period selected, the full face value of the policy is payable, premium loans, if any, being cancelled.

The North American has a larger ratio of assets to liabilities and net surplus to liabilities than any other Canadian Company.

Pamphlets explanatory of the Compound Investment and other attractive plans of insurance furnished on application to

DECISIONS IN COMMERCIAL LAW.

PREMIUMS PAID BY THE BROKER.

THE UNIVERSO INSURANCE COMPANY OF MILAN VS. THE MERCHANTS' MARINE INSURANCE COMPANY.—An interesting decision has been recently given in the United Kingdom, re-affirming the custom that the underwriter in marine insurance looks to the broker and not to the insured for payment of the premium upon a policy. The defendants, the insured, in the express terms of a policy promised to pay the premiums to the underwriters. The brokers who had negotiated the transaction suspending payment, the underwriting company sued the assured for payment. It was set up in defence, that the insured were bound to pay the brokers' estate and not the plaintiffs', and that in respect to the former, they claimed a set-off. It was held that the above principle was a recognized custom of Lloyd's policies, and wa not altered by the fact that the underwriters were a company, or that an express promise to pay had been made by the insured.

NO RESTITUTION OF PROPERTY DISPOSED OF BY ASSIGNEE.

TAYLOR ET AL V. CUMMINGS AND PEOPLES BANK OF HALIFAX.—An action was brought in the Superior Court of Canada to have an assignment by one McKinnon declared fraudulent and void, mainly on the ground that a secret agreement existed between the assignor, the assignee, and the firm of William Cummings and Son, a preferred creditor. Following the deed of assignment, the assignee had made preferred payments to Cummings and the Bank of Halifax. A claim to have these creditors pay over the amounts received by way of preference was held " absolutely untenable under English law, in an action to declare a deed void under the statute of Elizabeth. No decree has ever yet been made ordering restitution of property parted with by the assignor of the deed, or persons claiming under him. That statute avoids the deed, nothing more—it leaves the creditor defeated or delayed to his ordinary remedies, execution, garnishment."

PLUMBERS' COMBINATION.

MACAULAY V. TIERNEY.—The validity of the agreements of the Canadian Plumbers' Associations, as to restricted sales, has never been determined in the courts. It is interesting to note that in the above case, the Supreme Court of Rhode Island held that a similar arrangement by which the members of an association pledged themselves not to deal with wholesale merchants who sold to others than members of the association did not constitute a conspiracy and was not unlawful.

STEALING WOOD.

A LESSON to those pilfering people who will steal boards off a public sidewalk or the wooden steps off a private house was given by the police magistrate of Toronto the other day. James O'Malley, a storekeeper at Yonge and Belmont streets, Toronto, was charged with stealing a quantity of wood belonging to Chas. Bugg, 59 Grenville street, who is O'Malley's landlord, and owns some property on Roden place. The premises are in the rear of O'Malley's, and have been vacant, so that O'Malley thought himself privileged to help himself to all the wood he wanted. He chose to take part of the fence of this vacant property, thinking perhaps that seasoned wood burns best. His lawyer tried to get O'Malley let off, but Magistrate Denison replied: "I won't do it; there is too much of this sort of thing going on. People think that because a house is unoccupied they can take away anything they like." And Mr. O'Malley was sentenced to twenty days in gaol.

JOHN BARBER

Mercantile Summary.

Some of the leading citizens of Montreal propose to give a banquet to the retiring mayor of that city, Mr. R. Wilson Smith, before his tenure of office expires, a few weeks hence.

According to *Bradstreet's*, mercantile failures in Newfoundland last year numbered 20, with aggregate liabilities of $71,450 and assets of $33,250. In 1896 there were on the island 24 failures, with liabilities of $66,161 and assets of $26,722.

A letter has been received from Mr. E. E. Sheppard, the Canadian commissioner to South America, dated from Guatemala. He tells the Trade and Commerce Department at Ottawa that he will be in Victoria about the middle of this month.

An Ogdensburg despatch of Tuesday last says that the Ashley Hardware and Iron Company, the oldest wholesale hardware establishment here, was closed by the sheriff on claims which will reach about $40,000. The stock is estimated at $30,000.

Building operations in Philadelphia were unusually brisk last year, no fewer than 14,937 structures having been erected in that city, more than half of them dwellings. This is looked upon, with probable truth, as a result of improvement in business during 1897, and as an earnest of still greater building activity this year.

At Galt, on Monday last, four municipal by-laws were voted on, everyone of which was defeated by substantial majorities, viz.: To raise $7,000 for market extension, defeated by 210; to raise $3,000 for new fire hall, defeated by 15; to raise $3,000 for hospital sewer, defeated by 129; to raise $1,800 for electric fire alarm, defeated by 98.

Tenders were opened at St. John last week, for the issue of $125,000 bonds in connection with harbor improvements. They are 4 per cent. debentures payable in forty years; interest payable half-yearly. There were tenders received in Montreal, Toronto and some banks, but that of J. C. MacIntosh, Halifax, of $107.265 per hundred dollars, or $134,081.25 with accrued interest, was accepted

The receipts of revenue by the Government at the chief city of Canada during 1897 showed a considerable increase over 1896. The Custom House receipts for last year were $6,992,360, as compared with $6,619,401 in the previous year. At the Inland Revenue office there was received during the twelve months of 1897 no less than $2,591,522, whereas the Montreal receipts of 1896 were $2,274,808.

A subscriber in North-western Ontario writes, respecting the legal status of failed traders: "I hope you will keep right on nagging at the Government until they take action towards amending the present statutes relating to insolvency. Whatever may have been the lawmaker's intent who framed the present law, it does not work well, and never will give satisfaction to the public in its present condition."

Mr. John Hall, private banker, at Holland, Man., assigned a few days ago owing in the neighborhood of $32,000. Mr. Hall was in the hospital of Winnipeg, on 30th December. He was one of the early settlers in the district, says the *Free Press*, having gone there when the town of Norquay was the southern metropolis of Central Manitoba. He was successful in farming and land speculation, and some years ago moved into Holland and established a private bank.

Two maiden ladies of Sherbrooke, Que., M. A. & E. Draper, who have been in business some twenty years in the dry goods line, without any previous embarrassment, last week found it necessary to make an assignment.——M. Lepage & Fils, of St. Adelphe, Que., recently insolvent, have effected a settlement at 40 cents, payable in three, six and nine months.

On New Year's Day morning the steamer "Gerona,' of the Thomson Line, which had left Portland for London, with a general cargo, struck Seal Island and went down shortly afterward, the crew being saved in boats, all but one man, who is still missing. She had one hundred horses on board and 224 cattle, besides cheese, pulp, flour and grain. The "Gerona" was a steel steamer of 2,025 tons register, and was built at Dundee eight or nine years ago. She is valued at $150,000, the cargo at $210,000, mostly insured through Montreal agencies.

According to the *Railway Age* not a single year since 1887 has witnessed so few United States railways "or so small mileage confessing insolvency, while compared with the record of the five years immediately preceding 1897 the list of new receiverships in the last year is surprisingly small in respect to the number of lines, mileage and capital involved." This is a sign of better times in the States, for the railways are among the first interests to suffer from depression in commerce or industry, and among the first to feel reverse conditions.

It will be satisfactory news to many that Mr. N. Weatherston, so long connected with the Intercolonial, has been re-engaged by the Canadian Government System of Railways as traveling freight agent, with headquarters at his former office in Toronto, 93 York street. His chief clerk, Mr. P. F. Deslauriers, has been ordered to report at Montreal. Mr. William Robinson, who has been for many years general freight agent of the Grand Trunk, has been appointed to the position of divisional freight agent of the Intercolonial Railway, with headquarters at St. John, N.B.

The mineral output of West Kootenay for the year, or rather the mineral exports from that district for 1897, according to the Nelson *Tribune*, exceed in value eight millions of dollars. The mineral exports for the month total in value $593,950. Of this value gold represents $224,587; copper, $48,710; lead, $64,629; silver, $253,048; gold bullion, $3,976. The entries for the December week bring the total value of mineral exports for 1897 up to $8,136,696. Including 401,162 pounds of matte from the Trail smelter, and $719,132 worth of product shipped via Revelstoke to 31st October, the total sent out of Kootenay was 53,525 tons ore, of a total value of $8,136,696.

An important Montreal failure, which comes as a surprise, is that of J. H. Blumenthal & Sons, large retail clothiers, who assigned on the 4th inst. to Mr. James Rodger, of the Gault Bros. Co. The firm, though in somewhat extended shape, was supposed to be doing well, and some of its principal suppliers had considerably increased their lines within the past few months. Two large stores had been conducted by the firm for some years past, and only this past summer fine new premises were opened up on St. Catherine street west, where a high class trade was catered to. The figures of assets and liabilities cannot be definitely ascertained yet, but it is roughly approximated that the latter must be somewhere about $150,000.

CITY OF TORONTO

CORPORATION LOAN

INDUSTRY INTELLIGENCE INTEGRITY

Issue of £213,000 Sterling 3½% General Consolidated Loan Debentures, Equivalent of $1,036,600

REDEEMABLE 1st JULY, 1929.

Sealed Tenders will be received at the City Treasurer's Office, City Hall, Toronto, Canada, at or before three o'clock p.m., on Tuesday, the 25th day of January, 1898, addressed to the Chairman of the Board of Control, and endorsed "Tenders for the City of Toronto 3½ per cent. Debentures," for the purchase of $1,036,600, or its equivalent in Sterling at par of exchange (£213,000) General Consolidated Loan 3½ per cent. Debentures, maturing 1st July, 1929.

The Debentures will be made payable in Canadian Currency in Toronto, or in Sterling in London, as the purchasers desire, with Coupons attached payable half-yearly—1st January and 1st July. The interest accruing from 1st January, 1898, to date of delivery of bonds, to be paid by the purchaser.

Tenders will be received for the whole or any portion of the Debentures, and the purchase money will be payable as follows: Five per cent. on allotment; balance on the delivery of the Debentures.

The Debentures will be delivered to the party whose tender is accepted at the City Treasurer's Office in Toronto, the proceeds of the sale being payable in Canadian Currency; or, if the Debentures be taken in sterling, at the par of exchange at the said place of delivery; but, if tenderers desire, they may specify that payment of equivalent amount will be made in sterling in London, and the Corporation will deliver the Debentures against payment there on being indemnified for the stamp duty and the cost of transmission and insurance, the latter not to exceed one-eighth of one per cent.

Applicants are required to furnish the names of personal or corporate sureties for the due fulfilment of their tender, if accepted.

Tenders will be opened at a meeting of the Board of Control of the Corporation of the City of Toronto, in the presence of such of the applicants as may attend.

The highest or any tender not necessarily accepted.

Full information can be obtained on application to the City Treasurer.

JOHN SHAW,
Mayor (Chairman Board of Control).

R. T. COADY,
City Treasurer.

ACCOUNTICS : n.
The science treating of accounts and the art of keeping, verifying, examining and classifying them.

Accountics
A monthly magazine. Publishes each issue ESSAYS ON ACCOUNTING PRACTICE IN LEADING ESTABLISHMENTS in various industries; SHORT ARTICLES ESPECIALLY ADAPTED to the wants of BEGINNERS in office work; REVIEWS AND CRITICISMS of books on accounting and business subjects, written in a way to correctly describe the works; LETTERS OF EXPERIENCE from ACCOUNTANTS AND OFFICE MEN; QUESTIONS AND ANSWERS of interest to subscribers; NOTICES OF MEETINGS and BRIEF REPORTS OF PROCEEDINGS of leading ACCOUNTANTS' AND BUSINESS MEN'S ASSOCIATIONS; ILLUSTRATED DESCRIPTIONS of the BEST and NEWEST devices for OFFICE EQUIPMENT; brief EDITORIAL LEADERS ON TOPICS OF THE MONTH of interest in accounting and office circles; PORTRAITS OF EMINENT ACCOUNTANTS, with BIOGRAPHICAL SKETCHES; ACCOUNTING MISCELLANY, etc.
Monthly. $1 a year. Ten cents a copy.
ACCOUNTICS ASSOCIATION, Publishers,
262 West Broadway, New York.

Mercantile Summary.

It is reported in the leather trade, that the Adams Shoe Co., of Quebec, whose embarrassment was noted in these columns several weeks ago, is asking a settlement of liabilities at the rate of 40 cents on the dollar.

A demand of assignment has been made upon J. W. Brassard, of Cedar Hall, Que., who started in the general store line in the fall of 1896, with limited capital and brief experience. The liabilities are about $2,000.

According to Mr. Callaway of the Lake Shore and Michigan Southern Road, the passenger traffic of American railways has fallen off because business men use the long distance telephones to talk with their customers instead of taking a railroad trip for the purpose.

The assignment is reported from Montreal, of Alphonse Valiquette, dry goods merchant, doing business under the style of Valiquette & Valiquette. The failure was not wholly unexpected, because trade had been gradually leaving their locality for several years past, and the firm had not been altogether easy for some time past. The liabilities are figured at some $50,000 to $60,000.——A demand of assignment has been made upon Messrs. G. A. Hetu and Louis Viens, doing a retail dry goods business, in Montreal, under the style of A. Gagnon & Co. The firm dates from 1894, when they bought out Mr. Gagnon, who now makes the demand.

A correspondent tells the Montreal *Gazette* how Christmas was spent in the Crow's Nest Pass. He says that at the Headquarter Camp, Haneyville, as it is called, "the caterer, Mr. R. Smith (of Fort William, the railroad man's old time friend) gave us a real Christmas fare. At three o'clock Tom Cox and his staff had the long tables fairly heaped with a grand show, and some 300 sat down to a sumptuous dinner, viz., white fish, turkey, goose, duck, chicken, roast pork, plum duff, mince pies, some five kinds of pastry, raisins, nuts and candies. This was got through by about 5.30." Mr. Smith also supplied his sixteen other camps with the same bill of fare, and some 1,500 of us are quite sure that he is one of the right sort, and altogether a "jolly good fellow."

From Newfoundland we hear of several recent failures, in some of which Canadian creditors are interested. J. J. Hennessy, grocer, etc., at Harbor Grace, is offering 50 cents in the dollar. He owes in all $19,000, of which $6,000 is preferred, and he shows assets of about $15,000.——Wm. Mitchell, general dealer at Ragged Island, has made application to be declared insolvent.——Hill Bros., general dealers in St. Johns, are offering 45 cents in the hundred, in payments spread over twenty-one months, which settlement the court approves Liabilities are set down at $3,364.——Patrick Molloy, a grocer of the same city, has been declared insolvent. He owes only about $1,000.

From Eastern Ontario we hear of the following mercantile failures: Mayhew & Farquharson, general dealers for a year at Admaston, have already found there is no easy road to business success. They had been barely nine months in business when they were sued, and got an extension from some creditors, and now they have assigned.——A. Cinqmars, general dealer at Glen Robertson, has become insolvent, and his estate has passed into the hands of J. N. Rattey, of Ottawa. The liabilities are about $2,400, with nominal assets of $3,000.——A Morrisburg grocer, F. W. Sherman, in a modest way of business, has been reported slow pay for some time, and his failure is now reported.——The firm of Dufresne & Bedard, dry goods dealers, began business in Ottawa in the fall of 1896. The partnership lasted only a few months, and Arthur Bedard assumed the business alone. He has just assigned to P. Larmonth.

Some Montreal embarrassments follow: A demand of assignment has been made upon Adolphe Franklin, dealer in shoes, who is reported an absentee. According to his own statement when beginning business a few months ago, he was a good deal of a rolling stone, having been in business in London, England, afterwards in South Africa, and expressed an inclination to try the Klondyke. He had little apparent means, yet was able to secure credit from some leading houses.——A demand of assignment has been made upon Damase Leclair, contractor. It is said his embarrassment is largely due to endorsements for a vinegar manufacturing firm lately insolvent——Joseph Monette, hotel-keeper, has assigned upon demand of Wm. Farrell. He owes $3,300.——D. Hart, hatter and furrier, has consented to assign upon the demand of S. Harris & Co. He has been doing business in a daughter-in-law's name on account of old troubles. Liabilities are about $7,000. —— A demand in insolvency has been served upon T. W. Foster, doing business in his wife's name, under the style of the Montreal Horse Emporium.

We hear, with sincere regret, as many more will do, of the death of S. C. Stevenson, of Montreal. His death was sudden, and we believe entirely unexpected, and brings mourning to a large family connection as well as to an unusually large circle of friends and acquaintances. Mr. Stevenson was for a quarter century secretary of the Board of Arts and Manufactures of the Province of Quebec, in which capacity he did loyal service. But he was probably best known as manager and secretary of the Montreal Exposition Company, whose directors passed the following resolution: "Resolved, that this meeting desire to place on record their appreciation of the great loss suffered by this company in the death of their esteemed manager and secretary, Mr. S. C. Stevenson, to whose efforts was due not only the organization of the company, but its management during its entire existence. The position which he held brought him into close contact, not only with the members and directors of the company, but also with the general agricultural population of the Dominion, with whom his personal affability and obliging disposition made him a great favorite. In the death of Mr. Stevenson the Province of Quebec has lost one of its most zealous citizens and the agricultural community especially will miss his genial and constant efforts on their behalf."

Mercantile Summary.

A report received from Sydney, New South Wales, says: "The official estimate of the wheat yield is 9,745,000 bushels. There will be a small surplus available for export."

The annual meeting of the White Lead Association is to be held in Montreal on the 11th January, on which occasion, it is expected, some revision of prices will be made.

The St. John Board of Trade has voted to memorialize the Dominion Government to compel packers of tea, groceries, canned goods, etc., to have the weight and date of packing printed conspicuously on all packages.

A St. John paper notes the dissolution of the firm of Lilley, Sons & Aldous, dealers in meats and provisions, F. A. Aldous continuing. The others, Lilley & Sons, who assume all of the firm's liabilities and will collect all accounts due it.

An agreement has been concluded between the Standard Oil Co., of Essex, and the city of Chatham for the supply of natural gas to that municipality. Under the terms of the agreement gas must be there not later than the first of October next.

A shipment of Newfoundland dogs, some hundred in number, was sent from Newfoundland a week or two ago to be used in winter traffic in the region of the Klondyke. Another shipment of them left that island per steamer "Portia" on January 5th.

Building is active at the devasted town of Windsor, N.S. One Dorchester contractor has obtained contracts for building the new academy at Windsor at a cost of $33,568; a residence for Mrs. E. Dimock, to replace the one burned, $10,000, and also repairs to the Court-house, amounting to $5,000.

A despatch of Wednesday from St. John's, Nfld., says, respecting the herring fishery in Placentia Bay, that over thirty sail of American vessels have left for Gloucester, and twenty-six are now loading Immense shoals of herring still continue there, and the fishery promises to be the largest on record.

It is announced as a verity that the Klondyke Snow and Ice Transit Company of Chicago proposes to reach the Klondyke district next year by means of trains hauled by the snow and ice locomotive, of which our readers have heard. The company intends, it seems, to start trains from Fort Wrangel, run them up the Stikine, thence to Teslin Lake and the Hootalinqua River, the Lewis and the Yukon River to Dawson City, the first train to leave Wrangel about the middle of January.

"The Government of Canada Railway System."—It seems to us that this new title, to be given the Intercolonial and Prince Edward Island railways, almost equals, for clumsiness and lack of euphony, "The Queen Victoria Niagara Falls Park," with which needlessly long name a very beautiful scene has been burdened. A man in New Glasgow, who is struck with the inappropriateness of the new name for the I.C.R. (apparently borrowed from Mr. Hays' new title for his road), suggests the name Inter-Canadian instead of Intercolonial.

SEC'Y BOARD OF TRADE,
New Westminster, B.C.

Mercatile Summary.

An assignment has been made by Arthur Bergeron, who has been in trade only about two years as a grocer in Quebec City. The liabilities are nearly altogether local, and amount to about $1,700.

Capt Wm. Hall, the superintendent of the Le Roi, at Rossland, B.C., was killed last Wednesday evening, by falling down the main shaft from the surface to the six hundred foot level. The body was terribly injured by the fall.

The Legislature of the State of New York was opened at Albany on yesterday. The annual report of the State Treasurer Colvin showed receipts for the fiscal year, ending Sept. 30th, to have been $32,678,112, and the expenditures $30,364,254. The surplus in the treasury amounts to $7,243,904.

Counterfeit $100 silver certificates of the United States have been discovered so nearly perfect that Secretary Gage will call in the whole issue—$26,000,000—of that denomination. One of the spurious notes was found in one day's cash receipts at the United States Treasury in Washington.

A Buffalo despatch says that the contracts for the six main buildings of the Pan-American Exposition, which is to be held on Cayuga Island on the Niagara River, in 1899, have been awarded to the firm of Grace & Hyde, of New York. The firm will receive $700,000 for the work, which is to be begun within ten days. The buildings are to be of steel, brick and staff.

Last year's lumber, wood, and bark shipments from St. John and its support of Fredericton to the United States were valued at $1,276,000, a decrease of only about $100,000 from the figures of 1896. Two hundred and fifteen thousand dollars worth of last year's lumber shipments to United States was cut on American soil, or tributaries of the Upper St. John River, and chiefly manufactured by American owned mills at St. John.

Mr. Yarrow, of Yarrow & Hedley, London engineers, cables to the *Times* from Boston yesterday that the result of his tour of New England has impressed him with the fact that a most severe competition is inevitable from the United States. He thinks the English engineers now on strike are "ignorant of the progress of other countries," and offers to defray the expenses of the tour of a delegation that would go from Boston to Philadelphia with a view of preparing a statement as to the social and financial position of American engineers.

At the annual meeting of the Atlantic and Lake Superior Railway Company, on Monday last, Mr. J. R. Thibaudeau, the president, complained of the Government for not having carried out its agreement to guarantee interest on bonds to be issued by the company. In consequence of the Dominion Government's repudiation of agreements, an action for $1,575,000 had, he said, been entered against it. Further, the company had last week concluded the purchase on favorable terms from the Canadian Pacific Railway, of the section of the southeastern line between Sorel and Yamaska, including the bridge across the Yamaska River, and the Government subsidy of $50,000, granted for its construction.

The Advocate Printing Company of Toronto has had to make an assignment, with liabilities amounting to $3,000.——Word has arrived to the effect that Walter Mitchell, boot and shoe dealer in St John, N.B., has suspended payment, and further, that in a few days his solicitor will present a statement to creditors, showing liabilities totalling $38,000, and assets half as much. Mitchell intends offering a compromise of 30 cents on the dollar, payable in three months, secured

Yesterday's financial article of the London *Globe* says it is reported on the stock exchange that the British Government has arranged to guarantee the Chinese loan of £16,000,000 at 3 per cent., the price of issue to be 110.

The United States Senate yesterday confirmed the following nominations for consulships in Canada: U. J. Ledoux, of Maine, at Three Rivers, Que.; M. J. Burke, of Illinois, at Port Stanley and St. Thomas; C. W. Merriman, of Wisconsin, at Brockville.

In March, 1896, Terry & Culver, bought of S. M. Sovereen, at Simcoe, his general stock of merchandise, paying but a small portion of the purchase money down, and giving Sovereen a chattel mortgage for $6,600 on the stock as security. This was evidently more than they could undertake successfully to carry out, and they assign.——D. Rothchild & Co., Sudbury, jewelers and general storekeepers, have made an assignment. — On the 11th inst. the stock of R. E. Porritt, general merchant at Milton, will be sold.

A heavy failure is that of the Army and Navy Clothing Co, in this city. The liabilities amount to $125,000, while the company claim assets of $90,000, but it is doubtful if unsecured creditors will receive more than ten cents on the dollar. Only last September, this concern exhibited a statement showing a surplus of $37,000 over liabilities of $35,000. A charter was granted to the company in 1894, with an authorized capital of $95,000.——Another Toronto failure of considerable importance is that of the American Tire Co. A petition has been filed on behalf of an English firm for a winding-up order against the Company, which in its statement shows liabilities of $25,000 and assets only $8,200.

Since R. C. S. Johnston entered the stationery line at Petrolea in 1895 he has received considerable assistance from his mother, having but little means of his own. Now he makes an assignment.——In 1887 Wm. Watson commenced as a tailor at Stratford, without much capital. Two years afterwards he effected a settlement with creditors. Then the style of the firm was changed to Watson & Co.; they have assigned. ——There was once a farm laborer who worked hard and saved up about $300, then he went storekeeping. Now it looks as if he might have to go back to farming, for he has made a failure and an assignment. Chas. H. Pringle was the unfortunate's name and Baldwin is the place where his store was.——James M. Carnall purchased the hat and men's furnishings stock of R. P. Leask, in Hamilton, last March. The stock amounted to about $3,000. Now we hear of his assignment.——The bailiff is in possession of the confectionery stock belonging to Mrs. E. Newport, Hamilton.

The total exports of last year from St. John, according to Custom House returns, show an increase of a million and a quarter dollars over 1896. The Custom House figures, however, do not include American products transhipped at that city by the winter port steamers to the value of $1,271,663, and Canadian goods cleared at Upper Canadian ports and shipped at that port for the United Kingdom. These combined will constitute a big item and increase the exports nearly three million dollars. The total imports were valued at $3,440,338, and the duty collected thereon at $740,567; against imports of $3,513,157, and duty of $775,714 in 1896.

Mercantile Summary.

It appears that the operatives in the textile mills at Fall River, Massachusetts, have accepted the reduction in wages. A despatch of Jan. 3rd says the new wage schedule on a basis of 11 1-19 per cent. below that of the past three years went into effect that day in the mills, but no demonstrations of any kind have been reported, the operatives apparently being bound by the vote of the different unions to accept for the present.

London, Ontario, shows a fair record in the matter of new buildings erected or additions made in 1897. The list shows dwellings, stores and other structures erected to a value of $150,140, while alterations and additions came to $20,735. There has been a marked increase in the number of modern two-story and story and a half brick residences erected in that city during the present year.

From a recent issue of the Rossland *Weekly Miner* we learn that the final payment of $47,500 was made for the Porto Rico and the Lizzie B. claims by the Canadian Pacific Exploration Co., limited, a day or two before Christmas. The sale of these properties was made on December 16, 1896, by Messrs. Maxwell and Day to W. H. Courbold, the representative and manager for the C.P.E. Co. The price was $52,000, of which $4,500 was paid down and the balance made due in one year. These properties are on the headwaters of Slate Creek, a tributary of the Salmon River, at a point eight miles from Ymir. The ore is quartz, carrying iron and copper pyrites, assays $100 to the ton, and the vein is from two to four feet wide. A wagon road has been constructed from the mine to the Nelson & Fort Sheppard railway.

MUNICIPAL EXPRESSIONS OF OPINION.

Monday last, January 3rd, was the day on which, by law, the residents of Ontario municipalities elected their officers for the year, and also expressed their opinions by their votes as to proposals made upon new enterprises or other matters affecting the interests of their respective localities.

In Galt, four by-laws were submitted: one to raise $7,000 for market extension, one to raise $3,000 for new fire hall, one to raise $3,000 for hospital sewer, defeated by 129; and one to raise $1,800 for electric fire alarm. All four were defeated, strange to say.

In Toronto, the voters declared by a majority of 6,031 out of 24,000 votes cast, in favor of the abolition of all exemptions from municipal taxation, which is an example that is likely to bear fruit in the future.

Ottawa ratepayers adopted by nearly a thousand majority the giving of a bonus of $75,000 to the Ottawa & New York railway, to establish workshops in that city.

The market by-law was voted on by the ratepayers of Brantford, and was adopted by a majority of 504, the vote being 718 to 214.

At Owen Sound, the by-law proposing to make the Mechanics' Institute a free library was defeated by a large majority.

Sarnia, Port Colborne, and Welland all submitted to their citizens by-laws to provide waterworks for these towns, and like wide-awake, modern people, they carried the by-laws. At Bowmanville a fire engine by-law was carried.

The opinion of various municipalities in the County of Bruce was asked as to the establishment of a House of Refuge for the county. Walkerton, Kincardine, Lucknow, Teeswater, and Ripley all pronounced on Monday in favor of the proposal.

At Madoc, the Mechanics Institute by-law was defeated.

Voters in Tilsonburg defeated a by-law to buy a driving park, but approved one to furnish the Town Hall. At Brampton the good roads by-law for $10,000 was defeated by a large majority, while the Preston by-law to purchase the driving park for a town park was carried by a small majority.

THE FIRE LOSS OF 1897.

It is very satisfactory to find the fire waste of 1897, in the United States and Canada, less than that of 1896, as the waste of that year was less than in 1895. The total fire loss in the two countries for 1897 was $110,319,650, against $115,655,000 for 1896, and $129,869,700 for 1895. So says the New York *Journal of Commerce*, which for a number of years past has compiled the statistics of fires daily. The month of December is usually an expensive one to insurance companies. We find that the total fire loss in the United States and Canada was $11,328,650 for last month, against $7,189,800 for November, $11,362,000 for December, 1896, and $10,018,800 for the same month in 1895. Insurance men will read the total of the year with interest, for some of them were feeling blue over losses.

TORONTO, FRIDAY, JANUARY 7, 1897.

THE SITUATION.

As a result of his visit to Washington, Mr. Sifton is enabled to predict that the customs annoyances which have been felt at Dyea and Lyn Inlet will be satisfactorily arranged. So much he felt justified in saying in an interview with a Montreal journal. A strip of land along the frontier belongs to the United States, and over this a loose system of bonding, not always observed, it would seem, has been in operation at the two points of departure for the interior, Dyea and Skagway; for the mere machinery for carrying it out was somehow made so unreasonably expensive that, in certain instances, the costs charged by Americans were greater than the Canadian duties, which become payable at the inner end of the American strip of land, the frontier of Canada. If the goods were Canadian, and paid duty to the American customs, to avoid higher charges in the form of fees at either of the stations named, they by this act became American, and had to pay duty a second time when they got to the Canadian frontier. No wonder the miners complained of this state of things. Outfitters, in the two countries, sought their interest in this entanglement, not seldom without finding it. Each argued that his own country was the place to get supplies in. Uncertainty was everywhere. There is much room for amendment, and we trust that the particular plan in contemplation will be found to do all that is expected of it.

The relief expedition to the Klondyke will be a joint affair, American and Canadian. American citizens in that region being more numerous than Canadians will require most attention, and in this way the larger share of the supply and distribution will fall upon the Washington authorities. The American guards to accompany the expedition will be soldiers; ours, a part of the Mounted Police force, who are used to that kind of life, and well capable of withstanding its hardships. It is not generally believed that there will be much shortage of provisions among Canadian miners, and some contend that there will not be any. But as a doubt exists on the point it is only a matter of prudence to be on the safe side.

Next spring will see an immense rush from all quarters to the Klondyke, and doubtless the means of getting there will be improved as rapidly as possible. To what extent railway construction in that direction will be commercially justified is an untried problem. But nobody, so far as we can see, proposes to build a railway on commercial principles. The first thought of projectors is how much they can wring from the Government. Already, we may be sure, they are at work, trying to get promises on which to base their operations. This rush for the Klondyke will probably give new life to the corrupt and corrupting system of railway subsidies, in spite of the fact that the Government must feel the necessity of going slow in the road of borrowing capital for the purpose of giving away.

It seems to be admitted that when Great Britain refused to become a party to the sealing treaty agreed to by the United States, Russia and Japan, that instrument became of no effect, its vitality depending upon Great Britain becoming one of the signatory powers. In this state of the case, the United States was left to act alone in preventing her own people engaging in sealing at sea. All other countries, including Russia and Japan, remain at liberty to permit their subjects to engage in that occupation. What the United States could do, besides preventing her own citizens following sea-sealing under their own flag, she has done with a stringency that could not be surpassed. It is doubtful whether anyone can go into the United States with a sealskin garment on her back, without running the risk of its confiscation, unless she can prove her right to wear it, under the new law. As things go at present, seal skins legally taken by Americans are of no use till they have been cured, in England, the art of curing, strange to say, not having been mastered in the United States. This defect may be cured, in time, but meanwhile, even the Alaska Company will find that the obstructions of the recent Act of Congress will interfere with the movement of its peltry.

The most-favored-nation clause in British treaties can still be invoked in favor of equal treatment of all nations. With China, England has a treaty of this character; and just now, if report be true, it is being invoked to prevent much of the grabbing which no less than three countries are making, or trying to make, in China. England's reading of the most-favored-nation clause is said to be that if Germany obtains a naval station at Kiao-Chau, other nations can claim a right to a lease of land for the same purpose at the same place. In this light England becomes the champion of equal privileges for all nations, as well as for herself. This policy is bound to make her popular with all except those nations which have schemes for exclusive grabbing. It covers everything the United States could desire. The plea which England is making, in the case of China, is not in accord with the notion of preference, as between one nation and another; preference within the Empire is another matter, but the reasoning applied to the case of China does not tend to forward even that policy. French policy enforces preference with her colonies, but the colonial system of France is not extensive enough, or so conspicuously successful as to create alarm among other countries; with England and her wide-spread colonial system it might and almost certainly would be different.

What France has got in China is a lease, said to be for fifty years, of Kiao-Chau Bay and several square miles of adjacent land, with a right to exchange this place for some other on the coast at will, China to pay for any buildings that may have been meanwhile erected. Even here, the-most-favored-nation treaty clause might be invoked by other countries having such agreements containing that provision; other nations might claim similar leases, and England in taking that ground becomes the champion of equal trading facilities for all countries. In resisting the attempt to dismiss the English fiscal agent at Seoul she was standing on her rights. If the settlement gives Russia a co-agent, as alleged, it is a compromise. But the funds are invested in the name of Mr. Brown, the British agent, and the bank pays his cheques. Mr. Brown was appointed to this position in pursuance of a solemn engagement entered into by Russia in regard to certain money payments due to British subjects. England obtained control of the Chinese customs as a condition of a loan made to China, and when the last loan was made there was a stipulation to maintain the fiscal management that was then in operation. If she now makes the loan, for which China is asking, on the security of the land tax, the necessity for a British fiscal agent will be increased.

Ontario, fortunately for her, is not under any necessity of entering on any expensive work of afforestation; but she has a strong interest in preserving such timber-producing areas as are unfit for cultivation. How to do this, the Royal Commission appointed to deal with the subject makes several suggestions. The great danger of destruction of forests by fire waste is one which is much more difficult to deal with here than, say, in Germany, where forest fires seldom occur. The extension of the agency of fire rangers in Ontario is recommended. Without some such precaution as this, it would be useless to attempt to preserve permanently any portion of our forests; with it, the recommendation of the commission, that lands unsuitable for settlement ought to be so preserved, comes naturally and properly. There might be some difficulty in deciding what lands are, and what are not fit for cultivation; nearly every considerable area of country, in Canada, that has been successively opened to settlement, was underrated before it was so made available. But there are, doubtless, large spaces which it would not be difficult to class as valuable for timber growing, but not for agriculture. There are minor recommendations about arrears of licensees, and the minimum girth of trees that should be cut. Elsewhere we print a portion of the report of the commission.

At the dinner of the New England Society, at Delmonico's, Senator Wolcott made a speech which has set the gossips' tongues a-wagging. He related that he had met a mysterious personage, of English parentage he thought, thoroughly versed in the politics of Canada, and much concerned about a direct winter postal route to Europe. When the two had turned and twisted this subject, in every shape and out of all shape, their minds wandered off to the Klondyke region. Whether the Senator's interlocutor made any suggestion on this golden region, we are left to guess; but Senator Wolcott somehow became convinced that, at some future time, Canada and the United States will come to an agreement to exchange the State of Maine and a part of Vermont and New Hampshire for British territory in the North-West. In some mysterious way, hinted at as automatic, this exchange is to bring about a reciprocity of tariffs. This after-dinner utterance, which may have been intended as a joke, somewhat ponderous indeed, has been taken seriously in some quarters. There is no reason why the Senator's suggestion should be taken up as a subject for serious discussion.

From time to time the commercial section of the French press recalls Sir Wilfrid Laurier's reference to the project of direct steam communication between France and Canada. He is quoted as saying that Canada would, if necessary, vote $200,000 for this purpose. France, as well as England, feels, and feels bitterly, the pressure of German competition, and is on the outlook for new markets; many believe that direct steam communication would help much to extend the trade of France with Canada. But there can be no direct line unless France is willing to do her part towards setting it up and keeping it afloat. French capitalists make no sign of being willing to embark in the enterprise at present, and no one can tell when they are likely to be. If there be any truth in the rumor that Mr. Chapleau will be sent to France as Commercial Agent of Canada, we may look, if not for some new policy, for increased activity in an old one. Countries which have numerous commercial agents abroad have the advantage over us which results from an aggressive commercial policy. Canada, owing to her position as a colony, has not the status which entitles her to appoint consuls in foreign countries, but she is at liberty to send commercial agents there. That she ought to do so there is a growing feeling, which, for all we know, may be nearing the point of realization.

CANADIAN BANK CLEARINGS IN 1897.

Bank clearings reflect business transactions, and the larger business of all kinds done in Canada in 1897 than in the preceding year is nowhere better shown than in the figures of the clearing houses. Montreal, whose total transactions exceed $600,000,000, shows an increase of nearly seventy-three millions; Toronto of more than twenty-seven millions, and Winnipeg of twenty millions, and so on, every city showing an increase. We cannot compare St. John, because until May, 1896, St. John had no clearing house. The total for the year, exclusive of St. John, exceeded the total for 1896 of five cities by $125,928,000, which represents an increase of business transactions equal to almost two and a half millions of dollars per day. And if there were any profit in this business the country must be better off by reason of it—a proposition which will hardly be doubted by any one who looks at the statistics of deposits. We give below the clearings, by cities, for three years:—

	1897.	1896.	1895.
Montreal	$ 601,185,000	$527,851,000	$583,160,000
Toronto	369,824,000	342,031,000	306,239,000
Winnipeg	84,435,000	64,146,000	55,873,000
Halifax	63,112,000	59,867,000	60.587,000
Hamilton	33,350,000	32,065,000	34,108,000
* St. John	29,982,000	....	....
	$1,181,888,000	$1,025,960,000	$1,039,967,000

* St. John established May, 1896.

So pronounced an enlargement of the volume of business as $156,000,000 in 1897, shown concurrently with a decrease of several millions in mercantile failures, may well have an inspiriting effect on our manufacturers and merchants.

STOCK EXCHANGE TRANSACTIONS.

Elsewhere is presented a table of transactions on the Toronto Stock Exchange in fifty or sixty stocks during the year just closed. It has been compiled by Mr. Lyndhurst Ogden, the secretary, under the authority of the Exchange Board, and shows the highest and lowest points reached by each security during the twelve months. It is to be noticed that with respect to banks and the miscellaneous shares in the list, the lower values prevailed at the beginning or during the earlier months of the year, and the highest point was reached generally in the fall months. This was not so much the case in loan company shares, though it might have been expected to be, the harvest then impending; half a dozen kinds of them touched their lowest point in December.

Some of the stocks dealt in showed a remarkable variation. Bell Telephone, for example, which began the year at 156½, went up in the autumn to 173, and in December touched 174½. Montreal Street Railway shares were as low as 211 in May, but went to 226½ five months later. Toronto Railway showed a difference of twenty per cent. in the course of the year, 68¼ being bid in January, 78 paid in June, and 88 in December. Fire Assurance stocks were pretty active, Western beginning the year at 155¼, touching 171 in September, closing the year at 164¾. British America had a very similar course.

It may be said, generally, that the better prices of securities betokened the improvement in commercial and industrial affairs as the year advanced. Certainly, it was an active year for the brokers, for the number of shares which changed hands on the Toronto 'Change was unprecedented. Last year's total shares dealt in was 246,615, where in 1896, the total was only 139,104, and it was 234,770 in 1895. It is to be noted that several mining stocks have been listed here; transactions in them, however, have been limited. The level of prices in bank and miscellaneous stocks was higher last year than during 1896, but that of mortgage loan companies was lower.

THE FAILURE LIST.

It is agreeable to find that the mercantile failures of the year in Canada show a substantial reduction in both number and aggregate amount. The failures of 1895, according to Bradstreet, namely, 1,876, owing $15,347,000, had increased in 1896 to 2,179, owing $16,208,000. But last year the number of failures was 1,907, with liabilities of $13,147,929. An allotment of them into provinces for two years gives the following comparison:

	1897.		1896.	
Province.	No.	Liabilities.	No.	Liabilities.
Ontario	866	$5,201,159	930	$5,024,476
Quebec	699	5,999,743	870	8,158,426
New Brunswick	62	380,667	81	597,311
Nova Scotia	181	976,729	155	782,520
P.E.I.	10	84,292	23	125,737
Manitoba	43	470,397	29	323,599
Northwest Territory	10	78,342	19	104,085
British Columbia	66	356,600	72	1,092,306
Totals, Canada	1,907	$13,147,929	2,179	$16,208,460

Ontario shows a reduction in number of failures, but no decrease in liabilities, while Quebec is able to show a decided reduction in both. New Brunswick, Prince Edward Island, and British Columbia all exhibit an improvement in the list, inasmuch as they have fewer failures and smaller liabilities than in 1896, but Nova Scotia and Manitoba reverse these conditions. There is no improvement, but a slight decline in the proportion of assets to liabilities. It was over 40 per cent. in the previous year; it is slightly under 40 per cent. this year. Both wholesale and retail merchants may find some comfort for the future in the fact of a lessening in failures during 1897.

NOVEMBER TRADE.

The trade returns of the month of November are most gratifying, showing an increase in both imports and exports with a substantial improvement in the revenue collected from dutiable goods. Canada has not only imported larger quantities of textile goods, but also more of raw cotton and wool. These latter purchases bear out the reports we have received from the manufacturers that Canadian textile mills are, as a rule, busily employed. There has been an increased importation of provisions, leather and leather goods, earthenware, drugs and coal. A most marked improvement has taken place in the trade in metals and metal manufactures with foreign countries, which is mainly due, we suppose, to the greater activity in railway construction and ship-building. The imports may be classed as follows:

	Nov., 1897.	Nov., 1896.
Dutiable goods	$5,310,732	$4,609,170
Free "	4,936,905	3,854,381
Coin and bullion	232,673	229,100
Total	$10,480,310	$8,692,651

In November, 1897, the revenue from import duties amounted to $1,607,202 as against $1,421,342 in the corresponding month, 1896. We append a table of the value of the principal imports:

PRINCIPAL IMPORTS.

	Nov., 1897.	Nov., 1896.
Cottons, including cloths and thread	$225,411	$175,681
Cotton, waste and raw (free)	801,229	756,697
Fancy goods	91,810	87,187
Hats, caps and bonnets	28,769	20,304
Silk goods	121,871	66,077
Woolens, cloths, carpets, yarns, knit goods	253,721	176,282
Wool (free)	163,033	62,492
Furs and manufactures	25,743	29,394
Books and pamphlets	109,274	102,977
Breadstuffs, grain, flour and meal	85,785	102,741
Coal, bituminous	204,613	211,925
" anthracite (free)	686,328	611,143
Drugs and medicines	151,987	117,434
Earthenware	66,897	59,358
Metals and manufactures	47,453	23,393
" (free)	560,702	322,830
Iron and steel manufactures	1,006,941	682,522
Leather and manufactures	155,217	125,999
Oil and paints	189,436	199,515
India rubber and gutta percha	25,554	18,005
Provisions	108,931	51,906
Sugar	334,401	523,875

The aggregate foreign trade of Canada for the five months of the current fiscal year ending November 30 shows an enormous increase, being in excess over the same period of last year of nearly $23,000,000. This amount is mainly caused by larger exports. In the first five months of 1896 the exports (the produce of Canada) had totaled $60,968,867, as against $75,382,839 in the same period of the previous year.

Exports for November show a marked increase, although some of the items, such as forest products, dead meats, animals, etc., show a decline. The totals are $17,475,362 in November, 1897, as against $15,567,804 in November, 1896. The increase in field products exported is marked, being from $4,203,389 to $6,930,148; fisheries, manufactures and produce of the mine also show more or less growth. Coin and bullion exported amounted to $119,375 in November last, as compared with $50,425 in the preceding November.

SHORTER CREDITS IN THE HARDWARE TRADE.

For some time the wholesale hardware merchants of Canada have been attempting to reduce the terms of credit. It has been found impossible to accomplish this end by individual action, and the more important houses in various cities have united in the attempt. A circular letter bearing date January 3rd, has been sent out to the trade, which contains this announcement:

"We beg to notify you that our terms of credit for shelf and heavy hardware and metals, to purchasers in the Provinces of Ontario and Quebec and the Maritime Provinces, will not exceed four months, 3 per cent. 30 days."

The movement has the support of the wholesale trade generally, the circular being signed by 78 merchants and manufacturers of Montreal, Toronto, Quebec, Halifax, St. John, London, Hamilton, Ottawa, Sherbrooke, Levis, St. Catharines, Sarnia, Guelph and Amherst, N.S. The jobbers have found that they can no longer purchase supplies from manufacturers on the old terms of long credits and must in self-defence alter their selling arrangements. If the retailers in the different towns and cities make of this an opportunity to put their own business affairs more nearly on a cash basis, the agreement will prove of immense value to the whole trade, wholesale and retail. It is to be hoped that secret violations will not characterize this arrangement, as such irregularities must prove of immense injury to wholesale and retail dealers alike. Unfortunately too many similar movements in other trades have been destroyed by a few houses failing to maintain their obligations. The efforts of the trade are now being directed towards the preparation of a uniform list for forward dating and seasonable goods.

THE COAL SITUATION.

For some time a change in the conditions of the coal trade has been gradually taking place. While the consumption of anthracite has been decreasing, that of bituminous coal has been on the increase. This is due to various causes. There has been a competition in domestic heating on the part of the gas companies, and they use bituminous coal to generate power. Many of the large consumers of coal for heating purposes in the city of Toronto, for instance, University College, the T. Eaton Co., the Union Depot, have found it to their advantage to arrange their furnaces for the burning of bituminous, instead of, as formerly, anthracite coal. The partial success of smoke-consuming appliances has had a beneficial effect upon the bituminous coal trade, while the reduction of railway rates has contributed to a reduction in cost.

There has naturally resulted a depression in anthracite circles. Mr. Frederick E. Saward, an authority on the subject in the United States, writing of the situation in the Pennsylvania district, says :—

> It was considered by the conservative element in the trade that there would be a market for 38,000,000 tons of fresh-mined coal in 1897 ; this with the quantity carried over from the preceding year, as has been the case, (and it was a large tonnage carried into 1897), would be sufficient to meet the requirements of the market and enable the producers to secure a profitable return on their investment. In the first six months of the year there was unanimity of action upon the important point of keeping the product within the demand, but after that time there was the usual repetition of all such affairs. Having put business in a position where prices are good, it is found that there are always parties who fancy that the market will take any quantity at that price. Such folly prevailed in the hard-coal trade this year, with the usual result. Circular prices really amounted to very little during the entire year, and in this respect the season was a peculiar one. In January [1897] the list was supposed to be $3.75 for broken, $4 for egg and chestnut, and $4.25 for stove—merely nominal figures—and 5 per cent. off was the rule. By April there was some effect realized from the idea of restriction, and these prices were more nearly had. By July the producers felt their position to be strong enough to make a new list, showing an advance of 25 cents per ton on the above tide-water figures. Owing to the heavy tonnage done in July and August, this result was not realized, and the price list fell flat upon the mind of the buyer. It was at first thought to overcome this condition of affairs by a new list on September 1st, showing a further advance on paper, but this notion was checked by the efforts of the conservatives in the trade and the effort made to hold the April idea of prices as far as possible.

The trade for 1898 remains in an unsettled condition. It is reported that the allotments of 1897 to the different companies, which were practically those of 1896, will be continued during the coming year.

INSOLVENCY LEGISLATION.

It is proposed to hold a conference of all Canadian Boards of Trade, with a view to making united representations to the Dominion Government as to the urgent need for insolvency legislation. For some little time, correspondence has been going on between the Montreal and Ottawa Boards of Trade with this object in view. And a conference has been held within the week in Montreal between representatives of the Montreal, Toronto and Ottawa boards, to consider the subject. After full discussion it was decided to issue a call for a meeting early in February, to be held at the Board of Trade in Montreal. Representation at this meeting to be based upon the number of a board's membership, one delegate and one vote being allowed for each 100 members.

We understand that a circular is in preparation which will be sent to each Canadian Board of Trade, inviting attendance at the meeting and outlining certain general principles laid down for insolvency legislation. Each board will be asked to consider these beforehand, so that their delegates may be prepared to vote thereon at the meeting. The vote will thus, it is thought, fairly represent the commercial views of the country. Such a method is likely at any rate to elicit the views of business men.

MATURING SHARES.

A subscriber who remarks upon the attention which THE MONETARY TIMES has given to the elucidation of assessment insurance writes as follows : " I would like to hear from you in regard to a certain class of loan companies that sell stock on the instalment plan. Small amounts being paid monthly for ten years, at the end of which time all amounts are to be returned with interest at from 8 to 12 per cent. compounded. It seems to me that either the borrower is being robbed or the company can't mature their stock. Unctuous agents, who sell the shares, inform the intending purchaser that all payments can be withdrawn in such and such a time, and when that time comes, the investor receives a letter like the enclosed."

Here is the letter he encloses us :

> TORONTO, Dec., 1897.
>
> DEAR SIR,—Enclosed please find the usual acknowledgement for remittance, which came to hand yesterday.
>
> Referring to your wish to withdraw, we may say that the by-law in reference to withdrawals was changed at the first annual meeting, held in February, 1896. The by-law, as it now stands, does not allow withdrawals until thirty-six monthly instalments have been paid, when the holder can withdraw the whole amount paid in, together with five per cent. added for the average time the money has been invested.
>
> Under the old by-law you could withdraw at twenty-four months but no interest would be added.
>
> Yours truly,
>
> ————, Secretary.

Of course such companies do not want any one to withdraw ; hence the by-law mentioned preventing it. Something of the same kind is done by other companies, the York County for one, if we remember rightly. If a person goes into such a concern he must abide by its rules. " If people are going to get scared and drop out, we don't want them," was said to us by a well-known director of one of these companies ; " if they will only *stick* and pay up, we can mature our shares." Now this is the very point in doubt in our correspondent's mind ; can they mature their shares ? This does not seem to admit of a definite answer on this side the border, for we do not know of any of these societies long enough in existence to make a test. But the New York *Evening Post* had, not long since, a list of twenty or thirty such concerns in the States which could not, but went to the wall.

Unhappily, the members do not all " stick ; " and, unhappily, it is not possible to avoid bad debts, as some of the managers of these concerns would have us believe. A borrower from such a society does not get his money cheaply ; he pays from 10½ to 12 per cent. Then he pays a sum every month for expenses. And besides, he does not get the use of all the money he is paying interest for. Suppose he applies for a loan of $1,000 for six years ; he does not have the use of that $1,000 for six years, because he is paying back part of it to the society every month or fortnight. He actually gets the use of only about $640. The rest is interest.

MONTREAL AS A BORROWER.

"The further increase [of taxation] as contemplated would seriously damage the city's credit, driving away business, depreciating the value of property, and thereby impairing its power to meet the burden of taxation in future years."

Such is the conclusion of the protest made by the Bankers' Section of the Montreal Board of Trade, and telegraphed to the city's representatives in the Quebec Legislature, against the proposals made that the city of Montreal borrow money for the Bonsecours market scheme and the widening of St. Antoine street west and Notre Dame street east. It is a strong protest, but none too strong under the circumstances, which are these:

So profuse have been the expenditures of the municipality of Montreal of late years and so rapid its borrowings, that the debt of the city is now some $26,000,000, which is equal to more than 17 per cent. of the assessed value of tax-paying property within the city limits. And it exceeds the limit set in 1894 by Act of the Legislature of Quebec, which was $24,000,000; namely, the city is prohibited by this Act from borrowing more than 15 per cent. on $160,000,000 assessed value of taxable property. Now, while the assessed value has not reached he amount stipulated, the debt has exceeded the limit. And the bankers' section of the Montreal Board of Trade "does most emphatically protest against all proposals now before the Legislature whereby the present liability of the city shall be increased, unless such increase is provided for by special taxation."

Nor are the bankers alone in their protest. A special meeting of the Board of Trade council assembled to protest against this borrowing scheme, and sent a deputation to appear before the Legislature and oppose it. Surely it is time. From a detailed statement of the $2,866,061, which is the amount appropriated for the municipal expenditure of Montreal for 1898, no less than one million and sixty thousand ($1,060,305) is for interest upon the city debt—exceeding what is paid for schools, police, roadways, fire protection, light and water services all put together. It is high time to call a halt. And the Quebec Legislature will do well to heed the protests of capable and earnest citizens and refuse to sanction expenditures that Montreal cannot afford, and that neither its council, its representative merchants nor its bankers approve.

MINING VENTURES OFFERED IN BRITAIN.

We have met people who say, with respect to the procuring of English capital for industrial purposes, or for any other sort of enterprise: "You can raise money in London for anything under the sun: it is all a matter of knowing the ropes." This may or may not be true. We should be disposed to say it is not true if we were not aware of some very startling things successfully done in this direction—and not always by colossal misrepresentation, either, in the great money market of London. But what we wish to say at present is that Canadians should be careful not to rely too firmly upon the power or disposition of the London money market to absorb any and all propositions put before it; not to overstate the prospects or understate the risks of a venture offered there; not to think they can easily "gammon" the keenest financial Hawkshaws in the world because certain unscrupulous Americans of a former day did great things by "salting" mines or cooking accounts. Even if a Canadian has a proposal to make which there is every reason to believe will prove a sound and remunerative one, he will act unwisely if he puts it forward with too great a flourish of trumpets. Statements of probable values or earnings that have an exaggerated look, or that contain tall talk, are sure to be discounted.

Some few things recently appearing in English and Scottish papers touching upon Canadian and other ventures of the kind, are significant in this connection. We recall the tone of a criticism made by one journal, the London *Shareholder*, if we mistake not, respecting an advertisement of the Rainy River and Ontario Exploration Company, limited, capital £150,000 sterling, occupying a whole page of the *Financial Times*, of London, on 22nd November last. The criticism was something like "The lady doth protest too much methinks." Promoters have a right, of course, to put the best of their apples on the outside of the basket. But looking to the future, and having regard to the attention now being awakened to Canadian mining enterprises (we do not speak of "Klondyke ventures, Yankee or other," about which people in Britain seem disposed to go wild), it is not the part of wisdom to act as if there were neither common sense nor business shrewdness among investors or their agents in Britain. The *Economist* of the 18th December, in an article entitled, "The Rush of Companies," has this to say about a project then upon the market:

"The British American Corporation, which we may next take, is an undertaking whose *raison d'etre* is not easily discoverable. It invited subscriptions to a capital of £1,500,000, not, however, from the general public, but from the shareholders of the London and Globe Corporation, by whom the new company has been brought out. The business of the new corporation is to be principally directed to operations in British America, and we are told that the London and Globe has incurred heavy expenditure in securing various options, concessions, and properties, and that it intends to co-operate with the new venture. In these circumstances, it is difficult to see where the necessity for the new company arises.

And in its issue of December 25th, the same journal says, in writing of capital applications in the past year: "Of the exploration ventures, the British American offshoot of the London and Globe Company accounts for no less than £1,000,000."

FREIGHT RATES REDUCED.

The Canadian Pacific Railway Company has carried out its agreement with the Government undertaken at the letting of the contract for the building of the Crow's Nest Pass Railway. The articles of commerce to be thus affected were specified in the Act of Parliament passed at the last session, and the amount of the reduction was also fixed. It is in conformity with that agreement that the Canadian Pacific now issues the reduced freight tariff. The reductions have been made in three divisions.

The articles under group one of the new tariff and carrying the 10 per cent. reduction are:

Agricultural implements of all kinds, set up or in part. Cordage and binder twine.—Small cord and twine, rope, rigging, clothes lines, binding cord for harvesters, in bales or boxes, lath yarn. Felt.—Boiler and pipe covering, roofing. Furniture, household, new and old. Glass.—Window, plate, boxed, loaded in box cars; plate, packages over five feet long or wide, in box cars, at owner's risk, shippers' signing special plate-glass release form; plate, requiring the use of a flat or gondola car for carriage—(Rules 3 and 6 not to apply). One case, minimum weight 12,000 lbs.; two or more cases, minimum weight, 20,000 lbs.; same—when shipped at owner's risk, shippers signing special plate-glass release form. One case, minimum weight 12,000 lbs.; two or more cases minimum weight, 20,000 lbs.; ribbed, stained, ground, enamelled, leaded, colored or embossed, boxed O.R. released; common window, under 80 united inches, boxed, O.R. released; 80 united inches or over, O.R. released. United inches means the length and breadth of the package added together. Iron, including bar, band, Canada plates, galvanized, sheet, pipe, pipe fittings, nails, spikes and horse shoes; bar, band; Canada plates, galvanized iron, horse shoes, nails and spikes, in kegs, boxes or cases, nails and spikes in bags, nails and horse shoes, in boxes or kegs, in mixed car; pipe, wrought iron, all sizes; pipe fittings or connections (iron) such as joints, ebows, Y's; pipe fittings, N.O.S., in boxes, kegs or bbls.; pipe, cast iron, under 5 inches diameter;

pipe, cast iron, 5 inches diameter or over, inside measurement; sheet iron. Paints of all kinds and oils.—Oil in glass or stone, well packed, O.R.; oil in kegs or cans, securely boxed, O.R.; oil in wood, O.R.; oil for machine or lubricating purposes in wood, O.R.; paints, dry, in boxes, barrels or kegs; paints, in oil, in cans, jacketed, loose, O.R., of leakage; paints, in oil, in cans, or pails, boxed, crated or packed in barrels; paints, not otherwise specified, in bbls., kegs, drums or irons; paints, in buckets; paper, building and roofing; wire, all kinds; woodenware.

The second group bearing the 20 per cent. reduction is coal oil. Coal oil in glass or stone, well packed, O.R.; coal oil in kegs or cans, securely boxed, O.R.; coal oil in wood, O.R.

The third group carrying the 33 1-3 per cent. reduction includes all kinds of fruits, as follows: Apples, green, only carried at owner's risk of freezing; must be prepaid and released between the 1st November and 30th April, as follows: Apples in bags or boxes, apples in barrels, to be taken at 165 lbs., pr bbl.; cranberries, prepaid, O.R.; oranges and lemons, in packages, O.R. must be prepaid and released between the 1st November and 30th April. Fruit, fresh, in baskets, O.R., prepaid; fruit, fresh, in boxes or barrels, O.R., prepaid; fruit, fresh, not otherwise specified, prepaid, O.R. released; fruit, mixed cars fresh fruit, including apples; fruit, grapes, pressed in barrels, for wine-making purposes.

These reductions should prove of material advantage to the farmers of the West, and will also be appreciated by Eastern merchants.

APPLE SHIPMENTS.

From the standpoint of values, which in the eyes of the trade are all important, the present apple season is proving very satisfactory. The markets of the United Kingdom have offered a profitable outlet for the supplies of exporters in Canada and the United States. The shipments from the principal ports through which Canadian apples find their way abroad, for the past number of years, according to the compilation of Mahlon Terhune, a trade authority, are as follows:—

Date.	Montreal.	Portland	Halifax.
1880-81	145,276	39,908	24,250
1881-82	56,433	6,497	13,805
1882-83	64 390	16,890	18,542
1883-84	7,445	9,811	3,758
1884-85	84,487	71,460	41,207
1885-86	68,716	87,301	37,982
1886-87	106,713	100,569	94,606
1887-88	93,058	25,215	32,652
1888-89	291,307	145,825	94,691
1889-90	162,526	122,433	53,627
1890-91	182,095	80,365	89,199
1891-92	320,427	163,145	87,379
1892-93	429,243	235,396	116,725
1893-94	56,255	49,344	35 058
1894-95	273,353	155,878	264,410
1895 96	128,027	141,955	165,797
Boxes	1,861	......	......
1896-97	100,274	221,350	409,733

In the above estimates the season is considered as extending from the gathering of the apples in the autumn, usually the month of September, until the early spring. The shipments from Boston in 1896-97 are estimated at 1,015,029 barrels, and from New York at 570,327 barrels.

We have been enabled to compile, through the kindness of Messrs. Peterson, Toronto, the shipments made from the beginning of the movement of the 1897 crop until the close of the year. The exports by ports were: Montreal, 159,662 barrels; Halifax, 43,993 barrels; Portland, 34,266 barrels; New York, 246,123 barrels; Boston, 131,600 barrels. It must be borne in mind that while shipments by way of Montreal have ceased for this season through the closing of navigation, the movement still continues at the other ports, and figures compiled in the spring of 1898 will show a much greater year's export.

OUR TRADE WITH BERMUDA.

That Canadian trade with Bermuda can be increased if the inhabitants of this country are prepared to take the necessary energetic steps, is apparent from the reports of officials and others interested in extending the foreign trade of the Dominion. Referring to the relative positions of Canada and the United States in the trade of that island Mr. H. B. Small, an ex-secretary of the Department of Agriculture, says: "Where one barrel of Canadian flour is seen, a dozen bear the brand of Minneapolis or some other United States place. Butter from the United States is sold retail at from 30 to 35 cents per pound." Mr. Small thinks that Canadian butter if put up in one or two pound boxes would find a ready sale. The Commissioner of Agriculture, it is said, will send by the steamer "Beta" from Halifax trial shipments of butter in one and two lb. tin boxes, from the Government dairy station at Nappan, Nova Scotia. A number of the merchants in Bermuda have cold storage facilities on their premises. Large quantities of cheese are consumed It principally comes from the United States, the retail price being from 18 to 20 cents per pound. There is a large demand for eggs all year round; fresh eggs were at the date of writing (Dec. 22nd) being sold retail at 48 cents per dozen. Stored eggs were 39 cents per dozen, and seldom go below 25 cents per dozen.

Mr. Small says there is also among the Bermudians a good demand for bacon, hams and dressed fresh beef. Apples are in a limited demand; and the trade in these is already mostly in the hands of Canadian firms. Pressed hay is largely imported by the islands, retailing at $1.12 per hundred pounds.

THE LONDON DISASTER.

London, Ontario, has been particularly unfortunate in the matter of death-dealing accidents upon a large scale. The Victoria steamboat accident was a shockingly memorable one, the inundation caused many deaths, and the collapse of the city hall floor on Monday last, when twenty persons were killed and more than a hundred wounded, was a dreadful close to what was intended to be a municipal rejoicing. With respect to the alleged lack of proper support to the floor of the hall at the point where the collapse took place, the city engineer explains that while it is true that a brick wall used to support the particular portion of floor, and it was removed and replaced some years ago by a beam, this beam was in ordinary circumstances adequate, being 12 by 12 inches, and of sound wood. But the excessive crowding and the stamping of feet, as the inmates cheered the speakers, caused a strain upon the beam which caused it to break in the centre. Many messages of sympathy have gone to the stricken city; offers of assistance have been made, too. But the authorities of London manfully reply: "We can take care of our own, and will see that no one shall suffer want."

"WHAT IS CANADA?"

An American writer, referring to recent international negotiations, asks: "If Canada is a dependency of the British Crown, how can her foreign relations be separated from those of the Empire? If a treaty or agreement made with Great Britain is not binding throughout the extent of the Empire, of what value is such an instrument?" As a rule, the foreign relations of Canada are not separated from those of the Empire. This rule is suspended, if Canada elects not to come under any commercial treaty which England is negotiating, a liberty which she has enjoyed for some years. The value of an international agreement containing this exception is understood by the party making it with Great Britain, or it would not be made. With this exception, Canada does not pretend to settle her commercial relations with other countries, by way of treaty, without reference to Great Britain; but the Mother Country and the dependency acting diplomatically in unison, each practically gets its own way, in its own sphere. Formerly when the trade of the British colonies could be shared only by other countries which also possessed colonies, the regulation had reciprocity for its basis, each country having the right to trade with the colonies of the other. When the restrictive part of this arrangement was dropped, a privilege to countries which did not possess colonies to trade with the West Indies was granted. But the inclusion or non-inclusion of a particular colony in a commercial treaty has, from first to last, continued to be the rule. Formerly the right of choice lay with the Imperial Government; now, in cases where her own interests are concerned, Canada has the right to say whether she will be included in a particular British commercial treaty when it is being negotiated. There is no mystery about the diplomatic position of Canada, and no inconsistency in Lord Salisbury's method of dealing with her rights or those of other colonies in their relation to foreign powers If Canada assumed, as Newfoundland did, to make a treaty with a foreign government without reference to the rules of British diplomacy, the irregularity would be signalized, in her case, as it was in that of the island of Newfoundland.

HOLIDAY REMEMBRANCES.

We have much reason to be gratified with the many tokens of kindly remembrance of THE MONETARY TIMES, on the part of its friends at the New Year season. In addition to scores of letters from subscribers containing complimentary remarks or good wishes, many advertisers or correspondents have favored us with Christmas cards, calendars, desk accessories and various kindly memorials. We thank them all; and like the old darkey who set himself to comfort his missus in a long fit of depression by saying to her, "Look up, honey; an' look out—the sun don't keep hisself on de floor ob yo' house. *Hit's in de sky*—yes, indeedy." We would say: Look up and look out, for the good time coming in business. To some it has already come.

The calendar of J. & T. Bell, of Montreal, shoe manufacturer, is a dainty piece of design and execution, and the Toronto Radiator Company's tinted and embossed "good wishes" for the New Year are quite *recherche*, so to speak. A copy of "The People's Almanac" comes to us from the Belleville *Intelligencer*, and a beautiful pamphlet, entitled "Glimpses of the Maritime Provinces," from James S. Neill, Fredericton. The Standard Life sends a handy desk pad, and of calendars we have received our full share, notably from the Equitable Life, the New York Life, the Royal, the Sun, the Ontario Mutual Life, the Federal Life, the Whitman & Barnes Manufacturing Co., St. Catharines; Alling & Cory, paper dealers, Rochester; Jacob Stern & Sons, wool dealers, Philadelphia; the Galt Knitting Company.

OYSTER CULTIVATION.

That strenuous efforts have been made by the Dominion Government to improve the oyster beds of Canada is well known to our readers. In other producing countries, attempts are also being made to stay declining production, from which we may possibly obtain some information. Oyster culture has been carried on in Jersey satisfactorily, the fish growing at a normal pace, their shells being remarkably neat in form and the oysters of first quality. We learn from a French Consul's report that the St. Clement's beds now contain about four millions, of which half-a-million have reached condition, whilst no fear is entertained as to the future success of the enterprise, owing to the careful selection of the site, which guarantees the oysters free from all contact with contaminating matter. The young oysters which were located last year, and then were only equal in size to a finger-nail, have grown to two inches, and whereas a thousand then only weighed three pounds, they now weigh twenty-one pounds. The larger oysters put in in May, 1895, went seventy pounds per thousand; after two years in the beds they weigh 160 pounds, and have all the characteristics of the finest fish. The Consul also states that lobster beds are projected.

BRITISH COLUMBIA LUMBERMEN DISSATISFIED.

The British Columbia lumber interests are in arms against the inequality of the tariff laws of Canada and the United States. For the past four or five years the mill owners on the Canadian Pacific coast have not prospered. Their position is certainly a difficult one. In a letter to the Dominion Government a number of the prominent members of the trade outline the situation as follows: "The very same products that we manufacture are manufactured in those States lying to the south of us; their manufacturers have every facility for reaching our main Canadian markets that we have; they buy nothing from us; they are able to purchase machinery and all mill supplies from 20 to 33⅓ per cent. cheaper than we can; their general cost of living is about 25 per cent. cheaper than with us; consequently, they are enabled to manufacture cheaper than we can."

As in the Eastern Provinces, the British Columbia owners of sawmills are constantly subjected to losses by the Americans dumping large quantities of lumber in this country to preserve the home market. The supply is irregular, and while of only temporary advantage to consumers, causes serious injury to manufacturers. It is said that several British Columbia firms contemplate removing to the State of Washington if the Canadian tariff be not altered at the coming session of Parliament. At a recent meeting of manufacturers the following resolution was passed:

"*Resolved* that, while admitting our willingness to take our chances, should a reciprocal arrangement be made between the Canadian and United States Governments, placing lumber and shingles on the free list, we are of the opinion that the present tariff on these articles is eminently unfair to us, and, we submit, quite unpatriotic. It is, further, the opinion of this meeting that the peculiar conditions of our industry in this Province are not sufficiently understood by our Government, and that a memorial be presented to the Dominion Government, praying that an import duty be imposed on lumber and shingles, similar to the import duty imposed by the United States."

FIRE AND MARINE INSURANCE.

At a meeting of the marine underwriters of Montreal last week at the Board of Trade rooms, there were present: Mr. E. L. Bond, in the chair, and Messrs. W. A. W. Burnett, G. Lomer, J. J. Riley, jr., and J. H. H. Routh. The president submitted his report of the business done during the past year, and, being approved, it was ordered to be printed in the Board of Trade annual report. Matters pertaining to pilotage and wharf accommodation and the shipping of inward cargo were discussed at some length. The following officers were elected: Mr. E. L. Bond, president; Mr. J. H. Routh, vice-president; Mr. W. A. W. Burnette, treasurer; and the executive committee nominated as follows: Mr. J. H. Routh, Mr. C. E. Gault, and Mr. Robt. Bickerdike.

A fire that was almost destructive enough to cause a flutter in the American wheat market occurred on Tuesday last at Stockton, California. Very early in the morning fire destroyed warehouses 5 and 6 of the Farmers' Union and Milling Company at that place, and 10,000 tons of wheat are reported destroyed. The loss is placed at $500,000, and at last accounts the wheat was burning, although the fire in general was under control.

The Montreal fire department were by no means idle during 1897, for in that year they answered 708 alarms, against 683 for the previous year. There were many serious fires in the city, too. Four of them lasted over two hours and fifteen over one hour. From the insurance companies' point of view the fire in Messrs. Crathern & Caverhill's, on January 14, was the most serious. There were three deaths in the department during the year: Capt. Nolan, Capt. Sparling and Fireman Lautermann.

There is a grim satisfaction in hearing that John McIntyre, one of the Windsor incendiaries, was found guilty on Tuesday last by Judge Chipman, at Windsor, and sentenced to five years in Dorchester penitentiary. If he had been also sentenced to be flogged, few would have been sorry. The other man, Fletcher, also supposed to have been concerned in starting the conflagration that almost destroyed the beautiful Nova Scotia town, was to be tried on Tuesday. We have not heard his fate.

It has been arranged that the superannuation fund of the Montreal Fire Brigade shall be increased from its present figure of about $12,000 until it reaches at least $25,000. It is some years since the city council voted $10,000 in aid of the fund, but it has not increased to any great extent. The Firemen's Benevolent Association, in connection with this fund, has now a bill before the Quebec Legislature asking for certain additional powers. It has been arranged that on and after January 1st of the present year, three per cent. will be deducted weekly, monthly, or otherwise, from the wages and salary of every employee in the Fire Department for the benefit of the superannuation fund.

LIFE INSURANCE MATTERS.

The enormous extent of the business of some of the United States life offices is illustrated by the statement made public on New Year's Day that, upon the closing of their books on 31st December, the New York Life Insurance Company reported over one hundred and thirty-five millions of new paid for insurance in 1897, and a net gain of over fifty millions in insurance in force.

It is stated in the *Quarterly Journal of Inebriety*, published at Hartford, Connecticut, issue of October, 1897, that several prominent life assurance companies refuse to consider an application from a "graduate" of a Keeley-Cure establishment, no matter how good a risk otherwise the man may seem, or how little of an inebriate he may have been. The reason given is that persons who have undergone this "treatment" are prone to premature death, due supposedly to the severe drugs used.

An extensive building enterprise is to be carried out in Chicago by the Union Mutual Life Company of Maine. That corporation is owner of the old Chicago University ten-acre lot, a very valuable piece of real estate. The company proposes to erect on this land 83 residences, the total cost of which will be in the neighborhood of $600,000. A Chicago paper says that the work will begin early this year, and when completed the residences will be placed upon the market at prices ranging from $8,500 to $15,000 in time payments. The company thus expects to realize 4 per cent. upon its investment. The land in question came into its hands several years ago by process of foreclosure.

"Canada First" is the belief of many in matters of business, as well as in politics. And this sentiment has been shrewdly taken advantage of by the two latest Canadian life assurance companies, the Imperial, of Toronto, and the Royal Victoria, of Montreal. We are told that the former has succeeded in the feat of writing, in the portion of 1897 since it was founded, about $1,250,000 of risks. This is remarkable, and shows what push and loyalty combined will do—loyalty on the part of the directors to their company; push on the part of the management. Nor have the authorities of the Royal Victoria been idle. A large block of the stock of this company has lately been placed in Toronto, we understand. And while it does not boast so large a business in assurance written at the outset as its Toronto *confrere*, it will have have on that account the less strain in making the business of 1898 come up to the ratio of 1897.

At the beginning of the year Mr. Thomas Bradshaw, F.J.A., entered upon his duties as secretary and actuary of the Imperial Life

Assurance Company of Canada. This new company has done well to secure the services of one so well qualified to fill these important offices. Mr. Bradshaw, although no more than 30 years of age, has had a thorough training in the head office of the North American Life, where he grew familiar with every branch of the life insurance business. He has, besides, been a close student of life insurance along actuarial lines, with the result that he passed his final examination for the degree of Fellow of the Institute of Actuaries of Great Britain in April, 1897. This honor has, we believe, been conferred by examination on only two other Canadians during the whole history of life insurance in Canada. Mr. Bradshaw is also a member of the Actuarial Society of America.

IN THE DRY GOODS STORE.

There has been a good demand for light fancy calicoes for the spring trade. Price standards are said by authorities to be in harmony with the general trade situation.

The Italian raw silk market, according to advices received from Milan, under date of Dec. 17, 1897, shows that one week has sufficed to make good the loss in value which raw silk had suffered during four to six weeks of comparative dullness, and to-day prices are fairly back to the early October level, with a strong undertone to the market all round.

The Belfast correspondent of the *Draper's Record*, Dec. 25th, 1897, states: "The demand for tailoring goods has been moderate, and prices remain unaltered. A slight improvement is noticeable in the demand for union pales and dowlas for the apron and pinafore trades. The export trade to the United States is well sustained, and with the new year a substantial improvement is anticipated. Continental trade is fairly good for the season, though not up to that of recent weeks. Colonial business in both Canadian and Australasian is rather better than the average for this period, but the demand from Foreign West Indies, and from South America continues stagnant. Local stocks are much the same, and prices continue unchanged."

The American *Wool and Cotton Reporter*, compiling a record of the textile mills built in the United States during the year, says: "The showing for the year presents a decided falling off from the record of previous years, although this is not at all surprising, considering the present depressed state of cotton manufacturing. The number of new mills undertaken and projected during the last four years compares as follows:

Years.	Mills.
1897	155
1896	300
1895	337
1894	263

January is the month in which many dry goods merchants are accustomed to hold special sales of white goods and "special bargain sales" are advertised everywhere.

While begging letters are not unknown in Canadian trade circles the practice is not as common here as in Great Britain. The *Draper's Record* cites the following letter received by a wholesale merchant:

"Gentlemen,—When sending out your Christmas Boxes, please do not send intoxicants, as my wife and self are abstainers."

"The writer of the foregoing letter," comments our contemporary, "is a hosier who has been established in business for two months. If his ability to conduct his shop is at all commensurate with the brazen impudence of which he is the possessor, he will probably make his fortune in a remarkably short time. The calm assurance of the foregoing demand note renders it a particularly obnoxious specimen of a very obnoxious type of begging letter."

FOR GROCERS AND PROVISION DEALERS.

The local pork packers are very active and are daily in receipt of arge quantities of dressed hogs.

Broomhall says: North Africa is buying wheat and barley freely. Nicolaieff now closed by ice. Bristol wheat stocks show moderate decrease. Hull moderate increase. Paris stocks still very small.

A transaction of some moment in teas is reported from Montreal. The deal which took place four or five days ago, our correspondent says, was from first hands to a jobbing house, and included some 350 half chests of low-grade blacks and about 600 packages of medium grade Japans.

Canned goods, whether vegetables or fruit, are still in active request, and especially firmly held. There is said to have been not fewer than 14,000 or 15,000 cases bought for Klondyke and other Pacific coast regions. Besides the actual consumptive demand there is a good deal of buying for speculation.

Advices from Florida state that all oranges and vegetables are frozen at points above Tampa, the thermometer registering 26 degrees on Sunday morning, and on Monday 19 degrees. The thermometer stood below the freezing point for 15 hours, the telegram says. Receivers think this indicates the destruction of the new growth since the freeze of three years ago.

Current information from the Virginia country points suggests a moderate quantity of ordinary quality peanuts, but supplies suitable for fancy hand-picked goods are scarce; the quality of the nuts harvested since the October storm has not shown as much improvement as was expected, a great many of them are stained from being, in the ground too long, and the average quality of the crop is rather poor.

Official returns give the British Columbian salmon pack for the past year as 1,007,838 cases. This is larger than that of any previous year, while the Fraser River pack is 400,000 cases more than the pack of 1893, the previous best year. Sixty-four canneries were operated last year. A cable from London announces that the deal for the sale of eighteen canneries to an English company is off, as owing to the prevailing Klondyke craze, people will not subscribe for industrial enterprises.

The annual meeting of the Wholesale Grocers' Association, of Montreal, was held on Monday last, at the Board of Trade, the acting president, Mr. H. Laporte, in the chair, in the absence of the president, Mr. Charles Chaput, who is at present in Europe. The annual report being read, was adopted, and was ordered to be printed in the annual report of the Board of Trade Council. The following were elected officers:—President, H. Laporte; vice-president, S. J. Carter; treasurer, Albert Hebert; directors, H. H. F. Hughes, L. E. Geoffrion, and J. E. Quintal; board of arbitration, D. C. Brosseau, H. H. F. Hughes, L. E. Geoffrion, Chas. Lacaille and A. Robitaille.

Only in one instance, says the Cincinnati *Price Current*, in 1891 have the November and December killings in the West shown as large a total as this season. The total Western killings for the calendar year 1897 appear to be about 19,700,000 hogs, which compares with previous years as follows:

1897	19,700,000	1892	13,750,000
1896	16,230,000	1891	15,180,000
1895	15,285,000	1890	16,980,000
1894	15,265,000	1889	12,690,000
1893	11,080,000	1888	10,610,000

This illustrates the great gain in Western slaughterings the past year in comparison with high records previously.

CLEARING-HOUSE FIGURES.

The following are the figures of the Canadian clearing houses for the week ended with Thursday, January 6th, 1898, compared with those of the previous week:

CLEARINGS.	Jan. 6th, 1898.	Dec. 30th. 1897.
Montreal	$12,519,058	$10,357,193
Toronto	10,706,210	6,812,242
Winnipeg	1 761,077	1,816,264
Halifax	1,314,065	1,061,433
Hamilton	948,158	613,962
St. John	573,527	504,185
	$27,822,095	$21,165,279

Aggregate balances this week, $4,919,533; last week, $2,978,792

—An increase of nearly one-third in the extent of building operations in Toronto for 1897 over the preceding year is a gratifying exhibit, and indicates an improved condition which speaks well for the prosperity of the community. A statement prepared by the City Commissioner of the amount of building done in the city last year shows a total value of $951,130 represented by the permits for the year, as compared with $657,168 for 1896, an increase of $293,962, or 31 per cent. Particulars are given as under: 113 brick dwellings, $310,100, 32 brick-front and rough-cast dwellings, $23,550; 141 alterations; $80,770; 16 warehouses and additions, $71,700; alterations to stores, $46,710; 8 churches and additions, $85,050; 1 brewery, $10,000; 1 music hall, $12,000; 1 abattoir, $8,000; printing office, $35,000; and miscellaneous building, $34,595.

VISITING PLACES—A WESTERN JOURNEY.

Manitoba and Ontario Towns.

A stranger stopping at North Bay is not long there until someone, be he merchant, lawyer, banker, or "village character," tells him with pride that North Bay is the capital of Nipissing District, that a few years ago a hard struggle took place for the possession of the Court House and other civic institutions between the municipalities of Mattawa and North Bay, and how the latter came off victorious. While it is true that being a "county town" gives certain advantages to a place, it is equally true that other towns in the same county or district may, from their geographical or other conditions, see quite as much commercial activity as their rivals, and Mattawa is such a town, the latter being a distributing point for the lumbering districts farther north.

North Bay is an active little place. When I was there last summer I found the merchants busy and the industries thriving. It is essentially a railway town, but has fishing, lumbering, and other enterprises. Mr. Snyder, manager of the Traders' Bank, and president of the Board of Trade, told me much about the place and its prospects. I was informed that there were no vacant houses. From one point of observation I counted the glistening timbers of a dozen new buildings, and I afterwards learned that as many more had been completed last fall.

From North Bay to Port Arthur is a day and a night's continuous travel. One does not miss anything by sleeping all night, and some of the day, for that matter, because over the whole distance there is very little change in the landscape. It is a succession of lakes, rivers, valleys, hills and rocks. At no time is there a let-up to this sort of thing. No level stretches of ground under cultivation amounting to anything. I don't think I would care to take up farming in Algoma, at any rate, that portion of it to be seen from a car window, but I see no reason why sheep ranching could not be gone into extensively.

If ever there was a more enthusiastic exponent of the value of the resources of Algoma District than the Mayor of Port Arthur, Mr. Marks, he was enthusiastic surely. Mr. Marks knows the district thoroughly, having driven and ridden nearly everywhere in it. He also thinks that much sheep-raising could be and should be done. The towns of Port Arthur and Fort William are not thoroughly live places during the winter, but the opening of navigation sets things humming. Woodside Bros.' foundry was exceptionally busy. For two months they had been working night and day. There is some talk of a pulp-wood industry being started.

Sometimes a town has only one or two leading men, who are its mainstays and guides. Other towns are sometimes so lucky as to have a street full of such men, and it must be said that Rat Portage comes under the latter category. We who live in Eastern Canada will some day wake up to the fact that we are, to a very great extent, dependent for our growth and advancement upon the West. We will become less selfish and exert a greater influence towards the upbuilding of this western country. But this is a divergence.

Rat Portage is undeniably a thriving town. I engaged in conversation with the managers of the fish companies and learned that the sturgeon catch last season amounted to about five million pounds. One company caught over two tons at one haul, and the amount of caviare and oil taken from those fish was in itself sufficient to pay for all expenses, leaving a full profit from the fish proper. The four large sawmills of the Ontario and Western Milling Company had been running continuously all season, and the same might be said of the flour and sawmills at Keewatin a few miles away. Gold in large quantities was being mined within a few miles of the town. The Sultana and Regina mines being in full blast. Your correspondent was unable to get up to these mines, more's the pity, but he had the pleasure of holding in his hand a brick of gold that had that day been sent up from the Sultana. Its size was about one and one-half inches square, and I was told that it was worth more than $2,000, and represented one week's work in a ten-stamp mill. Every house good enough to live in at Rat Portage was occupied. During the summer months many Winnipeg and other Manitoba people go and spend the hot season on the islands in the Lake of the Woods. These waters are similar to those in Muskoka and not in the least less attractive. One feature of Rat Portage is that there is but little farming land thereabouts, and it may interest some to know that while I was in a grocery store a letter was received from a farmer some miles away, ordering rhubarb. Then I discovered that the merchant had himself bought his rhubarb in an American city. Much more might be said about this place, but the Board of Trade report appeared in full in the Rat Portage *News*, and no doubt the editor of that paper will send a copy to anyone wishing to know more than I have told.

Winnipeg was my next stop. I had read much about those Western cities, and had studied photos and other pictures in railway literature, so that I felt familiar with their general appearance. But Winnipeg was full of surprises for me. I had not expected to find Main street half as wide as one of Toronto's squares. Friends had told me that Winnipeg was a lively city, and that Winnipeg mud was something awful, but I found I hadn't formed half an idea of the city's commercial activity, nor the remotest idea of the adhesive qualities and general nastiness of Manitoba mud. From the roof of the Manitoba hotel one can get a splendid view of the whole city, and the level prairie which, commencing where the buildings end, extends for miles and miles beyond the range of vision. The Red River can be traced for a long distance to the south and north, and the Assinaboine, which joins it at Winnipeg from the west, can also be followed as far as the eye can carry. The Hudson Bay stores and offices are premises of much interest.

Some of the wholesale and retail merchants complained bitterly of the high tariff for freight charged by the C.P.R. One large wholesale grocer asked me if it was fair that the merchants and people of Manitoba should be made pay a large transportation rate on goods brought from Toronto, Montreal, and other Eastern cities, when, as a matter of fact, the road cost very little to build in their province, and considerable in Algoma. He stated further that some of the department stores in Toronto had a rate from the express companies so favorable that they could sell goods as far away as British Columbia at a less price than merchants in that province. In conversation with other Winnipeg merchants, I learned that whenever freight rates are advanced from Montreal or Toronto to Winnipeg, orders for supplies are at once sent to St. Paul and other American cities, thus paying duty rather than what they consider an exorbitant freight charge.

Toronto, Dec. 28th, 1897. A.W.L.

REFORESTING IN ONTARIO.

In June last the Ontario Government appointed a Royal Commission to investigate and report upon "restoring and preserving the growth of white pine upon lands in the province which have been cleared or partially cleared by lumbering operations or by fire, and which are not adapted for agricultural purposes or for settlement." The gentlemen composing the commission are Mr. Rathbun, president of the Rathbun Lumber Co.; John Bertram, president of the Collins Inlet Lumber Co.; J. B. McWilliams, Superintendent of Forest Rangers; Alex. Kirkwood, of the Crown Lands Department of Ontario; and Thomas Southworth, Clerk of Forestry.

The regions visited by these gentlemen comprised the rear of Peterboro county, the north shore of Lake Nipissing, the neighborhood of Algoma Mills and Thessalon, and points on the north shore of Georgian Bay. The commissioners also inspected some of the territory on the north shore of Lake Superior and along the line of the Port Arthur, Duluth & Western Railway, in addition to a trip through the Rainy River country.

They feel warranted in coming to the conclusion that with sufficient areas set aside for the purpose, and with reasonable care and protection of the young and growing timber now upon them, the supply of merchantable timber in the Province of Ontario will be vastly augmented.

The report reproaches Canadian lumbermen for the reckless manner in which they have treated the forests. The former apparently limitless forest wealth of the province has led them to be incautious, and the litter they have left lying about has fed the destructive fires that have always followed. These fires have destroyed the original growth, and in many cases paved the way for the springing up of a crop of other varieties more easily propagated. It has been found, however, say the commissioners, that where any of the original trees survived the fire and produced seeds, the forest has eventually assumed the characteristics of the growth indigenous to the locality. The widely-entertained theory that the white pine on being cut away is invariably and permanently succeeded by a crop of inferior varieties, was completely disproved by the frequent instances observed in which tracts of flourishing young pine trees are growing up on cut-over land, and the prevalence of the idea can only be accounted for on the ground that fire has in so many cases completely exterminated the pine in all stages of growth.

There seems to be no doubt that with the exclusion of fire, and the adoption of more intelligent and provident methods of lumbering, there would be no difficulty in securing a quick and sure production of the varieties of trees desired.

PROTECTION FROM FIRE.

This statement as to the condition in the Township of Burleigh may be taken as fairly typical of the course of natural forest regeneration in nearly all the fire-swept lands which came under the observation of the commissioners. Much of the forest lands now looked upon as of little use will yet, under proper protection, be very productive. The main feature of forest preservation must be protection from fire.

To the north of the height of land which sheds water into Hudson Bay, it was found that some timber lands had been burned over through the carelessness of Indians, but the Hudson Bay officials there had promised to help the Government in protecting the forests.

The commissioners proceed to say that, though in earlier years the lumbermen confined their operations to taking out trees which measured at least 14 inches diameter at the butt, many rafts were observed today to consist of mere poles—six inches or so in diameter. This practice should be promptly sat upon by the Government.

HOW FAST PINE GROWS.

The commissioners give the following idea of the rate of growth of white pine: A young tree which would cut only one log 8 inches in diameter and 10 feet long, measuring 16 feet, board measure, would, if allowed to stand for 30 years, grow in diameter at the rate of one inch in five years—in some cases the growth is an inch in two years—and hence would give a butt of 14 inches diameter, 16 feet long, or 100 feet of lumber, board measure. In addition to this, however, this tree would have grown in height sufficiently to give two more logs, one, say of 11-inch, and one of 8-inch diameter, both 16 feet long, or a total of 164 feet, board measure, for the tree. Thus, a tree that required, perhaps 40 years to make its first 16 feet of merchantable timber would in 30 years more have increased to 164 feet.

It is then suggested that a market should be secured for the "thinnings," which should be taken out where the timber stands too thick, and the idea is put forward that much of this apparently useless forest material might be utilized in the manufacture of pulp, and small wood goods, or for the production of charcoal for smelting ores.

THEIR CONCLUSIONS.

In conclusion, the commission makes the following recommendations:

1. The present system of fire ranging inaugurated by the Government in 1886 be extended so as to be compulsory on all the holders of timber berths; that all unlicensed timber land contiguous thereto be also protected by rangers employed by the Government, and that all fire rangers be subjected to the inspection and control of the Department of Crown Lands.

2. That the officials of the Hudson Bay Company be asked to co-operate with the Government in preparing and printing fire proclamations in the language of the Indians of the northern districts, to be posted along the canoe routes throughout the country.

3. That for all unworked limits on which the ground rent shall be two years in default on the termination of the present license year, the license shall not be renewed, but the berths be held by the Crown as forest reserves.

4. That license-holders be not allowed to cut any trees for logs smaller than will measure 12 inches across the stump, two feet from the ground, unless under special forest conditions, with the sanction and under the supervision of the district forest ranger.

5. That the Government take power by order-in-Council to withdraw from sale a location, and set aside, to be left in permanent Crown forest reserves, such areas of territory as are generally unsuitable for settlement, and yet valuable for growing timber.

COMMERCIAL LAW LEAGUE OF AMERICA.

The Executive Committee of this body, composed of Wm. C. Sprague, chairman, Detroit; George S. Hull, attorney, secretary, Buffalo; E. K. Summerwell, attorney, treasurer, New York; E. J. Whitehead, president North American Mercantile Agency, New York; Elbert C. Ferguson, attorney, Chicago; and others in Boston, Auburn, Milwaukee, Richmond, Ind.; Altona, Pa.; Davenport, Iowa; met at Detroit, Mich., last month and prepared a programme for the fourth annual convention, to be held at Put-in-Bay, Lake Erie, Ohio, July 26th to 30th, 1898.

The chairman had tabulated the responses to a general letter to the members inviting suggestions, three-fourths of the eight hundred members responding. The membership presented a rapid increase. The committee decided to hold one session a day on the dates mentioned.

A paper on the "National Bankrupt Law," by Levi T. Griffin, of the Detroit bar, will occupy the time of one session, followed by general discussion. The credit men and the managers of collection departments of the States and Canada are invited to be present. An able paper on "Uniform Legislation" is to be presented, and prominent lawyers and credit men will discuss the question.

The Commercial Law League is the only one of its character. Its members are taken from the legal profession, credit men, collection managers, mercantile agency managers, and editors of legal publications, the membership living in all parts of the United States. Much work has been done to bring about uniformity in commercial laws. The experience of layman and lawyer are brought together, like the sick and the doctor. Three years' life of this organization presents the greatest activity and result of any organization undertaking these objects. The commercial bodies and trade clubs are invited to co-operate and correspond with the organization.

ADULTERATION OF SILK.

Some remarkable details with regard to the adulteration of silk, recently came before the Chamber of Commerce, Macclesfield, and the Society of Chemical Industry at Manchester. It was found that by immersing silk in vegetable extracts containing tannic acid, a chemical combination between the silk and the acid was induced, which added nearly 25 per cent. to the weight of the material. But some of the continental manufacturers go far beyond this in their greed of gain—or, as they would put it, perhaps, in the necessity of coping with commercial competition. In one case a hundred pounds weight of silk was sent to the dyer with a request that its weight was to be increased ten-fold; so that when the operation was complete the fabric contained less than 10 per cent. of silk, the rest being mineral matter. There is one advantage of a lady being costumed in such a dress—she is safe from the risk of being burnt to death while she wears it, for it is incombustible. Raised to a high temperature, it will smoulder away and leave a perfect mineral skeleton with a silky lustre. On the other hand, certain black silks which have been weighted up to only 300 or 400 per cent. have been known to break into flame spontaneously.

LAKE SUPERIOR IRON ORE PRODUCTION.

Enormous figures of production have been reached by the great iron mines of Michigan within the last few years. A despatch of Monday last from Ishpeming says that the output of iron ore by the five ranges composing the Lake Superior iron district in 1897, was larger by over 2,000,000 tons than in any previous season, reaching the total of 12,500,000 gross tons of 2,240 pounds each.

The production of iron near the shores of Lake Superior in the past seven years has been greater than the total output from the first discovery in 1847 to the year 1890 inclusive.

Of the 1897 production, as in previous years, by far the greater portion was transported by water, the total shipments of the season aggregating 12,215,645 tons. About 300,000 tons were consumed by local furnaces.

The output of iron ore in 1896 was 9,934,826 tons, as against 10,429,037 tons in 1895. Of the 1896 shipments 8,026,432 tons was sent to Lake Erie ports, and 1,617,604 tons went to Chicago and Milwaukee, the Illinois Steel Company taking nearly all of the ore sent to Lake Michigan ports. Of the 1897 shipments by water 10,120,906 tons went to Lake Erie ports, and 2,094,739 tons were sent to Lake Michigan ports.

The recent perfection of a process of ore reduction by Thomas A. Edison, the famous inventor, and the practical demonstration of its mechanical success in large reduction works at Edison, New Jersey, has been in some quarters regarded as highly inimical to the Lake Superior mines. Such, the despatch contends, is not the case. Very little Lake Superior ore goes east of the Allegheny mountains, and little of the New Jersey ore can ever come west of the same natural barrier to enter into open competition with the lake ores. While there seems little doubt that the Edison process of ore concentration is mechanically successful, it remains to be demonstrated that it is a commercial success.

—It is said that the Dominion Government has decided to issue patents for 100,000 acres of vacant lands to the Manitoba Government. This is the result of the "better terms" arrangement made by the two Governments in 1885. The terms of the grant are practically those agreed upon by the University Council.

MINING NOTES.

J. M. Robinson, of the Canadian-American Gold Mining and Development Company, who at present is in Winnipeg, has just negotiated the sale of the Ethel claim for $75,000 to an English syndicate. This property was bonded a year since to Col. Topping, of Trail, for $50,000, but he failed to make the payments, and his option died. It is located near Trout Lake.

Big values are being received from the Porto Rico, the Canadian Pacific Exploration Company's property near Ymir. Assays received recently by A. B. Irwin, the resident manager, were as follows: Average for the week from the No. 2 tunnel, which is in 255 feet, $122; bulk sample of picked ore from the face of the tunnel, $525.

At the office of J. Thornton Langley there is some fine looking ore that came from the Hexahedron and North Fork claims. These properties are located on the north fork of the Salmon, and owned by Jay Benn. Assays of the ore give an average of $30 per ton with the principal values in gold. They also carry copper, lead and silver.

News reached this city of a strike of a seven-foot vein of copper ore in the Sitka claim, which is located on the reservation just south of Grand Forks. The late E. P. Suydam, who killed himself on Friday last, was one of the owners of this property.

Alexander Dick, mining engineer, is back from a visit to Slocan, where he examined the Evening Star for English clients.

Edwards Leckie, the manager of the New Goldfields of British Columbia, is again in the camp.

The Reddin-Jackson Company reports an important strike in the Twin, near Ainsworth, in which it is interested. At about the 130-foot station in the drift, a body of solid ore two feet wide has been encountered. It carries 70 per cent. lead and about 60 ounces of silver. The ledge at this point is 3½ feet wide.

Ernest Wookes, a London mining man; C. S. Drummond, also of the world's metropolis, who is likewise interested in mines, and has large holdings in the Kootenays, and Captain T. J. Duncan, of Nelson, were among the arrivals at the Allan Monday night. Tuesday they inspected the Cliff with a view of acquiring it. The party went north Tuesday evening without announcing its conclusions regarding the possible purchase of the mine.

H. L. Simmons, representing the Latimer syndicate, who was looking over the ground at Nakusp and at Kaslo, with a view to building smelters there, has returned to England to confer with his principals regarding the result of his trip. He was well pleased with the districts visited.
—*Rossland Miner.*

NELSON, B.C., IN 1897.

By Act of Parliament passed at the last session, Nelson, in company with her younger sisters, Rossland and Grand Forks, became a city. Possibly the steadiness that comes with her more numerous years has enabled her so far to avoid the troubles that appear to have followed on the incorporation of the other two, and as yet her cityhood becomes her well, and has been an unmixed blessing. Its chief results have been the laying down of a system of sewerage, the purchase of the old waterworks, and the installment of a new supply fitted with all modern appliances and coming from an untainted source. Many streets that previously existed only on paper are now cleared and their inhabitants can reach their homes by convenient sidewalks.

But great as these changes are, they are not the chief. Let the reader go to the end of the wharf, or better still, out upon the lake in a boat, and then face about and view the town. Then he will realize what 1897 has done for Nelson. From the smelter on the west right along to the N. & F.S. station on the east, from the water's edge almost up to where the railway track crawls along the hillside, seven hundred feet above it, stretches a sea of homes. Warehouses there are, and hotels, stores and offices, churches, schools and jails, all the appliances and requirements of a modern city, but it is the homes of Nelson that are conspicuous and single it out from the other towns of Kootenay as the abiding place of people, the capital of the district.

There are more people in Rossland than Nelson boasts, and for rush and racket Sandon probably holds the lead, but the throngs that fill the streets of Nelson are people who have come from afar to make homes for themselves, and have pitched upon Nelson as the place to settle in.

. . . .

The mines in the Nelson District have taken longer to develop than those of some of the surrounding districts, but though its production scarcely yet equals in value that of the Slocan, it is fast approaching it. Its shipping list includes the Hall mines, the Athabasca, the Porto Rico, Fern, Ymir, Dundee, Poor Man, and others, while the value of recent discoveries is increased by the fact that they make Nelson a gold camp.

Throughout the district of West Kootenay generally business has been prosperous, and this cannot be better illustrated than by comparing the values of the exports of this and last year. In 1896 they amounted to $2,762,822, while in the first eleven months of this year they have amounted to $7,373,071.25, not including the exports via Revelstoke, which probably will amount to half a million more.—*Nelson Miner.*

A HOLIDAY STORY FOR THE FIELD MEN.

Up in Minneapolis, Minnesota, there lived for many years, and let us hope still lives, a gentleman named Jeremiah Coughlin, better known as Jerry Coughlin. For years and years and years he was a conductor on the Chicago, Milwaukee, and St. Paul railroad. Jerry was one of those conductors who would hold the train a few seconds for the nearly-dead-with-exhaustion traveling man who had run all the way to the depot, heavy grips in hand, in order to "make time," only to see the train ready to pull out and he a hundred feet away. And Jerry, well, he'd stand by, watch in hand, and call out in a cheery way: "I'll wait for you," and smilingly help carry the satchels into the train. Up in heaven there are Pullman car reserved seats for such conductors.

By and by Jerry's savings accumulated until he had become a rich man, and was elected president of the Irish-American Bank of Minneapolis. Still he kept his train. Told the writer "he'd die if he didn't." One night on the smoker Jerry made a statement that still lingers in my memory. "My boy, save five dollars a month, only five dollars if need be, but keep it up and you'll be mighty glad of it when the gray hairs of old age come. It always hurts my feelings to see old men do day labor, sawing wood for a meal, and such work. Save your money when you are young to take care of you in old age. How did I get to be comfortably well off? 'Saved my money."

It is often remarked that "fire insurance men live well, but few save anything." Particularly is this true of the field men of fire insurance companies.

Now is the time to change all this. As a New Year's present hand your wife a savings bank book with a first deposit entered therein, and pledge her your word that each month you will deposit a similar amount. In the same envelope give her a life insurance policy for the amount of your yearly income, payable to herself, and an additional one in same amount for each of the babies, to care for them in case of your happening to be in such terrible railway disasters as recently happened on the New York Central, and Chesapeake and Ohio, railways Both were trains that the railway officials were proud of, both old well-settled roadbeds, but alas! more than one home mourns their dead, who had absolutely no warning nor thought of impending disaster.

The boys call you a good fellow—you are proud to be known as such. Cannot you be a good fellow to your own wife and children? To-day is the time to prove it, and the blessings that may come of your thoughtfulness no man can tell of.—*Monitor.*

—"I want," he said firmly, "one of those paradoxical collars." "Er—er, what is the name again, please?" asked the puzzled clerk. "I don't know. It is a turndown, stand-up affair."—*Cincinnati Commercial Tribune.*

—*Le Soleil* has a great scheme for paying the debts of Quebec Province (with a handsome balance over) by selling the Crown Lands for fifty million dollars. Before discussing such a scheme we should like to know something of the purchaser, and to have proof of his ability to pay the fifty millions, and if he is associated with any Ethopian.—*Gazette.*

—In London on Saturday last the Amalgamated Society of Engineers paid out the sum of £38,000 to 82,000 engineers who are on strike. The trades union conference has decided to levy a tax of threepence weekly upon each of the members of trades unions throughout the country in aid of the strikers, who show no signs of yielding.

—The project for a State Bank in Chili provides that it shall be called the Banco de la Republica, have an exclusive privilege for fifteen years of issuing notes to bearer, have a capital of $50,000,000, and begin operations when its subscribed capital reaches $20,000,000. The note issue may be equal to the paid-up capital, to which the State may authorize up to $50,000,000 on satisfactory guarantees.

—The great drainage canal just completed at the Mexican capital, is one of the most stupendous engineering feats of the latter half of this century. It involved the tunneling of the mountains surrounding the valley in which the City of Mexico is situated, and entailed an expenditure of $21,000,000. The canal will make the city of Mexico one of the healthiest cities in the world.

—A mammoth tramp steamer recently left Tacoma, Wash., with the largest cargo of wheat ever put into one vessel. The load consisted of 377,509 bushels, valued at $312,000. This cargo would equal the entire amount stored in a dozen of Manitoba's large elevators. The vessel was bound for the north-west coast of Africa, and it was expected would be about seventy days making the trip from the Pacific coast of Oregon.

—A company of twenty-one Minneapolitans have each put $1,000 into a common fund for the equipment of a Yukon River expedition. The steamboat to be used is to be armed with a pump of enormous capacity, and with its greedy mouth it is hoped to suck up all the gold along the river bottom. The scheme is a very novel one. At the head of the company are H. E. Fenney and J. W. Allen, of the fire department.

—For the benefit of a conductor who had suffered an accident which endangered his earning ability, the electric railway company of Santa Barbara, Cal., gave the gross receipts of its lines for one day while he was in hospital. His case appealed to his fellow workmen and the public, as he had been a faithful employee, and was the sole support of his mother. The other employees of the company on the same day, gave their day's earnings to him, and patrons of the road had conductors ring up sums ranging as high as $20. The car receipts amounted to $327.05.

—The regulations against bringing into this country water-caught sealskins, whether in the shape of pelts or manufactured into garments, will necessarily be so intrusive and exasperating that the last thing a traveler will bring as a part of his or her luggage will be any part or parcel of a sealskin. There will hereafter be more trouble in naturalizing a sealskin in the United States than in naturalizing an alien. A plague on the seals and sealskins, and on the monopoly that deals in them, say we!—*Phil. Record.*

—Messrs. Kennedy and Nelson, our enterprising cattle dealers, have shipped over one hundred cars of stock in the past season, sixty-five cars of which were shipped off this branch, besides eight carloads which were driven from here to Baldur when cars could not be got in time on this line. Since October 17th they have shipped to St. Paul over eight hundred head of cattle, principally stockers. They also shipped from this point five carloads of hogs, for which the highest market price was paid. There has been a strong market maintained here for all kinds of stock. —Glenboro, Man., *Gazette.*

—Selkirk, Man., according to the Winnipeg *Free Press*, has developed a new industry—dog exporting. The town is said to be overrun with dogs of all colors and sizes. The other day a team of eight, four white and four black, might have been seen parading the town. One stalwart dog drew twelve men in a test, a total weight of 1,700 pounds. A team of four transported some 2,100 pounds of flour with ease. Mr. Mark Donohue is one of the principal dealers. He recently disposed of a team of four dogs to a Chicago gentleman for the modest sum of $150. The usual price paid, however, is $25 per animal.

A MINING DECISION.

A matter of some moment to mining company operators and others was decided in a Manitoba court the other day. R. Whitla & Co., wholesale merchants of Winnipeg, sued a man named Phair, who formerly carried on business at Fort Francis to recover $3,296 due to them for notes given and goods supplied defendant. Plaintiffs were also holders of notes of Phair, indorsed to them by Thompson, Codville & Co., J. W. Peck & Co., and J. H. Ashdown. They sued for these amounts also, so that their total claim was $7,259. Defendant alleged he owned a mining location near Rat Portage, and that at a meeting of his creditors it was agreed that they spend $1,000 in developing the mine, and should accept a half interest in it in discharge of defendant's indebtedness.

The creditors took hold of the mine and a company was formed with the object of working it, but after some time the parties interested decided not to go on with it; and before the action was commenced the creditors came to the conclusion and notified the defendant that the mine was not likely to be valuable, and that they would not accept the half interest in it.

Justice Bain, in delivering judgment, held that there had not been a satisfaction and discharge of the defendants' indebtedness, and that as defendant had failed to establish the defence he set up, the plaintiffs were entitled to judgment for $7,259.45, the amount sued for, with the interest that the parties agreed upon.

—Says a postman: "I have heard of a great many cases where storekeepers have sent presents to children who have written to Santa Claus in their care, after they had ascertained that the parents were actually too poor to buy them, and they didn't make any splurge about it, either."

Commercial.

TORONTO MARKETS.

Toronto, Jan. 6th, 1898.

Dairy Produce.—The conditions of trade remain about unchanged. In butter last week's values are unaltered. Somewhat more liberal supplies of creamery butter are coming to hand. Fine dairy tubs are not abundant, although the market is well supplied with dairy rolls. The cheese market is firmer in view of better values in the export trade. Strictly new laid eggs are not plentiful, and at 18 to 19c. per dozen find a ready market Cold storage and held fresh are more difficult to sell, dealers quoting 13 to 14c., while pickled are in better demand with 13½ to 14c. per dozen the market quotation.

Flour and Feed.—The flour market is not active. In sympathy with the depression in wheat, values have fallen about 5c. per barrel all round, as compared with last week's quotations. Bran and shorts are quiet and unchanged.

Grain.—There is a dull market in local grain circles. Receipts have been small during the holidays, but show an improvement recently. The roads are gradually getting into better condition. The only export movement is in wheat and peas, and both these cereals are moving to the United Kingdom. Foreign wheat markets are weak. In the United States "the wheat trade is all at sea. It thought the December wheat could not be delivered; it has been and the clique has paid for it. Now everybody is guessing what they will do with it, and incidentally with the market." Late British cable advices state that according to a St. Petersburg authority the stock of wheat in Russian ports is 14,208,000 bushels, against 21,416,000 a year ago. Argentine weather still favorable, but offerings only moderate. Indian crop progressing favorably. Spain will have a small balance for export. Values on the local market have fluctuated and have lost strength during the week. Wheat is down 2c. per bush.; oats, 1c; rye, 1c., and corn, 2c. per bushel compared with previous prices.

Hardware and Metals.—At this time of the year trade is usually dull The travelers have been in the city for the holidays, but have now taken up their routes, and we may expect orders to follow about the close of the week. The volume of trade the past two weeks has been very light so far as general trade is concerned, but holiday supplies have been in request. For skates, hockey sticks, case goods, plated ware and cutlery there has been good demand. It is expected that orders will soon be booked for spring trade, and life will be put into poultry netting, green wire cloth, screen doors and windows, harvest tools, spades and shovels. Values have been very steady. The only changes of importance are in rope and window glass. The former is quoted at an advance of ⅜c. per lb. on the base. Window glass is quoted: In 50-foot boxes, $1.45, $1.55; in 100-foot boxes, $2.75, $3.05, $3.45, $3.75 and $4 05, The trade is interested, as we elsewhere show, in an attempt to establish a uniform period of credit.

Hides and Skins.—There is no change in the local hide market. Green hides are quoted 9c., while cured are worth ½c. per lb. more. Although at this season of the year tanners are accustomed to stock up in anticipation of the grubby season, we do not hear of free transactions. Chicago advices, January 4, say "Market was firm. There was a moderate supply of Texas hides on offer, and they were held for full values; but for other qualities of hides packers were sold close up to their kill, and offerings were light; prices were quoted unchanged at 11c. for native steers, 9¾c. for heavy Texas, 9c. for light do., 9¾c. for butt brands, 9¼c. for branded cows, 8¾c. for Colorados, 10¼c. for heavy native cows and 10½c. for light do."

Leather.—The situation remains without change. There is some movement for general lines. Dealers say that they are maintaining values, but at the same time admit that all traders are not getting the advance which was supposed to have been established some months ago.

Provisions.—The dressed hog market is very firm, and packers are anxious to secure consignments. Receipts have been fairly liberal and quite satisfactory. Shippers in the country have a good idea as to values, and are pressing the packers for full prices. Light weight hogs are quoted $6.25 to 6.40, while heavy weights bring 10 to 25c. less per cwt. Provisions are quiet, but prices remain very firm A reliable American authority, Dec. 30th, says: "There has been a large movement of hogs in the West the past week, the killings showing a total of 580,000, compared with 530,000 the preceding week, and 520,000 two weeks ago, bring the total from November 1st up to 4,175,000. The comparisons for last year are 360,000 for the week, and 3,225,000 for the season—indicating a gain of 220,000 for the week, and 950,000 for the season. Prices have been well sustained, and at the close the average is slightly higher than a week ago. The quality is generally satisfactory."

Seeds.—Farmers have been offering during the week larger quantities of seeds. The export enquiry is limited, although some dealers report a slight improvement. We quote:—Alsike, $2.50 to 5.00; red clover, $2.50 to 4.00, and timothy, $1 to 1.75 per bushel.

MONTREAL MARKETS.

Montreal, 5th Jan., 1898.

Ashes.—The market is a little stronger, not so much from any improved demand, but rather from scarcity of stock. There are only about 30 brls. of pot ashes in store here at the moment. For first quality pots from $3.35 to $3,45 could now be realized, seconds $3 to 3.10; pearls, $4.77½ to 4.80 per cental.

Cements and Firebricks.—The demand is very slack in both these, but values rule steady. We quote British cements $2 10 to 2.20, Belgian $1.95 to 2.05; firebricks, $17 to $22 per thousand.

Dairy Products.—The English cheese market shows a firmer tone, an advance of sixpence having been cabled since last writing. Locally there is not much doing in cheese, but holders are inclined to be firmer in their views, and probably not much could be done in finest Western below 8¾c. Roll butter is coming in freely, and quotes at 15 to 15½c. per lb. for good quality. Fine creamery is in steady local demand at 18½ to 19c.; fine dairy, 15 to 17c. In an export way there is nothing doing. Selected boiling eggs readily bring 18 to 19c.; limed, 14 to 15c.; No. 1 candled, 13 to 14c. per dozen.

Dry Goods.—Rumors of impending trouble in the city retail clothing and dry goods trade have turned out, unfortunately, too true, and failures of several quite important firms will be found noted in our summary columns. General country trade seems in a fairly healthy shape, and the proportion of payments met on the 4th inst. is reported up to a good average. Sorting business is now over, and travelers are again getting out with fully revised spring samples. Among city retailers the main attention is now being devoted to stock-taking, and to getting things into shape for the usual clearing sales.

Oatmeal............	285	250
Flour	......	......
Buckwheat..........	34,827	32.263

Groceries.—The sugar market is somewhat less active, but values are very steady at the last advance. Since last writing, cable quotations of raw beet sugars went off a little; but to-day's telegraphic advices report a recovery, and raw cane sugars are very firm in New York. The refinery price for standard granulated is 4⅜c.; for second grade granulated, now branded "Austrian refined," 4 1-16c.; in yellows, the range is from 3⅝ to 4c. per lb. Molasses continues to rule very firm, with advance in jobbing price expected daily. For teas there is no improvement in the general demand, but we hear of one rather important deal from first hands to a jobbing house, put through at the end of last week, of about 350 half chests of low grade blacks, and about 600 pkgs. of medium grade Japans. In values the tea market shows no weakening. Coffees are rather quiet, but some descriptions show a little more firmness. We quote Rio 8 to 11c., Santos 9 to 11c., Mocha 20 to 24c., Java 20 to 24c. per lb. The activity in canned goods continues in full swing; it is stated that during the past three or four weeks there have been some 15,000 cases purchased for the Pacific coast trade, but there is also a great deal of buying being done on speculative account. Frequent reports are heard of $1.15 being declined for round lots of tomatoes, and for gallon apples all the way from $2.60 to 3.00 is now asked. For new dried apples 6 to 7c. is quoted and evaporated apples 10 to 11c. Tarragona almonds are reported scarce, and firmly held at 9c. in a wholesale way.

Hides.—The market rules strong, with 9 to 9½c. per lb. being paid by dealers for No. 1 hides. Receipts are fairly liberal. Quebec tanners are not buying freely just now, but some business has been done with western tanners on a satisfactory basis. Lambskins are quoted at 90c. each; calfskins 8c. and 6c. per lb., for Nos. 1 and 2.

Hops.—No special activity in demand is reported, but some moderate sales have been made of good Western hops at 13 to 14c., and a few parcels of extra choice at 15 to 16c. Yearlings are very dull, at 7 to 8c. the pound.

Leather.—The shoe factories have hardly yet begun to get into full running trim after the holiday spell, and buying of leather is not active, but the market is very firm. The American market for sole is strong, with considerable business reported at an advance of from half a cent to a cent. The export demand for Canadian sole is active, and it is said some houses have had to decline orders. In black leathers and dongolas all the firmness lately noted is fully maintained. We quote:—Spanish sole B.A. No. 1, 24 to 25c.; do. No. 2, 22 to 23c.; No. 1 ordinary Spanish, 22 to 23c.; No. 2, 19 to 20c.; No. 1 slaughter, 25 to 27c.; No. 2 do., 21 to 23c.; common, 20 to 21c.; waxed upper light and medium, 30 to 35c.; do. heavy, 27 to 30c.; grained, 32 to 35c.; Scotch grained, 30 to 35c.; western splits, 22 to 25c.; Quebec do., 17 to 20c.; juniors, 15 to 17c.; calf-splits, 30 to 35c.; calf skins (35 to 40 lbs.), 60 to 65c.; imitation French calf skins, 65 to 75c.; colored calf, American, 25 to 28c.; Canadian, 20 to 22c.; colored pebble cow, 13 to 15c.; russet

Metals and Hardware.—There has not as yet been any recovery from the holiday quietude of the past fortnight, and the only business doing is of a limited jobbing character. Some renewal of enquiry for pig iron and other heavy metals is looked for during the coming week. Warrants are cabled at 45s. 4d., and lead rather easier at £12 17s. 6d. We quote:—Summerlee pig iron, $18.00 to 18.50; Carron, No. 1, $18.00; No. 3, $17.25; Ayrsome, No. 1, $17.00; No 3, $16.50; Shotts, $17 25 to 17.50; Carnbroe, $16.00 to $17.00, ex-store; Siemens pig No. 1, none; No 2 Siemens, none; Ferrona, No. 1, $15.00 to 16 00; Hamilton No. 1, $16.00 to 16.50; No. 2, ditto, $15.50 to 16.00; machinery scrap, $1400 to 15.00; common ditto. $12 00 to 13.00; bar iron, Canadian, $1.40 to 1.50; British, $2.00 to 2.15; best refined, $2.40; Low Moor, $5; Canada plates—Pontypool, or equal, $2.10 to $2.15; 52 sheets to box; 60 sheets, $2.25; 75 sheets, $2.35; all polished Canadas, $2.40; Terne roofing plate, 20x28, $5.90 to $6.00; Black sheet iron, No. 28, $2.25: No. 26, No. $2.15; 24, $2.05; Nos. 17, $2; No. 16 and heavier, $2.15; tin plates—Bradley charcoal, $5.60 to 5.70; charcoal, I. C., Alloway, $3.15 to 3.25; do, I.X., $3.90 to 4.00; P. D. Crown, I. C., $3 60 to 3.75; do., I.X., $4.50; Coke I.C., $2 90 to 2.95 for standard, $2.75 to $2.80 for 100 lbs.; coke, wasters, $2 70; galvanized sheets, No. 28 ordinary brands, $4; No. 26, $3.75; No. 24, $3 50 in case lots; Morewood, $5.00 to 5.10, tinned sheets, coke, No. 24, 5½c.; No. 26, etc.; the usual extra for large sizes. Canadian bands, per 100 lbs., $1.75; English ditto, $2; hoops and bands, $1.90 to 2.00. Steel boiler plate, ¼-inch and upwards, $1.85 to 1.90 for Dalzell, and equal; ditto three-sixteenths inch, $2.50; tank iron, ¼ inch, $1 50; three-sixteenths do.; $2.00; tank steel, $1.75; heads, seven-sixteenths and upwards, $2.45 to 2.50; Russian sheet iron, 9c.; lead, per 100 lbs., pig, $3.65 to 3.75; sheet, $4 to 4.25; shot, $6 to 6.50; best cast-steel, 8 to 10c.; toe calk, $2.25; spring, $2.50; sleigh shoe, $1.85; tire, $1.90; round machinery steel $2.25; ingot tin, 15¾ to 16c. for L. & F.; Straits, 15¼ to 15½c.; bar tin, 16½ to 17c.; ingot copper, 12 to 12½c.; sheet zinc, $5 to $5.25; Silesian spelter, $4.75; Veille Montagne spelter, $4.75 to 5.00; American spelter, $4.75; antimony, 9 to 10c.

Oils, Paints and Glass.—The only noteworthy feature of the week is the strong advance in linseed oil, which has been put up fully two cents, making the quotation for raw now 45c., and boiled 48c. per gallon. Messrs. Livingston & Co., the Baden crushers of seed, are reported to have advanced their prices 3 cents. Turpentine shows firmness, and is liable to advance, as the market is stronger in the South. The annual meeting of the White Lead Association will be held on the 11th inst., when some revision of prices is quite possible. We quote:—Turpentine one to four barrels, 49c.; five to nine barrels., 49c., net thirty days. Linseed oil, raw, one to four barrels., 43c.; five to nine barrels, 42c.; boiled, one to four barrels, 46c.; five to nine brls., 45c., net 30 days; olive oil, machinery, 90c.; Nfld. cod, 35 to 37c. per gal.; Gaspe oil, 30 to 32c. per gal.; steam refined seal, 45 to 47½c. per gallon in small lots. Castor oil, 10 to 11c. as to quantity. Leads (chemically pure and first-class brands only), $5.37½; No. 1, $5.00; No. 2, $4.67½; No. 3, $4.25; No. 4, $3.87½; dry white lead, 4¾ to 5c.; genuine red do., 4½c.; No. 1 red lead, 4c.; putty, 1.55 to $1.60 in bulk, $1.70 to 1.75 in bladders, $2 to 2.10 in tins; London washed whiting, 40 to 45c.; Paris white, 85 to 90c.; Venetian red, $1.50 to 1.75; yellow ochre, $1.25 to 1.50 spruce ochre, $1.75 to 2.00; window glass, $1.40 per 50 feet for first break; $1.50 for second break; third break, $3.10.

Wool.—No special business is being done at present, but the market rules stiff. Some few sales of Cape have been reported within the past ten days at 15½ to 16½c., and nothing is now available below the inside figure. Some Natals are obtainable at 17 to 18c.; Australian, none; B. A. scoured, 26 to 35c. A cargo of Cape wool for this market left Port Elizabeth on December 1st, and should be due in New York about the 1st prox.

DIRECTORS:
AS. GOLDIE, Pres. J. L. SPINK, Vice-Pres.
THOS. WALMSLEY, Treas. HUGH SCOTT, Mgr. and Sec.
Adam Austin, Inspector.

This Company was organized in 18⁸5, specially for the purpose of insuring manufacturing industries, warehouses and contents.

The primary object being to give protection against loss by fire at a minimum cost consistent with absolute security.

The system adopted has been to inspect all risk before acceptance and fix the rate to be exacted equitably in accordance with the hazard assumed.

Assurers with this company have made a saving, upwards of $108,000.00 on the current rates charged, in addition to which, on the rates exacted by us, dividends have been declared to policy-holders amounting to over $24,000.00, together, making the very substantial sum of over $132,000.00 that our policy-holders have saved during the eleven years we have been in operation.

As no canvassers are employed, dealing directly with the assured, those desiring to avail themselves of the advantages thus offered will please address

ASSESSMENT OF LOAN COMPANIES.

Mortgage loan companies in Hamilton were not satisfied with the assessment upon their property, and the judges were called upon to decide. Last week Judges Hamilton, Snider and Hardy delivered their judgments in the cases of the Hamilton Provident and Loan Society, and the Landed Banking and Loan Company. The assessment of the Hamilton Provident has been reduced from $85,000 to $45,353. The judges struck off $8,446, the rents received by the society, and $17,000, the interest on the mortgages, etc., in Manitoba. They held that the society was not entitled to exemption on the ground that it was a building society. The assessment of the Landed Banking and Loan Society was reduced from $27,860 to $5,125. The judges held that the rents received by the appellants, amounting to $22,735, were not assessable, and that the savings bank profits and deposits were assessable. In both these cases all the appellants have to pay are the costs of the Board of Judges.

WORLD'S GOLD PRODUCT.

The Director of the United States Mint, from information now at hand, says that there is substantial evidence that the world's product of gold for the calendar year 1897 will approximate, if not exceed, $240,000,000, an increase of nearly 20 per cent. over 1896. The gold product of the United States for 1896 was $53,100,000; for 1897 it will approximate $61,500,000, an increase of $8,400,000.

The product of Africa for 1896 was $44,400,000; returns received up to December 1, 1897, indicate that the gold product of that country for the year will be $58,000,000, an increase of $13,600,000.

Australasia for 1896 was $45,200,000; for 1897 the indications are that it will not be less than $51,000,000, an increase of $6,800,000; Mexico, for 1896, $8,330,000; for 1897 it is estimated that it will be $10,000,000, an increase of $1,000,000. The Dominion of Canada for 1896, $2,800,000; it is estimated for 1897 at $7,500,000, or an increase of $4,700,000.

India's product for 1897 is estimated at $7,500,000, an increase of $1,400,000 over 1896. Russia's gold product for 1896 was $21,550,000; for 1897 estimated to approximate $25,000,000, an increase of $3,500,000.

AMERICAN PRODUCTS SHIPPED BY CANADIAN PORTS.

There has been a remarkable development in the trade of American butter to the United Kingdom via Montreal within the past few years. This has resulted in diminished exports from American ports. The shipments from New York to Great Britain from May 1st to December 11th, 1897, were 178,977 packages of butter, as against 224,313 packages in the same period 1896, or a loss of nearly 22 per cent. "In comparing these figures," says the New York *Journal and Bulletin of Commerce*, "it should be stated that there has been a decided increase in shipments of American butter via Montreal this season, and some local exporters are of the opinion that this increase would nearly if not quite offset the loss via this port. The Canadian route has the advantage of greater and cheaper refrigerator service on ocean steamers, the refrigerator rate from Montreal to Liverpool being about 30 shillings per ton, and to London 50 shillings, while the rate from New York to London is 75 shillings." It is pleasing to know that we are in a position to be of assistance to our neighbors in marketing their products. But it does not imply a narrow and illiberal spirit to suggest that this has been mainly accomplished through Government assistance, and to enquire how far the Government is justified in expending public funds which benefit the producers of a foreign country. There is apt to enter in the question of port statistics, both of freight and passengers, a spirit of false pride. It must be remembered that strong arguments are necessary to tax the people for the encouragement of special interests, as in the development of the cold storage system. If as is urged, this has been done for the purpose of helping Canadian farmers and butter-makers in their attempts to gain a firmer foothold in the British markets, but little can be said in favor of extending the benefits of the Government assistance to competitors in the United States. It may gratify our vanity to know that Canadian vessels are carrying American products, but it does not appear to be a very profitable undertaking for the Canadian people. If the shipments from American ports continue to increase, as the traffic is diverted to Canadian ports by the low rates made possible through Government action, there will soon come an appeal from American vessel-owners to Congress, to which with the Republican party in power, it would in all probability be only too ready to respond.

A BIG ORE DEAL.

A despatch of Monday last from Pittsburg, Penn., says that one of the largest ore deals ever consummated in the States or any other country has just been closed by James W. Miller, of Pittsburg, at London, England, with the Cardiff Iron Foundry Company, Limited. The telegram gives the following particulars of the deal:

"Ship us at the earliest possible moment 4,000,000 tons of 64 per cent. Mesaba iron ore, f.o.b. docks at Cardiff."

Such was the order received and accepted by the ore firm of Warner, Stuart & Company, of Cleveland, Ohio, for more than $20,000,000 worth of goods in which this firm deals. The price agreed upon was $5.15 a ton, delivered on the docks at Cardiff. Mr. Miller's commission on the sale amounts to $500,000.

COMMERCIAL TRAVELERS' ASSOCIATION.

The twenty-fifth annual meeting of the Commercial Travelers' Association was held on Wednesday of last week. The president, Mr. R. J. Orr, occupied the chair. The annual report of the board of directors, read by Mr. Jas. Sargeant, the secretary, showed the total membership to be 4,253, an increase of 167. The mortuary payments for the year had been $31,950, while the accident payments were caused by minor accidents, and amounted to $1,827. A sensible resolution was taken as to insurance by the association. No steps were taken to extend its powers in affording life and accident insurance, as the board did not feel justified in withdrawing from permanent reserve fund the amount required as a Government deposit.

It appears from the report that negotiations are still in progress with the various transportation companies in regard to baggage regulations. The secretary had during the year visited the principal railway and steamboat points west of Fort William, and had secured more advantageous arrangements from the carriers for commercial travelers. The maximum mortuary benefit was fixed by the board as $1,000.

The financial statement of the association shows a balance of $2,577 in the bank. The assets are set down as $272,935, among which is $10,041 of the Farmers' Loan Company debentures, a fact that caused some complaint and discussion. The valuation of the property on Yonge street was put as $50,000. The relief fund statement showed the receipts to have been $378, and the disbursements at $330. Messrs. W. H. Cross and Henry Barber were appointed auditors at a reduced salary.

Jas. Middleton, M.P. for East Hamilton, addressed the meeting regarding the bill now before the Legislature providing for the municipal taxation of departmental stores.

THE FIRST CANADIAN MARKET.

Although the French Government cannot be said to have followed any consistent policy in its treatment of Canada, while in possession of this country, there underlay most of the rules of law in force at Quebec, Montreal, and the early settlements, the idea of paternalism. But paternal government means restriction, and of the numerous measures restricting commerce few were more burdensome than the rule preventing merchants from meeting in markets. Meetings of the citizens, no matter for what purpose they were ostensibly called, according to the royal idea must result in a conspiracy against the Crown. In 1717 the merchants of Montreal and Quebec sent a joint petition to the King of France, asking for the privilege of meeting in market places to carry on their trade. They recited that the commerce by which alone the country could flourish, was impossible so long as the right to meet in assemblies was denied the merchants. It was pointed out that markets had existed in France and had not proven destructive of law and order. The petition contained also a request that a merchant might be named who should represent the interests of the merchants whenever a representative might be required. This was opposed to the maxim of the Minister Colbert, that every citizen should speak for himself, and none should speak for all. The Crown officials appear to have been actuated by a sincere desire to see the country grow in strength in all their regulations governing the colony, although some of the means taken to secure this end were, apparently, likely to have an opposite effect. This request was granted, and the merchants of Quebec and Montreal, after some years of agitation, received the privilege of meeting in a convenient place in each town, there to trade in commerce.

—The Federation of Labor has tabulated the results of the strikes undertaken in the United States during the past year. Since 1886, the number yearly has increased from 500 to about 1,500, but it is beginning to fall off, so many severe struggles having proved fruitless. The cigarmakers had fifty strikes during the year, but succeeded only in maintaining the existence of the union and preventing a reduction of wages. The tailors had 24 strikes, which resulted in an increase of wages for 900 tailors out of the 150,000 said to be working in the States. The printers had 16 strikes, of which ten were entirely unsuccessful. In nearly every trade the story is the same—a strike generally inflicts as much injury on the work-people as on the employer, and is only justifiable, from the workman's point of view, as a necessity to prevent serious injustice. The work-people in this province have apparently learned by the misfortunes of their more enterprising fellows in the States and the Old Country, for the inspectors of workshops and factories report that there were no strikes during the year. Differences between employers and workmen were rare, and were adjusted amicably.—*Herald.*

—The honor of being the first paper published in Dawson City, Klondyke, is claimed by the Klondyke *News*, appearing weekly since July 17, 1897. It contains everything that is of interest to the miners and likely to attract others to the region. The first number boasts of two columns of advertisements. The subscription price is $20 per year, or 7½d. per number. The proprietor was the first advertisement canvasser at Dawson City, and brought with him the compositors to set the paper; but they soon left him, infected by the gold fever, preferring to "lift" gold from the earth rather than type from the case. The result is that the proprietor of the Klondyke *News* combines in the same individual the offices of editor, compositor, printer, and publisher.

PUBLIC NOTICE

DECISIONS IN COMMERCIAL LAW.

ALTERATION OF DEMAND NOTE.

BOULTON V. LANGMUIR.—The date of a demand note had been altered by the payee, and this was held to be a material alteration voiding the note. The fact that the alteration would be of advantage to the maker, by reducing the amount of interest for which he was liable, was held not to change the effect of alteration. The expression "beyond the seas" in 4 and 5 Anne, c. 3 and c. 16, was held to mean "out of the Province of Ontario," when applied to a defendant sued in this Province.

RAILWAY COMPANY'S NEGLIGENCE.

ANDERSON V. GRAND TRUNK RAILWAY.—The defendants were accustomed to sell tickets to a road crossing at which there was no regular station. The trains stopped at a point from which passengers alighting from the cars were compelled to walk along the track to the highway. Held, that a passenger who, while in the act of going from the stopping place to the roadway, was killed, was not a trespasser, and the defendants were under the obligation of using reasonable care towards him.

NOTICE TO INSURANCE COMPANY ON ASSIGNMENT.

CRAWFORD VS. CANADA LIFE ASSURANCE COMPANY.—Two policies were issued upon a man's life, one being payable generally and the other to his wife. On the insolvency of the assured the assignee, knowing only of the policy payable generally, gave notice to the company of the assignment. The assured's wife had died before the assignment, and the policy in which she was beneficiary became a part of the assured's estate. Several weeks after the company had received the above-mentioned notice from the assignee the assured upon application obtained from the company the surrender value of the policy. In the claim of the assignee for this money, it was held that the company, in the absence of knowledge of the wife's death, was entitled to treat the notice of assignment as applying only to the policy payable generally.

WALLACE V. CITY OF OTTAWA.—Judgment by the Chancery Divisional Court on appeal by plaintiff from judgment of Meredith, J., at the trial at Ottawa, dismissing the action which was brought against the city corporation and the Ottawa Electric Street Railway Company for damages for injuries sustained by plaintiff by reason of the alleged negligence of one or another or both of defendants on the evening of the 7th December, 1896, whereby plaintiff was overtaken and run over by a tramway car in Sparks street in the city of Ottawa, there being a very narrow passage for foot passengers between a fence erected outside the sidewalk where there had been a fire, and the tramway line, and an obstruction on the passage, and no warning having been given of the approach of the car. Plaintiff contended that there was negligence of both defendants, no contributory negligence on the part of the plaintiff, and abundant notice to defendants of the condition of the roadway, etc. The learned judge, while dismissing the action, assessed the plaintiff's damages for his injuries at $350, and directed a reference as to damages for loss of business, etc., in the event of an Appellate Court finding negligence proved. Appeal dismissed with costs.

JOHN BARBER

Mercantile Summary.

The following Ottawa parties, John Rudolphus Booth, Edson J. Chamberlin, Wm. Anderson, Andrew Walker Fleck, are asking incorporation as the Ontario Elevator Co.

Bonuses were carried by the ratepayers of St. John's, Que., on Monday, for $25,000 in favor of the Parent boot and shoe factory at Terrebonne, Que., and $10,000 in favor of the Swain cigar factory of Montreal. A few years hence, St. John's will probably be less fond of bonuses.

At Detroit, a few days ago, Judge Swan sentenced Benjamin Hunton, a colored railway porter, convicted of smuggling phenacetine and other dutiable drugs across the river, to nine months in the Detroit House of Correction, and to pay a fine of two hundred and fifty dollars. James Nevelles, arrested as a confederate, was allowed to go free.

More corporations were formed in New York State during 1897 than during any other year in the last twelve, or since the enactment of the statute taxing corporations one-eighth of one per cent. for the privilege of organizing in the State. There were 1,603 companies formed, and their aggregate capitalization amounted to $150,352,295.

The Hall Mines, Limited, give the results of that company's smelting operations for the five weeks ending 31st Dec., 1897, as below In 25 days and 6 hours' smelting, 5,796 tons o ore was smelted, yielding 317 tons of matte, containing (approximately) 146 tons copper 92,170 ozs. silver, 238 ozs. gold.

New Year remembrances continue to flow in upon us. The Manufacturers Life send a pocket match box; the Dominion Brewery Co., a pocket reference book: Mr. F. H. Leavenworth, editor of *The Indicator*, Detroit, a portrait and a message of greeting, which we reciprocate; the Western Canada Loan and Savings Co., a calendar, illustrated by photography in natural colors; the Great West Life, brownie blotters; the Excelsior Life, a neat colored calendar.

The Toronto City Commissioner issued last week a statement giving the following comparison of the live stock which passed through the cattle market during the last two years:

	Cattle.	Sheep.	Hogs.
1897	138,155	88,460	217,765
1896	104,887	95,675	194,104

There is thus an increase of 24 per cent. in cattle and 11 per cent. in hogs for the year. In 1897 the fees for weighing stock were $5,792, in 1896 they were $4,409.

A Detroit letter of Saturday last, speaking of the enlarged business done by the merchants and factories of that city in 1897, the better collections resulting from good crops and the better feeling among storekeepers and citizens generally, adds: "Our trade with Canada is not going to be helped by this infernal seal-skin-seizing regulation that our bungling botches at Washington have imposed upon us, long-suffering people that we are. A man, or a woman either, is hardly going to come here from Windsor or Chatham in winter to shop, if his or her garment is likely to be taken and sacrificed to the Alaska Sealing Company."

Notice appears in a recent number of the Quebec official *Gazette* of an application by Robert Cowans, manufacturer; John McKergow, merchant; Kenneth W. Blackwell, manufacturer; Peter Lyall, contractor; John Forman, merchant, all of Montreal; Charles Riordon, paper maker, of St. Catharines, and John Roaf Barber, paper maker, of Georgetown, for letters patent incorporating them and others as "The Shawenigan Manufacturing Company," for the production and sale of pulp and paper, carbide of calcium, acetylene gas, aluminum and electricity, and other objects incidental thereto, with a capital of $500,000, with right to increase.

A paragraph about the Victorian Era ball in the Toronto Armories finds place in the *Baker and Confectioner*, the figures in which illustrate the enormous scale of that memorable spectacular event. Writing of the quantity of viands used during the evening, that journal says: "Amongst these were over a thousand pounds of turkey, 145 dozen quail, 75 gallons of ices, nearly 300 pounds of fancy wafers macaroons, etc., and sixty cases of champagne besides claret."

Under the heading of "Building and Loan Associations," *American Investments*, in its last issue, says: "Receivers galore. The beginning seems to have just begun. Scarcely a day passes without some association being reported as insolvent, some trusted treasurer missing, or some composite secretary so mixed up in his accounts that months are required to untangle them. It looks now as though these associations were undergoing a pretty severe test, which will result in the thinning out the bad and doubtful ones, and emphasizing a few fundamental truths which perhaps have been lost sight of in the intense shuffling for business. Thirty years ago it used to be the boast that no building and loan association had ever failed, but now, alas! failures are altogether too common. There is something decidedly out of joint, and in our next issue we will undertake to put our thumb on the big screw that is loose."

The following figures, relating to the customs transactions of the port of New Westminster for the year 1897, indicate a large increase in the trade of that city and its tributary district, The total value of imports for 1897 amounted to $742,457, showing an increase of $230,596 over the preceding year. The dutiable goods imported were valued at $501,623, an increase of forty per cent. and the duty collected, with other revenue, shows a proportionate increase. being $149,612, as against $92,311 for 1896. The goods imported on the free list also increased, from $211,686 in 1896 to $240,834 in 1897. The same gratifying increase is noticeable in the exports, which have risen from $2,966,400 for 1896 to $3,396,387 for 1897. This increase of about $430,000 is chiefly due to the large export of Fraser River salmon, the figures for October reaching over one and a quarter millions.

The Lake Bouchette Pulp Company applied to the Quebec Legislature for incorporation to make and sell pulp and paper in all its branches; to purchase, sell and deal in timber limits and timber, and to erect and construct sawmills, and make lumber to build and navigate vessels, on the Lakes Commissaires, Bouchette, Ouiatchouan and their tributaries; to keep hotels; to manufacture, sell and distribute electricity for lighting, heating and motive power. Head office, Quebec; capital, $200,000. The petitioners are: Victor Chateauvert, Gaspard Lemoine, Rodolphe Audet, George Elie Amyot Alphonse Letellier, Octave Jacques, Joseph Vermette, Narcisse Rioux, A. B. Dupuis, Jean Elie Martineau, merchants: Joseph Isaac Lavery, advocate, all of Quebec, and Damase Jalbert, trader, of Lake Bouchette. The first directors are to be Messrs. Victor Chateauvert, Gaspard Lemoine, Rodolphe Audet, George Elie Amyot, Alphonse Letellier, Damase Jalbert, and Joseph Isaac Lavery.

Mercantile Summary.

A lad in Brantford has been arrested for raising one dollar bills to tens.

A bill to incorporate the Ottawa Stock Exchange has been read a third and last time before the Ontario Legislature.

A Winnipeg leather firm received last week an order from New Zealand for fine harness etc., aggregating $2,500. It was a trial order.

It is announced by a New York contemporary that the National Shoe and Leather Bank, which lost its entire surplus of $250,000 and $104,000 additional by the defalcation of its bookkeeper, Samuel C. Seeley, three years ago, will on April first next resume the payment of quarterly dividends.

A number of men are at work on the new exterior of the pulp mill at Milton, N.S. The old mill, so called, is already at work, and the new mill partially so. Ten thousand cords of pulp wood will be required yearly at this mill, to be made into paper.

We hear of a partnership formed at the first of the year to do a wholesale dry goods business in Halifax. The partners are Andrew B. Boak, formerly of the firm of Anderson Billings & Co., and latterly buyer for the firm of Murdoch's Nephews, and his son, Stanley D. Boak, late manager of the Union Bank at North Sydney. The firm name will be A. B. Boak & Co.

Near Saginaw, Michigan, last week, a fire destroyed 8,000,000 feet of pine lumber on the wharves of the Saginaw Lumber and Salt Company, at Crow island three miles below the city, causing a loss of about $120,000. The docks and one drill house were destroyed, the mill and salt-block saved. Insurance stated at $85,000.

A new engine is being put into the Almonte factory of the Rosamond Woolen Company, by the Goldie & McCulloch Co. of Galt. Its flywheel is 18 feet diameter and of 36-inch face. The new engine is of 350 horse-power, and replaces one of 150 horse-power put up in the year 1872, and in active use ever since. The mill has been running overtime, and is still busy.

A Vancouver paper says that the B. C. Iron Works, of that city, has received contracts to build two river steamers for the Hudson Bay Co., and one for the Klondyke Mining, Trading and Transport Co. One is to be delivered in March, and the second on April 15th. The Albion Iron Works of that city have also contracts for machinery for a number of vessels, including the steamers the C.P.N. Co. will place on the Yukon and Stikine rivers.

At Pictou Landing, N.S., there has been unusual activity during 1897. The quantities unloaded at the public wharf there were 35,000 tons of iron ore, 1,500 tons German sand, and a large quantity of dolomite, all for the Nova Scotia Steel Co. On the other hand there was shipped thence 11,000,000 feet of deal, two or three cargoes of hardwood timber, and large lots of pig iron, in addition to the coal trade. In view of these figures the residents of the locality look to Government to do something towards the repair of the wharf, which is in bad shape.

A number of mill men in Fall River are becoming interested in the building of a cotton mill in Japan. A capitalist of means beyond those of the ordinary Oriental, who is much interested in the development of his country, has been in communication with J. Thayer Lincoln since the latter was in Japan, and is very anxious to get Americans to build a mill in his country.

The Christmas number of the *Farmers' Advocate* appears with a very handsome lithograph cover, also a full page group of famous Herefords, done in colors. In the interior are nearly a dozen excellent cuts, that do not appear to advantage owing to the dim color and poor quality of paper they are printed on. Had such paper been used as the Toronto Paper Company at Cornwall, or the Canada Paper Company make, the effect produced would be far better. The contents of the *Advocate* are always interesting; a little more attention to its appearance and make-up would be a very decided advantage.

The Sheba Gold Mining and Development Company of Ontario, Limited, is incorporated in Ontario by letters patent. Capital stock, $495,000, with mining, milling, reducing and developing powers, under the Mining Companies Act. The parties so incorporated are: Joseph Alfred Gendron, Lambert Victor Dusseau and Charles Rochereau de la Sabliere, manufacturers; William Thomas Joseph Lee, barrister, Louis Victor Bachaud and Alfred Eodras Blangdon, accountants, all of Toronto; Patrick Arthur Bogue, of London, agent; Leonidas Charles Bachaud, of Coaticook, Que., physician; Stephen Connolly, of Spencer Cove, in Que., gentleman, and James Isaac Bogue, of Montreal, accountant.

A license is granted to the Norton Manufacturing Co., of Illinois, to make and sell sheet metal goods, etc., in Ontario; the capital stock of the Duncan Lithographing Co., Limited, is increased from $10,000 to $45,000; the S. J. Wilson Lumber Co., of Toronto, Limited, is incorporated, capital stock $24,000, parties:—Sarah Wilson, Wm. Wilson and W. D. Wilson, Thomas Dunnett, R. S. Wilson and W. H. Irving. Letters patent, dated 4th instant, incorporate Robert McDougall, Thos. McDougall and A. J. Oliver, manufacturers; Robt. McDougall, jr., machinist, and Elsie McDougall, spinster, all of Galt, to make and sell hot water and steam-heating apparatus, pumps and windmills, etc., under the name of the R. McDougall Company, Limited; capital stock, $30,000.

Says *Dun's Review*, speaking of the failure list of traders in the United States during last year: "In failures 1897 was not only the best year since 1892, but on the whole the best ever definitely known. With 13,522 failures, in number eleven per cent. less than in 1896, and $182,581,771 defaulted liabilities, a third less than in 1896, the year's banking failures counted for $28,249,700, and the commercial failures were but 13,351, with liabilities of $154,332,071, the average per failure being only $11,559, the lowest ever known, except in 1892. But even in that year the failures during the last half averaged liabilities of $10,477 per failure, while in the last half of 1897 the average was only $9,593.

WHOLESALE TRADE ONLY SUPPLIED

Mercantile Summary.

AFTER months of agitation and negotiation the Canadian Pacific Railway telegraphers have effected an arrangement with that corporation. The crucial point of the men's whole complaint was that of minimum salary. It appears that a concession was made on this point, and that the men are satisfied.

THE big cannery deal, outlined in the New Westminster *Columbian* some days ago, has fallen through, says that journal. The gentleman who was managing the affair in England cabled to his confrere to the effect that owing to the "Klondyke craze" his people were not favorably inclined toward industrial enterprises.

A MEETING with Sir Wilfrid Laurier has been arranged by the insolvency committee of the Montreal Board of Trade. The meeting will be in Ottawa to-morrow afternoon. The Montreal board is showing much activity in the effort to obtain proper insolvency legislation, and to this end appointed this committee.

WORD comes from Port Hope of the death o Sunday last of Mr. Stanley Patterson, so long a prominent citizen of that town. As private banker, agent of the Great North-Western Telegraph Company and the Canadian Express Company, and president of the Midland Loan Company, he was very actively engaged in business, and commanded the respect of a large circle.

WE are informed that Messrs. W. R. Pentecost and W. R. Smallpiece have been admitted partners in the wholesale dry goods firm of W. R. Brock & Co. Both these gentlemen have been connected for many years with the Brock firm, the former as traveler on the Grand Trunk Railway west, and the latter as buyer and manager of one of the departments of the company.

—THIS week, the ratepayers of Kingston vote to determine whether a by-law shall be passed to bring to that city the iron works of Abbott & Co., of Montreal. Leading citizens representing the Board of Trade and the City Council have struck, so the *News* says, a good bargain; an agreement has been signed; the City Council, with virtual unanimity, has given a first and second reading to a by-law providing for a bonus of $50,000 and a site worth $10,000, or $60,000 in all.

A COMPROMISE is offered by E. E. W. McGaffey, dry goods dealer at Lindsay. He wants creditors to write 30 per cent. off their claims. McGaffey was formerly in the employ of Fairweather & Co., Peterboro, in which John Burnham was a silent partner. In order to withdraw his capital, he was obliged to accept considerable stock, which was moved to Lindsay and placed in charge of McGaffey, who succeeded in building up a good trade at retail. Owing to the sudden death of Mr. Burnham a few days ago, and the unsatisfactory state of his affairs the firm have suspended payment.——An assignment has been made by C. W. Muir, manufacturers' agent, Grand Valley.——Another small failure is that of Sterling Bros., grocers, Amherstburg, who have been in business about two months.

SEC'Y BOARD OF TRADE,
New Westminster, B.C.

Mercantile Summary.

John Burnham, of Peterborough, and the uncertainty connected with his estate, has caused trouble to one or two firms. For example, the firm of Fairweather & Co., of Peterborough and Toronto, had the assistance of endorsements by Mr. Burnham. This paper it is now found necessary to protest in order to hold the Burnham estate. Mr. Fairweather is meanwhile carrying on his business, depositing in trust the moneys taken in, and taking stock with a view to future developments. No meeting of his creditors has been held nor, so far as we hear, has any one attempted to press him.

After experience as a merchant tailor for a little over a year, in Orillia, Joseph O'Hara has assigned.——Another small failure is that of Miss M. Howitt, who has been in the millinery business for several years in Owen Sound, but not always successful. In June, 1895, she was compelled to assign. Now she offers creditors 25 per cent. in settlement of their claims.——A meeting of the creditors of A. G. McDonald, tailor at Port Arthur, who assigned, will be held here to-day. He owes about $8,000, and has nominal assets of $1,000 less.——Tobias Alley, who had been unsuccessful as a grocer in Frankford, resumed business in the name of his wife (Mary) in 1881. About four years later they removed to Campbellford. Mrs. Alley now makes an assignment.

The unexpected and sad death of Mr.

The following are Montreal happenings in the way of failures, etc., for the week: O. Bernier, who has long done an excellent custom shoe business, has been obliged to assign, largely owing to over-liberality in the way of credit-giving. He owes some $7,000.——A demand in insolvency has been made upon T. W. Gales, baker.—D. Lapointe, a tea and crockery dealer, has made assignment.——L. G. Thouin, doing business as a grocer in the name of his wife, Azelie Choquette, is reported insolvent. In 1895 he failed disastrously, with liabilities of $31,000. In the present case he owes $6,000.——Among dry goods dealers the failure is unexpectedly reported of J. E. Leblanc, whose position was supposed a very good one. Indeed, not many months ago he claimed to owe only about $5,000 on stock of nearly $20,000, besides real estate interests, but he apparently did not include some family loans, etc., which now crop up to the detriment of merchandise creditors.——N. Valoode, a barber and tobacconist, offered 20 cents on his small liabilities.——L. Bissonette, also in the tobacco line, is asking a settlement at 25 cents.——The liabilities of A. Gagnon & Co., dry goods, whose failure we noted last week, foot up about $25,000. Mr. Arthur Gagnon being the largest creditor, for $9,200, and the balance is distributed among the trade.——It has been decided to liquidate the Taylor Iron & Steel Co., limited. The company was chartered about a year and a half ago to take over the business formerly carried on in boiler tubes and general steamfitters' supplies, by J. & H. Taylor. The liabilities are small, under $10,000.

In the Province of Nova Scotia failures have been apparently rather more numerous than usual, as shown by the following list: A somewhat prominent merchant of Tatamagouche, D. Malcolm, who has been in business since 1874, has been obliged to assign. Recently he had gone into a sawmill and lumbering business. Preferences are reported to the amount of 10,000. but the total of his liabilities is not yet ascertained.——James Northrop, of Harborville, is another recent insolvent. He has tried a variety of occupations, and in none of which he has commanded much success. Originally he was in the shoe business, and he has also tried tanning, hotel-keeping and farming. A year or so ago he started a small general store, with the above result.——Oxner & Duff, merchants at Bridgewater, got behind a year ago, and obtained an extension on liabilities of some $30,000. They are reported to be asking some further indulgence.——F. E. Burke, general store at Joggins, is reported to have assigned.——G. W. Cameron, of River Herbert, formerly a journeyman tailor, who began business for himself in 1895, has proved unsuccessful.——From Lockeport is reported the failure of C. Locke & Co. Mrs. Mary E. Locke, registered partner, engaged in the general store and fish trade, being quite large exporters of the latter article to South America and the West Indies. Trade in this direction has resulted very unfavorably during the past year, and the local fisheries have lately resulted poorly. They show assets of $42,000, largely ship and other property, liabilities of about $28,000, of which some $19,000 is covered by preferences.——Rufus Embree, for some thirty years in the flour and feed business at Amherst, but who has always appeared to do an unprogressive business, is reported insolvent.——Miss Mary Hayden, milliner, Halifax, is reported to be asking creditors to accept a 40 per cent. compromise.——G. M. Moore, of Middleton, gave up farming two years ago on account of failing health, and engaged in selling implements. He has not made it a success, and has assigned.——J. E. Crowe, general store, Springhill, is in the assignees' hands. There are preferences of $1,900, which will about absorb all the assets.

Mercatile Summary.

It is reported, says the Fall River *Herald'* that local mill agents are taking advantage of the present low price of cotton and are buying futures in large quantities. Rumor has it, on the street, that the Flint became a party to a contract recently for 2,000 bales for monthly shipments, and the Seaconnet is reported to have contracted for 3,600 bales to be delivered in the same way.

An interesting table presents the statistics of the exports of American locomotives for five years ending June 1, 1897. It appears that the locomotives exported rose from 195, of the total value of $1,794,709 to 338 of the total value of $3,225,831 in 1897. In 1896 Brazil purchased 84 locomotives of American make, Chili 22, Cuba 4, Japan 23, Mexico 23 and Russia 74. Ten per cent. of the total output of American locomotives now go abroad.

Upon the demand of Messrs. Beauchemin, Fils & Co., an assignment has been made by E. A. Martineau, of Montreal, dealer in wall papers and general fancy goods Owing to street traffic disturbances, Mr. Martineau's trade has suffered of late years, and he has been reported slow pay. The liabilities are $17,200. ——A brief business career has been that of L. E. Dion, who was formerly a clerk in a large departmental store until last August, when he bought the retail stock of E. Lavigne in Montreal, inventoried at about $20,000, on long time. He has already assigned on demand, with liabilities fixed at about $21,000.

The returns for the four chief western markets, Chicago, St. Louis, Kansas City and Omaha, show for a number of years the following receipts of cattle and sheep:

Date.	Cattle.	Sheep.
1897	5,974,945	5,932,790
1896	5,693,888	5,532,819
1895	5,537,844	4,933,532
1894	6,148 725	4,225,348
1893	6,403,154	4,203,005
1892	6,459,270	3,070,407
1891	5,752,634	3,057,735

As an instance of proof regarding the carelessness of American manufacturers in putting up goods for export, the daily press has cited that of a cargo of 7,000 kegs of nails consigned by a Cleveland firm to a house in Kobe, Japan, which had to be coopered twice during transportation. In a suit against the steamship company a verdict for the defendant was rendered, the frailty of the kegs being considered the fault of the shipper.

From Quebec city we hear of the failure of A. L. G. Dugal, a furrier, some twenty years in business. He owes nearly $10,000. In 1890 he compromised at 40 cents.——Pepin & Co., retail shoes, in the same city, have also assigned. Alfred Pepin failed two years ago, and has since done business under cover of his wife's name.——A meeting of the creditors of H. A. Proulx, printer, Quebec, was held on the 8th inst., when an offer of 20 cents on the dollar was rejected.

In a paragraph under this heading last week we spoke of the American Tire Company, of this city, as having failed. We are now informed that it was against the English company of the same name that a petition was filed, and that this petition has been this week withdrawn. This being the case, the business of the American Tire Company of Toronto remains unaffected. The vice-president tells us that all orders given the company will be taken care of in the usual manner.

An arrangement has been made with the creditors of James McGregor, dealer in men's furnishings, at Nanaimo, B.C. Eighteen months ago he showed a surplus of $8,000, and the creditors then granted him an extension of time.——A. W. Peck, furniture dealer at Nelson, has assigned after being in business only six months.

An important decision has been come to by the Minister of Customs in the matter of "travelers' baggage." The effect of it is said to be to do away with the exemption of 300 pounds of supplies which was allowed last season to prospectors from foreign countries entering Canadian territory in the Yukon. Only personal effects, necessary for the journey, will hereafter be admitted free of duty. This is the same regulation as is enforced at the boundary in the United States.

The sheriff is in possession of the general store of Morrisette & Setherington, at Norman, in the Algoma district. Both these men had been employed in a sawmill previous to starting business, about seven years ago. The former, it is said, retains his position in the mill, and the latter looked after the store, but unfortunately invested some considerable money in the fish trade, which resulted in a loss. A year ago they claimed a surplus of $11,500 over liabilities of $7,600.——A sheriff officer is also in possession of the Toronto Junction Foundry Co., limited, which was incorporated a year ago with an authorized capital of $24,000. Of this sum $8,700 was paid, but this proved insufficient for their needs. The business will probably be wound up.

The Burford Canning Co., limited, was incorporated in Ontario in March, 1894, with an authorized capital of $15,000. Of this sum $4,000 was paid. Two years later the paid capital was increased to $6,700. With small capital, a heavy stock to carry, and strong competition, the company find that they cannot meet their bills, and have made an assignment.——Davis & McCullough, jewelers, Hamilton, have also assigned. W. R. Davis, the sole proprietor, has not given the attention to business that it deserved. It is thought that he will owe about $27,000. The nominal assets will probably exceed this sum, about $9,000.——John E. Wilkinson, tailor, in this city, has assigned with liabilities of $500.

There has been an impression that though the exports of lumber from St. John to trans-Atlantic ports jumped last year to 244,169,459 feet, compared with 169,530,695 in 1896, that the exports to the United States were very much smaller than usual. This, however, was not the case to nearly as large an extent as was supposed. The difference in value between the exports of the two years is only about $108,000. The total year's export of forest products for 1897 to the United States was $1,275,687, compared with $1,384,295 in 1896, or a decrease last year of only $108,-608, which is very much less than people generally had supposed. It may be noted that the lumber exports (exclusive of firewood and bark) for the last half of 1895 were valued at $956,078, compared with $727,173 in the last half of 1896, and $612,767 in the last half of 1897.

THE SITUATION.

All at once the resolution to use reindeer in the relief expedition to the Klondyke has been abandoned. Secretary Alger's knowledge of the use of traction engines over snow in the lumber woods of Michigan has suggested to him the substitution of that machine; and accordingly a contract has been entered into by the United States Government to send into the mining region 150 tons of provisions. It is thought that Dawson City can be reached in this way in 70 days. Six of these engines and 35 cars are being made. Chilcoot Pass would seem to be an unpromising place for the use of traction engines. A pilot engine will feel the way, and cables will be used on the hill sides. Some even dream of making permanent this mode of traveling, and when things have got into regular working order, they talk of doing the trip in 14 days.

A railway from Toronto to James Bay, which now finds influential advocates, offers the best means of opening up what has been, not inaptly, called New Ontario. The deputation which waited on the Ontario Government, on Monday, to ask aid to this project was unfortunately not agreed upon any specific line of route. That one of the speakers was thinking of the English townships, and another of how lumber could be got down from the north as far as the C.P.R. and then shipped east, a little reading between the lines will suffice to show. The importance of these divergencies is the fact to which they point, that large and varied interests are wrapped up in the proposed road. Ontario possesses a vast region in the north which is virtually closed to most kinds of enterprise for want of railway communication. The prospective sale of lands, of timber limits and minerals would justify a considerable expenditure on communications. As the road will depend largely upon Government and municipal aid it ought, if possible, to be obtained at first cost, and not made a means of making money for bonus hunters, as has so frequently happened in the past. When the subsidies suffice to build, or nearly to build a road, they ought not to be unqualified gifts. The Governments and the municipalities, in virtue of the aid they render, should acquire a corresponding interest in the work, or a right of ultimate repayment, as the Congress of the United States did in case of the Pacific roads. When a large amount of the capital consists of private subscriptions, Government and municipal contributions often have to be content to rest on a less advantageous footing. But there ought to be some defined claim to a refund, whole or partial, if the future prospect at all warrants such a conclusion of the joint enterprise. The Ontario Government proposes a grant in aid of $270,000.

Binder twine was put on the free list, at a date then a little in the future, when the tariff of 1897 was passed. Now representatives of the cordage interest call upon the government to re-enact a duty and make it 25 per cent. This interest is chiefly comprised in the Consumers' Cordage Company, which has swallowed up all rivals except the Patrons' factory at Brantford and the government plants at Toronto and Kingston. The Consumers' Cordage Co., in spite of its large capital, real or nominal, or both, depends on bank discounts to carry on its business and these it cannot get unless the duty be reimposed. It becomes, in the face of this demand, pertinent to ask what is the real capital of the company, apart from water, and what form has it taken, so as to avoid the possibility of pretexts for calling on the public to contribute, through the restraint of legislative machinery, dividends on watered stock. The patrons were most promient among those who demanded that binder twine should be duty free. They also set up binder twine machinery of their own, and now that their desire for duty-free twine has been met, they show their consistency by demanding for their Brantford factory a reimposition of the duty. It remains to be seen when the Patrons, as a body, will relieve the irony of the situation by refusing to sustain the demand of the Brantford factory.

A Montreal despatch to a New York journal gives as the cause of the blackballing of U.S .Consul-General Bittinger by the St. James Club, a statement published in a Chicago journal, for which he was given as authority, to the effect that the French citizens of Quebec were forming secret societies and arranging for an outbreak looking to the independence of Canada. If it were certain that Mr. Bittinger set afloat any such statement as this, the matter could not stop here; his recall should be a matter of course, or in the absence of recall the other available recourse should be utilized. We are not assuming that Mr. Bittinger set afloat so silly a story. If it were proved that he did, what we have suggested would be inevitable.

Leo XIII., in his apostolic letter on Manitoba schools, says about what, from his position and character, might have been expected of him. Where his predecessor would have scolded loudly, he is conciliatory, while firmly maintaining what he regards as the rights of Catholics. As might have been foreseen, he upholds the Canadian bishops in their condemnation of the late school law of Manitoba, and he finds the amended law inadequate. While admitting that a certain latitude of opinion as to what is best to be done in the premises, he in effect says that no one is at liberty to propose any plan for this end, without first consulting the bishops. This applies, of course, to public men, and the effect of the requirement laid down is that no public man can initiate a plan of education for Manitoba without first taking the advice of the bishops. His words are: "Let no one forget the respect he owes to others, and let all weigh maturely that which is best to do, and do in a cordially thorough agreement, and not without having taken your [the bishops'] advice." This injunction has no chance of being obeyed. On the point of paternal authority, Leo XIII. comes very near giving the whole case of the church away. He says: "As to deciding in what institutions the children shall be brought up, what master shall be called to teach them the moral precepts, that is a right inherent in paternal authority." This statement, afterwards qualified, is broad enough to make paternal authority in matters of education the supreme law. Even Pius IX. was accustomed to make claims in the name of parental authority, and Canadian bishops uniformly do the same; but they mean no more than that parental decision should be exercised in obedience to the church. The good feature of Leo's deliverance is its conciliatory tone and purpose. In substance, however, the decision is unqualified that the church must have the control of education. This demand, the statesmanship of Canada is not prepared to concede.

England's object in her dealings with China, Mr. Balfour, First Lord of the Treasury, points out is trade; and in asking freedom to trade, she asks it not merely for herself, but for the whole world. She has no objection to Russia having a free port in China, on condition that other countries are not excluded. Russia would probably have made her seizure of Port Arthur exclusive, if she could. The pretext on which Germany seized Kiao-Chou was that she wished "the possession in the same way as other powers of a base for trade and navigation in Chinese waters." But in seeking an exclusive possession she sought what the other powers have not, and which Russia alone, in the case of Port Arthur, had tried to get. Great Britain got Hong Kong, in 1842, as Portugal had got Macao in the sixteenth century; but neither of them is held as exclusive possession; both are as open to Germany as they are to Portugal and England. In this contest the whole commercial world must take the side of England, simply because she champions the cause of universal freedom of trade. Far from desiring to acquire any Chinese territory, she would, as Mr. Balfour points out, regard such acquisition as an unwelcome burthen.

LUMBER AND DEALS.

At this season of the year activity in our lumber trade with the United States is not to be expected. But the improvement in business, generally, in the United States during the latter half of 1897, the evidences of present activity in manufactures and commerce among that people, and the preparations they are making for greatly increased production, building and transport in the year now begun seem to justify the belief that there will be a demand in the spring for Canadian lumber across the lakes. Indeed, there have already been enquiries at Ottawa and Toronto for good quality pine. That better times and better prices have come to the lumbermen in Michigan and further west is admitted, an improvement of from $1 to $1.50 per thousand in Wisconsin being spoken of. Eastern markets must naturally respond for in the great cities of the Eastern and Middle states house and factory building is showing an activity to which they have long been strangers.

As to deals for the British market, word comes from Quebec and Ottawa that nearly the entire cut of last year has been bought up, shipment to be begun when St. Lawrence navigation opens. Messrs. Sharples & Co, have purchased one-third of J. R. Booth's cut, and the whole of the Hawkesbury Lumber Company's. The Cox Lumber Company of Liverpool has secured a third of Booth's and half of Edwards'. John Burstall & Co. have bought half of Edwards' and the remaining third of Booth's. Dobell Beckett & Co., we understand, have obtained the stock of Buell & Hurdman, while the McArthur Brothers Company, Limited, have bought the supply of Gilmour & Co. and Gilmour & Hughson, Limited. There is a report that Watson & Todd of Liverpool have bought Bronson & Weston's cut, but this is perhaps premature. The feeling in lumber circles generally shows greater cheerfulness and confidence in the future.

BETTER TEXTILES.

There are many indications that the textile industry is about to experience an improvement in trade conditions. Success in handling textiles should not be regarded as consisting only in an increase in the bulk of goods ordered, but efforts should be directed towards the advantage of improved quality in fabrics, the economy to be found in greater durability in napery or clothing. From the manufacturer down to the retailer, there seems to have existed within the past few years a tendency to put the best energies into the sale of cheap goods. Competition has been keen, times more or less hard, and manufacturers, as well as merchants, have considered that low prices were the attractive baits to the public. Shoppers have received a bad education in this connection, and no small effort will be required to bring them to a better appreciation of "a good article at a fair price." Retailers should instruct their clerks carefully in this matter. A little tact on the part of the salesmen; more prominence given in the windows to goods of the *best* texture and pattern; fewer "slaughter" sales—all these may contribute much to making the year 1898 brighter, so far as the textile world is concerned, than its immediate predecessors.

OUR SUPPLY OF BITUMINOUS COAL.

What effect, if any, the proposed deepening of the canals will have upon the coal trade of Ontario is problematical. The Cape Breton producers maintain that they will, when the canals are deepened, be in a position to compete for the trade of Eastern Ontario, and possibly be able to take a share of the business of the West. Mr. A. C. Ross, in Ottawa the other day, is reported as saying that the deepening of our canals to give a 14 feet draught would result in Cape Breton coal being sold in Ottawa at half the present price of bituminous coal. He is also the authority for the statement that last season this coal was laid down in Montreal for $2.20 per ton. "That, of course," he said, "was for large quantities, but I think it shows what could be done in the way of cheapening coal in Eastern Ontario with improved facilities for transportation. This rate includes freight charges for about 600 miles by turret steamers. Those vessels are too large for even the improved canals, but coal could be carried in barges of a capacity to conform to the new lock dimensions, all the way from our Cape Breton ports to places along the Upper St. Lawrence."

There is such a variation in the prices of coal, according to its quality, that intelligible comparisons are difficult to make. The large capital of the Dominion Coal Company, operating in Cape Breton, N.S., has brought about a change in running methods in the Maritime Provinces. The shipments to Montreal last season, are said to have exceeded by 130,000 tons the shipments of the previous year. A moderate increase was also made in the export trade to the Eastern States, and several large contracts recently closed give promise of a larger business next year. The output of the Cape Breton mines during 1897 is placed as follows: Dominion Coal Company's collieries, 1,250,000 tons; Old Sydney mines, 260,000 tons; New Campbellton mine, 20,000 tons. Total, 1,530,000 tons; a considerable improvement on the output of the previous year. It does not appear improbable that, unless unforeseen events occur, the miners of Cape Breton will secure a considerable market in Western Ontario for their product. Toronto is within 350 miles of what are probably the richest coal fields of the world, those of Pennsylvania. The peculiar nature of bituminous coal renders it desirable that transportation of it should be made with as few handlings as possible. In water shipments there will always be a necessity of placing the coal first in the yard at the port of shipment and again at the port of unlading. The frequent changes from cars to yard, vessel and carts, necessarily result in a great waste. The large consumers much prefer to import their coal by rail, receiving it from the mines in lots as needed for consumption. The chances of political change or labor troubles, however, render it advisable that the manufacturers of Ontario should have more convenient access to the coal fields of Eastern Canada, and the deepening of the canals would achieve this end.

CANADIAN ROUTES TO THE KLONDYKE.

Preparations are being made on a liberal scale in British Columbia and Washington ports, and not without reason, for an unprecedentedly large influx of people from all parts of the world bound for the fabled Klondyke in the coming spring. Australians, Americans, Canadians and European folk will rush thither, most of whom have but a slender notion of the district they are going to, or of the preparation that should be made for such a journey. It is proper, in these circumstances, that an effort should be made to inform the thousands whom there is reason to expect will wend their way to that land of hardship, privation and gold, of the best way to reach it and the most sensible provision to make for the journey.

The American cities which lie around Puget Sound, and the American transport companies, rail and water, are making strong efforts to induce Klondyke traffic over American routes. In doing so the authorities of these ignore as far as they can Canadian routes and Canadian cities. They do not even admit that the richest regions of the Klondyke are in Canada, but leave it to be inferred that United States steamers, shops and arrangements generally are the directest, cheapest and best. The city of Seattle, for instance, is cited by these authorities as the best point of departure on the coast; whereas it is some 200 miles south of Vancouver, the western terminus of the Canadian Pacific Railway.

We are glad, therefore, to see that the Board of Trade of Vancouver has taken energetic steps to make known the advantages of that port, through which passengers can reach the gold districts of the Yukon River more quickly by a day's journey than through Washington coast cities and by three days than through San Francisco. It is to be borne in mind, too, that supplies and other freight can be procured to advantage at Canadian western cities and towns from merchants who have for years been fitting out miners and travelers for Northern British Columbia and the territory beyond, packing their goods and sending them rejoicing on their way. These supplies can be transported by the Stikine or all-Canadian route cheaply, and without the delay and expense attendant on merchandise bought in American cities, which must pay the Canadian customs duty, averaging 30 per cent. *ad valorem*. This circumstance alone should influence British and Canadian travelers to take the more convenient Vancouver route.

The Stikine route to the Yukon, a recent pamphlet tells us, possesses advantages over the White Pass, the Chilcoot Pass or the Dalton trail. There is, it should also be said, a route farther inland from Ashcroft or Kamloops, by pursuing which travelers can reach the gold regions of Cassiar and Omenica in British Columbia, regions which can also be readily reached by the Stikine route through Telegraph Creek, and the richness of which, though at present overshadowed in the popular mind by the fame of the Klondyke, must prove attractive to many a gold-seeker.

THE MONTREAL BILL IN THE QUEBEC HOUSE.

In spite of the protests of the representative mercantile bodies of the city, of the bankers and business men, it has been decreed by the Legislature of Quebec, on a vote of 22 to 17—not half the House—that Montreal shall enter upon an extravagant course of street-widening and market extension, the cost of which will probably exceed half a million dollars. In vain did the city members try to get the $250,000 item for Bonsecours market eliminated from the bill; in vain were amendments offered and delays asked for; in vain proved the remonstrances of the city council and the commercial bodies. A powerful lobbying influence was at work; and legislators from country districts remote from the city voted to saddle upon the city, works which, however desirable in other circumstances, are extravagant in the face of the existing heavy debt. Upon the property owners will fall the burden of the increased taxes these projects will involve. But it is well known that the English merchants and manufacturers of Montreal are rich, and what do the French members far down the St. Lawrence, care for the objections of the prosperous milch cow of the province?

In view of the action of the Legislature a section was added to the bill authorizing a special assessment of a quarter of one per cent. of the assessed value of all taxable realty in the city. This is to provide for the cost of the above-mentioned works, and is over and above the requirements of the city's existing funded debt limit. And by this same section it is provided that the city's share of St. Antoine street and Notre Dame street widening shall not exceed $250,000 each, any excess over this sum to be paid by the owners of land on these streets. The section in question was unanimously agreed to, we are told. How kind of these arbitrary legislators, after having forced an obnoxious expenditure upon the ratepayers of a municipality to say to them, " Gentlemen, we compel you to spend money for works which you do not wish and cannot afford, but we graciously allow you to tax yourselves to pay for them!"

SUNDAY WORK BEFORE THE ONTARIO LEGISLATURE.

An organized opposition to the bill to amend the Lord's Day Act has suddenly developed a startling degree of strength, which had not been counted on by the advocates of the measure. A fear that blast furnaces might have to be blown out for Sunday, steamboats prevented coaling, railway through trains be brought to a stand, brewing and distilling be hampered, numerous manufactures hindered in their necessary operations, sent to the council chamber of the Ontario Government a deputation of unwonted strength to protest and to demand that the arm of the proposed law should be shortened. Some of the fears expressed on the assumed effect of the measure may have been misconceived or exaggerated. The advocates of the bill, who formed the reverse of the deputation, scented the coming storm and hastened to assure the critics that they were the victims of misapprehension. The bill, they alleged, was not intended to have any, or if any, but few of the effects feared. Ontario could not interfere with

Dominion railways, even if it desired. The Lord's Day Alliance protested that it had not sought any such measure as the imagination of the critics had conjured up. Mr. Hardy volunteered the statement that the bill was not intended to reopen the street railway question. But even he could not undertake to say what view the courts might take of necessary legislation. He promised to bow to necessity, or to make needed exceptions. The demonstration made by the deputation was a revelation of reserved power which could be called into action if necessary. We trust it may not be necessary, as was suggested, to organize a counter force to that to which this bill owes its existence.

The commercial or necessity side of the Sunday question, highly important as it is, is still only subordinate. Though it would be very inconvenient that steamboats should come to a stand, away from shore, on that day, it is more necessary that no one should be compelled to work on what he believes is a day of sacred rest, incumbent on him, in conscience, to observe. The condition on which everyone enters on an employment where Sunday work is necessary is, and must be, one of choice; one which he is at liberty to accept or reject. That everyone is not a free agent, but that many are under the restraint of circumstances is alleged against the possibility of the hungry man being in a position to exercise a free option; but in this sense, few indeed are absolutely free: that is, not to say that free contracts are impossible, or that one-sided contracts, when voluntarily made, at least in appearance, are not binding. The one thing which especially commends respect in Sabbatarianism, is the effort to secure for the workingmen one day of rest out of seven. Yet, if everybody wanted to have his day of rest on the same day, all necessary work would cease. But all do not so desire. Doing or refraining from doing necessary work on Sunday, is a matter exigible in the court of conscience. Compulsion exercised in one direction or the other is tyranny, the parent of the sort of persecution which has not seldom drenched the earth with blood. There are plenty of people to do all necessary work on Sunday, whose scruples of conscience, though probably as acute as those of others, do not forbid them to do it. This makes it possible that all necessary Sunday work can be done without violence to any man's convictions: the essential thing to be attained by any legislation which aims to regulate the economy of Sunday rest and necessary Sunday work.

CANADIAN IRON FOR EXPORT.

The transaction, recorded shortly after New Year's Day, by which the Cardiff, Wales, Iron Foundry ordered from Warner, Stuart & Co., of Cleveland, Ohio, 4,000 tons of 64 per cent. Mesaba, Lake Superior iron ore, f.o.b. docks, at Cardiff (price said to be $5.15 per ton), proves that there is a market for American ore in Britain. Furthermore, the pig iron of Alabama is being shipped to England at a profit. These and other considerations are said to be influencing the proprietors of the Nova Scotia Iron Works, at Ferrona, in Pictou county, to discuss the removal of their works to Louisburg, Cape Breton. The original object in locating the works at Ferrona was to be alongside the immense deposit of ore supposed then to exist there, and also to be near coal and limestone. But the deposits of ore were not extensive, and now nearly all the ore used comes from the company's ore beds in Newfoundland. It is further said that Pictou County coal is not so well suited for smelting as is Cape Breton coal. In fact, the company made practical tests of the latter with the result that they ordered something like 10,000 tons. This had to be taken from Louisburg to Pictou Landing by water, and then to Ferrona by rail. By locating at Louisburg the company would be alongside the kind of coal they require, and would be saved the haul by rail of their ore from Newfoundland. They would also have an advantage over Alabama competitors in the matter of freight. The latter being handicapped with a haul of several hundred miles to the seaboard and a longer ocean journey.

At the meeting of the company held at Halifax some days ago, the project was discussed, we are told, in all its bearings. The authorities of Sydney, having heard of the possibility of removal, make proposals that Sydney, not Louisburg, should be chosen, because it offers advantages in point of situation, railway and shipping facilities, etc., fully as great as Louisburg, while a proposal of exemption from taxation, or cash bonus, has been made by resolution of the town council, to any coal mining companies or other companies which will locate their workshops, offices and shipping piers on the peninsula of Sydney." If it should prove to be the intention of the company to locate their works in Cape Breton, with the object of making pig iron for export abroad, it would seem to be extraordinarily well placed and circumstanced for such an enterprise, either at Sydney or at Louisburg. We shall look with interest for further news in the matter.

EXPLOSIVES USED IN COAL MINES.

The revised rules for regulating the use of explosives in coal mines in the United Kingdom came into operation on the first of the year. It is a year since the first set of rules on the subject was promulgated; in June and again in October, 1897, amendments were made, for it was found impossible to make the same set of rules apply to all the mines in the country. Originally, the Home Office Order on the subject contained a list of "permitted explosives" that included ammonite, Ardeer powder, bellite, carbonite, dahmenite, electronite, kynite, roburite, and westfalite. But gunpowder was left out. Agitation was set on foot to amend this order, and experimental trials of various explosives were made by a departmental committeee, with Mr. Cunynghame, Assistant Secretary of State, as chairman, and with two of the inspectors of explosives and two of the inspectors of mines as members. The object aimed at was the safety of the miners, through the prevention of accidents. As a consequence the list of "permitted explosives" is extended to twelve. In other respects it is a good deal altered. Ammonite still holds its own; so do bellite Nos. 1 and 3, electronite No. 2, kynite, roburite, No. 3, and Ardeer powder. On the other hand, some things in the original list are not in the revised document. In their stead are carbo-gelatine, Faversham powder, and two more of Nobel's preparations—Nobel carbonite and Nobel gelignite. A footnote tells that another explosive, patent blasting powder No. 1, has passed the test, but is not yet classed among the "permitted explosives."

Laborious experiments both in Britain and on the continent proved that all kinds of explosives yielded more or less flame—that, in fact, there was no such substance as a "flameless explosive." This result, arrived at by private investigators, has now been confirmed by the report of the Home Office committee. But, says the Scotch paper we quote, no tests can dispense with the obligation of those who purchase an explosive to see that they procure one of good quality, and that it is used with the proper detonator and stamped and fired in a workmanlike and careful manner. To reduce the risks in mines to a minimum, Parliament and the Home Office having done their part in the matter, "let the example be followed by the managers of mines and by the underground workers themselves."

MARKETING EGGS IN WINTER.

Every merchant in the country is interested in farm products and should be always on the outlook to suggest improvement of conditions on the farm, and advance, at the same time, his own trade. In every town or city of importance there is at the present season an active demand for "strictly new-laid eggs," but only a limited quantity of eggs of this quality is available. Is it not in the interest of merchants to encourage farmers to supply this want? There are specialists who make it their business to cater to this trade, but for the most part they market their supplies without the assistance of the forwarder. There is no reason, however, why farmers generally should not acquire special skill in supplying the market, which is by no means limited. A writer on the subject recently said: "There are three chief reasons why hens do not lay in winter: – improper food, a poor hen house, and an unsuitable class of fowls." We do not propose to go into the details of successful poultry raising, they may be easily acquired by those interested in the industry. The average farmer is of the opinion that there is little profit in raising poultry, but this opinion is not based upon intelligent experiment. An authority at the Central Experimental Farm, Ottawa, says: "I should state that on the ten cent per diem ration, during last winter, fifty hens laid sometimes twenty-seven eggs, at others twenty-two eggs per day, and for these we got thirty-five cents per dozen in December, making a return of about seventy cents at a cost of ten cents. I am at once met with the statement, 'Oh! a farmer could never get such figures.' Well, then, take half what I got." If the question be carefully studied it will be found that there is money alike for the farmer and merchant tn this trade Belgian statisticians tell us, sells $3,500,000 worth of eggs in the United Kingdom each year, while Denmark annually receives $2,000,000 for eggs from the same source. Canada contributes but comparatively little to the British supply, and is capable of doing a great deal more.

TORONTO TRADE FIGURES.

Both foreign imports and exports showed a marked increase at this port during December, the figures totalling 20 per cent. more than in the like month of the preceding year. Imports were $1,670,475; exports $564,712; total, $2,235,187. In December, 1896, the figures were, imports, $1,364,853: exports, $428,844; total, $1,793,697. The principal items are compared in the following list:—

PRINCIPAL IMPORTS.

	Dec., 1897.	Dec., 1896.
Brass and manufactures of	$ 6,651	$ 7,016
Copper "	421	1,171
Iron and steel "	123,790	122,216
Lead "	4,601	384
Metals and composition	12,070	7,334
Total metal goods	$147,533	$138,121
	Dec., 1897.	Dec., 1896.
Cotton, manufactures of	$165,218	$83,128
Fancy goods, laces, etc.	26,706	32,420
Hats, caps and bonnets	8,886	7,264
Silks, and manufactures of	38,829	31,361
Woolen manufactures	125,939	93,072
Total dry goods	$365,578	$247,245
Books and pamphlets	$38,996	$31,346
Bicycles	7,525	13,828
Coal, bituminous	40,087	37,091
" anthracite (free)	79,514	68,967
Drugs and medicines	22,002	13,199
Earthen, stone and chinaware	12,230	14,148
Fruits, all kinds and nuts	56,314	77,702
Glass and glassware	19,119	17,985
Jewelry and watches	29,044	21,205
Leather and manufactures of	37,329	23,440
Musical instruments	18,383	10,159
Oils, paints and colors	23,061	20,464
Paper and manufactures of	34,529	28,273
Spirits and wines	10,464	8,370

An increase is observable in imports of dry goods, metal goods, leather, paper and jewelry, while the only items of moment exhibiting a decline are fruits and delf. Turning to exports, animals and dead meats show a marked advance, also field products and manufactured goods.

EXPORTS, CANADIAN PRODUCE.

Produce of	Dec., 1897.	Dec., 1896.
The Mine	$ 42	$ 48
" Fisheries	9	....
" Forest	4,074	5.426
" Field	146,541	110.676
Animals and their produce	261,775	181,191
Manufactures	115,916	94,737
Total	$528,357	$392,078

MONTREAL BUTTER AND CHEESE MERCHANTS.

The annual meeting of the butter and cheese Association of Montreal was held on Monday the 10th inst. Several interesting questions came up for discussion. The sale of goods landed in England with a clause attached making them subject to arbitration on the other side of the Atlantic was considered by many an unsatisfactory method of doing business. Under certain conditions it placed the merchant in Canada at a decided disadvantage. Another practice in which reform is desired is long dating of drafts of exchange. The customary period is sixty days, which is a relic of the days of sailing vessels. At present fifteen days is the longest period between date of shipment from this side and the receipt of the goods in Great Britain. The foreign importer, therefore, is practically given 45 days in which to speculate in the goods before he is called upon to pay for them. It is contended that this, on occasion, acts as a temptation to the receiver to ask for arbitration, if the market declines in the meantime. Indeed, it is claimed that sixty days is not by any means the longest draft, but that they frequently run to 90 days. The short selling of cheese ahead has of recent years grown enormously. It is asserted that more than half of the past season's business was done on this basis. In the discussion which took place on this subject at the meeting the point was made that it would be more honorable to deal openly in futures in butter and cheese, as is done in grain, than to follow the practice secretly as at present.

The merchants believe that they are not receiving justice from the railways. Operators west of Toronto, it is stated, were given through rates that meant a decided disadvantage to the exporters in Montreal. Individual shippers stated that not making shipments on a through rate from the West meant last summer to them a loss of all the way from $5,000 to $6,000. The through rate was altogether disproportionate to the rate to Montreal.

The election of officers resulted as follows:

President—A. J. Brice.

Vice-President—James Oliver.

Treasurer—P. W. McLagan.

Executive Committee—John McKergow, Arthur Hodgson, J. A. Vaillancourt, and Wm. Nivin.

Arbitration Committee—A. W. Grant, A. C. Wieland, M. J. Farrell, F. Duckett and D. A. McPherson.

Transportation Committee—John McKergow, J. C. Warrington, D. A. McPherson, F. Duckett, J. Alexander and A. J. Brice.

The president is to be the association's nominee for the Council of the Board of Trade, and it was also decided to renew the practice of an annual association dinner, A. W. Grant, A. C. Wieland and A. C Froemcke being appointed a committee to look after the details.

TEA IMPORTS.

Although accurate statistics of the year's tea trade are not yet available it is generally believed that the imports for the season 1897-98 will be much less than those of the two previous years. The somewhat stringent inspection to which tea is subjected upon importation into both Canada and the United States is, no doubt, partly responsible for the decline in trade. In both countries there has been some dissatisfaction with the operation of the laws, but there is little doubt that they have been fairly effective in keeping out spurious teas, which the Chinese and Japanese exporters were accustomed to market here with considerable advantage.

The following figures of imports into the United States and Canada for three seasons have been furnished by Messrs. Jas. & Jno. R. Montgomery, who are regarded by the tea trade as authorities on tea statistics, to the *N.Y. Journal and Bulletin of Commerce*:—

IMPORTS INTO THE UNITED STATES AND CANADA.

	1895-96. Lbs.	1896-97. Lbs	Estimated. 1897-98, Lbs.
Green	21,576,085	16,216,906	13,000,000
Japan	48,750-838	42,676,418	42,500,000
Formosa	15,912,426	18,994,324	17,500,000
Amoy	2,419,272	1,152,846	200,000
Foochow	4,843,764	3,430,327	4,000.000
Shanghai and Foochow	11,798,196	11,080,536	9,500,000
Total	105,300,581	93,551,357	86,700,000

It is interesting to note from this table that the decline of the China trade is relatively much greater than that of Japan. The foregoing totals do not include India or Ceylon teas, which, by another authority, are given as follows:—

	Pounds.
Season 1895-6	7,792,185
" 1896-7	9,474,019
" 1897-8 (estimated)	12,000,000

Leaving India and Ceylon teas out of consideration, says the *Journal and Bulletin*, it would appear on the basis of the foregoing figures that the new tea law has had the effect of keeping eight to ten million pounds out of the country. Imports into the United States and Canada during the season 1895-96 were considerably above normal, while in 1896-97 imports were somewhat below. The 1897-98 estimate will, the Messrs. Montgomery believe, prove under rather than above the actual figures, as it is possible that the tea that has been considered available for export from China, etc., may not all meet the requirements of the tea law's standards. Accepting, however, the deficit from the normal imports into the United States and Canada at nine million pounds, and accepting the rejections at 2,000,000 pounds, there is a total deficit in the imports during the current season of 11,000,000 pounds, which is a fact that is interesting members of the tea trade just now, especially those who are amply equipped with supplies.

HARDWARE AND METALS.

If all the projected railway schemes in Canada are carried out the metal traders of this country should be on the eve of a period of great prosperity. The present industrial undertakings have had the effect of increasing imports of iron and steel manufactures, as compared with a year ago.

The German iron and steel industry continues in a thriving condition. The Association of German Iron and Steel Masters show that the total output of iron in the German Empire, including Luxemburg, amounted during the eleven months to 6,273,612 tons, against 5,808,263 tons in the same period last year.

The British tin plate industry has had an exceptionally chequered career during 1897. Several times during the year it looked as if there was likely to be a considerable revival of demand; but these prospects have been dashed again and again by renewed depression, so that the mills have been worked with rather more irregularity than usual. The total exports of tin plates for the first eleven months of the year were 250,736 tons, against 248,737 tons for the first eleven months of 1896, and 332,547 tons for the first eleven months of 1895.

Canada has been an important market for the foreign manufacturer of steel rails. Large orders have hitherto been placed in the United Kingdom for these supplies, but prospects now point to an enlargement of the trade with the United States. Commenting upon the competition to which British manufacturers have been subjected at the hands of American rivals, the *Economist* says: "The average price in the United States ranges from 3s. to 4s. at the pit's mouth, whilst in this country the average is between 6s. and 8s. Cheap coal leads to cheap pig iron, and it is stated that pig iron can be produced in Alabama at about 25s. per ton. The carriage to the shipping ports of Pensacola and Mobile (a distance of about 270 miles) is only 10s. per ton, or about one-half the rates which would be charged in this country. Although pig iron is exceptionally cheap in the Southern States, still, as similar conditions exist in the Pittsburg districts, we can understand how the Carnegie Company are able to compete with the makers of English rails at a time when, by a combination, the price has advanced from £3 15s. to £4 10s, per ton. Although considerable quantities of steel bars and billets, wire and other kinds of manufactured steel have been imported, it would appear as if pig iron and steel rails were the departments in which the American makers were likely to have the greatest amount of success."

ACETYLENE GAS AND INSURANCE.

With a view of ascertaining how far acetylene gas may safely be used for lighting purposes—the Underwriters' Association having imposed stringent regulations upon its use—a number of Ontario mutual fire insurance companies united in requesting an expert opinion from Professor Shuttleworth of Toronto as to the risks involved in the manufacture and use of acetylene. The Wellington of Guelph, the London, the Perth, and the Millers and Manufacturers companies asked for this report on calcium carbide and acetylene gas.

After explaining the Willson process of making calcium carbide, from which acetylene gas is derived, and describing what he saw in the Merritton works, Mr. Shuttleworth says: "Much of what has been just stated is applicable to the question of the storage of carbide. In the absence of water the compound is no more dangerous than is so much limestone. With water there is the formation of acetylene gas, but, except pressure is thus generated - a condition which, under such circumstances, is difficult of fulfillment—there is practically no liability to accident in the absence of flame. Water and fire together constitute the element of danger, while in the case of gunpowder and other explosives, and with inflammable liquids, as alcohol, gasoline, turpentine, etc., the latter is alone sufficient. . . . I am of opinion, with proper provision for keeping the carbide in substantial, properly sealed, water-tight, metallic cases, enclosed in wood in order to protect the tins from external violence, and the storing of such packages in a well-ventilated apartment, the risk would not at most be greater than with ordinary inflammable liquids."

The dangers to which the manufacture and use of low-pressure acetylene is liable are then enumerated. It will be noticed that the risk of explosion through defects in apparatus or escape of gas is placed first:

1. Formation of explosive mixtures of acetylene and air, as produced by defects in generating apparatus, or escape of gas through fixtures. 2 Production of heat and pressure by the too rapid decomposition of the carbide. 3. Secondary formation of gas by waters vapor, or the dehydration of slaked lime by the carbide, after the conclusion of the ordinary process. 4. Generation of dangerous pressures in apparatus insufficiently provided with relief attachments. 5. Formation of explosive compounds with copper or its alloys. 6. Production of spontaneously inflammable gases originating in impurities in the carbide. 7. Blocking of pipes by solid hydrocarbons resulting from polymerization of acetylene. 8. Evolution of gas from imperfectly exhausted carbide residues.

Dealing with these points the report expresses the opinion that (1) the danger of accident from explosive mixtures with air does not appear to be appreciably greater with acetylene than with coal gas. (2) Experiments made here by Prof. Shuttleworth have not confirmed what *savants* in Europe have said about explosions arising from too rapid decomposition of carbide. (6) Inspection or analysis of carbide should be put in force, because explosions of compressed carbide have occurred from impure carbide being used. (8) The professor does not consider residues from undecomposed carbide in the generators as dangerous as wood ashes as removed from domestic stoves. In cases 3, 4, 5 and 7 the risks are regarded as slight, and dependent upon the proper construction of apparatus. We quote further from the report: "The above enumeration fairly exhausts the list of risks involved in the manufacture and use of low pressure acetylene. The next point of enquiry is that of ascertaining whether these dangers have been actually realized. In order to carry out this purpose I have searched for records of accidents the files of likely periodicals, and have succeeded in finding notes of a few cases, though in most of the accounts the information is meagre, and in some instances indefinite, especially as to the state of compression of the gas. To those you will doubtless be able to add others from insurance records. The following is not given as being complete, but simply comprising all the cases which I have been able to find:

Accident alluded to by Smithells, in remarks on Berthelot and Vieille's communication to the French Academy of Science. Carbide in generator thought to have become incandescent from insufficient supply of water. Particulars not given, nor pressure of gas stated. A plumber at Egremont, Cheshire, constructed and used an acetylene apparatus. Supposing the "receiver" to be empty he took off the cover, the result being an explosion by which he was so much injured that death shortly after resulted. The coroner thought the explosion was caused by the admixture of air with the gas remaining in the receiver. There is here a possibility of the presence of spontaneously inflammable phosphoretted hydrogen. Infante reports the explosion of a home-made apparatus. Smithells thinks that it was due to phosphoretted hydrogen, and that the receiver contained air. Two explosions took place in New York from the escape of gas from acetylene apparatus. The presence of flame might here be presumed. Another New York accident resulted from the cover of a generator being removed while a lighted candle was in close proximity. An explosion is said to have taken place lately at Arkona, Ontario, by which several persons were slightly injured. The owner is stated to have been in the act of showing the apparatus to some of his friends, a lamp being used as a source of illumination. Explosion followed the removal of the cover of the generator. The last four accidents evidently took place with low pressure acetylene, and were all probably due to the proximity of flame. This indicates what I believe will prove to be the chief source of danger.

Recognizing the importance of the subject we have given what space we could to the discussion of the production of carbide and the use of acetylene. And we now present in full the conclusions of the expert:

GENERAL CONCLUSIONS.

(1) Calcium carbide factories may be classed in the same category as iron foundries, with the additional risk incidental to electrical plant.

(2) The storage of carbide should be subject to the conditions governing that of inflammable liquids. Packages to be of sheet steel, of a least twenty-seven guage, well tinned, having seamed and soldered joints, and furnished with water-tight metallic caps. Packages to be further protected by being enclosed in strong wooden cases. Place of storage to be well ventilated, dry and well drained.

(3) Carriage of carbide, by water, to be held to involve extra risk.

(4) Carbide to be free from phosphoretted or siliciuretted compounds, as determined by analysis, or assured by guarantee.

(5) Apparatus for generating acetylene to be inspected and approved before use, and to embody certain general features of construction to be hereafter specified.

(6) Rooms for the instalment of apparatus to be well drained, free from dampness, and provided with sufficient overhead ventilation communicating directly with the open air. No fire, flame or artificial light to be allowed in apparatus room, nor are such places to be used for any other purposes than that indicated.

(7) Manufacture of gas to be carried out by a properly instructed and capable person, and never to be attempted except by daylight.

(8) Residues from generator to be removed by daylight, and directly deposited at a proper distance from any building.

(9) The use of acetylene gas, for lighting purposes, need not be placed under any special restrictions when the apparatus is not located in the building, and at a safe distance from it.

USE OF COMPRESSED AND LIQUID ACETYLENE AND CARBIDE LAMPS.

It is more than probable that this question will, in time, become of considerable moment, and demand attention. In view, however, of the serious accidents which have already occurred, even in the laboratories of the most experienced gas chemists; and until the peculiarities of compressed and liquid acetylene are more perfectly understood, and better control apparatus has been devised, I think the underwriter may most profitably decline all business involving risk with these dangerous substances.

I have formulated and herewith enclose a draft of regulations governing the installation and use of gas machines. I have the honor to be, Sir,

Your obedient servant,
E. B. Shuttleworth.

Toronto, Nov. 12th, 1897.

INSURANCE MATTERS.

At the beginning of last week the annual statement of the United States Life Insurance Company was made public. It shows the assets now amount to $7,623,100, which is an increase of $159,000 for the year. The surplus, as regards policyholders, is $722,507.48, nearly ten per cent. of its entire assets, and an increase of over $90,000 on the previous year, a satisfactory showing.

The item of agents' balances has long been classed among the indifferent items of assets of an insurance company's balance sheet. We observe that a number of the United States have advised the fire insurance companies that agents' balances will not be considered a credit in annual statements unless guaranteed. With a significant timeliness, says the *N. Y. Bulletin*, the notification was promptly followed up by solicitors of surety companies offering the guarantees.

Truro, N.S., is awake to fire protection. A committee of the council has submitted two plans. One to cost $7,000 proposes to enlarge the present central engine house on Young street, and equipping it with horses and other apparatus and improvements. The other is a larger and more expensive scheme costing say $12,000, viz.: the purchase of property on the corner of Prince and Young streets, which will afford also room for a Town Hall when the ratepayers decide to build one. The committee recommend the larger scheme, and the ratepayers will be called together on the 18th to consider these proposals, and vote upon them.

The remarkable difference in favor of abstaining lives over those of non-abstainers, which has characterized the yearly returns of the United Kingdom Temperance Insurance Company for a quarter of a century, has been again exhibited. During last year in the non-abstaining section the actual death claims were 356, or 46 fewer than the expectancy. In the temperance section the actual death claims were 246, or 118 fewer than the expectancy. In other words, if the death rate of the abstainers had been the same as of the non-abstainers, instead of 246, there would have been 320 deaths, or 74 more, while if the death rate of the non-abstainers had been the same as of the abstainers there would have been 84 fewer deaths.—*British Medical Journal.*

A recent blue book issued by the British Board of Trade, shows the growth of life insurance in the United Kingdom in sixteen years, as measured by the total assets. The 1880 report gives the total assets at $681,895,000, while the 1897 report gives the total assets at $1,140,000,000. That is an enormous growth in sixteen years, but has been greatly exceeded in the United States. Taking the life companies reporting to the New York insurance department, and the total assets in 1880 were $417,951,009, but in 1896 they had grown to $1,228,324,342. The percentage of increase from 1880 to 1896 was sixty-seven per cent. for the British companies, while for the American companies it was nearly two hundred per cent., and the New York report, as a contemporary shows, does not include all the companies.

In a letter of enquiry sent to us by a subscriber, he comments upon the many hundreds, and even thousands of members of assessment societies who conscientiously pay up when called upon by their authorities, and laments that so many of them are bound to be disappointed by the failure of the system. The enquiry reminds us of the observation made by an American comic paper, that a good deal of the sting is taken out of a dollar insurance assessment when the Past Grand Worshipful Exalted Treasurer merely reminds (by letter) his Worthy Grand Venerable Brother that one dollar is required from him by Royal Grand International Adullam Lodge, Distinguished Machpelah Chapter No. 79. If the letter began simply "Dear Sir," and ended "Yours Truly," it would not fetch the money half so quickly.

ANSWERS TO ENQUIRERS.

A subscriber asks us to define the meaning and application of ohms, and volts in electric measurement, and desires to know how a volt will compare with a horse-power of steam. [The ampere is the unit of electric current, but the electro-motive force produced by this current and applied to industrial uses is measured by volts. The relations between the units of force, quantity and resistance in dealing with electric energy have been thus defined. A unit of resistance, or, as it is called, the standard ohm, may be represented by a wire of standard substance, standard diameter and temperature, which will absorb one unit of electro-motive force, *i.e.* one volt, when one unit of quantity, *i.e.* one ampere passes along it.]

J. McC., Montreal.—There is the Stratford Board of Trade, whose president is R. M. Ballantyne, and secretary, C. J. McGregor. Galt is in an adjoining county; its president is J. M. Irwin, and secretary, R. Ferrah. The other place you mention has no board.

Eastern Reader, Picton, N.S.—Hong Kong is a crown colony and a great entrepot for British trade with the east coast of Asia. It has nearly 200,000 inhabitants, and its inward and outward trade with Great Britain is between £4,000,000 and £5,000,000 annually.

William Street, Montreal.—Have not the European figures at hand, but can inform you partly as to the American. Besides the Cleveland plant, there is the Aluminum Reduction Works, at Niagara Falls, N.Y. The capacity of these is at least 10,000 pounds of aluminum per day.

Enquirer, Pembroke.—It was neither of those you mention; it was the Bank of Hochelaga that was the first of what you call "The French Banks" to open in Winnipeg. This was in 1892. A year or two after that La Banque Nationale opened a branch, but it has since been closed.

FOR GROCERS AND PROVISION DEALERS.

Seventy-five cigar makers employed by S. Davis & Sons, Montreal, have gone out on a strike.

Baking powders containing alum, if sold in Minnesota or Wisconsin, have to be conspicuously labeled "alum."

The Chicago Board of Trade recommends that Congress impose a license of $500 upon the sale of adulterated wheat flour.

Both the sugar refineries in Montreal are shut down, the demand being light. Spot quotations are an eighth of a cent lower.

The Yarmouth steamers are carrying large quantities of live lobsters to the Boston markets. They are bringing about $12 per crate.

The Food Show recently held at Boston under the auspices of the Retail Grocers' Association netted a profit of between $32,000 and $33,000 to that body.

Some of the principal inspectors of weights and measures, employed by the Department of Inland Revenue, are to meet in Ottawa soon to discuss the question of increasing the toleration of error in weights and measures in order to bring it more to a commercial basis instead of the purely scientific basis on which it rests at present.

Molasses is stronger. The Montreal stock in first hands is estimated at 3,000 puncheons Barbadoes, 1,000 of Porto Rico, and a trifle of Antigua, a supply much below the average. Prices have accordingly advanced 1 to 2 cents per gallon as compared with the close of the year.

The reports of advanced prices being obtained for canned tomatoes has had a disturbing effect upon the farmers. Recently the tomato growers of Wentworth county and district held a meeting and protested that the canners have been treating them unfairly for a couple of years past. Three years ago they received 30 cents a bushel for tomatoes, but the last two seasons they have not been able to get more than 18 cents. It is said that an organized effort will be made to obtain higher prices next year.

Mail advices from Porto Rico, December 16th, state: "A few planters will begin grinding early next week, suspending during the holidays, to resume work about January 10, so that there may not be any produce available for exportation until the end of next month or beginning of February. The crop will probably be a small one compared with previous seasons, as planting has been considerably reduced on account of low prices reigning of late years, and it will depend upon rates ruling during the approaching season whether cultivation may be maintained or many other plantations turned into non-productiveness."

On Monday evening last the Toronto Retail Grocers' Association met in St. George's Hall. The secretary read his annual report, which showed the society to be in a flourishing condition. Addresses were delivered by the chairman, Past President J. L. Bond and the newly elected officers, who are: President, W. H. Marmion; vice-president, F. W. Johnson; treasurer, W. J. Sykes; secretary, Ed. Hawems; trustees, F. S. Roberts, A. White and J. L. Bond; guard, R. W. Davies; executive committee, Messrs. Kelly, Booth, Clarke, Bell, Scoales and Van Soon.

Of the salmon canners combination, to which we made reference some weeks ago, the Montreal *Star* says: "Representatives of all the leading British Columbia packers have agreed under a bond, the breaking of which involves heavy penalties, not to sell under the figures decided upon by the combination, while a strong executive committee has been elected to supervise the duly carrying out of the whole of the conditions of the agreement, which will extend over the whole of 1898.

The prices fixed are on quite a popular basis, and it may again be stated that the object of the combination is not unduly to advance prices, but rather to have positively fixed figures, so that grocers can enter into purchase with confidence and without the fear that the market will be 1s. or more a case cheaper a short time after. The signatories to the agreement include the great bulk of the consignees of the 1897 pack."

The orange crop of Southern California, now being harvested, is in prime condition, so says a despatch of Tuesday from Los Angeles. Although there was an unexpected fall of snow yesterday the fruit was not damaged.

A queer story comes from Shelburne, Nova Scotia; There was a great run of herring along the shores of that country last autumn, while these fish were scarce elsewhere. Speculating as to the why and wherefore of this the Shelburne *Budget*, finds a gentleman skilled in the habits of fish, who says that herring, like trout, salmon and eels, inasmuch as that they can be attracted by fire, and in his opinion, "the herring were attracted to our shores by the immense forest fires that raged so fiercely some weeks ago. The fires mentioned were started shortly before the fish struck in, and burned for several weeks, acres of wood being ablaze at one time."

SHOE AND LEATHER ITEMS.

The button shoe, we are told, is gradually but surely coming into vogue again.

The collector of customs at Boston has been notified by the Secretary of the Treasury that his practice of requiring the disinfection of wet salted hides of neat cattle imported at that point from England in transit to Canada, is not in accordance with the views of the department.

A shoemaker and dealer was complaining of bad times and dull business—feared the worst, and happened to say to a customer, an eccentric man, "I hardly know what to do." The customer jerked out the words, "Peg away." The shoe man answered that so he did, but be did not get paid promptly for his work, and so on. But the rough old man persisted, "Peg away." And when the disciple of St. Crispin begged that he might not be made a fool of, answered, "Don't be a fool, and don't misunderstand me; I said keep pegging away, but d—n it, I don't mean pegging boots."

The shoe manufacture of the United States this month and last surpasses all records in shipments, which have been in five weeks 25 per cent. more than last year, and 32.5 per cent. more than in 1892, and yet many of the shops have orders for some time ahead. A good many have been placed at a small advance in price, but many more withheld because dealers will not pay prices asked. The average of quotations is now only 3.7 per cent. higher than in 1892, with leather averaging for most kinds 15 per cent. higher, and hides at Chicago averaging 61 per cent. higher than five years ago.

Many a woman who rides a bicycle is still ignorant of the importance of correct ankle action and thereby misses much ease and grace in riding. A writer from Lynn to the *Shoe and Leather Review* urges that the best expenditure of strength is missed if the ankles are not properly used, and they cannot be unless the boots or shoes are made correctly. It should be borne in mind primarily that a rider's heels are to be kept down. This prevents an obtrusive knee action. If one rides with a high seat it is of course impossible to have the heel lowered when the pedal is at its lowest point, but directly it begins to rise the heel should be below it and continue there until the lowest point is again reached. Button boots, he says, are preferable to laced ones for bicyclists, because for one thing buttons do not come undone, as laces do.

TANNERS MEET.

The annual session of the tanners' section of the Toronto Board of Trade was held at the National Club on Thursday, January 13th. The proceedings were opened by a luncheon, which the able and genial chairman of the section, Mr. George C. Lang, of Berlin, had provided. There was a representative attendance of tanners present. The address of the chairman was a comprehensive review of the situation in Canadian leather circles. Mr. Lang maintained that stocks of leather had been reduced and are now in excellent condition. "The past year," said Mr. Lang, "has been a very trying one for tanners, who have had to face, on the one hand, a steady enhancement of values in their raw material, and at the same time meet a persistent effort on the part of buyers of leather to bear the market. It has been a hard fight, and if progress has been recorded in any degree at all, it has been largely on the part of those whose facilities are such as to enable them to meet the extraordinary strain of these circumstances.

"The gradual expansion of export trade in leather is a matter for congratulation. The excellence which our leather products have attained within the past few years has given them a place in the markets of the world that augurs well for the future. The growth of the export trade means the stimulating of an industry that is peculiarly Canadian, and will bring in its wake advantages to Canadian users as well as producers of leather."

The chairman spoke in a vigorous manner of the tariff situation, saying:

"In regard to the tariff, which was an exceedingly live issue at our last annual gathering, tanners cannot but feel that while grateful that nothing has been done to seriously interfere with existing conditions, scant justice was dealt them in comparison with other branches of manufacturing enterprise. The duties, seventeen and one-half and fifteen per cent., were it not for the perfection to which appliances and competition have brought the domestic product, would permit this market to be flooded with foreign goods. As it is, importations are becoming more and more confined to specialties demanded for a certain class of trade."

"As to the outlook," continued Mr. Lang, "it may be said that the future promises little abatement of the present severe conditions in the raw product. With hides in their most undesirable condition, and prices still strengthening, there appears to be no glint of hope for lower-priced hides. Tanners have their future in their own hands. With the gradually increasing demand for all classes of commodities and the indications for enhanced values on every hand it behooves the manufacturer of leather to insist upon a fair remuneration for his enterprise. Nothing like a proportionate advance has hitherto been realized."

The old question of inspection came before the section, and the advisability of making it compulsory was warmly debated. A bill for that purpose is, at present, before the Dominion House of Commons. The proposed measure will not apply to the purchase of hides in small towns where there is no inspector at present.

The following were elected as officers for the coming year:

Chairman.—A. R. Clarke, Toronto.

Deputy Chairman.—C. J. Miller, Orillia.

Secretary.—Edgar A. Wills, Toronto.

Executive.—W. D. Beardmore, W. Bickell, J. C. Breithaupt, G. C. Lang and W. H. McCordick.

Committee on Inspection and Arbitration.—F. T. Daville, James Robson and R. M. Beal.

UNDERGROUND INSURANCE OR WORSE.

A correspondent has sent us some literature pertaining to alleged insurance companies which offer to do fire underwriting in Canada, and which it appears to us have slender, if any, claim to the confidence of business men. Here, for example, is the card of the Great Britain Insurance Corporation, Limited, purporting to be incorporated and to have offices in London, England. The capital of this limited and incorporated concern is stated at £20,000 paid up, and there is besides a "deposit in the hands of trustee, for protection of the U.S. policyholders, £15,000. Total, £35,000 or $175,000." But the ingenious author of this literature nowhere states who this trustee is, or where be keeps his so-called $75,000 security. The "manager for the United States," of this concern is Mr. Sam Foster; and at the top of the card appear the names of Norman L. Wilcocks, Esq., managing director [formerly a clerk in a Toronto company, we understand], and George J. Byrne, Esq., secretary—both being esquires, but the manager for the U.S being no esquire, only plain and democratic "Sam Foster." We find no such concern in our lists of British fire insurance companies.

But behold another and more pretentious card, lithographed on steel in Buffalo, bearing the Belgian lion, and the motto, "L'Union fait la Force," surrounding the words LA MEUSE FIRE INSURANCE COMPANY OF LIEGE, BELGIUM, the United States office of which is placed at Brooklyn, N.Y., with Frank W. Anthony as manager. We are not familiar with the name of La Meuse Company. We do not find it in the published list of the New York Department of Insurance, where it ought to be if it has any right to do business in that country. Further, whether it has any existence in the States or not, it has made no deposit in Canada, and has no license or legal right to do business here. Mr. Anthony is free and easy in his ideas of business. For example, on one of his application blanks there is printed, "No Prohibited List," which, we presume, means, "We Insure anything—come on, Boys." And then he offers 25 per cent. straight commission.

Both these concerns have made attempts within the last twelve months to do business in Canada, and it is well that our business men should be on their guard. If they want "insurance that insures," that can be got at home from companies that are known and trusted.

FREDERICTON BOARD OF TRADE.

The annual meeting of the Fredericton Board of Trade was held in that city on Monday last, Mr. Wm. Lemont in the chair. Nine new members were added on the occasion, and the membership of the board exceeds 60. The chairman submitted the annual report, which referred among other things to the action taken by the city respecting transient traders. Extended reference was also made to the recent agitation in Northern New Brunswick, asking the Dominion Government to buy the Canada Eastern Railway, extending from Fredericton to Chatham. "Away back in the sixties a great agitation was carried on in this province in reference to the building of the Intercolonial Railway. The valley of the St. John was strongly agitated, but the North Shore route prevailed. That entailed a debt, and the yearly deficits of the I.C.R. have been foisted on us as a legacy. This board is outside the arena of politics. As a board we have nothing to do with Mr. Blair, yet almost every opponent of the Government is strongly with the Minister of Railwaays when he desires to take away the yearly deficit on the I.C.R., and the purchase of the Canada Eastern is one of the ways of lessening this deficit. Messrs. Gibson and Snowball built this road."

After the Board had considered the President's report, it was decided to appoint a delegation to interview Mr. Alex. Gibson, and report to the Board at a later meeting.

The election of officers resulted in the choice of the following:
President.—Mr. A. H. F. Randolph.
Vice-President.—Mr. C. F. Chestnut.
Secretary.—Mr. J. W. McCready.
Treasurer.—Mr. M. Tennant.

Council of the Board. — The President, Vice-President, Wm. Lemont, J. H. Barry, F. B. Coleman, F. B. Edgecombe, J. S. Neill, M. Tennant, J. Palmer, J. D. McKay, J. J. Weddall, Geo. Hodge, J. M. Wiley and R. A. Estey.

Arbitrators.—H. Beckwith, Geo. Hodge, G. T. Whelpley, J. S. Neill, J. J. Weddall, J. W. McCready, M. Lemont and F. B. Edgecombe.

CLEARING-HOUSE FIGURES.

The following are the figures of the Canadian clearing houses for the week ended with Thursday, January 13th, 1898, compared with those of the previous week:

CLEARINGS.	Jan. 13th. 1897.	Jan. 6th, 1898
Montreal	$16,085,498	$12,519,058
Toronto	9,182,649	10,706,210
Winnipeg	....	1,644,321
Halifax	1,320,757	1,314,065
Hamilton	730,537	948,158
St. John	667,789	573,527
	$29,631,551	$27,822,095

Aggregate balances this week, $........; last week, $4,919,533.

—A correspondent of ours in the North of England writes, at the middle of December, "We were not unprepared to hear, as we did by your letter, that apart from its gold and other minerals, yours is the finest country out-of-doors. You seem to have in Canada everything an Englishman wants or requires; and in this year of the Queen's Golden Jubilee, it is fit and proper that a boom should take place with you in agriculture as well as in gold. The pamphlet you sent me about farming, ['A Few Facts'] is a most sensible one, and places facts before the public so that they can judge exactly of how they may expect to do in various districts of your North-West. It is a good idea on the part of your friend and the Government, and should bear fruit. . . . . Now that there are so many going from here and elsewhere to British Columbia to work its minerals, capable men may expect to get employment. We had been expecting to hear that —— —— had gone to the Klondyke, but hope that he may hold on where the is and solidify his position in Kootenay. We feel much interested in Klondyke development; dear knows we all hear enough about it."

—We welcome the holiday number of the New York *Chronicle*, which contains a number of good things. The number marks the close of the *Chronicle's* LXth volume and its thirtieth year devoted wholly to insurance. By way of celebrating the event four living ex-editors, P. J. Hanway, S. H. Davis, Franklin Webster and F. C. Oviatt, have contributed to the present issue, and Mr. Kingsley has an interesting paper.

A bill now before the legislature of Ontario, and which was introduced by the Attorney-General, suggests some amendments to that part of the Division Courts Act relating to judgment summonses. By this bill it is proposed that where it appears a judgment debtor has, since judgment was obtained against him, sufficient means and ability to pay the debt or damages or costs recovered against him, either wholly or in instalments, as prescribed by the court, without depriving himself or his family of the ordinary means of living; and if it appears that such debtor has wilfully transferred or made away with such means in order to defeat the collection of such judgment, he may, in the discretion of the judge, be committed to gaol for forty days. A rather drastic proceeding for some high-and-mighty folks who think it no harm to live well at the expense of their grocer and butcher and milkman.

—A man crossing the ferry from Canada into Michigan has his sealskin cap taken from him by the Detroit Custom officers and has to borrow a head covering from a man on the boat. An Englishwoman traveling eastward by Grand Trunk railway is stopped at Niagara Falls and her sealskin coat confiscated. She has to remain at a hotel until she can procure more clothing. These are instances of the working of the disgraceful sealskin law just promulgated by the United States. If this measure illustrates statesmanship and comity, where shall we go to look for stupidity and narrow selfishness? But the N. Y. *World* in another column says harder things of the precious enactment than we can.

—On Monday and Tuesday, January 3rd and 4th, the New York banks had to clear checks for over 100 millions of interest and dividends paid in that city, and on Wednesday they made another payment of $8,500,000 to the Sub-Treasury on account of the Union Pacific operation, which further reduced their available lines of money. The result, says *Dun's*, was a feverish call loan market, ranging for the week from 2 to 5 per cent., averaging 3½ and closing at 3 per cent. For time loans on good collateral the market was easier, and at the close money could be had at 3¼ to 4 per cent. for all dates up to nine months, with most business at the lower rate.

—The lumber export trade of New Brunswick was of large proportions in 1897. In no previous year, we are told, was so large a quantity of deals sent abroad. The total shipments from the province were 531,628,000 superficial feet, which is an increase of 30 per cent. over 1896, which in turn showed an increase of 12 per cent. over the preceding year. St. John shipped 244,169,000 superficial feet of deals, against 169,530,000 in the preceding year. Miramichi gained about forty millions, and Moncton forty-two millions, as compared with the previous year.

—After having noted the remarkably favorable showing of the United States for 1897 in the matter of failures—one-ninth less in number and one-third less in aggregate liabilities—*Dun's Review* of last Saturday remarks that the volume of business represented by clearing-house payments has been 34.4 per cent. larger than last year for January thus far, and 4 3 per cent. larger than in 1892, and banks state that commercial defaults the first of the year were smaller than for ten years or more in that country. "There is marked increase in the buying of commercial paper by brokers, though banks are as yet scarcely enough relieved from obligations to expand in that direction."

—It has been claimed by New Brunswick officials of the Dominion Government that their salaries are exempt from the jurisdiction of the courts of that Province. We should like to understand upon what grounds such a claim is made. Civil servants do sometimes claim that they are made of superior clay to the average citizen; but we are not aware that this claim has any basis beyond an exaggerated sentiment. In all other relations of life, outside of the Parliament Buildings, a civil servant is a citizen. If any other citizen fails to pay his debts, he can be made to pay them by process of law; why should not the civil servant?

—A despatch from Chicago, dated Tuesday last, states that the board of chiefs of the American Order of United Workmen is in session in that city to adjust the claims of the members who have paid in excess of the maximum assessment. "The claims will amount to nearly $250,000, while the available reserve of the Order is $350,000."

Correspondence.

LAND VALUES AND TAXES.

Editor MONETARY TIMES :

SIR,—In the notice which you were kind enough to give to my little pamphlet on "Taxation in Halifax," you say that the proposition contended for by me, that taxes paid on land inevitably distribute themselves over the community, "if true at all is subject to exceptions numerous enough to break the rule," and you proceed to give some of what you consider exceptions. "How," you ask, "are taxes on vacant land shifted from the owner to somebody else?" Suppose the owner sells this vacant land in a year's time at a price high enough to cover cost, interest, taxes and a good profit, on whom do the taxes paid in the first instance by the present owner ultimately fall? The owner is, probably, keeping it vacant in the hope that he will be able to make such a sale, and in the meantime, paying the taxes with the expectation of thus being ultimately able to get them back again. If he had no such expectation, he would let it go for what it would bring. If his expectation is wrong, he must surely bear the consequences of his mistake. The fallacy underlying your supposed exception, and all the others put by you is, in not distinguishing between the value put upon the land by its owner and its real value as determined by what can be got for it.

F. H. BELL.

Halifax, 5th Jan., 1898.

CANADIAN-WEST INDIA FEDERATION.

Editor MONETARY TIMES.

SIR,—Have you seen the report of the "West India Royal Commission?" If you have looked it through and thought over the matter, what do you think of the idea of Canada suggesting to Great Britain that if a proper understanding can be reached and the British West Indies desire to come into the federation of Canada, that overtures should be made to that end?

I believe the report has been before the public since September last, and I understand that some of the English press have discussed the question of the British West Indies becoming an integral part of the Dominion of Canada. Possibly you may have seen something of the matter through your English exchanges. I would suggest that the several Boards of Trade throughout Canada each become possessed of a copy of this report, and after having it fairly digested amongst the members, take up for discussion the subject—the Principle.

If the principle met with the approval of the boards generally, it would give encouragement to our Parliament to take up the matter and possibly lead to instructing the Government to invite the British Government and the Colonial Governments of the British West Indies to a consultation on the subject.

One naturally enters upon even a suggestion, on so important a matter, with such far-reaching possibilities or consequences as the acquisition of territory, with a certain degree of timidity, but if these islands were worth the purchase by Blood and Treasure to the British Crown, some of them as far back as 1632, they are worth being conserved to-day.

If they are valuable to Great Britain today—and who would doubt that the United States would pay 100 millions to-morrow to acquire them—they are likely to be still more valuable to the Empire when they have become an integral part of Canada. Their consolidation with us is one more step towards the federation of the Empire.

I speak not of sentiment, though sentiment has as much to do with nationalities as with individuals, but of trade and commerce. We have no tropical country, and need the islands as a fitting complement to our northern zone.

The United States have a semi-tropical zone, and yet they absorb more than half the entire import and export trade of the British West Indies, and are now making overtures to Great Britain for the establishment of reciprocal trade relations with those islands and British Guiana. In point of fact the island themselves have indicated to the Home Government that unless some other mode of relief can be suggested or provided for their depressed industries, that their chief hope lies in securing better fiscal arrangements with the United States.

I need not point out how serious a blow such relations with the United States would strike at the present and prospective trade of Canada with those islands. The total area, including British Guiana, is 116,451 square miles; population, 1,684,607; revenue, £1,723,571; imports £7,618,322; exports, £6,102,000. Of this total trade of £13,720,338, rather more than 50 per cent. is done with the United States; the greater part of the balance with the United Kingdom and Canada.

Under Confederation with Canada the larger portion of that trade now done with the United States would be diverted to us. Unless the Imperial Government granted some relief to the sugar industry by the application of countervailing duties against European bounty fed sugars or a small bounty to a limited production of cane sugar to the West Indies, the problem of providing a present market for the total production of the West Indies might be attended with some difficulty.

The total exports of sugar from the British West India colonies in 1895 is given at 236,770 tons, whilst the requirements of Canada are at present limited to about 150,000 tons.

Even if no direct relief were granted, those islands would be no worse off than at present, in disposing of the balance of their sugar crop to the United States, whilst their other chief exports to that country of coffee and bananas would find a fairly good market, because of the superior quality of the West India coffee, and from the fact that the United States can't grow bananas to perfection. It is reasonable to suppose that Great Britain would be more willing to assist the West Indies in a substantial way if by so doing she was giving aid towards the consolidation of her Empire and diverting trade from a foreign country to herself and to her several colonies.

I have not touched upon the climate, soil and future possibilities of those islands, so ably set forth by Dr. Morris, whom the Royal Commission acknowledge an expert authority on matters pertaining to the West Indies, but I merely throw out a few hints by way of introducing the subject, in the hope that some more able critics may take up an examination of the subject.

HALIFAX.

January 8th, 1898.

VISITING PLACES—A WESTERN JOURNEY.

MANITOBA AND ONTARIO TOWNS.

(Concluded from last week.)

I had taken a bicycle along with me, intending to tour Manitoba thereon, but the roads leaving Winnipeg were so bad that it was impossible to use the wheel, so I took train to Portage la Prairie. Here, too, they have wide streets and good business men, but are without so much sticky mud as in Winnipeg. Most of the merchants of this busy town are located on one main street, which runs parallel with the railway, and is about three blocks off. Upon questioning some of the merchants as to the quality of farming in that section, I was told that right thereabout was the garden of the province. Whether this be quite true or not I do not say—there may be other places making the same claim—but certain it is that where we find business men who think their customers the most prosperous in the land, there you will also find merchants who are energetic and good people to have as your customers. The Manitoba and North-Western Railroad runs from Portage la Prairie to Yorkton, through Neepawa, Minnedosa, Birtle, and numerous other smaller places, and the car shops and other works for this road being situated here, gives steady employment to mechanics and others.

Leaving Portage la Prairie in the early morning, I rode out westward to Carberry. Here is a thriving town of about one thousand inhabitants, many of whom have come from different points in Ontario. In fact it seemed to me that the majority of business men in Manitoba had originally lived in Ontario. One merchant, in reply to my query as to where he had come from, said:

"Yes, I was in business near Toronto, but got the worst of it. When I came out here I had nothing but a good deal of experience. Now, although I haven't a great pile, this store is my own, as is the house yonder (pointing to a neat little dwelling), and when I buy goods I pay cash for them." This, I dare say, is the experience of more than one merchant in Manitoba.

When I started north from Carberry to go to Neepawa, a town about eighteen or twenty miles distant, a strong north-westerly wind was blowing, so that my progress was slow. Whenever I came to a farmhouse I rested, and that was only about six times in the eighteen miles, but with each rest came a new story of farm life in that section, and each of those farmers having farmed in Ontario, could point out the differences in the life in both provinces. Some claimed that a fifty-acre fruit farm in Lincoln county was a better possession than a section of land in Manitoba. One farmer near Neepawa who had cut down forest, burnt and yanked out stumps, and ploughed around boulders in Grey County, Ontario, for twenty years, declared that had he known there was a country like Manitoba, where all you have to do is plough, sow, and reap, he would have gone out there at once, even should he have had to walk. Neepawa has a brewery, without a saloon, and it has other industries also. The Beautiful Plains Milling Company has a large grist mill here, which is kept busy. In Neepawa and the country surrounding there is a good class of people, and I found none who wished they were back in Ontario, which is an indication of their contentedness. One day I happened to be at the railroad station, when a train came in. To my surprise, about a drayload of parcels was thrown off, which, upon examination, proved to be goods sent out by one of Toronto's department stores, addressed to different townspeople and farmers in that section. Upon broaching the subject to a good general merchant a few minutes later, I was astonished to hear him say that he would rather have Eaton's trade in Neepawa than his own.

The country in the northern part of Manitoba is not so level as it is in the south and west. There are more hills and a good many marshes, low tracts from which a large quantity of hay is procured. From Neepawa I journeyed to Minnedosa. which town struck me as being about as pleasantly situated as any I had ever visited, High rolling hills encircle it entirely, while the Little Saskatchewan River flows through, giving power to a number of small manufactories. The farming right about here is not so good as in other parts, but cattle ranching is engaged in extensively. The following morning I rode and walked up the hill to the south of the town, and made my way per bike, to Rapid City. This was the most disagreeable ride I ever experienced. If I was not pulling grass out of my sprocket-wheel I was picking my way around a "muskeg." It was a hot day, and there were no wayside trees under which to seek shelter. Then there were the trails, which sometimes became confusing. Finally, when about three miles from my destination. I discovered a small house nestled in against a hill, and made for it, in the hope of getting some rest and relief from the broiling hot sun. While conversing with the hostess I learned that she and her husband had taken up land where they were, about five years ago. Previous to that time they had lived in England, and until coming to this country her lord and master had always worn kid gloves, a silk hat, and carried a cane. When I asked where her husband was, she answered that he was employed on the adjoining farm as an ordinary laborer, trying to earn and save enough to take them back to England. It seems that after securing the land, he invested all his surplus cash in expensive implements and poor stock. Not having had any previous experience nor any knowledge of the subject of farming, he made a poor fist of it, and was waiting for the time to come when he could get back to his old home and old associations to warn them not to come to Canada, this land of snow and drouth, and blacklegs.

As the adjoining farm had to be passed through in order to reach Rapid City, I made some general observations, which showed me clearly that the man and not the land, the implements, nor the stock, had caused so lamentable a failure as has just been described. This farm adjoining the one settled on by the poor Englishman was just about perfection. The owner had discovered that the climate was not suited to wheat-raising at one end, but at the other, which was in a different elevation, a fair crop could be harvested each year. Potatoes and other roots were carefully cultivated, and all the farm buildings were kept repaired and clean. In the flat land, near the river, a splendid herd of cattle was grazing. During the continuance of my journey to Rapid City I had time to think over the tale of woe I had just listened to, and it seemed to me that it would be almost a good thing if the poor Englishman could never realize his fond desires, and get back home to slander that, splendid part of our Dominion. There is little to be told about Rapid City. It is a small place, situate on both banks of the Little Saskatchewan River, which supplies power for a couple of mills.

Brandon is a good substantial city. Its streets are not as wide as some in Winnipeg and Portage la Prairie, and maybe this will account for the impression I received that Brandon was the busiest of the three. While taking a hurried run through the stores, I found several which were doing business on the departmental-store plan. Doorways had been cut through between each shop, so that after making purchases in a grocery store, one can step through into a dry goods store, and from there to a furniture shop, and so on. One large grocer said he had adopted some of the tactics employed by Toronto department stores, and was sending out catalogues to all the townspeople and farmers thereabout. Passenger trains are infrequent in that Western country, and, being anxious to reach Winnipeg by a certain date, I boarded a freight, a practice which is permitted, and thus completed a trip which I often wish had been extended, and which I hope to cover again.

Toronto, Dec. 28th, 1897. A.W.L.

SCOTTISH BANKS.

The National Bank of Scotland, which holds its general meeting in Edinburgh to-day (Tuesdav) is paying to its shareholders 13 per cent. dividend, and 3 per cent. bonus, total 16 per cent. for the year ending November 1st, 1897, after carrying a large sum to reserve. This is not an unsatisfactory result even in these days of successful banking. Yet it would seem from a work just issued by Mr. A. W. Kerr, on "Scottish Banking During the Period of Published Accounts" (1865 to 1896), that Scottish banks as investments do not, at the present time, offer much inducement to the investor, beyond that of fair security. That is, of course, everything with cautious investors. Those who want to see a little better return for their money, however, even if the security involves some risk, had better look elsewhere. The average yield of the investments in Scotch banks at present prices of their stock is rather less than that of English institutions. It is 3.64 per cent., taking the average of the ten leading banks of which Mr. Kerr gives statistics.

The average price of Scottish bank stock is £308½, equal to a premium of £208½ per cent. In 1865, the first year in which the accounts were published, the price was only £196 or 96 per cent. premium; so that the credit of these institutions now stands high. In the meantime, however, the average rate of dividend has fallen from 7.6 in 1865 to 6.6 in 1896. Both these rates seem very moderate, but the average is brought down by the low dividends paid by several banks which have experienced considerable vicissitudes, and are keeping their rate of distribution low in order to build up a new reserve. The North of Scotland Bank, for instance, was very severely hit by the failure of the Scottish fisheries in 1887, and the reserve fund was depleted in order to save the bank from insolvency. Other banks were also affected adversely by the same cause.

There are several features connected with Scottish banking which are in a measure peculiar to the financial enterprise of the "North Countrie." One of these is the "dirty Scotch pound note." This has given Scotland a local paper currency which is popular notwithstanding its objectionable traits. * * * Another feature is the extension of branch banks throughout the country. There were in 1895 no fewer than 1,021 of these, and there are more now; and they give facilities for banking to all the small towns and many of the villages. The example of this system of branches has been followed in England in late years, and most of the London and leading provincial banks have now numerous branches. Yet another special feature of the Scottish system is that of cash credits, or overdrafts, which are commonly allowed even to small tradesmen, on the security of two or more personal guarantors. This system has doubtless rendered banking a more thoroughly popular institution in Scotland than it is in England, where many tradesmen, even though doing a fairly good business, have no banking account at all. In late years, however, there has been considerable extension of both banking facilities and of the recourse had to banks by shopkeepers and other men of business in a small way in the southern kingdom, after the fashion that has longer prevailed among the canny Scots.

Scottish banking has had its ups and downs : its good and bad years. The latter seem unfortunately to have predominated. Mr. Kerr states that only thirteen out of the thirty years of which he gives a survey can be chronicled as good. The Glasgow Bank failure shook the credit of Scottish Banking to its foundation for many years. The fishery failure of ten years ago also injured it. Yet at the present time the Scottish people seem to have the utmost confidence in their banks. These establishments do not treat depositors very liberally. Their rate of interest on fixed deposits has come down from 4½ per cent. to an average of 1.93 per cent.; they allow no interest on current accounts. Yet between 1865 and 1896 the amount to the credit of depositors has been augmented by £38,555,944, or 67 per cent. In the same time the reserves have risen £31,561,820 or 148 per cent., and now represent 48 per cent. of the banks' liabilities. The total capital of the Scotch banks was put last year at £9,302,000, and their reserve fund at £5,889,473, which inindicates a very strong position. Of course these figures apply only to the banks which publish accounts, not to private banking businesses.

Mr. Kerr seems to think that Scottish banks will soon partake more of the character of investment companies than of banks. But the figures do not seem to bear out that conclusion. The extent to which the banks are used by depositors, who practically derive no advantage in the shape of interest from the spare funds placed in them, testifies to the faith of the Scottish people in their banks, as safe custodians of the cash for which they have temporarily no more profitable use. But apart from this, the facilities offered by the Scottish banks to traders of all grades are very considerable, and are widely appreciated and used. This surely is one of the most legitimate forms and functions of banking. The fact that the Scottish banks are beginning to find a difficulty in the profitable utilization of their balances, and on that account have reduced their deposit interest practically to nil, is only another illustration of the plethora of capital from which the commercial and financial world generally is suffering. Despite this difficulty, and despite the fact that the increase of profit has not been commensurate with the extension of branches or the volume of business, Scottish banks are, on the whole, sound and prosperous institutions. Though yielding so modest a percentage at present prices, their stock is well worth purchasing as a permanent investment by those who are content with small interest and good security.—*London Shareholder.*

ONE OF THE LESSONS OF LIFE.

It is well to profit by the unfortunate experiences of others, and that many are continually doing so is illustrated by the case of a business man which recently came to our attention. As he one morning was seated in his office the door opened, and looking up he saw before him a female book agent. The frown of annoyance which had instantly gathered disappeared as he perceived the sweet yet sad expression of the young woman. With half reluctance he dismissed her, and as she turned away he added: "A girl like you ought to marry and have some good man take care of you. "I was married," she replied. her face brightening only to again fill with sadness, "but I am alone now with my baby. My husband just as he was getting nicely fixed died. Heaven knows that I hope no other woman will have to endure what I have since then." She turned abruptly and went forth again into the cold world. But shall we say her visit that day went for naught? No! It saved another mother from perhaps similar distress, as that man, one of the class who was always disposed to take chances, was before long himself taken away from his family—but not uninsured. Later on the same day the young woman called he sought insurance from an agent he had often repelled.—*United States Review.*

—She (at the desk)—Dear, please tell me how to spell costume. I'm writing to mother about my lovely new gown. "Well, are you ready?" "Yes." "C-o-s-t, cost"— "Yes." "T-u—to." "Well?" "M-e, me—$65, as yet unpaid." "You're a wretch."

—A new royal yacht is to be built for Queen Victoria, to replace the now antiquated paddle steamer "Victoria and Albert," which has carried royalty for many years. The new yacht is to cost $1,000,000. She will have a speed of 21 knots. Only two guns will be in her battery and they are intended mainly for saluting purposes.

—Paris has about 600,000 electric lights, and London twice as many. More than half of Berlin's streets are now lighted with a gas glow-light, perfectly white, and five times as powerful as the old flame, and the lamps are being placed rapidly in the other streets, and the city, with a consumption of 10,000,000 cubic meters of gas, will have fivefold the light heretofore obtained from 17,000,000. The 10,000,000 oil lamps burned nightly in England cause 300 deaths annually, and 165 fires yearly in London alone.

ENTERPRISE IN INSURANCE.

There can be no doubt of the popularity of insurance in Michigan. At one time a bazar at Grand Rapids advertised that it would give away an accident policy with all purchases to a certain amount; some time after a Lansing clothier made a similar present to every purchaser of a pair of suspenders, while a Jackson firm offered to pay $100 to the relatives of any person found dead and wearing one of its make of corsets. The latest Michigan combination of commerce and insurance is that furnished by the Industrial Benefit Association, of Detroit, an organization originally of thirty-one merchants, but now comprising a much larger number. A customer of any one of these merchants, on payment of $1 becomes insured in a sick and death benefit fund for one year. No sick benefit is paid for the first ninety days: after that time, in case of temporary total disability an indemnity is paid equal to one-half the amount of the person's cash trade with the merchants in the association, such amount not to exceed $5 per week or $20 in all. The indemnity for permanent total disability is fixed, for the first year, at an amount equal to the sum of the customer's cash trade with all the members of the association from the time of the payment of his entrance fee; in subsequent years the indemnity is to be equal to the amount of the customer's cash trade for the preceding year. The death indemnity is the same as that for permanent total disability.

All these schemes have been suppressed one by one by the department, except the last and most ambitious, which is organized under the Michigan law for benevolent associations, and has filed articles of incorporation with the county clerk. The department will probably refuse to recognize the legality of the corporation's existence, but in any case it is not likely to live long. The opportunities for fraud, the cost and the extra labor involved, will be found to outweigh any profit in the way of increased cash trade. Still the experiment is interesting, as showing that insurance is being more and more regarded, as it should be, as one of the necessities of life.—*Investigator.*

DOMESTIC SERVANTS.

In an article on domestic servants in the Old Country, the Glasgow *Herald* discusses social conditions and the changes which have drawn many women away from the field of domestic service, so that it is not now easy to procure good servants. "The trouble is a very real one, and relief in any form will be welcome. What, then, do they say to a substitute for the female domestic whom they either cannot obtain, or having obtained, find quite unsuitable for their purpose? The substitute for the 'general' that has been tried both in America and in London and found to serve remarkably well, is not a patent mechanical invention. It is—a Boy! And why not? The Chinaman and the Kaffir have long been shown to possess splendid talent for all departments of household work. Given the necessary training, why not the average British boy? The superintendent of one of the Boys' Homes in London has already developed a large business in this way. He supplies boys for domestic service—willing and able to perform all the duties of a 'general'—either for full employment or for two or three hours' work per day. The system, it would seem, is so far giving great satisfaction where it has been tried, for, according to the superintendent, 'ladies come here in flocks, and take my boys as fast as I can supply them.' Here, then, is a hint for Mr. Quarrier and others engaged in similar work, who must pass through their hands every year the raw material for many excellent household helps. It would be an interesting outcome of the present invasion by women of what has hitherto been considered men's sphere if the men were to turn the tables and set about poaching seriously on such a close female preserve as that of domestic service."

CHRISTMAS IN SCOTLAND.

A private letter, written from Edinburgh about Christmas time, referred to the change that has come over many households in Scotland in the greater observance of Christmas Day as a Christian festival. We find the same thing mentioned in the Glasgow *Herald* of Dec. 27th, which adds that a great increase is noticeable in the use of Christmas cards in Scotland. In all the large cities of North Britain and in many smaller places the pressure upon the postoffice service was enormous on Christmas eve: Christmas cards, Christmas letters, and above all, parcels, being in unprecedented quantity. In Edinburgh the postoffice staff, which had to be enlarged, delivered 51,000 parcels in six days; and in Glasgow, where an extra staff was employed, the number delivered on Christmas Day was 19,737. Telegrams to the *Herald* from 75 towns and villages spoke almost invariably of the religious observance of the day, and of the activity of the postoffice. It was also observable that in the afternoon of the day out-door recreation was actively in vogue. The morning was cold; and here and there, from Inverness to Moffat, the curlers were out early, playing for bags of meal or barrels of flour for the poor of the parish. In the afternoon the golfers were "at it." In the evening there were concerts or supper-soirees for the poor, and musical services. There were even carol services in Presbyterian churches.

PAY UP.

Now is the time when all owing small accounts at the stores should make it a point to call and settle up. The merchants do not get their goods for nothing, they are not doing business for the love of it, and when they are kind enough to oblige a friend by giving them his goods, that person should make it a point to pay for all the goods that he got, not wait until he is dunned, and dunned, and dunned, then to pay the account, give impertinence, and say mean things. The individual that will do that will do worse only for the law. Some people get credit, and when repeatedly asked for the amount say, "Just get it when you can, now that you are in such a hurry: have only had your goods ten or eleven months," and they act as if the merchant does not keep books or know all about the transaction. How they promised on the honor of a man to pay at such a time, and that time has long gone past and no pay, proving beyond any doubt that their word was no good. We wish to inform all such persons that the merchant from whom they got their goods knows all about them, points them out on the street, saying, "There goes a man that owes me so much, promised to pay, but did not; he is a dead beat." The merchant and everybody else knows them. Did you ever thing of that, Mr. Debtor? If not, just think of it now and rush and pay up every cent you owe and be a free man.—*Wallaceburg News,* Jan. 5.

COMPRESSED FLOUR.

The British admirality and the war department are testing, under various climatic conditions, the new method for preserving flour. One objection to the establishment of national granaries has been the difficulty of storing grain for any length of time. The grain germinates and is ruined, and to keep large quantities in sound condition has been pronounced impracticable. Experiments are being made with a system of compression into bricks by hydraulic pressure. The trials show that the flour so treated is not affected by damp, even under unfavorable conditions, and is free from mould. The compression destroys all forms of larval life, and the flour is thus rendered safe from the attacks of the insects. The saving in storage is enormous, as the cubic space occupied by one hundred pounds of loose flour will hold more than three hundred pounds of the compressed article.

BURGLAR-PROOF SHUTTERS.

A new German safety shutter, which is invulnerable to burglars, is made on the principle of the roller shutter, the strips of iron and wood being replaced by tubes of hardened steel three-quarters of an inch in diameter, placed over rods or on pivots. The sides, the only vulnerable points, are hidden in grooves. and, as the tubes revolve freely, the burglar's tools can obtain no purchase upon them, thus rendering strong rooms. etc., absolutely inaccessible. Theatre curtains constructed on the same plan would also prove invaluable for the preservation of life in case of fire.

—It may be remembered that when the gigantic manufacturers' building of the Chicago World's Fair was burned, in January. 1894, it still contained a quantity of exhibits. Some of these exhibits belonged to France, and some to French manufacturers or merchants. Suit was entered on their behalf for the amount of loss, and last week Judge Grosscup, in the Federal Court, ordered a judgment entered for $57,600, the full amount claimed, in favor of the French Republic and the French exhibitors. The court two months ago held that the Columbian Exposition Company, the local corporation conducting the fair, was liable for the damage. He withheld the entry of judgment until the amount of insurance paid the individual exhibitors could be ascertained, stating that when this was known a judgment for the balance would be directed.

—Co-operation.—"The old-fashioned father believed in the co-operation of parent and teacher." "Yes; when I was whipped at school my father always whipped me again when I got home."—Detroit *Free Press.*

—With proud and unaltered confidence in the eastern districts of British Columbia as a mining region, the *Kootenaian* sings:

Kootenay was Kootenay
  When Yukon was a pup,
And Kootenay will be Kootenay still
  When Yukon's busted up.

Commercial.

TORONTO MARKETS.

TORONTO, Jan. 13th, 1898.

DAIRY PRODUCE.—There is nothing special to chronicle in the butter trade. Trade is quiet and there is a marked tendency to accumulate, especially in large dairy rolls. Dairy tubs are not coming forward freely. Creamery continues in fair supply and prices are as quoted last week. There is little more enquiry for cheese in the local trade, but there is nothing new in export markets The egg situation is a little brighter, and stocks of the best eggs are getting light. Prices are firm, with pickled quoted 14 to 14½c.; cold storage are weak and prices run very low. Strictly fresh eggs are worth 18c. per dozen.

GRAIN.—The local wheat market has fluctuated during the week under review, and has closed slightly easy. European crop prospects have been reported more satisfactory, and the American acreage increased, while condition has been maintained, so that as a whole the next crop situation has been considered more favorable. But the wants of Europe are for the near future and not for next crop, and hence these conditions have effected the speculative markets rather than cash wheat, of which stocks on the Continent and in the United Kingdom are so low as to require steady buying until another crop. The *N.Y. Journal and Bulletin* says: "Even with all Argentina and India can give her she will be in need of all the surplus of the Northern Hemisphere, and then go into next crop with comparatively depleted reserves, which will require another year of good crops to replenish. The outlook for wheat and wheat growers for another year is, therefore, very encouraging, though the old-time high-priced prophets are liable to modify their figures for the balance of this crop unless more serious crop damage than so far shall occur to the growing crops of this or other countries." Buckwheat is dull. Corn is steady. Rye continues unchanged. Peas are more active with sales at 59c.

Green Fruits.—This trade is always quiet after the holiday season. There is this year no more than the usual lack of January demand from retailers. Oranges find fair request. We quote: Japanese Tangerines, 160s to 200s, $1.50 to 1.75; Mexican, 126s, 250s, $2.75; Bahamas, 150s, 176s, 200s, $3.00 per box Valencias are quoted: Ordinary to large, $4.75 to 6.00 per case. Lemons are rather slow of sale, with new Messina quoted $3 to 3.25. Extra fancy bananas are worth $1.25 to 1.75 per bunch. Canadian cranberries are worth $2.25 to 2.50 per box and $5.50 to 6.00 per barrel, while Cape Cod are worth $8 to 8.50 per barrel.

Groceries.—There is the usual falling off in trade after the holidays. Sugars are in only fairly satisfactory condition. A reduction of ⅛c. per lb. in the price of sugars was made by refiners this week. Dried fruits are steady. As we have elsewhere noted, the canned goods market is very strong. Stocks of canned vegetables are in small compass. Tomatoes, 3 lbs. 1897, are quoted $1.25 per dozen. Corn, 2 lbs., 85c.; peas, 85c.; beans, 85c., and asparagus, $2.25 per doz. There is a better supply of canned fruits. We quote: Pineapple, $2 to 2.25; strawberries, $1.50; citron, flat tins, $1; peaches, 3 lbs., $2; 2 lbs., $1.30, and plums, 2 lbs., $1 to 1.15 per dozen.

Hides and Skins.—There were rumors early in the week that the local market was about to be more unsettled than it has been. However, conditions are about as last reported, and quotations given in our last issue still hold good. At country points in Ontario tanners are paying an average, we should say, of 7½c. for green cow hides, which is relatively lower than the price for Toronto inspected hides. Advices from Chicago, Jan. 8, state "market moderately active and firm. Tanners gave a fair amount of attention to the market, and yesterday sales were made of 2,500 native steers at 11⅛c. for No. 1, and 1,200 do. at 11⅛c. for do.; also recently about 10,000 branded hides at unchanged prices to ¼c. advance. The close was firm at 11⅛ to 11¼c. for native steers, 9¾c. for heavy Texas, 9½c. for light do., 9¾c. for butt brands, 9¼c. for branded cows, 9c. for Colorados, 10¼c. for heavy native cows and 10½c. for light do." In the local trade, sheepskins are quoted $1.10. Tallow is dull and inactive at nominal quotations.

Leather.—The principal interest of the trade is centred in the annual meeting of the Tanners' Section of the Board of Trade. There are representatives of several large tanning concerns in the city, and most of them report a fairly good year, but speak more cheerfully of the prospects for 1898. The tanners amuse each other with accounts of recent sales at advanced prices. If the office books tally with the accounts, there is certainly a bright outlook before the tanning industry.

Provisions.—Receipts continue fairly liberal, although packers consider prices too high, especially for heavy hogs. In fact, more is being paid for heavy dressed hogs than the live hog market for the same weights would warrant. We cannot say how long this will continue. In a number of instances higher quotations are given for heavy in order to secure mixed lots. Packers, on this account, are not anxious to secure consignments that contain a large proportion of heavy weight hogs. There is a better demand the past week for all lines of provisions. Smoked meats and lard are moving freely. Values are well maintained. Lard is especially strong.

Wool.—Business in Canadian fleece wool is at present inactive. In pulled wools there is a moderate movement. The mills are apparently busy, and are consuming the stocks of wool on hand.

MONTREAL MARKETS.

Montreal, 12th Jan., 1898.

Ashes.—The stock on spot continues very light and receipts small. The gain in firmness noted last week is maintained, and probably $3.40 to 3.50 could now be realized for first pots; seconds, $3.10 to 3.15, and pearls about $4.80 per cental.

Boots and Shoes.—The city shoe factories are actively at work again, "Old Christmas," having come and gone, and the work-people, volatile or religious-minded, or both, having settled down after their prolonged holiday. Manufacturers have had to buy and contract for considerable quantities of leather, and in colored upper stock and goat-skins prices are decidedly firm. Remittances are pronounced satisfactory as a rule.

Cements and Firebricks.—Transactions in cement are few, but stocks are in quite moderate compass, and there is no inclination to shade prices. We quote British cements $2.10 to 2.20; Belgian, $1.95 to 2.05. Bricks are in a little better demand; quotations are $17 to 22.00 per thousand.

Dairy Products.—For cheese there is some improvement in cable enquiry, and on the whole there is rather more business doing, though no really important transactions can be reported. The last cabled advance is maintained, and dealers are pretty firm in their ideas that they should get about 8¾c. per lb. for finest Western goods. The butter market on the whole is slow; exporters are light buyers; there is a fairly steady local demand for finest creamery at 19 to 19½c., which shippers do not feel they can pay. Fine dairy quotes at 15 to 17c., roll butter 14 to 15c. per lb.

Dry Goods.—Travelers are now all fully at work, and the volume of orders for spring goods is reported as gratifying. There is still some limited sorting demand for winter goods, but, of course, everything bought now goes under spring dating, four months from 1st April, or to Lower Province dealers four months from May 1st. The little run in city dry goods failures seems to have come to an end, though it is expected there may be a few more in the course of several weeks, when the usual seasonable weeding out arises among the weak ones. The ordinary current remittances from the country show a good lead on those of last year.

Furs.—Receipts of raw furs in the city continue quite light, and it is surmised that there must be a good many buyers in the country. Several American firms have also been soliciting consignments promising big returns, which the too-confiding shipper does not always realize. There is a tendency to improving values in several lines, such as mink, marten and fisher, and we amend quotations in these furs. There has also been quite a sharp advance in New York, in southern coon, due it is said to Russian demand, but Canada coon is not materially altered. We quote: — Mink, large dark, $1.50; small, do., $1.00 to 1.25; marten, $1.75 to 2.25; fisher, $4.50 to 7.00; lynx, $1.00 to 2.00; otter, $1.00 to 12.00 for dark; pale, $5.00 to 7.00; red fox, large, $1.30 to 1.50; small, $1.00; cross fox, $3.00 to 6.00; bear, cubs, $3.00 to 7.00; medium, $7.00 to 10.00; large, $12.00 to 15.00; skunk, 15 to 70c., as to color and stripe; coon, 20 to 75c.; rats, fall, 7c. to 10c. kits, 2 to 5c. Beaver, not quoted, killing being forbidden by law.

Groceries.—The foreign markets for raw sugars have been somewhat erratic of late, and the tone is a somewhat easier one. On spot refiners have reduced quotations an eighth of a cent, making factory prices now as follows: Standard granulated, 4¼c.; Austrian refined, 3 15-16c.; yellows 3½ to 3⅞c. per lb. The wholesale demand is at present very light, and both the Montreal refineries are shut down owing to the dullness. There is as yet no general improvement in the demand for teas, jobbers being seemingly pretty well stocked up, but there is no weakening in values. Molasses is good stock to hold; it is estimated by competent authority that the total stock in first hands here is only about 3,000 puncheons of Barbadoes, 1,000 puncheons of Porto Rico, and a little Antigua, a supply much below the figures usual at the season. For Barbadoes in a jobbing way 30c. is now asked; in quantity 28c. is quoted for Barbadoes, 26c. for Porto Rico and 23c. for Antigua. The market on the island for new crop will shortly open, and prices are expected to range at about 10 to 11c. first cost. In currants there is some scarcity and prices are firmer; Sultana raisins are also in light supply and high-priced; stocks of Valencias are ample. Canned goods have lost none of the strength lately noted, and it is reported difficult to buy tomatoes in quantity at $1.25 per case.

Hides and Tallow.—The market is without noteworthy change. There has been some revival of Quebec demand for hides, and some fair sales have been made in that quarter, since last report, at firm prices, which tanners before were indisposed to pay. Dealers are buying on the basis of 9 to 9½c. per lb. for No. 1, and quoting 9½ to 10c. to tanners. Few calfskins are coming in as yet; lambskins are worth 85 to 90c. each. Tallow is dull at 3 to 3½c. per lb. for rendered; 1 to 1½c. for rough.

Hops.—Business rules on the quiet side, but quotations are quite steady at 12½ to 14c. for good Western; choice, 15 to 16c.; yearlings slow of sale at 6 to 8c. per pound.

Leather.—Some of the larger houses are doing a fair amount of buying, though a good deal of stock has been contracted for already. Dongolas and fancy calf are in good demand, and in the former line there is much firmness, as all advices from foreign sources of supply for raw goat skins indicate advancing markets. There are but few changes in price. We quote: — Spanish sole B.A. No. 1, 24 to 25c.; do. No. 2, 22 to 23c.; No. 1 ordinary Spanish, 22 to 23c.; No. 2, 19 to 20c.; No. 1 slaughter, 25 to 27c.; No. 2 do., 21 to 23c.; common, 20 to 21c.; waxed upper light and medium, 30 to 35c.; do. heavy, 27 to 30c.; grained, 32 to 35c.; Scotch grained, 30 to 35c.; western splits, 22 to 25c.; Quebec do., 17 to 20c.; juniors, 15 to 17c.; calf-splits, 30 to 35c.; calf skins (35 to 40 lbs.), 60 to 65c.; imitation French calf skins, 65 to 75c.; colored calf, American, 25 to 28c.; Canadian, 20 to 24c.; colored pebble cow, 13 to 15c.; russet sheepskin linings, 30 to 40c.; colored, 6 to 7½c.; harness, 24 to 27c.; buffed cow, 12 to 14c.; extra heavy buff, 15c.; pebbled cow, 12 to 13c.: polished buff, 11 to 13c.; glove grain, 11 to 14c.; rough, 22 to 23c.; russet and bridle, 35 to 45c.

Metals and Hardware.—There is no special revival of demand in these lines yet. In pig iron there is a little apparent tendency to easiness, and some small sales of Summerlee are reported at $18, and a 50-ton lot of No. 1 Hamilton at $16. The iron market is easier in the United States, and it is said local offers have been solicited from that quarter. Canadian bars are easy, no change having been made in the way of advance at late meeting, and they can be done at $1.35, it is said, in quantity. Plates of all kinds are dull; quite a moderate lot of Canadas was placed a few days

Gold Medals, Paris, 1878 : 1889.

Oils, Paints and Glass.—Business is showing signs of picking up, and with this week there is some beginning of booking orders for spring delivery. There was no revision of lead prices made at the annual meeting of grinders held yesterday, as was thought probable. The advance in turpentine, predicted in our last, has gone into effect, and prices are up two cents; the advance in linseed is steadily held. Castor oil is easier, and could now be probably had in fair lots at 9c. The prices for Paris green have been fixed for the coming season at 15c. in 50 and 100 lb. drums; 25 lb. drums, 15½c.; 1 lb. cartons, 16c.; pound tins, 16½c. We quote:—Turpentine one to four barrels, 51c.; five to nine barrels., 50c., net thirty days. Linseed oil, raw, one to four barrels., 45c.; five to nine barrels, 44c.; boiled, one to four barrels, 48c.; five to nine brls., 47c., net 30 days; olive oil, machinery, 90c.; Nfld. cod, 35 to 37c. per gal.; Gaspe oil, 30 to 32c. per gal.; steam refined seal, 45 to 47½c. per gallon in small lots. Castor oil, 9 to 9½c. as to quantity. Leads (chemically pure and first-class brands only), $5.37½; No. 1, $5.00; No. 2, $4.67½; No. 3, $4.25; No. 4, $3.87½; dry white lead, 4¾ to 5c.; genuine red do., 4¼c.; No. 1 red lead, 4c.; putty, 1.55 to $1.60 in bulk, $1.70 to 1.75 in bladders, $2 to 2.10 in tins; London washed whiting, 40 to 45c.; Paris white, 85 to 90c.; Venetian red, $1.50 to 1.75; yellow ochre, $1.25 to 1.50; spruce ochre, $1.75 to 2.00; window glass, $1.40 per 50 feet for first break; $1.50 for second break; third break, $3.10.

Millers' & Manuf'rs Ins. Co
ESTABLISHED 1885.

HEAD OFFICE:
Queen City Chambers, Church St., Toronto.
DIRECTORS:
AS. GOLDIE, Pres. J. L. SPINK, Vice-Pres.
THOS. WALMSLEY, Treas. HUGH SCOTT, Mgr. and Sec.
Adam Austin, Inspector.

This Company was organized in 1885, specially for the purpose of insuring manufacturing industries, warehouses and contents.

The primary object being to give protection against loss by fire at a minimum cost consistent with absolute security.

The system adopted has been to inspect all risk before acceptance and fix the rate to be exacted equitably in accordance with the hazard assumed.

Assurers with this company have made a saving, upwards of $108,000.00 on the current rates charged, in addition to which, on the rates exacted by us, dividends have been declared to policy-holders amounting to over $24,000.00, together, making the very substantial sum of over $132,000.00 that our policy-holders have saved during the eleven years we have been in operation.

As no canvassers are employed, dealing directly with the assured, those desiring to avail themselves of the advantages thus offered will please address

Millers' and Manufacturers' Insurance Co.

ENGLISH CO-OPERATIVE STORE METHODS.

The British public have recently been treated to an expose of the methods pursued by the great co-operative stores, to which they have transferred a large portion of their trade, formerly enjoyed by the independent store-keepers, under the impression that they were getting better value for their money by so doing. A trial has been in progress in the London Police Court of the officers of the Junior Army and Navy stores, limited, on the charge of substituting American and Canadian hams for English and Irish, made at the instance of the British Bacon-Curers' Association. Mr. De Rutzen is the presiding magistrate, and Mr. Weeks the counsel for the prosecution. The following evidence given by an ex-employee of the stores at the last hearing, and taken from the London *Grocers' Gazette*, is decidedly spicy. In reading it, bear in mind that a penny (1d) is equal to about 2 cents, and a shilling (1s.) to about 25 cents.

Mr. Weekes: Were any of the American hams branded?

Witness: Do you mean those we sold as Irish or those we sold as American? (Laughter.) Some of the American hams were marked "B.C.," and some of the same class of hams were not branded at all, but were known as "U.B.'s." Both were sold as Irish, but some of the darker colored ones were sold as Wiltshire. (Laughter.)

In further examination, witness said those which were not branded were called "U.B.," which meant unbranded, and when they were sold as Wiltshire they realized 1s. per lb. That was the general custom in the department. American hams which were sold as Irish, were sold at 10d. and 10½d. per lb.

Mr. Weekes: Were these hams sold in that way by any person who happened to be there? Do you know that of your own knowledge?

Witness: Yes, I do.

Mr. Weekes: Did the Americans undergo any preparation before being sold as Wiltshires?

Witness: Yes. We picked out the most suitable looking for Wiltshires, warmed them over the gas, rubbed a little peameal on them, and then rubbed them with an oily rag on the back. (Laughter.)

Mr. Weekes: Was that often done?

Witness: Yes, whenever any customer required a Wiltshire ham. (Laughter.)

Mr. Weekes: By whose direction was that done?

Witness: By Mr. Venner's. Continuing, he said, they took all their orders from Mr. Venner. He remembered on one occasion that a gentleman who knew Mr. Crumplen pretty well, came into the stores and looked at some American hams, and Mr. Crumpien came forward and spoke to him. The gentleman said: "What hams are these?" and Crumplen replied that they were West of England hams. The member turned round and said: "I am a West of England man, these are the hams I want." Crumplen selected two, after trying them with the iron, and sold them as West of England hams at 1s. per lb. The hams that were sold were American hams. He (witness) made out the invoice for the customer. The stores were in the habit of getting a large number of orders by post. The majority of those orders were for Irish, Wiltshire, or York hams. The order would often run: "Please send one best smoked Irish ham." In these cases he had asked Mr. Venner for instructions, and he would say: "Oh, send one of those 'U.B.'s' along there," meaning those that were placed on the rail at the store. Another time he (Venner) would ask if the customer had had a ham before, and would tell witness to ask the others up the counter if they knew the order, and then, if they did not, he was to refer to the last order, and if 10½d. a lb. was paid to send the customer a "U.B." ham, and if 10d. a "B.C." ham. If a pale York ham was asked for they sent a genuine one. If a member wanted a smoked York, they were supplied with a large long cut American, which seemed most suitable for the purpose, and which had been treated with peameal, etc., and these were charged for at 1s. per lb. The ordinary price of the class of American ham they sold would be about 8d.

Mr. Weekes: What do you call the process of oiling the hams?

Witness: Oh, faking. (Laughter.) Venner would say, "Oh, Stutchbury, I have a nice little job for you. Get up some of those little 'U.B.'s,' put a little meal on them, rub in a drop of oil, and stick a 1s. ticket on them. See that they do not go out for less." They would be ticketed, "Finest Wiltshire, 1s. a lb." or "Finest Irish, over 10 lbs. 10½d., under 10 lbs., 11d." Continuing, he said Admiral Lord Kerr, of H.M.S. "Majestic," always used to order Irish hams for his own private consumption, and he was supplied with the American "B.C." Lord Stratheden, Lady Joicey, the Hon. Mrs. Barry, and others of the nobility, used to order Irish and Wiltshire hams, and were supplied with "B.C.'s" or "U.B.'s." Sometimes they were asked for a particular brand, and they generally had a few of Denny's, Matterson's, Shaw's, or Coey's in stock. They had about 10 or 15 of each kind of ham in now and again.

Mr. Weekes: If a member ordered a specially branded ham, did he get it?

Witness: If we had one in stock. If not we substituted something else. (Laughter.)

Mr. Weekes: If Irish or Wiltshire were asked for without any branded name, what was the custom?

Witness: Oh, give them American. (Laughter.) If a member insisted on a particular brand, and we were out of stock, we sent out and got one. Resuming, he said Mr. Venner told him about 12 or 18 months ago of a prosecution that had been taking place in regard to hams, and said they had been waking some of them up in Ireland, and he had told witness to be careful as to who they were serving with the hams, and who they were sending them to. They were paid a weekly wage of 28s. and a commission of 1d. on every American ham that they sold as Irish or as Wiltshire. They did not get any commission on any of Denny's, Matterson's, or Coey's hams that they sold, nor on any American sold as such, except on one occasion when they had a ½d. commission on each one for two weeks only, because they were overstocked. They never sold the "B.C." brand as American hams. They were sold as Irish or smoked York. The stores had sugar-cured Canadians in their list at 9d., but he never remembered seeing any there. If sugar cured hams were asked for, the members were supplied with short-cut Americans, the proper sale price of which would be 7d. or 7½d. He had also seen hams described as Anglo-American on the list.

Mr. De Rutzen: Do you know what an Anglo-American ham is?

Witness: No, I do not. Continuing, witness said they used to scrape the name and brand off Fowler's hams, and send a lot of them to France: but he did not know what they were sold as. France however, would not take in American hams. The duty on American hams going into France was greater than on British hams. The stores did a large trade with canteens and her Majesty's ships in American "U.B." and "B.C." hams. Sometimes Irish hams were asked for, but the same custom was pursued with the canteens and ships as with other customers.

DECLINE IN SHIPPING.

Wooden shipbuilding in the Maritime Provinces is practically a thing of the past. Since 1878 the shipping of the Maritime Provinces has steadily declined from a little over 1,000,000 tons to 401,000 tons—the decline last year being some 46,000 tons. In this connection, however, it should be explained that, acting under instructions from Ottawa, many vessels that had been retained on the registry as missing or unreported, have been struck off the list by the registrars, many of which probably should have been struck off long ago. On the one hand, it must not be forgotten that a considerable amount of shipping owned or partly owned in the Maritime Provinces is registered in Great Britain, and, of course, does not appear on our registry. This fact must be borne in mind in taking account of the investments of the Maritime Provinces in shipping.

That wooden shipbuilding will revive to any considerable extent in the Maritime Provinces is exceedingly problematical. The only vessels that can now be constructed and profitably run are coasting schooners, fishing vessels and brigantines suited to a few special lines in the carrying trade; and it is becoming a question how soon even these will be largely driven out by coasting steamers of moderate tonnage.—*Halifax Chronicle.*

THE LAW AND THE SEALSKIN SACQUE.

There are bridges and ferries between the United States and Canada. There is an ocean ferry from New York to Europe.

Women stroll over the bridges and ride upon the Canadian ferries, and go back and forth by steamships. The weather being sharp, these women wear their sealskin jackets.

Here comes in the law. If these women pass the border they must leave their cloaks behind on their return, unless they have taken the precaution to have them certified as garments not made of sealskins taken by pelagic sealing.

What idiocy is all this! What intolerable interference with individual liberty! What oppression!

Yet it is the law of the land—a law made solely to secure an absolute monopoly to a single company of very rich speculators. Every traveling woman in the country must be harassed in order that these monopolists shall enjoy the privilege of exclusively selling sealskins.

There was a time in American history when American women sealed up their tea-caddies and drank water for the sake of liberty and personal right. Why don't they now abandon sealskin for a like patriotic purpose? There are other furs, and there is always wool.

The women can end this thing if they will, but they cannot wipe out the deep disgrace of the abominable enactment.—*N. Y. World.*

N. Y. STATE CANALS.

Canal management in New York State has had a varied history, some of it not having been of the most edifying kind. Attention has been directed to the subject anew by the announcement that the work of deepening the canals, for which an appropriation of $9,000,000 was made, cannot be completed for that sum. As a matter of fact, as stated by the Governor in his annual message, less than two-thirds of the intended improvement has been provided for. Governor Black suggests simply that if a further sum is to be expended for the completion of the work it should be only by a vote of the people. There remains, however, the question why the work has not been completed for the amount originally provided, and this interests a number of people. According to present indications something will be learned about the matter before long, for a committee of enquiry has been appointed by the New York Chamber of Commerce to report to that body the facts regarding the large expenditure already made, and the reason for the large deficiency. The report will be looked for with interest.—*Bradstreets.*

DECISIONS IN COMMERCIAL LAW.

GILLARD v. MILLIGAN.—A judgment debtor assigns, and the execution creditor, after the assignment, takes no active steps to enforce his execution. The assignee and his solicitor receive from the estate more than the amount of costs of the execution creditor, but apply it to the costs of administering the estate. It was held that as the plaintiff, the execution creditor, might have proceeded under his execution to realize his costs, he could not recover when there was no fund available for the creditors.

HYER v. THE RICHMOND TRACTION COMPANY *et al.*—An interesting decision has been recently given by the Supreme Court of the United States in regard to a contract alleged to be void because against public interest. Two companies were competing for a franchise from a city council. The promoters afterwards agreed to co-operate, and the one company withdraws its ordinance on a contract that the results of the enterprise are to be divided equally between them. Held, that the contract was not void on grounds of public policy.

CHATTEL MORTGAGE.

INCH v. SIMON.—It was held not to be a fatal objection to a chattel mortgage that the affidavit of execution by the mortgagor had been taken by the witness before the mortgagee himself, he being a Commissioner for taking affidavits in the Province.

TRADE MARK.

RADAM v. SHAW.—In the use of trade names it is impossible to give a general rule which will apply to all cases. Each instance must be decided by itself. In the above, the words "Microbe Killer" were held to constitute a valid trade mark, and an injunction was granted at the instance of the owner of such registered trade mark to restrain another manufacturer from using it.

A BENEFICIARY.

VIDEAU v. WESTOVER.—The sum of $500 was by a certificate of life insurance made payable to the daughter-in-law of the assured. The assured afterwards by will directed that the money should go to certain other beneficiaries, and died before the passing 60 Vic. c. 36. Held that, by ss. 151, 159 and 160 of that Act, the daughter-in-law being an "ordinary beneficiary," the assured had the right to make the reappointment, and the provisions of the will in question were valid.

TRANSFERRING BANK STOCK.

STEWART v. HAYDEN.—The Supreme Court of the United States has recently given an interesting decision as to the limitations under which a holder of shares in a national bank may transfer them. The appellant had been a director of a bank for eight years when he transferred his bank stock in payment for certain real estate. Twenty days later the bank failed. The receiver sought to include the appellant in the list of those liable to depositors. Held that as a director he knew of the condition of the bank, and the disposal of the shares was to be taken as an attempt to evade liability in case of failure, and the transfer was clearly a case of fraud.

Mercantile Summary.

THE new marine railway at the Island of St. Pierre, which cost between $30,000 and $40,000, has been burned.

IN Ontario during 1897 the number of births was 46,908, and of deaths 24,857. The number of marriages was 14.904.

THE *London Engineering* says the number of working days lost by the great strike now in progress is 8,973,378, and represents easily over $12,000,000 in wages.

THE jury at the Hamilton assizes gave Mrs. Chas. Curran a verdict of $5,500 damages against the Grand Trunk Railway, the jury agreeing that her husband's death was due to the frog in question not having been packed.

THE jury in the matter of the recent London disaster find that no complaint of unsafeness of the City Hall floor was made by any of the city officials or any others. That the evidence has been very carefully gone into, and the jury are unanimous in their opinion that the sad occurrence was purely accidental.

IN mentioning last week the death of Stanley Paterson, of Port Hope, we unfortunately spoke of him as president of the Midland Loan Company. This was an error: he was not president of that company, and had no connection with it. The company of which he was president is the Midland Trust Co.

AN action has been brought in the Supreme Court of British Columbia on behalf of Mrs. Fred. Cope, says the Victoria *World*, to compel the London Guarantee and Accident Company to pay the accident policy of $5,000 taken out by her late husband before she started for the North.

A BAILIFF went into possession last week of the Horseshoe Inn, the place in Hamilton so handsomely fitted up by ex-Mayor A. D. Stewart. The Grant-Lottridge Company and others held chattel mortgage for $4,500. It is said that Mr. Stewart had spent between $5,000 and $6,000 in fitting up the place, besides paying $2,800 for a license.

WHEN Charles McLerie's house was burned at Windsor the insurance money was garnisheed by a number of his creditors. Mrs. McLerie set up the claim that the insurance was her own, that it could not be used to pay off her husband's debts. The creditors, however, showed that the husband had been given power of attorney to use his wife's name in his business transactions, and claimed that his debts should be met by Mrs. McLerie. The judge took this view of the case, and granted the claims of the creditors.

IN the spring of 1899 a new trans-Atlantic steamer, the "Castilian," will be added to the Allan Line. But for the engineers' strike she would have been ready this year. Her length is to be 520 feet, beam 58 feet, capacity 8,800 tons, which makes her half as large again as the "Parisian." She will have passenger accommodation for 150 first cabin, 120 second cabin, and 800 steerage, and her speed will likely be 17 miles per hour. She is intended to carry a large amount of freight, and will have refrigerators for perishable goods.

MONCTON City Council estimates an expenditure for 1898 of $44,784. Of this $7,000 is for the Board of Health; $6,800 for water and light; $14,000 for schools; $4,200 for city government; $4,200 for fire protection; $1,000 for Windsor relief fund, and $1,000 to retire debentures.

A MANUFACTURING company at Lequille, near Annapolis, N.S., assigned last week to the Union Bank of Halifax. Overproduction of manufactured wares and the shortage of the fruit crop last season prevented them from disposing of the large stock on hand. The stock of the company is mostly owned in Halifax.

ACCORDING to the Buffalo *Courier*, Cleveland parties have asked for tenders from leading ship-builders on the lakes for the building of a steamer, 428 feet over all, 410 feet keel, 50 feet beam, and 28 feet deep, and fitted out with all modern improvements. It is expected that the new boat will be ready for business in September next.

THE aggregate receipts of fifty-four railways in Great Britain and Ireland, for the twenty-six weeks of the latter half of 1897, amounted to £46,000,659, or an increase of £1,391,214. On forty-two lines the aggregate receipts for that period, from passengers were £20,453,291 or £710,751 increase, and from goods £23,964,577 or £634,454 increase.

—AT the annual meeting of the stockholders of the Saint John Bridge and Railway Extension Company last week, a 2½ per cent. dividend was declared on the stock. The following directors were elected: Hon. Judge Barker, president; John H. Parks, vice-president; Simeon Jones, W. H. Thorne, Thomas Williams, Thomas R. Jones, and Hugh H. McLean. Mr. T. R. Robinson is secretary.

THE sale of the steamers "Pennsylvania," "Ohio," "Indiana," "Illinois," and "Conemaugh," by the International Navigation Company to the State Steamship Company for the Pacific trade, leaves but five steamships flying the American flag crossing the Atlantic Ocean. They are the "St. Paul," gross tons, 11,629; "St. Louis," gross tons, 11,629; "New York," gross tons, 10,802; "Paris," gross tons, 10,794; "Evelyn," gross tons, 1,963—the latter three built in English shipyards and denationalized.—*Maritime Journal.*

BESIDES the vote of $270,000 by the Ontario Legislature to the James' Bay Railway project, which consists of a transfer of $150,000 voted to the Nipissing and James' Bay Railroad project in 1889—fifty miles—and a new vote of $120,000, being $3,000 a mile for forty miles between Sudbury and Parry Sound, the following grants have been made to other roads from the same sources: Ontario & Rainy River road, from a point at the westerly end of the 165 miles heretofore aided, to a point at or near Fort Frances, $420,000. Pembroke Southern Railway, between Pembroke and Golden Lake, 3½ miles, $10,500. Irondale, Bancroft & Ottawa Railway, from a point 45 miles from Irondale, and thence due west, ten miles, $30,000. Bay of Quinte Railway, formerly Kingston, Napanee & Western Railway, a re-vote of $90,000, which was granted in 1893.

that the
ANNUAL GENERAL MEETING
of the Shareholders of the
IMPERIAL LIFE ASSURANCE CO.

Of Canada, will be held at the Head Office of the Company, 26 King St. East, Toronto, Ont., on Wednesday, the 2nd day of February, 1898, at eleven o'clock in the forenoon, for the reception of the Annual Report and Statement of the Affairs of the Company, for the Election of Directors for the year, and for all other business and general purposes relating to the management of the Company.

F. G. COX, Managing Director.
Toronto, January 17th, 1898.

FURNITURE MANUFACTURERS ATTENTION!

Lucknow Central Furniture Factory Offered for Sale.

REASONS FOR SELLING:

The company being composed principally of local merchants, not one of them understanding the business; at the present time are without an experienced manager. Factory is a commodious one, having all the modern conveniences; electric light plant, heated throughout by steam, &c. Factory now working on full time. Plant offered at a very low figure. Small payment down; balance yearly payments without interest. About three hundred thousand feet seasoned lumber on hand. This offer is a decided snap for an experienced person. The company and the corporation of Lucknow will encourage and offer such inducements as will make it pleasant and interesting for the purchaser. Lumber can be be bought for years to come at a low figure. Plenty of natural woods close by. Better investigate quick.

Monthly. $1 a year. Ten cents a copy.
ACCOUNTICS ASSOCIATION, Publishers,
262 West Broadway, New York

Mercantile Summary.

A feature of the Montreal flour market last week was a demand from South Africa for Manitoba flour. We learn that the Lake of the Woods Milling Company placed a few cars for early shipment.

It is recorded as an illustration of quicker transport under the new administration of the Intercolonial Railway that a carload of carpets was received by a St. John, N.B., firm from Toronto in four days.

The Tobique Gypsum Company, consisting of Hon. John Costigan, Hon. Peter White, Hon. John Haggart, and some Ottawa citizens, is applying for incorporation by letters patent; capital, $40,000, head office, Ottawa.

The offer of compromise made by the Adams Shoe Company, of Quebec, at the rate of 40 cents on the dollar, has not been generally accepted, and an assignment has been made at the instance of Messrs. Shaw, Cassils & Co. The liabilities are figured at $19,000, and assets $14,000.

Two clothing failures are reported from Ottawa. J. H. Doherty & Co., the larger concern, have assigned to E. R. C. Clarkson, Toronto. Some six months ago they claimed a surplus of about $24,000. This is not Mr. Doherty's first failure.——Bernstein Bros. have also assigned, but no figures of liabilities or assets are yet given.

Having removed from Moncton to St. John, N.B., Walter Mitchell has since 1893 done an active boot and shoe business. He has suspended, and made a proposition to pay creditors 30 cents on the dollar. His liabilities foot up to the respectable sum of $38,000 odd, with assets figured at about half that sum.

The Maritime Sulphite Fibre Co. have completed a mill on the Canada dock, Chatham, N.B., for cutting, barking, and preparing wood for the grinder in the pulp mill. A similar mill is in course of construction in the company's Wellington street wood yard. In operation each mill will employ about 25 hands.

Two failures in Montreal of a more important character than those noted elsewhere, are those of the R. Miller Co., limited, wholesale stationers, and of Turner Bros., furniture and sewing machine dealers. The former concern was incorporated several years ago, to take over the business so long carried on by the late Robert Miller, but they have not apparently been able to hold the old connection, and have decided to liquidate. It is not thought the liabilities to the public will much exceed $25,000 to $30,000. In the matter of Turner Bros. the liabilities are stated at about $29,000, and the assets consist largely of instalment-plan payments.

The clothing firm of S. Glube & Co., Lunenburg, N.S., have assigned, and are offering 15 cents on the dollar to general creditors. Mr. Glube went from Chicago to Halifax and failed in the latter city in 1895, afterwards removing to Lunenburg. Liabilities are $7,900, of which $2,630 are preferred; assets apparent, about $4,000.——A. J. Boyd, for many years in general business at River Bourgeois, N.S., has assigned, owing about $7,000.

A case of interest to shareholders in building societies was decided by Mr. Justice Gill in Montreal last week. The case was Ross v. Menard. The plaintiff sued in his quality as liquidator of the Washington Building Trust Company. The defendant had subscribed for five shares of the capital stock of the company, and the action was taken to recover the payments due under the rules regarding such matters, His Honor maintained the action, and gave judgment for $526 and costs.

Before Chancellor Boyd on Tuesday an application for a winding-up order for the Army and Navy Clothing Co. was granted, and it was ordered that the stock of the company be disposed of by auction, Mr. Henderson to be provisional liquidator. The affidavit of John Calder states that the company was incorporated in May, 1894, with a capital stock of $26,000, $25,000 of which was paid up. The whole indebtedness of the company is said in the affidavit to be $125,000, and the assets were stated by the president of the company to be $75,000, but $50,000 would be nearer the mark. The Chancellor holds that a landlord's claim for rent and a city's claim for taxes, are preferential, and do not come under section 66 of the Winding-up Act, which bars a number of such preferences. Mr. Calder takes an appeal from this judgment.

In Montreal the following recent failures have taken place: P. Routhier, who began in the grocery line last fall, has already assigned, owing $1,939. He has made an offer of 35 cents cash.——P. Marsan, after ten years' experience as a boot and shoe clerk, started on his own account a year ago, but has not found success. He owes $5,090, which he would like to settle for 60 per cent.——N. Valade, a barber, also dealing in tobacco, unable to settle at 20 cents, has finally assigned, owing $4,700.——Odilon Dugas, men's furnishings, recently failed, is trying to arrange a settlement at 35 cents on liabilities of $9,400.——J. Roston, *alias* Rostonski, shoe retailer, lately damaged by fire, and since under seizure for rent, has made an assignment.——C. N. Beaudoin, also in the shoe line, in St. Henri suburbs, is offering his creditors 50 cents on the dollar.——Voluntary assignments have been made by Organ & Carpenter, grocers, and also by J. B. Richer, produce dealer in St. Henri, the liabilities in each case being small.——H. C. Gregoire, fancy goods, who moved in from St. John's, Que., four years ago, has assigned, owing $6,000.

Mercantile Summary.

Two Nova Scotia traders, C. R. Bown, doing a small grocery and confectionery business, at Sydney, N.S., and E. D. McQuarrie, a small general dealer, at Alexander, have found it necessary to assign.

In Nov., 1892, Campbell & Shane dissolved partnership as dry goods dealers, in Windsor, Ont. Since that date, C. S. Campbell has continued the business. Owing to the sale of some bankrupt stocks in that place, the last year has been a very trying one for him. We hear of his assignment this week, and it is thought his liabilities will be about $25,000.

Having engaged in the furniture and under taking business in Collingwood some years, Alfred Chellew made some money. Afterward he handled boots, and later men's furnishings. He moved into larger premises last year, and thereby added to his expenses. Lately he found trade backward, and in order to realize sent some goods to the auction room. Now we hear that he assigns, with liabilities of $18,000, and nominal assets only $8,000. A meeting of his creditors will be held to-day.

It is something like twelve years since Geo. Eberle & Co. opened a tailoring shop in Owen Sound. A few years afterward men's furnishings were added to the stock, but this did not appear to help them very much. Lately they have found business very dull, and several claims have been put into the hands of solicitors for collection. So they assign.——A small dealer in tobaccos, etc., named Bruce W. Rickey, in Peterboro, assigned, after one year in business.——Another assignment is that of A. Hoover, coal dealer, Toronto Junction.

A subscriber in Montreal, who has read the story in our issue of 31st December, entitled "A Great North-West Work Interrupted," writes that the natives of Ashantee in Africa have made a similar use of telegraph wire to that mentioned by Wm. Jennings, C.E., as having characterized the British Columbia Indians in 1874. A telegraph line has lately been erected to Coomassie from the sea coast, and the natives along the route have been cutting off the wire in suitable lengths to mak armlets and anklets.

A general dealer of Victoriaville, Que., J. C. Thibault, has assigned. He was originally a tinsmith, and has been "a rolling stone" in the past. He built quite a fine store in Victoriaville, largely on borrowed capital, it is said, and despite his lack of experience, etc., has evidently found credit cheap, and has been able to run up liabilities of some $15,000.——St. Hyacinthe furnishes its third dry goods failure since the New Year, H. D. Gagnon, having assigned on demand, owing about $12,000.——D. H Godbout, a trader of St. Marcel, is offering 50 per cent. cash, on small liabilities.——P. A. Cloutier, of Notre Dame du Lac, who has kept a small store and hotel for some 30 years, is also offering 50 cents.

In March, 1895, S. W. Davis succeeded his mother, who had a small stock of crockery and teas in Barrie Having more extensive ideas, he soon increased his stock to $1,000. Lately he has been slow in meeting his bills, was threatened with suit, and this is followed by an assignment.——The bailiff is in possession of the premises of J. D. Brown, manufacturer of pop, etc. His effects have been mortgaged for more than a year, and he has not been attentive to business.——A bailiff is also in possession of R. Kirkpatrick, shoe dealer in London, for arrears of interest on mortgage and for taxes He owes $2,000 on his stock.——In the same city the creditors of John R. Gurd, broom manufacturer, are offered 40 per cent. of their claims His statement shows a surplus of $1,200 on liabilities of $7,600.

GRAND TRUNK RAILWAY SYSTEM

Are You Going To the Klondyke?

The Grand Trunk Railway is the popular route to the Yukon and gold fields of the Klondyke. The route is via Chicago, St. Paul, Seattle, and Victoria, the leading ports to Alaska.

William Ogilvie, F.R G.S., Surveyor to the Dominion Government, says, in referring to the various routes to the Yukon:

"We now go to the Dyea route, which has been used by the Indians for generations—and they evidently knew their business. It is estimated that 95 per cent. of the traffic that has already gone into the Yukon has gone via Dyea, which is the clearest possible evidence of its superiority over all other routes."

Mercantile Summary.

SHELBURNE, Nova Scotia, is asking for a new public building to replace the present "shell."

THE fleet of steamers which will ply between Victoria and Alaskan points during the spring and summer months will, according to present announcements, number not less than thirty-two.

THE sales of farm lands by the Canada North-west Land Company during the past year amounted to 39,000 acres, for $210,550. This is an increase of 18,873 acres, as compared with 1896, and an increase in money received of $96,500. There has also been a good increase in the sales of town sites.

THE revenue of the city of Sherbrooke for last year was $61,835.91, and the ordinary expenditure $54,510.36. There was a special expenditure besides, for stone pavement, grading and widening of streets, of $11,841.93, which works may be considered as permanent improvements. The waterworks system at present is not complete, and, in addition to the amount the city has paid for them, they will need to have considerable money laid out on them.

THE corporation of the town of Mount Forest had plenty of competition among contractors in tendering for the construction of their water works plant. No less than ten tenders were submitted, that of Clark & Connolly, of Toronto, being successful in getting the work at $22,400. Gowanlock & Weddell, Toronto, and Walker & Co., Kincardine, were each within $100 of this amount, which shows how carefully the estimates have been made.

IN the death, ten days ago, of John L. Harris, Moncton lost one of her most prominent citizens, and the Maritime Provinces one of their most public-spirited sons. A general merchant in Moncton more than thirty years ago, he made money and became instrumental in establishing the Moncton Cotton Co. and the Moncton sugar refinery. He had been in poor health for a year or more, but stuck tenaciously to business until quite recently. He died on Monday last in his 65th year.

FROM the busy town of St. Hyacinthe, Que., we hear of two dry goods failures last week. Bergeron & Co. have been asked by a Montreal millinery house to assign, and have filed consent. Mr. B. was unsuccessful years ago, and has of late been doing business as tutor to his minor child. The liabilities are stated at $17,000, with assets of only about $6,000.——Manasseh Echemberg, jun., has also assigned on the demand of S. Levinson. He shows assets of about $1,000, to pay liabilities of $2,500.

VICE-PRESIDENT Thomas F. Clark, of the Western Union Telegraph Company, proposes to the United States Government a suit against Spain for a million dollars damages because the authorities in Havana have interfered with the workings of the cable between Havana and Key West. This cable, the Western Union Company owns, and used to work at a profit. But since the beginning of the insurrection, the profits have disappeared, and now it is claimed the shortage amounts to more than half a million dollars.

IT gave much satisfaction to the friends and admirers of Mr. Hamilton G. McMicken—and they are not few—to learn, a week ago, of the appointment of that gentleman to the important position of European agent of the Great Northern Railway. This American corporation, which Mr. McMicken has represented in Canada for some years, has a railway which stretches from the Mississippi to the Pacific Ocean. The European interests of such a concern must therefore be of moment, and in Mr. McMicken they have an officer who has learned "what is what" in various places and circumstances. In Niagara Falls, Winnipeg, Rat Portage, St. Paul, he has learned to understand the cowboy and the miner, the aristocrat and the tramp. The appointment is a good one, and it is to be hoped Mr. McMicken will have his headquarters in a convenient part of London.

CITY OF TORONTO

CORPORATION LOAN

INDUSTRY INTELLIGENCE INTEGRITY

Issue of £213,000 Sterling 3½% General Consolidated Loan Debentures, Equivalent of $1,036,600

REDEEMABLE 1st JULY, 1929.

Sealed Tenders will be received at the City Treasurer's Office, City Hall, Toronto, Canada, at or before three o'clock p.m., on Tuesday, the 25th day of January, 1898, addressed to the Chairman of the Board of Control, and endorsed "Tenders for the City of Toronto 3½ per cent. Debentures," for the purchase of $1,036,600, or its equivalent in Sterling at par of exchange (£213,000) General Consolidated Loan 3½ per cent. Debentures, maturing 1st July, 1929.

The Debentures will be made payable in Canadian Currency in Toronto, or in Sterling in London, as the purchasers desire, with Coupons attached payable half-yearly—1st January and 1st July. The interest accruing from 1st January, 1898, to date of delivery of bonds, to be paid by the purchaser.

Tenders will be received for the whole or any portion of the Debentures, and the purchase money will be payable as follows: Five per cent. on allotment; balance on the delivery of the Debentures.

The Debentures will be delivered to the party whose tender is accepted at the City Treasurer's Office in Toronto, the proceeds of the sale being payable in Canadian Currency; or, if the Debentures be taken in sterling, at the par of exchange at the said place of delivery; but, if tenderers desire, they may specify that payment of equivalent amount will be made in sterling in London, and the Corporation will deliver the Debentures against payment thereon being indemnified for the stamp duty and the cost of transmission and insurance, the latter not to exceed one-eighth of one per cent.

Applicants are required to furnish the names of personal or corporate sureties for the due fulfilment of their tender, if accepted.

Tenders will be opened at a meeting of the Board of Control of the Corporation of the City of Toronto, in the presence of such of the applicants as may attend.

The highest or any tender not necessarily accepted.

Full information can be obtained on application to the City Treasurer.

JOHN SHAW,
Mayor (Chairman Board of Control).

R. T. COADY,
City Treasurer.

CITY TREASURERS' OFFICE,
City Hall, Toronto, Dec. 27th, 1897.

Mercantile Summary.

INCORPORATION has been granted in Ontario to the John Goodison Thresher Company, of Sarnia, limited, capital $99,000, to make and sell threshing machines and field implements. The parties are J. F. Lister, John Goodison, Charles Mackenzie, E. F. Goodison, and W. T. Goodison, all of Sarnia. Also to the Tudhope Carriage Company, limited, of which the members incorporated are James B. Tudhope, Wm. Hugh Tudhope, Hugh Reid Tudhope, Harriet Tudhope, and Catharine Tudhope, married women, of Orillia, to make and sell vehicles, capital $100,000. They take over the business of the Tudhope Carriage Company.

As a fact illustrating the activity of freight movement in the United States, the *Railroad Gazette* finds upon enquiry that in 1897 there were 43,588 new freight cars constructed for the various railroads in that country. To get an idea of the probable increase in railroad business in 1898 enquiries were sent out a few weeks ago to all the companies, asking their probable requirements in new cars during the first six months of the present year. Answers received from two-thirds of these estimated that 38,000 cars will be required within the time named. The whole number of cars built in twelve months of 1896 did not exceed 45,000.

AMONG the considerable dry goods establishments in Western Ontario is that of Messrs. Zeigler, Hinch Co., Guelph, who have been obliged to hand over the estate to an assignee for the benefit of creditors. Mr. E. J. Henderson has been asked to wind up the business, and he will call a meeting of creditors in a few days.

A PERSON of practical business experience having some surplus capital would like an opportunity to invest in some profitable business in Toronto, where further skill and capital would give it increased success. Address P. O. BOX 459, care of Monetary Times, Toronto.

WM. CLENDINNENG & SON,
IRON FOUNDERS AND
STOVE MANUFACTURERS
Montreal, Que.

A rough statement of the affairs shows liabilities of $25,000 and assets of $30,000. Although several Toronto firms are interested, the majority of the creditors in for large amounts are Montreal, Quebec and Hamilton firms. The firm originally was Zeigler & Smith, who started in 1886. The latter died five years later. About one year ago Hinch was made a member of the firm. Last year competition had been very severe, and they have suffered in consequence.

THE bailiff is in possession of the stock of J. B. Stouffer, druggist, Toronto, and John Symons, many years a butcher in Toronto, has made an assignment.

AN offer of compromise is made by J. B. Henderson, general storekeeper at Carberry, Man., who assigned a week ago.——J. Ely & Co., general store at Salt Coats, have also assigned.

BEING unable to trade in his own name J. R Walker, who is a shoe dealer, in Campbellford, has used that of his wife R. E. L. Walker, since 1893; but in so doing, for purposes of trade, did not increase her wealth. Last September, there was a fire in their premises, but were well insured. Now she assigns.——Another assignment is that of Moffatt Bros., painters, Guelph. Their stock has been mortgaged, and there is a judgment against them. —Another man doing business under cover of his wife is John Morton, general storekeeper, at Fort William. About ten years ago he failed in Hamilton, as a grocer, now we hear of their assignment with liabilities about $14,000.

AN offer to compromise has been made by Stubbs & Rogers, furniture dealers in Guelph. Eight years ago they succeeded W. J. Joyce & Co., and for some time did an excellent trade. But at various intervals they had assistance from Mr. Stubbs' father. Last Monday a meeting of creditors was held, and the senior partner offered to take over the business and pay creditors 50 per cent.——A bailiff has seized and sold the chattels of S. L. Hunter, tailor in Hamilton, who has done a small business for several years——Another tailor in trouble is Robert Weir, Peterboro. He was supposed to be in a fair position, but now his statement shows that he owes $2,300, and to pay this sum he has nominal assets of $1,200.

THE LAND MORTGAGE COMPANIES' ASSOCIATION OF THE PROVINCE OF ONTARIO.

The annual meeting of this association was held in the board room of the Canada Permanent Loan and Savings Company, in this city, yesterday, the 20th inst., when the annual report of the executive committee and the sectary-treasurer's statement of receipts and disbursements were submitted and adopted. The annual report showed a membership in the association of thirty-four companies, representing a total paid-up capital of $25,775,267, and assets amounting to $397,148,610, as at 31st December, 1896. The retiring officers and executive committee were re-elected, with the addition of a second vice-president, as follows: President, J. Herbert Mason, Toronto; first vice-president, William F. Bullen, London; second vice-president, Hon. George A. Cox, Toronto; secretary-treasurer, R. H. Tomlinson, Toronto; executive committee, Walter S. Lee, James Mason and Andrew Rutherford, Toronto; George M. Furby, Port Hope; R. S. Schell, Brantford; William Buckingham, Stratford, and C. W. Cartwright, Hamilton.

Debentures.

Municipal Debentures bought and sold, also Government and Railway Bonds. Securities suitable for Investment by Trustees and Insurance Companies and for Deposit with the Government, always on hand.

VICE-PRESIDENT,
J. W. FLAVELLE, Esq.,
Managing Director The Wm. Davies Co.
Director Canadian Bank of Commerce.

The Toronto Globe, in referring to the first three months' business of the Company, said:

"It was generally known by those in the business that this new aspirant had secured a fair share of the new insurances taken out in the last three months, but it will be a surprise to nearly all to hear that the applications received amounted to over one million and a quarter of dollars, of which more than one million were approved and policies issued. This phenomenal record—for such it really is for a new company—compares favorably with the business of the older and progressive life insurance companies of the Dominion, and considered in the light of the character of the business, gauged by the large average amounts of premiums and policies, it is quite safe to say that the record is unparalleled in our country."

F. G. COX, Managing Director.
THOS. BRADSHAW, F.I.A. Secretary and Actuary.

TORONTO, FRIDAY, JANUARY 21, 1898.

THE SITUATION.

"On to Hudson's Bay," has of late been heard in Toronto, and there has been some disposition to raise the cry into a shout. The country between Toronto and Hudson's Bay, it cannot fairly be doubted, is worth opening by rail. When those who called for railway facilities to Hudson's Bay came together and began to talk about the line to be traversed, differences of view and interest were at once developed. Finally, a result was reached in the selection of a route which, whatever its incidental value, does not take us sensibly nearer to Hudson's Bay than existing railway facilities take us. The Legislature may have had good reason for subsidizing a line to Wahnapitae; but Toronto will not be any nearer to Hudson Bay when this road is built, than she is now by the road to North Bay. The road to Wahnapitae will have its uses. It will supply the means of bringing out lumber, and if the tariffs continue to permit a trade in that article with the United States, it will serve to carry some of it. But this trade would not come to Toronto, but would go round by Hamilton and Buffalo. Toronto has no interest in the new road that would justify the City Council making a grant-in-aid, in any form. We have nothing against the enterprise or the assistance it has received; all we desire to say is, that it can have no claims on Toronto for pecuniary aid.

What Toronto, as a city, should seek to obtain, is an extension of railway facilities beyond the northernmost point to which a railway reaches at present, to wit, at North Bay. In any case, she must not deceive herself into supposing that she can ever command the bulk of the traffic from the direct north; the natural tendency of much of it will be to go easterly to Montreal, and what will go to New York will pass round by Hamilton, without coming nearer to Toronto than Georgetown. Nevertheless, so vast an extent of country as that which stretches between Toronto and Hudson Bay cannot be opened by railway to commerce without materially benefiting this city. Mr. Thomas G. Blackstock suggests that Toronto ought to build the road herself, otherwise, he fears, it will fall into the control of some other company whose interest will lie in the long haul. But, if we are right in assuming that the bulk of the northern trade will not, for economic reasons, come to Toronto, the city would not, in its corporate capacity, be justified in incurring the cost of construction. Mr. Blackstock seemed to have in his mind individual effort when he told of the honor to be won by undertaking this enterprise. There is one individual citizen who could do much, if he threw his means and effort into this enterprise; but, as things go at present, there is, we fear, little prospect of any new railway of promise being kept clear of ultimate control by the collossal organizations already in existence, desirable as independence would be. The C.P.R. long since marked the line to Wahnapitae as its own.

When a change of government took place in Canada, a year ago last June some American jingoes persuaded themselves that it portended a political change in the relations of Canada to the Republic. How mistaken that expectation was every act of the new government which tended to furnish an answer to the question raised goes to show; the whole tone of the public utterances of Ministers has been not less emphatic in the same direction. Mr. Smalley, in the *Review of Reviews*, once more throws out the hint, now become stale, that the commercial relations between Canada and the United States can best be regulated by the political union of Canada with the Republic. Mr. Robt. McConnell, editor of the Halifax *Chronicle*, a leading Liberal journal, answers the invitation effectually. He shows that the United States, by commercial hostility, winking at Fenian raids and ungenerous denunciation of the Mother Country, has made the thought of political connection with the Republic repulsive to Canadians. After confederation there was a time when the future of Canada was felt to be uncertain; British statesmen looked to the independence of the larger colonies; in the colonies themselves men groped their way blindfolded to try to discover their future; quite an extensive literature on the uncertain future of Canada was created. If the United States had wooed Canada then, Mr. McConnell is uncertain of what the result might have been. But American statesmen, believing that Canada could be starved or coerced into annexation, pursued a policy of hostile commercial legislation, till now, in the words of Mr. McConnell, "the time has gone when our American neighbors can woo Canada into political union, even by a policy of friendliness and close commercial relations." It will be best for all parties if this truth is at once grasped in its full significance and acted upon. There are a few renegade Canadians in the United States, who are always trying to sell a country they do not possess and drawing the means of buying substantial pudding from the credulity of a few Americans, who impose upon themselves the grotesque belief that these outcasts possess some occult, hidden power, which will enable them to do all sorts of impossible things.

Sir Michael Hicks-Beach, the British Chancellor of the Exchequer, speaking on a public occasion, has made plain to the whole world the position of England on the Chinese question. She does not intend to permit other nations, by their intervention, to close the door of Chinese commerce to the British Empire, but will keep it open even at the cost of war, should that become, in the last resort, necessary. This declaration is applauded by the press without distinction of party. The strength of the British position on the Chinese problem is, that England is fighting for free intercourse with China, not for herself merely, but for the whole world. Any nation that is satisfied with the common privilege thus sought will back this demand; only those that seek exclusive advantages in China, to the detriment of the rest of the world, will object. England, in renouncing for herself territorial acquisitions in China, lets it be understood that she would not countenance in other nations a game of land-grabbing which would mean partition; her object being trade, she expects to continue to enjoy it, under the Chinese Government. All Europe now trades with China, at twenty-four treaty ports, on the same terms that England does; but the other European nations have not been able to make their competition for a share of the Chinese trade very effective. England continues to do the bulk of the European trade with China, to the great discontent of her European rivals. Mr. Sherman admits that England opened for the United States the trade of China; and the Republic has known how to use her opportunities, for she does as much business with the Flowery Kingdom as all the European nations, apart from England. This fact should be encouraging to Canada, which, from her position on the Pacific, has the same facilities of trading with China that the United States has. When France obtained an opening for her trade at the port of Nanking, forty years ago, England demanded and obtained the right to trade at the same port, on equal terms; and we may be sure that she will now make a similar demand in respect to the Chinese ports at which Germany and Russia have sought and obtained trading privileges.

Mr. Chamberlain, Secretary for the Colonies, has lost every particle of the hope which buoyed up Cobden when he confidently predicted that all nations would soon follow England in the beneficent path of free trade on which she had entered. "We must," says Mr. Chamberlain, "seek in our own family the strength and support which we shall never find from foreign nations; and with this view we must be ready to respond to any colonial overtures, without seeking pecuniary recompense, but looking to the wider interests of the future." This he said as a prelude to a proposal, which he announced, that Parliament, as a means of balancing the sugar bounties of other countries, should make a large grant in aid of the West Indies. The way the press has criticized this proposal shows that there is no abatement of the free trade faith in England. Mr. Chamberlain estimates at £2,000,000 the benefit which England annually reaps, in the form of cheap sugar, from the sugar bounties. It would be a mistake to conclude that what England gains the West Indies lose. The loss is shared by other sugar-cane growing countries. The competition with beet sugar makers would, perhaps, be unequal if left to unloaded competition. From whatever cause, there is much defective sugar cultivation, even in Cuba during peace, and the state of things in this particular is much worse in the British West Indies. It looks as if Mr. Chamberlain would find some difficulty in passing his proposed measure of relief through Parliament.

In Mr. Keating the city of Toronto loses a valuable engineer, gone into the employ of the Toronto Railway Company. Experts, when they are reliable, may safely be allowed a large latitude in doing work which only experts fully understand. Some aldermen may flatter themselves that they will now get a free hand in matters that require scientific knowledge. There is one thing unfortunate, which it is impossible not to regret in Mr. Keating's translation. He leaves the employ of the city when it has a lawsuit with the Toronto Railway Company, and goes to the other litigant, just at the time when he was relied on as an important witness. It will, however, be recalled that he is the third competent and valuable man whose services as city engineer have been lost to Toronto by the vagaries of aldermen. Mr. Shanly was the first to rebel against thraldom, then Mr. Jennings, now Mr. Keating.

UNITED STATES BANKING AND CURRENCY.

Secretary Gage's banking and currency scheme recently brought before Congress, has perished, still-born, as we foresaw it would the moment it was introduced. Mr. Gage, appearing before the House Committee on Banking, as a witness, explains the failure of his scheme. "The predisposition of the people," he says, "is in favor of Government notes," and "you cannot change their minds. They are timid and suspicious of bank note issues. They disbelieve that anyone can uphold a system such as I have sketched without selfish and sordid motives. They fear that it involves hazard and loss. They recall the period of wild-cat banks." He might have said that his own scheme recalled it in many particulars. The revival of the old Safety Fund feature of Van Buren's scheme, though that was in form an improvement on pre-existing methods, was sure to recall wild-cat banking, for under it in the State of New York millions of bogus capital figured in the stock lists of these banks. The present National Banking system of the United States has been slowly developed, bit by bit, to afford a succession of remedies against defects and possibilities of fraud, in previous systems. Whoever undertakes to remove the manifold precautions against loss to the public from banks, must be prepared to show that the country has cast off all the evil instincts against the consequences of which the wit of the Legislatures was taxed to the utmost. And if we look to railway and other monopolies, there is small encouragement to believe that any such moral improvement has taken place. Mr. Gage overstates the public suspicion; the people are not suspicious of National Bank notes which they know to be specifically secured; but they may, as he says, be suspicious of bank notes not so secured. That suspicion has its root in history; it was born of disaster to the public, and though, as always happens in like cases, it has probably survived the state of things which gave it justification; if it has not already, it is sure to outlive the reasons that justified it; and when this happens, the suspicion, just in its origin, can work only mischief, like a malevolent superstition.

LAKE GRAIN TRANSPORT.

Reference was made by the president of the Winnipeg Corn Exchange the other day to some matters connected with the handling and export of Manitoba and North-West grain that deserve consideration. Five or six times as much of the export hard wheat of Western Canada goes to the seaboard by way of Buffalo, N.Y., mostly in American steamers. Mr. Bawlf says, that of 12 928,000 bushels of the 1897 crop shipped for export, 11,000,000 bushels went by way of Buffalo, while 2,000,000 bushels found its way to the seaboard by way of Montreal. He further says that in 1897 there was shipped from Montreal about 10,000,000 bushels of wheat against 17,000,000 bushels from Fort William. This state of the grain carriage trade is not a pleasing subject of contemplation for Canadian carriers or for Canadians at large. But until we can get modern boats of our own to rival the 4,000-ton steel steamers that now carry ore and grain down and coal up the lakes, we shall probably have to grin and bear seeing our grain carried in American bottoms as far as lake navigation will carry it.

Mr. Bawlf drew attention to Fort William as a grain shipping port. Its importance in this connection, he points out, is not generally recognized. During the year 1895 there was shipped from Fort William, 10,587,866 bushels of wheat; during the next season, 12,689,000 bushels; during the season of 1897 the quantity increased to 17,600,-

000 bushels. It is interesting to compare with this the total shipment of grain of all kinds from Montreal for 1897 (wheat, corn, peas, oats, barley and rye), namely, 27,000,000 bushels. Thus Fort William shipped nearly double the quantity of wheat in 1897 that was shipped from Montreal. The magnitude of this traffic gives weight to the agitation of the Winnipeg Corn Exchange for some means of keeping open the Kaministiquia River free from ice in the later months of the year.

MARITIME PROVINCE WOOD EXPORT.

The activity shown in lumbering in the Atlantic Provinces of Canada during the winter of 1896-7, and the large shipments from that region during the following summer brought a natural reaction. There had been a full production that season, and prices were attractive, so that, the United states markets being depressed, and those of Great Britain showing a good demand, large quantities of wood were sent across the Atlantic, especially of spruce. From Miramichi ports alone, nearly sixty million feet of sawn lumber went to Great Britain, thirty-three million feet to Ireland, four million to France, three million more to Africa and Spain, in all 101,719,077 feet, besides 2,801,000 feet spool wood, and 880 tons hewn timber. From a glut of pine and spruce, prices in Britain dropped, and activity ceased towards the close of the year. We give below from the wood trade circular of J. B. Snowball, of Chatham, some particulars, the New Brunswick vessels number last year 480, with a tonnage of 532,495 :

TRANSATLANTIC SHIPMENT OF NEW BRUNSWICK 1897 AND 1896,

	1897.		1896.	
Ports.	Sup. ft, deals, etc.	Timber, tons.	Sup. ft. deals, etc.	Timber, tons.
Miramichi	101,719,077	880	106.147,420	.. ..
St. John	244,399,066	9,546	167,246,442	10,020
Outports of Moncton............	58,187,304	962	25,614,039	.. ..
Sackville (Bay Verte)	14,419,134	.. ..	19,996,978	.. ..
Dalhousie	24.185,011	323	36,600.980	195
Campbellton	14 960,267	.. ..		
Bathurst	13,864,133	29	8,188,078	.. ..
Richibucto	7,489,438	.. ..	11,191,062	.. ..
Shediac	14,980,765	.. ..	11,054,978	.. ..
	494,204,195	11,740	386,039,977	10,215

From this table it is seen that the deal and other sawn shipments of 1897 were over 494,000,000 feet, which is about twenty-two per cent. greater than in the previous year, when it was very large. The export of spruce from New Brunswick and Nova Scotia was excessive, particularly from the latter. It is predicted by the circular that the output of logs the present winter will be very small, not over half the quantity got last year, but the wintering stock in the Miramichi district is large, so that next season's shipments from Chatham will probably be a full average.

It must not be forgotten that the Government of New Brunswick has between four and five million acres of timber land under license, an increase of forty per cent. in five years. And in former circulars Mr. Snowball has given warning that the forests of that province, as well as of Nova Scotia, are being overworked.

The increased business with the United States, which twelve months ago was foreshadowed in the circular of this house, does not appear to have eventuated. Nor did the export to France increase. From the statistical tables and other particulars we gather that while both shippers and receivers of lumber and timber cargoes prefer to use sailing vessels, it is yet becoming apparent that sailing vessels "are to be still further forced out of the Atlantic business."

Shipments from Nova Scotia across the Atlantic were very extensive last year, almost double the average of any year up to 1892, and sixty million feet in excess of the previous twelve months. We speak of deals and other sawn wood, for the exports of square timber were trifling, 8,684 tons, mostly from Pictou. The body of exports were from Halifax, which is followed at a respectable distance by Parrsboro :

SHIPMENTS FROM NOVA SCOTIA, 1897.

Ports.	No. Vessels.	Tons.	Sup. ft. deals, etc.
Halifax	71	50,111	84,060,000
Parrsboro	33	40,598	44,397,133
Outports of Amherst	35	31,322	24,485,560
Bridgewater	23	10,873	10,749,000
Pictou	13	12,937	10,872,360
Hubbard's Cove	6	5,887	5,659,000
Yarmouth	3	2,927	2,684,061
Liverpool	1	528	495,260
Mahone Bay	3	1,522	1,478,000
Jordan River	1	528	482,188
	189	157,233	185,362,562

COMPULSORY HIDE INSPECTION.

The matter of hide inspection has been before the trade for a number of years. It is generally conceded that inspection gives a much needed incentive to the butcher to take off his hides with skill, and affords him a convenient standard for judging the work performed by his assistants. At present when hides are worth three times as much as they were a few years ago, the tanners and butchers have additional interest in securing the proper quality of hides. There are, however, a number of difficulties which present themselves in carrying out any system of inspection. Under a voluntary system, the inspector being remunerated according to the number of hides that pass through his hands, there is every inducement for him to favor the one who brings in the hides for inspection. We do not wish to impute dishonesty to the inspectors, but merely venture to assert that the manner in which they are paid is not calculated to give the most disinterested inspection. There is also a lack of uniformity in the results of their work, and tanners are accustomed to make considerable allowance for the differences in value between hides of Montreal, Toronto and Hamilton inspection.

It is proposed, we believe, at the next session of Parliament to introduce a bill providing for compulsory inspection of hides. The measure should be thoroughly debated before it becomes law. There is not, it is asserted, a country in the world where compulsory inspection exists. Government regulation of trade is at present exerted in different branches of industry, but for different reasons than can be urged in this instance. Different products intended for export have been subjected to inspection to prevent abuses which would injure the reputation of Canada in foreign markets. But the inspection of hides will not assist merchants in their trade with the United States, the usual foreign market for Canadian hides, as American buyers prefer to purchase "flat" in our markets. Products that are used for food have come under inspection, in the interest of purity and on grounds of public policy.

The sole argument in favor of the inspection of hides is the interest of Canadian tanners. If there be a unanimous demand from all interested in the trade, the Government ought to grant the request. But if there be opposisition on the part of even a considerable minority, the legislators should pause before taking steps to regulate this important industry.

CREAMERY BUTTER.

There has been a marked increase in the production of creamery butter in Canada during the present winter. Trade authorities maintain that there is an increase of fully 25 per cent. in the number of creameries operated this year.

Export shipments to the United Kingdom are increasing. During the four weeks ending on the following dates these quantities of Canadian butter have been shipped to Great Britain:—

1896-97.	Cwts.	1897-98.	Cwts.
September 26......	24,165	September 25......	34,085
October 24.....	16,167	October 23......	22,954
November 21......	17,643	November 20......	13,334
December 19......	6,343	December 18......	10,665

In the month of January, 1897, the quantity of 789 cwts. of butter was sent from Canada to British markets, while in the first week of January, 1898, there was 773 cwts. exported. The demand for Canadian butter is best in the North of England, and in Manchester by late mail quotations, "choicest" quality brought from 104s. to 106s. per cwt., or better prices than were obtained for Australian makes. The products of the two colonies are in active competition in different trade centres for the shilling-a-pound trade.

It is natural to wonder where this expansion in trade will stop. In the year ending August 28th, 1897, Great Britain imported 208,425 cwts. more butter than in the previous year, or 3,170,802 cwts., as against 2,969,377 cwts. The explanation to the increased consumption of butter the world over is found in the improved quality. In the local markets retailers report that of fine creamery butter the average family will consume far more than was formerly the case when dairy butter of irregular quality was used. The race between butter-producing countries must be essentially one of quality, and the makers who succeed in producing the most palatable article will reap the richest rewards of the trade.

CARE IN EXPORT SHIPMENTS.

Negligence and lack of methodical care as to quality and condition on the part of any producer is detrimental to the best interests of trade, but when an export is considered, lack of care in quality and packing is almost criminal, in that it is likely to cause, and often does cause, widespread disaster to national interests. A correspondent writing, December 31st, 1897, to the Kentville, N.S., *Chronicle*, gives a good example of what a farmer should not do in preparing produce for the market. Referring to the potato trade, he says:—

> The last cargoes here from Kingsport are showing very little rot, and will demand high prices. The sales have been quite heavy this week, most of the potatoes going out to small towns on the island. Good stock is worth $5.15, Spanish gold. What little rot I have seen is among those in hardwood barrels. But, alas! when will our farmers learn to separate the potatoes from the turnips? I noticed several barrels on the wharf yesterday with a few poratoes in each end—the rest good sized turnips. Now, if farmers only knew how much better turnips are for cows than they are for Spaniards and Cubans, we would get 50 cents more a barrel, as one barrel with turnips and carrots in it hurts the sale of a whole cargo. Our Cornwallis potatoes will demand the highest price in Havana if our farmers will ship in new soft wood barrels and put up good stock. But so many will say, "The bovs put them up," or, "We had to pick them over in a dark cellar." I have picked over a few potatoes, and I think it would be a very dark place where I could not tell a potato from a turnip. I hope our shippers will be more particular, and not ship in old barrels, especially old meal and flour barrels, as they mildew on the inside and spot the potatoes.

CHOOSE BETTER MEN.

At a dinner given by citizens of Montreal last week in honor of Mr. R. Wilson Smith, retiring mayor—a dinner the attendance at which testified to the cordial estimation in which he is held in that city—the guest of the evening said some sensible and suggestive things. Speaking of the duty citizens owed to their city of taking their proper share in municipal work, Mr. Smith urged that "there is no reason why our Board of Trade and Chambre de Commerce, labor organizations, bankers, underwriters, and other mercantile institutions should not, by a mutual agreement among themselves, say: 'Each of us will have a representative in the city council. We will each select and elect our men.'"

It is precisely because such bodies or groups of business men have taken little or no pains to select and elect trustworthy men to city and town councils that so much venality and vicious practice have crept into municipal life. The more intelligent voters take no trouble to get good representatives elected, and so their nerves as well as their pockets suffer from the fact that the bad representatives waste the money of the municipality, if they do not steal it.

It was not contended by Mr. Wilson Smith that the rich men need to do all the work in connection with a town or city; we have, he urged, a good example in this respect in connection with the laboring classes. But if the wealthier property owners shirk their work in connection with municipal machinery, they will very likely have to suffer for their neglect. As the Montreal Mayor puts it: "There is no reason why they should stand aloof and pay taxes and criticize, as they will have to do if they do not take a more active part in civic affairs." We have had in Canada conspicuous instances of civic misrule, arising from wrong men being put into the right place. We shall continue to have them until conscience, as well as interest, impels the better element of the population to take a vigorous hand in the choice, year by year, of town and city councillors.

THE TORONTO RAILWAY COMPANY.

This company has now completed the sixth year of its working time, out of the 30 years which marks the limit of the privilege it acquired from the city. In considering its situation, the temporary nature of its holdings must always be kept in view, for this is the key to the position. The earning power of the company is derived from the concession obtained from the city, and will cease on the day on which its tenure expires. With that event will come liquidation, unless a new bargain for the extension of the concession be made. The possibility of such a renewal depends upon so many casualties that we should not be justified in assuming that renewal will take place. Liquidation, on the expiry of the term of the concession, is the only thing that investors are safe in looking forward to.

In many respects the company has made great progress. The earnings have risen from $820,098.49 in 1892, to $1,077,612.53. In working expenses there has been a double gain: a largely increased number of passengers is carried, at a less cost, absolutely as well as relatively, the numbers being 5,592,708 for the first year, and 8,169,022 for the last. The net earnings have more than doubled, the respective figures being $229,765.23, for 1892, and $551,811.28 for 1897. But this very prosperity entails an additional burthen: the company has been paying the city, for the concession, eight per cent. up to the time when the earnings were below a million of dollars a year; over the million point now reached, the rate of payment will rise to ten per cent. That is not to say that it will pay no more dividends; it is probable that a continuance of the past increases of receipts may be looked for. But it must not be forgotten that, for three years, out of the six, no dividend was paid at all. A loss of three years' interest is equivalent to a proportionate loss of capital.

In the Sunday car service the company has obtained an additional earning power which, to the end of the year, had averaged $1,277 a week, a figure that is likely to be more than maintained in the future.

Besides the Toronto road proper, the company has acquired two others—the Toronto and Mimico and the Toronto and Scarboro roads—which are held independently of the city corporation, and on tenures different from the Toronto roads. These acquisitions introduce some complications and swell the debenture account, which now stands at $3,249,933, as well as the stock account; the whole of the nominal capital in the two forms being put, as a matter of book-keeping, at nearly ten millions of dollars ($9,957,159.78). What is put down as stock capital is largely water. It is pleasant to write large figures, when the day of liquidation seems far off; when stock can be sold and bulling devices are successful, the manipulators reap a financial harvest.

Large as this capital account, swollen by water, is, it does seem that the day may come when dividends may be earned on the whole sum, the net earnings already being $551,811.28. But this day may be postponed by the tendency of the nominal capital to increase, which never ceases. By the eighth or tenth year of the company's concession, this point may possibly be reached; leaving 20 more years in which, beside paying dividends, to establish a redemption fund, out of which to repay that portion of the capital which the road and its belongings, when they are handed back to the city, will fall short of meeting. As the city will have to pay for the mere value of the material only, the franchise reverting to it without payment, the difference will be several millions. If there be no redemption fund these millions, if advanced by the public to the financial manipulators of the road, will be a dead loss; if there be a redemption fund, though inadequate, the loss will be so much the less. At present, not only is there no redemption fund, but no sign of its future coming.

PROBABLE AMALGAMATION OF LOAN COMPANIES.

A meeting of the shareholders of the Manitoba North-West Loan Company was held on Wednesday last in Toronto, the immediate cause of which was the approaching maturity of some hundreds of thousands of dollars of its debentures, in view of which event negotiations had been on foot for the sale of its securities, or else amalgamation with some other loan society. The company, it should be said, has a considerable aggregate of loans on farm and other property in Manitoba and the North-West, the great bulk of which is of a substantial and satisfactory nature, and is considered to be quite solvent.

The Manitoba and North-West Loan Company was formed about 1878, with a subscribed capital of $1,500,000, of which $375.000 is called up and paid. The head office is in Winnipeg, and the greater part of the business is done in the west, though a large portion of the stock is held in Ontario. The directors were: The Hon. Senator Aikins, P.C., president; Alfred Hoskin, Q.C.. vice-president; Messrs. A. V. De Laporte, Frank Turner, T. Sutherland Stayner, R. T. Riley, J. Somerset Aikins and the Hon. H. D. McMillan. All but two of these are Toronto men.

For months past negotiations have been on foot with the Canada Landed and National Investment Company, and also with the Canada Central Loan and Savings Company, to take over certain securities of this company. Amalgamation had been broached also. At the meeting on January 19th a proposal to amalgamate was advocated by Hon. Senator Cox, Sir Mackenzie Bowell, Hon. H. D. McMillan, of Winnipeg, Ald. Lamb, Ald. Saunders, Rev. Dr. Warden and J. H. Brock. A resolution in favor of amalgamation with some company (not named) was carried unanimously, and the directors were empowered to arrange the amalgamation. At the meeting on Wednesday last Hon. H. D. McMillan and J. Somerset Aikins withdrew from the board, Dr. Larratt Smith and Dr. Warden being elected directors in place of them.

FAILURES IN THE UNITED KINGDOM.

According to statistics compiled in part from official returns of bankruptcies, some kinds of trades in the United Kingdom show an increase of failures in their ranks for 1897, as compared with 1896, while others show a decrease. Richard Seyd's list gives the total number of failures announced during the past year as 8,707, of which 4.724 were bankruptcies, and 3,519 deeds of arrangement. Against this is to be placed a total of 8,843 failures in the year 1896. In the wholesale branches of trade the year was somewhat more unfavorable than its predecessor, the number of failures being 997, as compared with 919. The increase was mainly in the boot and shoe trade and the woolen manufacturing industry.

The year would appear from Seyd's figures to have been an unfavorable one for builders and plumbers, butchers, coal dealers, and drapers. A feature of the statistics is the decline in agricultural bankruptcy, the number of farmers in the list for 1897 being only 445, while for 1896 it was 520. Other trades showing a reduction were bakers, carpenters, etc., confectioners, publicans, tailors, and tobacconists. The number of failures by retail traders is put at 7,710, where in the previous year it was 7,924. The statement adds that 1,636 limited companies were wound up during the year 1897. Of this number 852 went into voluntary liquidation, 396 were wound up on account of liabilities, 289 for the purpose of reconstruction, and 99 on the order of the court.

Another authority, *Kemp's Mercantile Gazette*, gives comparisons of failures in Britain and Ireland, adding that a satisfactory feature is the steady decline in the number of failures, that has been going on since 1895. This journal seems to deal only with registered bankruptcies, which will account for the discrepancy between its figures and those of Seyd. The number of bankruptcies during 1897 was: England and Wales, 4,105, decrease 91, compared with the previous year; Ireland, 209, increase, 27; and Scotland, 778, decrease, 101. During the year there have been 1,448 voluntary windings-up in England, 93 in Scotland, and 39 in Ireland; and 146 compulsory windings-up in England, none in Scotland, and 4 in Ireland, being an increase of 328 in England, a decrease of 10 in Scotland, and a decrease of 10 in Ireland. The "gazetted" failures in 1897 in the United Kingdom numbered 5,001, against 5,165 in the previous year.

A MONTREAL LETTER.

The city of Montreal Bill, after many vicissitudes in the way of additions, amendments, and cuttings, finally passed the Quebec Houses in almost the form in which it was originally presented by the Corporation of Montreal. It certainly seems anomalous and outrageous that the affairs of the commercial metropolis of Canada should be interefered with by country M.P.P.'s, who know nothing of the city's needs, but are willing to be lobbied and cajoled by oily-tongued individuals, as was done in the Lower House, when the bill was passed providing for the widening of Notre Dame street east and St. Antoine street, involving an additional tax of one-quarter of one per cent. on all the taxable real estate in the city. One of the eloquent and ardent members promoting this measure is said to own eleven properties on St. Antoine street. The people of Montreal breathe freer now, as it is felt that these quite needless measures are effectually killed for some years.

The first truss on the Montreal end of the new Victoria bridge is approaching completion, and the extension girders for the driveway and footpath on each side are in place almost as far as the centre span. This extension will be an immense improvement, and will give Montrealers a new sensation when completed, and a drive across it will be by no means the least among the attractions of the city.

Will the new hardware terms (4 months or 3 per cent. cash 30 days) be adhered to? is the question now uppermost in the metals trade. The trouble is with the wealthier houses, who find difficulty in keeping their funds safely invested at even six per cent. per annum, and in cases where they deem the risk safe they prefer taking a customer's note at six months rather than allow three per cent. discount at thirty days. A similar movement to reduce terms was inaugurated some years ago, and failed for this reason; and the refusal of a prominent Montreal house to sign the agreement (although heartily concurring in it), showed that their previous experience was quite unfavorable to such a compact being honestly kept by the parties thereto.

The Civil Engineers attending the annual meeting at Montreal of the Canadian Society of Civil Engineers, were treated by the G.T.R. to an excursion to Chambly, and were greatly impressed by their inspection of the power-house there, from which 20,000 to 25,000 h.p. of electrical energy is expected to be transmitted to Montreal, as soon as the dynamos and cables are completed. The head at this point is twenty-eight feet, and the supply of water from the Richelieu River apparently inexhaustible. What with this and the 15,000 to 20,000 h.p. now being supplied by the Lachine Hydraulic Co., and a further 15,000 h.p. expected from another company proposing to utilize a part of Lachine Rapids, it is predicted by some of the *seers* that within five years every factory in Montreal will be run solely by electrical power. The Dominion Cotton mills have already made a twenty-years' contract at a very low rate, and several other large concerns are negotiating.

Speaking of the predictions in this connection, did not Mr

Dwight, the telegraph magnate of your city, say in public a few weeks ago that before long every farmer would have an electric motor to do his farm work, and that the power involved in little streams and cascades in country places could be transformed into electric energy?

Canadian pig iron appears to be in great favor in Montreal, the Hamilton brand being used in every foundry there but one. Scotch iron, which formerly held supreme sway, is now rarely heard of, unless sent out as ballast and sold at a sacrifice on this side.

The Laurie Engine Company, Montreal, have several important contracts on hand for engines and heavy machinery, and their works are going day and night. They have just built a central power-house and equipped it with one of their cross-compound steam engines, with cylinders of 13 and 22-inch diameter by 30 inch stroke. This will be run by a Kingsley patent steam boiler, and will replace two tubular and one small Kingsley boilers now in the works, the latter of which has shown such economy and good qualities during its three years' run that the Laurie Company are satisfied that they will be able to produce power at less cost per horse-power than can be produced by the hydraulic companies, taking leakage and incidentals into account.

At the C.P.R. workshops at Hochelaga great activity still prevails, principally in getting out construction material for the Crow's Nest Pass new road.

Montreal, 19th January, 1898. ARDUA.

MONTREAL REAL ESTATE.

Of the real estate market, in Montreal, the January issue of the "Real Estate Record" says that there is steadily increasing enquiry, and that the improvement visible in general has had the effect of restoring confidence in the market, and reviving interest in realty dealing. While the market is not yet in a thoroughly satisfactory condition, still "the outlook is favorable and the entire situation is improving." Transactions for December were quite as numerous as was predicted, and indeed the whole year was fully up to, if not more than, what was expected. The year 1896 was the dullest for five years, the aggregate of real estate transactions having declined to $4,959,000 in that year from $11,196,000 in 1891. During the first six months of the year just closed the sales recorded amounted to $5,180,707, and in the latter half of the year, $4,149,238, making $9,239,945, as the result of 1,853 transfers of real estate (in the city and at Westmount), recorded during 1897. The registered sales during the year 1897 in the outside municipalities adjoining Montreal (and not including Westmount) amount to $1,527,900. Mortgage rates of interest were principally from 4 to 6 per cent., the largest amount of business being done at 5 per cent.

MINING MEN ORGANIZE.

A number of Toronto mining brokers and operators have had in view for some time the formation of a Mining Stock Exchange. Such a body has now been formed, and the membership limited to fifteen. The board consists, we understand, of Messrs. J. A. Currie, C. B. Murray, S. Bassett, F. McPhillips, F. A. Hall, W. C. Fox, J. B. Coulthard, R. Dixon, J. H. Ross, E. S. Cox, and S. J. Sharp. The officers are: President, J. A. Currie; First Vice-President, F. McPhillips; Second Vice-President, W. C. Fox; Secretary, C. B. Murray; Treasurer, S. Bassett. There is intended to be a "call" every day, beginning with Monday, 17th instant.

BANK OF NOVA SCOTIA.

Earlier than usual, the statement of the Bank of Nova Scotia for the twelve months has been issued. The statement for 1897 is the sixty-sixth. It shows that the net earnings of the bank for the year were $218,871, which is at the rate of over 14½ per cent. on the paid capital, and over 7 per cent. on capital and rest. After paying a dividend of eight per cent. to shareholders, $100,000 was added to reserve, which now exceeds the capital, and a sum equal to that of last year was carried forward.

The remarkable increase of $1,476,000 in the totals of assets and liabilities is shown on the year. Deposits have gone up by $1,287,000, the management having been fortunate enough to get a million of them at notice. And circulation has gone up also. The fact that this is so near the limit of $1,500,000—the amount of the paid capital—may be what induced the authorization, at last annual meeting, of an increase of capital to $2,000,000. Nothing is said of this in the printed statement sent us. More may be heard of it when the meeting takes place next month. The bank has current discounts of $8,470,000; call and time loans and cash credits, $1,720,000; investments in bonds, $2,014,000; and $1,346,000 in specie, Dominion notes, notes of other banks. The bank is a strong one, and the statement for 1897 is very satisfactory.

MONTREAL BOARD OF TRADE.

The officers of the Montreal Board of Trade have been chosen for the ensuing year without a contest. Nominations were closed last week, and the gentlemen whose names follow are elected by acclamation for the positions mentioned:

President—James Crathern, nominated by John McKergow.

First vice-president—Chas. F. Smith, nominated by A. F. Gault.

Second vice-president—Robert Mackay, nominated by David Robertson.

Treasurer—Henry Miles, nominated by A. G. Thomson.

This leaves the contest only for membership on the Council and the Board of Arbitration, for each of which twelve members are required.

TORONTO BOARD OF TRADE.

At the meeting of this board held on Tuesday last, to make nominations of officers for 1898, Mr. Elias Rogers was elected president, by acclamation, his place as first vice-president being taken by Mr. A. E. Kemp, who was also unanimously chosen. For the positions of second vice-president and treasurer there is a contest, the candidates being for the former position, Messrs, M. C. Ellis and Paul Campbell; for the latter, A. E. Ames and John Hallam. Messrs. W. B. Hamilton, Thomas H. Lee and Joseph Oliver were elected by acclamation to the Industrial Exhibition Board. The annual meeting will be held on Tuesday, 25th instant.

BANK OF NEW BRUNSWICK.

The statement prepared to be laid before the annual meeting of the Bank of New Brunswick on Monday last is summarized as under: To the balance of $55,943 brought over from last year at credit of profit and loss is to be added the net profits for 1897, viz., $101,982, less provincial taxes, $1,100, and city taxes, $6,935 = $93,947. This addition makes $149.890 to be dealt with. Dividend at twelve per cent. absorbed $60,000 and the sum of $50,000 was added to Reserve, leaving $39,890 to be carried forward. The Rest of this bank now exceeds its capital by $100,000 and its stock is at a high premium.

CABLES TO THE WEST INDIES.

The condition of affairs which left an important part of Britain's telegraphic connection with the West India Islands in the hands of the United States is being amended. We are told that, on the 20th December, the cable steamer "Scotia" left Greenwich laden with the cable destined to connect Bermuda, Turk's Island and Jamaica. She belongs to the Telegraph Construction and Maintenance Company, Limited, of London. That vessel has arrived at Bermuda, with engineers appointed to represent the Direct West India Cable Company, Limited, which is practically the Halifax and Bermudas Cable Company, Limited.

The length of this cable is 1,354 nautical miles, and its size and character varies according as it is intended for the deep or shallow water, or for shore ends, but the conductor is the same throughout, being made up of seven copper wires weighing 130 pounds per nautical mile. It is insulted with gutta percha, also weighing 130 pounds per mile, and all but the deep sea type is covered with a close metal tape sheathing for protection against ravages by borers. It is to be laid by the end of the present month, and the result will be the reduction of cable messages to Jamaica by nearly two shillings sterling per word.

EXPORTING FLOUR TO JAMAICA.

Canadian flour is marketed almost exclusively in Great Britain and Newfoundland. Without preferences our millers have been able to obtain the bulk of the Newfoundland trade and a fair share of that of the United Kingdom. There are other markets which we should make an effort to reach. A journalist from Jamaica, Mr. John Lanigan who was recently in Halifax, speaks of the possibilities of the flour trade of the Dominion with that island as follows: "There are 700,000 inhabitants in Jamaica—the city of Kingston has 50,000—and this vast population are great bread eaters; in fact, the negro lives almost altogether on bread. Notwithstanding, up to the present the entire flour trade of Jamaica has been controlled by one New York flour concern, the City Mills trust. Canada, of course, sends some flour to the West Indies, but none to Jamaica, yet there is no good reason why the Dominion could not control this immense trade. If the millers would change their grades of flour for export, making them a little less rich than at present, their flour would soon become popular. As an instance of the chance for business in this line a Minneapolis firm lately sent a representative to the West Indies to see what could be done in the way of opening up a trade, with the understanding that if orders to a certain value were taken shipments would at once begin. The man got more than the requirement in Jamaica alone and returned to the west to report his success. The company is now establishing a branch at Kingston, and hereafter the New York monopoly will be broken." The main source of Canadian prosperity must always lie in the welfare of the agricultural interests who have everything to gain in extending the flour trade.

TORONTO FINANCIAL CORPORATION.

This company, a winding-up order for which has this week been applied for, is by no means as extensive in its operations as might be inferred from the magnificence of its name. It has been doing business for four or five years in Toronto and in York and Ontario counties, and at the close of 1896 had borrowed $145,658, to wit, $44,100 on debenture, and $101,558 on deposit. The shareholders had subscribed for 6,331 shares of $100 each, but this did not mean that one hundred times 6,331 had been paid. There were 1,045 shares on which the whole face value was called up; 1,045 more with ten per cent. called; 4,000 shares, twenty per cent. called; other shares being paid by the month. The whole amount received from proprietors was $194,950 from calls, and $717 from subscription, so that the amount for which subscribers are liable siill is $437,433.

The company has had its assets locked up (though precisely how we cannot yet tell), and has not been giving satisfaction to recent claimants, depositors mainly, who had given the proper notice and wanted their money. Several suits were brought against it for amounts of $145 and $173 by persons in Pickering, and on Tuesday last speedy judgments were obtained by two persons in Scarboro' for small sums. A winding-up order was asked for on Wednesday by two depositors from Richmond Hill and Scarboro', respectively. It is to be argued in court to-morrow, but meanwhile the office is closed, and Mr. E. R. C. Clarkson is interim liquidator, having been so appointed by Chief Justice Meredith on January 19th.

What we hear of the company's career does not reflect credit on the foresight of the management. It received moneys on deposit from ignorant people, offering higher rates of interest than stronger concerns could afford to pay, and yet maintained no sufficiency of available assets to pay these people. And the standing of its directors—two of them being members of the Ontario Legislature, and one a Cabinet Minister—doubtless influenced many country people in its favor. The president is J. K. Kerr, Q.C.; the vice-president, E. J. Davis, M.L.A.; the other directors being Ed. Cronyn, R. McClain, and John Richardson, M.L.A., of Scarboro. We are told that the deposits have been reduced to something like $43,000. The available assets are not, so far as we can learn, equal to the payment of these and the bonds issued.

DEATH OF SHEPPARD HOMANS.

Everyone who knew him will learn with regret of the death of Sheppard Homans, the eminent American actuary, which occurred suddenly a few days ago near his own home in New York. He was a man held in high estimation on both sides of the Atlantic for his personal character, as well as for his professional attainments. Mr. Homans was by no means an old man, having just turned 66, and one would have thought must live at least ten or fifteen years. But it was heart trouble to which he succumbed.

He was born in Baltimore, Maryland, and went to Harvard College, where he showed great aptitude for mathematics.

ment, on astronomical duty before the days of the war. Then in 1855 he was appointed actuary of the Mutual Life Insurance Company of New York, and in 1871 consulting actuary of the same company. During this period he made the name he ever afterwards retained, of an actuary of superior attainments and sound judgment. Probably he is best known as the author of the American Experience Table of Mortality, first known as the Mutual Life Table, and the originator of the contribution plan of distributing, in the form of "dividends," the surplus of life insurance companies. The credit of devising the contribution plan, we are told, was shared by Mr. Homans with Mr. David Parks Fackler, who was then his assistant.

One could scarcely wish a stronger testimony to professional actuarial skill than the way in which Mr. Homans' life business in the United States. The Provident Savings Life was organized by him in 1875. Mr. Homans had for years been impressed with the idea that a very large number of persons desired a form of insurance which should be free from the element of investment contained in the ordinary forms, and this company was formed to meet that want. In 1889 Mr. Homans was elected the first president of the Actuarial Society of America. He was a corresponding member of the Institute of Actuaries of England, and a voluminous writer on scientific and actuarial subjects.

BLACK-LISTED.

Other journals have heard of the attempted fire insurance operations of the companies against the irregularity of which we warned our readers last week. Our Philadelphia contemporary, the *United States Review*, has the following about one of them, La Meuse, of Liege, and also about others than the remaining one we mentioned. We quote:

"We have had a number of enquiries regarding the financial status of the British and American Exchange Association, of London, the United States headquarters of which are at Chicago, but have been unable to obtain any information about the company from the insurance department of Illinois, which advises us it is operating without authority. The company has now been black-listed by the insurance departments of Kentucky and Indiana for doing an underground business. Two other concerns, the London Fire Office, of London, and the La Meuse Fire Insurance Company, of Liege, had suffered a similar fate."

CLEARING-HOUSE FIGURES.

The following are the figures of the Canadian clearing houses for the week ended with Thursday, January 20th, 1898, compared with those of the previous week:

CLEARINGS.	Jan. 20th, 1898.	Jan. 13th, 1898.
Montreal	$14,681,555	$16,085,498
Toronto	8,285,155	9,182,649
Winnipeg	1,434,080	1,644,321
Halifax	1,072,195	1,320,757
Hamilton	615,906	730,537
St. John	551,607	667,789
	$26,640,498	$29,637,551

Aggregate balances this week, $3,184,925; last week, $3,921,630.

—Before the Banking and Currency Committee of the House at Washington, on Friday last, Mr. S. Taylor, of Indiana, a member of the Monetary Commission, referred to the inadequacy of the banking facilities in the south and west, and suggested that for the present the United States must look mainly to independent, small local banks for the relief which is needed, though he conceded an extensive system of branch banks might have a more effective tendency to equalize rates of interest. Mr. John W. Fries, the North Carolina member of the Commission, stated briefly the prevailing conditions in the south and particularly in his own State. According to this gentleman, the people of North Carolina are clamoring for money. He did not think that this meant cheaper money, but better facilities for the transaction of business. This, said he, can only be secured by the establishment of such a banking system as will make

SMUGGLING WOOL.

So far as the border line between Canada and the United States is concerned, we have been accustomed to associate the tales of smuggling with commodities of small bulk, such as precious stones, jewelry, opium, and the like. Since the Dingley Act came into force there have been reported numerous instances of smugglers attempting to evade the duties in the exportation of bulky articles. The *Dry Goods Economist*, of New York, says the United States Treasury Department has received complaints that considerable quantities of wool were being smuggled into the United States, chiefly across the Canadian frontier, disguised in various forms, but usually under an invoice covering cotton waste. Many of these complaints have come from Cincinnati, which is the headquarters of a large trade engaged in the production of shoddy and other low grades of wool and wool waste, and the close competition on these products has served to induce competitors to keep careful watch on one another's methods. With a view to establishing a regulation for the examination of these goods, Assistant-Secretary Howell has addressed a letter to the collector at Cincinnati, and has forwarded copies to the principal ports throughout the country. The letter states in substance that the collector at New York reports that merchandise corresponding to the sample submitted to him would be classified under paragraph 362 as a waste in part wool, and that a careful and thorough examination of similar merchandise should be made, and whenever a mixture of wool fibres with the cotton waste is clearly recognizable, duty should be assessed accordingly.

WINNIPEG GRAIN EXCHANGE.

The tenth annual general meeting of the Winnipeg Grain Exchange was held on the 12th instant in the rooms of the Exchange. An account of the meeting reached us too late for our issue of 14th. Mr. Nicholas Bawlf, the retiring president, occupied the chair, and there was a good attendance. The report of the Council stated that the number of arbitrations had been smaller than for some years past. This was attributed to the new rules for future delivery and terms of trade, which appear to meet the present requirements of the grain trade well. Reference was made also to various negotiations with respect to railway freight rates and insurance companies' rates. The most lengthy paragraph refers to efforts made by a committee of the exchange, by correspondence with the C.P.R. and with the Dominion authorities to have better provision made for keeping the channel of the Kaministiquia River free from ice in the latter part of the shipping season. . It is asserted as a matter "of the very greatest importance that every possible day of open navigation should he taken advantage of, otherwise grain has to be stored at Fort William and inland points for the entire winter season or shipped out under an advanced all-rail route of about 9c. per bushel over the water rates."

Five associate members have been added to the Exchange during the past year, and eight seats had been transferred, in most cases from non-active to active members. A full report of the action in regard to export grades was submitted to the meeting.

In his retiring address Mr. Bawlf referred to the encouraging harvest and the good prices of the year for the Canadian farmers, and quoted statistics of Manitoba's yield of cereals and roots. He asserted that there is no grain-producing country in the world to-day better equipped for the receiving, cleaning and shipping of grain than Manitoba. The bulk of the 1897 wheat found its way out of the country by the Canadian Pacific railway to Fort William, a small percentage only going by Duluth. The speaker dwelt with emphasis upon the importance of Fort William as a shipping port, a matter to which we make reference elsewhere.

After the reading of the treasurer's report, which was pronounced satisfactory, the meeting proceeded to the election of officers, who were chosen by unanimous vote, as follows:

President, Robert Muir.

Vice-President, H. D. Metcalfe.

Secretary-Treasurer, C. N. Bell.

Council: The above officers with S. Nairn, S. A. McGaw, Hon. D. H. McMillan, F. W. Thompson, S. Spink, N. Bawlf, G. R. Crowe, G. V. Hastings, F. Phillipps, R. P. Roblin, and James Harris.

Committee of Arbitration: Messrs. S. Nairn, J. A. Mitchell, Jos. Harris, S. Spink, S. A. McGaw, G. R. Crowe and R. D. Martin.

Committee of Appeals: F. W. Thompson, A. Atkinson, R. P. Roblin, S. P. Clarke, Wm. Martin, W. Blackadar, and S. W. Farrell.

Call Board Committee: S. W. Farrell, F. W. Thompson, H. D. Metcalfe, S. Spink, and Jos. Harris.

POINTS FOR DRY GOODS DEALERS.

The words "pants," "pantaloons," and "vest," may be relegated, in the opinion of the New York *Sun*, to the usage of the vulgar and the word-clipping multitude. The waistcoat and the trousers were good enough for our ancestors. They should be good enough for us.

Imitating the policy of the Montreal Cotton Company, it has been arranged that the Merchants Manufacturing Company abolish their selling agency, so long held by Alexander Ewan & Co. The company will now do its own selling to wholesale merchants direct.

The gravest incident in the American textile industry was the reduction of wages in the cotton mills of Fall River, Mass. The cotton manufacturers of the East, in the presence of the reduced demand for their products, and low prices for goods sold, felt it an imperative necessity to cut down wages. The smaller demand for their fabrics has been attributed to the growing competition from the Southern mills, which, among other advantages, run longer time and pay less wages. But this is not the end, for a Boston paper tells us that the precedent set above by the Massachusetts cotton mills will be followed throughout the Eastern States. It is announced that the mills in Maine, employing some 12,000 or 13,000 persons, will reduce wages at an early date. Commenting upon the reduction at Fall River, the *Textile World* says: "These troubles [at Fall River], instead of being due to the excessive production of cotton cloth, are due solely to the abnormally low prices of the products of general industry; in other words, to the insufficient recompense of human toil, the insufficient earnings of invested capital. The conditions at Fall River represent the acute stage of a movement that is in operation everywhere. Reduction of the output of the mills or of the cotton crop may help to stay the downward tendency for a time, but the effects must be felt only for a time."

LEEDS.

The outlook at the moment is not bright The prices obtained by the producers of medium and low meltons, beavers and naps are not what they would like, and compensation for this can only come to them when there is a greatly increased turnover for home consumption. It is only in about one part of this district that the millowners are making cloths to the fullest extent of their capacity, but in that particular locality there are people who have worked their plant day and night from the beginning to the end of 1897. Cheviot serges do not appear to be in any more favor now than they have been for several weeks past. Prices of them keep up. A large percentage of looms are often idle which are adapted for the production of plain dress goods. As to the ready-made clothing trade, it is suffering severely. Those engaged in it say the depression dates from the close of the Jubilee celebrations. Of course strikes and lock-outs have protracted and intensified the misfortune. The knitting-worsted trade is sadly damaged by the imposition in Germany of a duty of about 1½d. per pound.

BARNSLEY.

A quiet trade in most forms of household linens is being done for the home market, demand being chiefly for medium to coarse grades. Fine damasks and cloths are little enquired for, but towellings and kitchen cloths, drabbets and smock goods, sell steadily. The South American demand for fine drills and cloths is very quiet, so that with about five days a week stocks are increasing. The United States demand is of a general character, and appears to be improving. Bleachers steadily employed. Yarns declining.

LIFE INSURANCE PARAGRAPHS.

We learn that the business in British Columbia of the Confederation Life Association has so grown that it has been considered advisable to divide the Province into two districts. Accordingly, Mr. Melville S. Parry, of Winnipeg, who was recently appointed general agent of that company in the West, will have charge of the country east of Revelstoke, with headquarters at Nelson, and Mr. Breeze will supervise the western portion of the Province.

A litle fellow who had his wits about him when the contribution plate was passed at church, administered a just rebuke to his mother, when, on the way home, she was finding fault with the sermon. "Well," he said, "what could you expect for a cent?" You can't have a sermon or an insurance policy that is worth anything unless you pay something for it.—*Weekly Statement, N.Y.*

George Moffat, formerly of the Manufacturers' Life here, later with the Prudential in Newark, is presently in New York, where we are told T. I. P. has got hold of him. T. I. P. knows a good thing when it sees one, and George is decidedly a good thing in the way of a pungent, pithy, Carlylean phraser—a sort of more literate Bill Nye. Here's till him!

Atlanta University publishes statistics which are such as to confirm the conclusion, says the *Insurance Advocate*, that negro lives are greatly inferior to white lives in insurance value, and cannot with safety and with equity to the latter be accepted without discrimination. The excessive mortality among them is due chiefly to pulmonary, scrofulous, and infantile diseases, and a variety of diseases that take hold upon the constitution and are transmitted by heredity. The eradication of these diseases is very slow and difficult, even under conditions much more favorable than those under which the mass of the colored people live.

The much-vexed question of the ultimate destiny of the Gratuity Fund of the Toronto Board of Trade, so far from being settled, assumes a still more belligerent phase this week. There is a party in the membership of the board which desires to continue the scheme, thinking it serves as a bond of union to the board. Another party, which in its circular promises to be aggressive, and which is apparently radical, is pledged to discontinue and wind up the life insurance scheme. And an effort will be made, it appears, by one or two gentlemen to ride into office in the board on the strength of the attitude they assume on this question. In spite of the arguments of the gentlemen who urge that the scheme costs its members "only the price of one bad cigar per day," we are of the opinion that it will be best to wind it up. We have never believed it would be found workable. Certainly nothing in the fifty years of the board's existence has given so much worry to its council as this ill-starred scheme.

FIRE INSURANCE ITEMS.

The British America Assurance Club held its annual At-Home in Harry Webb's rooms last evening, when a most agreeable time was spent. The committee consisted of P. G. Kimmerly, chairman; J. McVittie, secretary, and Messrs. Howson, Fudger, Pearcy, Keys, Fairweather, Parker and Garrow.

During the past year, the Toronto Fire Brigade responded to 582 alarms, the largest number in its history. And the total of losses by fire in the city in 1897, is officially put at $666,870. This is a heavy sum compared with the losses of five years ended with 1894, the average of which was $254,000, those of 1890 being $487,000, while each succeeding year of the four ranked downward to $152,281 in 1894. But the losses of 1895, the year of the down-town commercial fires, ran up to $1,817,374, those of 1896 not being given. Last year's fires showed a loss of $117,155 on buildings, and $549,724 on contents.

The report for 1897 of the Hartford Fire Insurance Company, which is the 88th annual statement, shows very handsome figures. The company is the possessor of assets amounting to $10,819,629, of which $1,848,000 is cash in hand or in course of transmission. The reserve for re-insurance is reported as $4,809,083, and the reserve for unsettled claims $510,749; the net surplus amounts to $4,249,796, and surplus to policy-holders $5,499,796. The management of the company is in the hands of men who have the experience and ability as underwriters to command success. And the results shown in these figures are such as to add to the confidence felt in the stability and character of the company. The Hartford is one of the best of companies.

A gentleman writes from Montreal on Saturday last in enthusiastc terms of the dinner given by a large number of citizens to the retiring mayor of that city, Mr. R. Wilson Smith. He considers it safe to say that no Canadian city has more recognized the services of a chief magistrate than Montreal did last week on the occasion in question. "The decorations of the spacious dining room, the brilliant assembly of guests who filled every available seat, the *menu*, and the arrangements generally, have seldom been surpassed.

In order to do honor to his Worship Mayor Smith, His Excellency the Governor General was present. The chair was occupied by the president of the Board of Trade, Mr. McKergow, the duties of which he discharged with credit to himself and satisfaction to all present. The Governor-General made an excellent speech, which was enlivened with that peculiar humor which is to be found only among the sons of Scotland. His Excellency said he found, on glancing around the table, that he was not the only one of the "Exs" who were there, and in good taste referred to other distinguished gentlemen who will shortly vacate their present positions: to wit, the Lieut.-Governor and the mayor.

The mayor's address was everything that could have been expected, and was delivered in a cool deliberate manner and pleasing voice, reminding one of that inimitable Southern accent for which the people of Dublin city are so remarkable. The Premier of the Dominion, Lieut.-Governor of Quebec, the Roman Catholic Archbishop of Montreal, Rev. Canon Ellegood and others made effective speeches on the occasion. A pleasing episode was that when the venerable Canon finished his speech he reached his hand across the platform and shook the hand of the Archbishop, a graceful act, which was evidently much appreciated.

Mayor Smith is editor and proprietor of a financial and insurance journal, and like THE MONETARY TIMES, goes strong in favor of the old line insurance companies, as against assessment system. Prominent among the large number of guests at the dinner were a number of well-known insurance men: Thomas Davidson, of the N.B. & M.; W. M. Ramsay, of the Standard; B. Hal. Brown, J. Hutton Balfour, and several others whose names I failed to secure.

ANSWERS TO ENQUIRERS.

COMMISSION, Halifax, asks: "Will you please inform me as to the obligation of a commission man in selling goods the property of another. To particularize: A. is a country dealer and B. a city commission man. A. sends B. a consignment of sundry packages of goods with instruction to sell them on his account. B. sells a part of the consignment to a wholesale dealer at a price which will enable said wholesaler to make a profit on the goods; the remainder of the consignment B. sells to sundry retailers and householders at a price much higher than to the wholesaler. In crediting the goods into A.'s account can B. justly put the last mentioned sales at the same price as those sold to the wholesaler, or must B. credit them all at actual selling price? Is there any fixed rate of commission that B. can charge A for selling his goods, or can B. charge commission according to what he considers it will pay him to handle the goods, there being no agreement between them as to the mode of disposing of the goods or expenses connected therewith?"

[In reply, we would say that there is no statutory rate of commission in such circumstances as are described above. The custom of the trade in Ontario is to charge five per cent. commission on consignments of farm produce such as dairy goods or poultry; ten per cent. on green fruit; so much per dozen or per cent. on eggs—these being, of course, sales to jobbers. It would manifestly be impossible for a commission man to sell to the retail trade and guarantee payment for a 5 per cent. commission; he would require 7½ or perhaps 10 per cent. If he found it necessary to sell part to jobbers and part to retailers, he would be justified in averaging his commission charges, or in making a clear discrimination in account sales and charges for the different lots sold.]

J. B., Rat Portage.—(1) The answer to your question will depend on the nature of the company's charter. See the Ontario Joint Stock Companies Act. (2) It would cost from $50 to $200 to list the company. Apply to the secretary, Toronto Stock Exchange.

—Resolutions introduced last week into the Quebec Legislature concerning a proposed Provincial loan, give authority to the Government to raise money to the extent of $1,500,000 by means of debentures to be issued on the credit of the Province, and "to be disposed of from time to time as the requirements of the Province may demand." These debentures or inscribed stock shall bear interest not exceeding four per cent. per annum. The interest and principal of such to be a charge on the consolidated revenue of the Province. The proceeds of the loan are to be applied to the payment of the unfunded debt of the Province and to the payment of railway subsidies, which may become payable under grants made by the Legislature of the Province.

—A convention having for its object the extension of the limits of the coinage of small silver money fixed by the previous convention has been signed by the five States of the Latin Union. It is now ratified by unanimous vote of the Swiss Council of State. The arrangement permits each State to increase its silver circulation to the amount of 1 franc per head of the population. The new pieces are to be minted out of the existing 5-franc pieces. The following figures show, says the *Financial News*, to what extent the different States will be affected by the new convention: France will see her silver fortune increased from 264,000,000 francs to 394,000,000 francs, Italy from 202,400,000 francs to 232,400,000 francs, Belgium from 40,800,000 francs to 46,800,000 francs, and Switzerland from 25,000,000 francs to 28,000,000 francs.

Meeting

TEMPERANCE AND GENERAL LIFE ASSURANCE COMPANY.

The above company held its annual meeting at its head office, on Tuesday, January 18th. The following is a synopsis of the report:—

Reference is made to the splendid progress which the company is making. The cash receipts from premiums and interest amounted to $195,161 98, an increase of $23,407.30 over the income from these sources in 1896.

The payments to policyholders for death claims, for matured endowments, and for cash dividends and surrender values, were larger than in any previous year, as would naturally be expected from the larger business and increasing age of the company.

The following statement was made with regard to death claims: "Our average ratio of death losses for the past twelve years has been 3.34 lives per 1,000 in number, and $3.77 per $1,000 in amount in our Temperance Section, and it has been 4.02 lives per 1,000 in number, and $4.91 per $1,000 of the annual average of our total business for the same period. We believe that this is a smaller loss ratio from death claims than has ever been recorded by any other company on a similar amount of business for so long a period. This is emphatically true with regard to the experience in our Temperance Section."

The company's assets increased from $507,-355 50 at the end of 1896 to $574,291.50 at the end of 1897, although the valuation of outstanding and deferred premiums was more rigid than ever before, and the statement was made that:—"The high character of our investments is indicated by the fact that for four years in succession we have been able to report having closed our books promptly on the last day of the year without a single dollar of interest in arrears, or a single dollar's worth of real estate on our hands. It is interesting in these times of great depression in real estate values, to note that we have never foreclosed a mortgage or purchased a dollar's worth of real estate."

The company's liabilities according to the report had increased to $474,140 61.

In this connection the report refers to the general tendency of all companies to adopt a higher standard of valuation, which means larger and therefore stronger reserves, and adds: "For the business of 1897 we have valued our reserves on the basis of a 4 per cent earning power instead of a 4½ per cent. standard as at present required by law. This adds to the strength of our reserves, but of course at the same time correspondingly decreases the surplus we would otherwise show."

With regard to new business, the report states that 1,803 applications for $2,052,100 were received from Ontario, New Brunswick and Nova Scotia. Of these 1,605 for $1,790,-500 were accepted, and the remainder were either declined or in abeyance.

The year closed with an aggregate business consisting of 6,314 policies on 5,917 lives for $7,260,786.

Of these 4,925 policies for $5,473,046 were in the Temperance Section, and 1,389 policies for $1,787,740 in the General Section.

The report recommends a dividend to policy holders on the basis of previous allotment, and a dividend to shareholders of 5 per cent. on their paid up capital, and refers in complimentary terms to the company's agents and officers, and says: "We believe that ours is the only company that has year by year for the past seven years sent its preliminary and completed returns to Government on the first day of the new year."

THE FINANCIAL STATEMENT SHOWS THE FOLLOWING FIGURES AS COMPARED WITH THOSE OF 1896.

	1896.	1897.
Number of applications	1,683	1,803
Insurance applied for..	$2,220,750	$2,052,100
No. of policies in force Dec. 31st	5,685	6,314
Amount of insurance in force Dec. 31st	$6,759,711	$7,260,786
Assets, Dec. 31st......	$507,355	$574,291
No. of policies gained.	669	629
Amount of insurance gained	$708,031	$501,075

The full report containing a detailed statement of all features of the company's business can be had on application to the company.

THE MIDLAND LOAN & SAVINGS COMPANY AND THE MIDLAND TRUST COMPANY.

In connection with the lamented death of Mr. Stanley Paterson and on account of the similarity of the names of these two institutions, there appears to have been some misapprehension as to their identity by many outside newspapers, notably the Lindsay *Post*, Peterborough *Review*, and the MONETARY TIMES—one of these papers having stated that "The Midland Loan Company had made an assignment to the Bank of Toronto," and another that the late Mr. Stanley Paterson was the presiname of "The Midland Trust Company,"

The facts are as follows: The late Mr. Stanley Paterson in his lifetime carried on a large private banking business under the name of "The Midland Trust Company," although it was not an incorporated company: he received money on deposit, the amount of the deposits being in the neighborhood of $200,000; he had a large line of mercantile business and loaned money on notes and mortgages. Mr. Paterson died after a short illness on the 9th of this month (January), and since then the doors of his banking office have been closed, and his legal representatives have made an assignment of his estate for the benefit of his creditors to Mr. T. Dixon Craig, M.P. Mr. Paterson had no connection whatever with "The Midland Loan and Savings Company, although he was secretary of it until March, 1882, when he resigned and severed all connection with the company.

And now as to "The Midland Loan and Savings Company." This is a Land Mortgage Company, incorporated by Act of Parliament in 1872, and has now just completed the twenty-fifth year of its existence. It is a prosperous institution of high standing and credit. Its capital stock is $360,-000 fully paid up; uncalled capital, $200,000; reserve fund, $80,000, and with its mortgage securities and cash on hand the total assets of the company are $1,600,000. It is authorized by law to receive deposits and issue debentures, and the balance of its assets in excess of all liabilities is $660,000.

The officers of this company, among whom are some of our most prominent citizens and largest capitalists, are as follows: President, John Mulligan; Vice-President, Henry Hamilton Burnham; directors, Wm. Quay, John W. Clemesha, M.D., J. H. Helm, William Henwood, and A. W. Pringle; Manager, George M. Furby; Solicitor, Seth S. Smith; Inspector, Henry Mulligan; Superintending Director, J. H. Helm; Auditors, J. D. Smith and Henry White.

As the statements made by the papers referred to must have a tendency to connect the affairs of "The Midland Loan and Savings Company" with the defunct Trust Company, and thereby injure the former company, those papers, as well as any others who may have copied their remarks, are requested as an act of justice, to insert this explanatory article.—*Port Hope Guide.*

NORTH OF SCOTLAND CANADIAN MORTGAGE COMPANY.

At the annual meeting of the shareholders of this company, which took place early in January, in Aberdeen, the report and accounts were adopted. Mr. Barclay, the chairman, spoke very favorably of the position and the prospects of the company and of Canada.

Dr. John F. White proposed the vote of thanks to the advising boards and general managers in Canada, and in reply Mr. A. M. Nanton, of Messrs. Osler, Hammond & Nanton, Winnipeg, in returning thanks, said: "I think I will apply my general remarks chiefly to the west, with the exception of remarking that your securities in Ontario are to-day in the same good and healthy condition in which they have always been. At the commencement of the company, Mr. Osler laid down a rule which he has always followed, and which has been followed by those under him, and which I think has added greatly to the success of the company, viz., that we should only lend on securities of the first class that were absolutely salable, or, in other words, that we were not to lend a dollar on anything that was not considered at once convertible into money when it should fall into our hands. * * With reference to the interest in arrears of some $16,000, I might say that if the company to-day wanted to realize that amount, our firm, or any other firm who knew the position of the accounts, would certainly guarantee payment of it. It is absolutely good, because anything that is not absolutely good is never included in the accounts, although it may be collected at a later date. With reference to the item of £33,000 of accrued and past due interest, I think neither Mr. Barclay nor the gentleman who seconded the adoption of the report put the case strong enough. As a matter of fact, three-fourths, or probably five-sixths of interest payable to the company falls due between the month of December and March 1st, so that if you made your accounts up to March 1st instead of November 11th, I venture to say that that amount would be reduced by at least $20,-000. As to the interest in arrear, the latest advices I have had from Canada show that since November 11th over £1,000—that is, about one-third of the total amount—has been paid. The real estate is so small that it is hardly worth mentioning, except that I am satisfied we would realize more than you have standing in the accounts for it. Past experience has shown—and I think the chairman will bear me out in my statement—that the estimates of loss have always been larger than the actual losses. (Hear, hear.) A point that occurred to me since I arrived here was that the company's stock is particularly low, and I asked why that was so. I have been told that it is chiefly on account of the amount still due on the shares. I feel satisfied that there really is no risk of that being the case, because if it ever should be required, the company can always withdraw from Canada a sum sufficient and more than sufficient to pay your debenture debts as they become due. The securities held by the company are of a class that all the large money-lenders, such as insurance companies and others would gladly take up."

THE CANADA COMPANY.

The half-yearly meeting of the Canada Company was held in London on 30th Dec., 1897, under the presidency of the Governor, Sir Robt. Gillespie. The chairman said this was a half-yearly meeting for the purpose of receiving the recommendation of the directors as to dividend, but before referring to that point it might be desirable that he should state the financial position of the company. The amount they had in hand was £5,473, 17s. 8d.; the dividend would absorb £5,200, leaving a small balance of £273 to the credit of the account. There were, however, two items in the liabilities which were not likely to be called. The Court of Directors proposed to pay a dividend for the half-year of 12s. 6d. per share, making 25s. for the year. The year now nearly closed had undoubtedly been of a more satisfactory character as regards the company's business than had been the case for some years past. He hoped next year would show better results. It would be observed from the statements that receipts for conversions to freeholds had produced £8,358, as against £6,248 in 1896, showing an excess or increase of £2,110. Other receipts were: for lumber, minerals, and fees, £1,596 this year, as against £783 last year, a surplus of £813. With regard to the disposal of land, it would be observed that they had disposed of 8,866 acres, as against 7,559 last year, a surplus of 1,307 acres; and on looking into the detailed statement of prices he found those figures:—they had disposed of 3,637 acres, valued in 1894 at $4.11 per acre, and they realized $4.97 per acre, an increase of 86 cents an acre, or 21 per cent. These were lands under the valuation of 1894. Coming to lands in excess of that valuation, he found they had disposed of 2,655 acres, valued in 1894 at $20 an acre, but which realized $21.64, an increase of $1.64 cents per acre, or 8 1-5 per cent. Then, as to the re-disposals of land, 2,574 acres reverted to the company at $12.44 an acre, and realized $12.99, an increase of 55 cents per acre, or 4 2-5 per cent. The general result was that they had disposed of 8,866 acres at $12.28 an acre, an increase of 99 cents, or 8 3-4 per cent. There had just been received from the commissioners in Toronto a voluminous but very interesting report. The commissioners were glad to be able to state that during the last six months there had been improvements in business matters generally, and in all that concerned the farming interest more immediately. The outlook was very favorable in many respects.

Coming now to mines and minerals, for the last six months there has been a decided lull in all enquiries after mineral lands for prospecting purposes in the County of Hastings. The reports from Rat Portage, Rossland and Klondyke seem to have allured a large number of the class of prospectors and speculators, and many bonafide prospectors have found that the development of mineral land in Hastings required more capital than they had at their command. On the other hand, strong companies like the Canada Goldfields ("Our own tenants," observed the chairman) who have the necessary capital, are satisfied that their investments will turn out to be very profitable, and both the Goldfields and another strong English company having its headquarters at Newcastle-on-Tyne are pursuing their work with great vigor.

Continuing, the chairman said the report referred next to a visit paid by Mr. Wilson, the second commissioner, to Canada, to the reduction works of the Goldfields Company at Marmora, where he found the largest and best constructed plant ever erected in the Hastings district since the first discovery of gold thirty-two years ago. There were about 3,000 or 4,000 tons of ore lying at the mill for treatment; the company said that so far their operations had been to a large extent experimental, but they claimed to have extracted from the ore 72 to 85 per cent. of the gold shown by fire assay to be present in it. Their new bromo-cyanide process was an undoubted success, and the only important question now was the permanence of the supply of ore in the vicinity.

BANKERS' CLEARINGS IN 1897.

The total clearings in London have steadily declined since 1895, the figures for the past year showing a reduction of £83,572,000, as compared with 1896. The total amounted to £7,491,281,000, against £7,574,833,000. Subjoined is a comparative statement for a number of years of the total bank clearings and of the amounts cleared on special days during each year:

	Totals for the years.
1897	£7,491,281,000
1896	7,574,833,000
1895	7,592,886,000
1894	6.337,222,000
1893	6,478,013,000
1892	6,481,562,000
1891	6,847,506,000
1890	7,801,048,000
1889	7,618,766,000
1888	6,942,172,000
1887	6,077,097,000
1886	5,901,925,000
1895	5,511,071.000
1884	5,798,555,000
1883	5,929,404,000
1882	6,221,206,000

From the heavy falling off on Stock Exchange and Consols pay-days, and the increase on Fourths of the month, there would seem to have been a continuance of the conditions that prevailed in 1896, viz., increased activity in general trade coincident with a reduced volume of dealings in Stock Exchange securities. That is further confirmed by the record of provincial clearings, which are more directly influenced by fluctuations in trade than are the London totals. As might be expected from the prosperous condition in the cycle and other branches of Birmingham industries, the returns for that city show a larger proportionate increase than any other centre in the country. The bank clearings at the provincial cities where the system has been adopted compare as follows with the previous year:

	1897.	1896.
Manchester	£193,005,400	£193,573,500
Liverpool	121,505,700	120,406,000
Birmingham	58,151,200	49,589,300
Newcastle	59.663,000	54,621,300
Bristol	25,746,400	23,716,200
Total	£458,071,700	£441,906,300

—*London Economist.*

A MINING DIVIDEND.

The Hall Mines Company, which has extensive mines in Kootenay district, British Columbia, and a smelter at Nelson, held its annual meeting last month (5th December, 1897), in London, England. It had expended a very heavy sum during several years past, but up to that time had paid no dividend. For the year ending with September 30th, 1897, however, there was a gross surplus of income over expenditure of £30,457, and declaration was made of £1,750 (being at the rate of 7 per cent.) on the preference shares of £25,000, and 10 per cent. on the ordinary shares of £250,000, after writing off £5,489 for depreciation on buildings, plant, and machinery.

An English paper received last week, says that the declaration of this dividend and the exhibit at the meeting produced an excellent effect. Not so much that the shares of the company were affected thereby, for they only went up a fraction, meaning probably that the result was expected. But it showed that the property was a satisfactory one, and gave a better tone to other Kootenay or British Columbia mining enterprises among the London folk. There was, the report says, for the first nine months, difficulty in obtaining a regular supply of ore, which prevented continuous work at the smelter, and it was not until 31st July that the second smelter started work, and the impediments in the way of obtaining a free supply of ore from the stopes opened up in the mine were removed. The new blast furnace, which was completed in July, has since then been working most successfully and with considerable saving in the cost of smelting.

The refining works were completed in May, and have since then done good work, but experience has shown that, in order to reap full benefit from them, it will be necessary to erect second reverberatory furnace and roasting oven. These are now in course of construction, and when completed will have a capacity of outturn of about 10 tons of copper bullion per day.

We give below the principal items of income and expenditure, which will show the scale on which the company works:

Income and expenditure account for the year ending 30 September, 1897:

	£	s.	d.
To ore and matte in stock at 30 Sept., 1897	10,850	5	5
To ore purchases	7,938	7	1
Expenditure in B.C.—			
Mining—Wages, salaries, stores, and general expenses	45,078	4	9
Taxes	557	19	5
Smelting—Wages, salaries, coke, coal, fluxes, stores and general expenses	46,182	17	0
Office and general expenses, salaries, law charges, insurance, and miscellaneous expenses.	2,020	2	11
Interest	1,498	12	9
Expenditure in London	4,212	11	1
Balance, being surplus income over expenditure for the year, carried to balance sheet	30,357	8	0
	148,696	8	5
Cr. By matte and copper sales	131,036	5	4
Ore, matte and metallurgical products in stock at 30th September, 1897	14,855	10	2
Sundry profits, including rents and assay charges received	2,617	18	11
Transfer fees	186	14	0
	148,696	8	5

BIG LUMBER RAFTS.

A venturesome experiment is about being made by a lumbering corporation on the Pacific coast, in the rafting of lumber on the ocean from the Willamette River in Oregon to San Francisco. It is proposed to transport 5,000,000 feet of lumber in a single raft towed by a steamer. The floor of the huge structure is 53 feet long by 396 feet wide. The mass of lumber will be 21 feet high, held together by a forest of long iron bolts disposed about 12 feet apart. When completed, two-thirds of its bulk will be below the water line, above which its top will rise only seven feet. The principle of the whaleback steamers on the lakes is followed, which allows any waves which may be encountered to sweep over the raft, instead of pounding against it. A steel cable having the strength of a 14-inch hawser, is passed longitudinally around the mass, to which the towline is attached. The enterprise is in charge of John Paulsen, who is said to have had large experience in rafting timber on the great lakes, and on the Baltic before coming to America. According to the Oregonian, he proposes to patent his plan. Doubtless if successful it will work a revolution in the lumber business on the coast, where ocean rafting has hitherto been confined to logs and spars, and these in smaller masses. But the novelty would appear to be simply in the immensity of Mr. Paulsen's raft, and it is difficult to discern any other feature wherein it differs enough from methods long used by Michigan and Wisconsin lumbermen to entitle him to a patent.—*Vancouver World.*

—The proprietor of a small grocery store in Kingston is said to have the following words attached to crape on the front door: "On account of the death of my father, go to the back door to do business."

—"He is a man of extremes, do you say?" "Yes. He is always talking at the top of his voice and offering to bet his bottom dollar."

COLLATERAL INHERITANCE TAX.

A tax was instituted by the State of Massachusetts in 1891 called the collateral inheritance tax. Its constitutionality was questioned at first, and collections under it were small—only $13,854 the first year, and $59,429 in 1893. But in the next year, 1894, the amount derived from the tax reached $239,365. Then came a test and a legal decision, and in 1895, after the decision of the Supreme Court had been fully accepted and all controversy ceased, the proceeds were $419,427. This included some large sums held back in previous years pending litigation. In 1896, the first normal year, the yield was $275,573. The year 1897 has increased this sum more than 80 per cent., for the proceeds of the tax were $501,170, and for interest on the same (overdue, we presume), $6,801, making a total of $507,971: not so bad as a source of revenue.

—Much satisfaction has been caused in France by the publication of statistics for 1896, which show the population of France to be increasing. In 1893 the number of births only exceeded the deaths by 7,146. In 1894 the excess rose to 39,768, which was also a trifling figure for a population of 38,000,000, and which justified the anxiety as regarded the future. Nor did the alarm appear to be groundless in 1895, for the number of deaths that year exceeded the births by 17,813. The figures of 1896, however, show that last year there were 94,000 more births than deaths.

—A practical test of the long-distance telephone was made last week between the Minneapolis office and Lowell, Mass. Chas. J. Gidden, president of the Traders' National Bank, of Lowell, was in Minneapolis and presided over the regular meeting of the bank directors of Lowell. The directors assembled at 4 o'clock, eastern time, and Mr. Gidden called the meeting to order and the business was transacted in the usual manner. Mr. Gidden readily recognized the voices of each director as they spoke into the long-distance instrument. The line was made up of eight copper metallic circuits, and was over 1,500 miles in length. This is believed to be the first business meeting ever held by use of the telephone over so great a distance.

Commercial.

TORONTO MARKETS.

Toronto, Jan. 20th, 1898.

Dairy Products.—There is a good supply of dairy butter coming forward. Receipts consist mainly of large rolls and pound prints. There is only a limited supply of dairy tub in the market We quote: Dairy, large rolls, 15c.; prints, 15 to 16c. per lb.; creamery, tubs, 19 to 20c., and prints, 20 to 21c. per lb. Creamery butter, as we elsewhere note, is in good demand for export, as well as in local markets. Cheese is firm and steady, with no change in values quoted last week. Our mail advices from London, Eng, dated January 7th, noted "the firmness in this market displayed last week still continues, being well supported by the rise in values in Canada, which, no doubt, will bring about higher prices here very shortly." Receipts of eggs are light, and if cold weather continues there will doubtless continue to be small supplies of fresh eggs. Strictly new laid are scarce and wanted at 20 to 22c. For cold storage 13 to 17c. according to quality, is quoted, while pickled bring 14 to 14½c. per dozen.

Grain.—The close of last week saw an active demand for wheat, and large sales of Ontario were made for export at 82 to 83c at outside points. The movement has fallen off this week, and at the moment the market is rather dull. In Europe, of late, there have been more liberal offerings of Indian and Argentine wheat. The crop situation remains without change and has not been an important factor in the market. Oats are firm at 25 to 26c., and in good export demand. Peas are scarce and wanted, with an advance of 2c. per bushel reported this week. Rye is dull and unchanged. The same may be said of buckwheat. Corn continues nominal at 35c. per bushel. Large sales of barley have been made for export at unchanged quotations, the shipments going mainly to Glasgow.

Groceries.—The depression that usually characterizes after-Christmas trade is gradually disappearing, and business is assuming greater activity. There is a fair demand for general staple lines. Sugars are steady at unchanged quotations. There is a fair demand for dried fruits, and values are firm. Good Provincial currants are worth 6¼c., and Filiatras 7½ to 7¾c. per lb. The next vessel to arrive from Patras in New York is the "Powhatan," with 700 tons, due about the 24th. Steamers "Scindia" and "Pocahontas" are expected to load in Patras next week; it is reported that large engagements have been made for shipments, and some authorities in this market claim that the steamers between them will bring cargoes of not less than 2,000 tons, or, say, the equivalent of 12,000 barrels There is a good trade passing in California dried fruits. Merchants quote:—Apricots, 50 lb. boxes, 8½c. per lb.; prunes, 90/100, 6c. per lb.; do. 70/80, 7¼c. per lb.; do. 50/60, 8¼c. per lb. In canned goods the situation shows little change. The market remains strong, and dealers are quoting high prices. In teas there is a feeling of great strength, especially in Japans of low grade, selling from say 12 to 16 cents. These lines are scarce. Shipments from Colombo are expected here soon of teas of excellent value ranging from 20 to 40c. in price. The total consumption of India and Ceylon has in 1897 amounted to 261,000,000 lbs. As only about 500,000,000 lbs. of tea are used in the civilized world, more than 50 per cent. was supplied by India and Ceylon in 1897. The increase in consumption was more than that in production. The apprehension of over-supply appears, therefore, to be decidedly less threatening. Not only has consumption in the United Kingdom increased, but the rate per head of population rose above any previous year, viz: Lbs. 5.83, against lbs. 5.73 in 1896, and lbs. 5.67 in 1895. Indian and Ceylon teas have almost beaten China out of the market, the quantities of each of the former used being higher than ever, while China has again fallen away. It is remarkable that wherever English is spoken, the trade in British grown tea has gradually expanded, until now Australia and North America are our two most important external markets, while there is little doubt that South Africa will soon become a prominent consumer of British grown tea. Russia also uses increasing quantities of Ceylon tea.

Hardware and Metals.—Trade in general hardware supplies is improving, and dealers feel encouraged with prospects for the year's business. The prices of staple lines are unsettled, and retailers are constantly enquiring as to the future of the market. At the moment it is impossible to answer their questions, and any opinion that might be ventured is likely to lead to disappointment when results of the manufacturers' ponderings over the situation are finally given out. In the meantime a number of orders are being taken for spring delivery in harvest tools, spades, shovels, screen doors and windows, green wire cloth and poultry netting. Import orders for glass are being freely given. By recent arrangement, it will be remembered no orders are taken for less than 5,000 feet in one shipment, terms 60 days, or 2 off 10 from date of customs entry. In metals galvanized iron, black sheet iron, sheet steel, tin plate, and ingot tin are active. Values are steady. Our Glasgow mail, January 7th, notes: "The chief feature of interest in the pig iron market this week has been the publication of the Scotch ironmasters' annual statistics, which show a decrease of 18,233 tons in makers' stocks, and 25,583 tons in Connal's stores for the year. The market became flat on the announcement of these figures, as a larger decrease had been expected, but on rumors that the engineering troubles were about over, prices improved, and close to-day with a firm tone" A change has been made in cut nails. Advances and sizes covering base have been changed, and are now the same as on wire nails, while the price still remains $1.85.

Hides and Skins.—To all appearances the market remains as last reported; but in the trade there is an undercurrent of strength. There has been strong competion to secure a certain lot of hides, and the price of green has in this instance exceeded the market quotation of 9c. for green cowhides, and 10c. for steers. The situation, putting aside local complications, is strong. Advices from Chicago, 18th inst, report: "Demand for hides fairly active, and as offerings were limited sales made were at full values, including 7,000 native steers at 11½c. for No. 1; also butt brands at 10c. and Colorados at 9½c. The close was firm at 11½c. for native steers; 9½c. for light Texas; 10 to 10½c. for heavy do.; 10c. for butt brands; 9½c. for branded cows; 9½c. for Colorados; 10½c. for heavy native cows, and 10¾ to 11c. for light do." There is little change in the trade in skins. Tallow remains as previously reported.

Leather.—There are indications that trade is working into a more healthy condition. While business is not active, there is a fair January trade being done. From all accounts manufacturers have to lay in more than usual stocks in order to complete the season's output. From the reports of transactions it may be said that while sharp advances are not realized, something has been done to place leather quotations more nearly in harmony with hide values. The gain is slow, but on this account, when once accomplished, it may be the more permanently held.

Provisions.—Dressed hogs are coming into the market freely. Values remain as quoted last week. Outside dealers, however, are prepared to more readily accept quotations than they were some two weeks ago. The strength which was marked in Quebec markets some weeks ago has, apparently, declined, and growers are better satisfied with the home market. For provisions there is more demand, the improvement extending to all lines. Lard is in short supply and prices are firm. Merchants quote; Tierces, 6¾c.; tubs, 7c., and pails, 7¼ to 7½c. per lb.

MONTREAL MARKETS.

Montreal, 19th Jan., 1898.

Ashes.—Receipts very small and demand slow, but the recent little gain in firmness is maintained, under light stocks. We quote first quality of pots, $3.40 to 3.50; seconds, pearls, $4.75 to 4.85 per cental.

Cements and Firebricks.—Dullness marks the situation in these lines, and there is really little doing. Stocks of cements are small on spot, smaller than usual at the season, not being calculated at more than 5,000 barrels all told. Quotations are quite steady at figures prevailing since close of navigation.

Dairy Products.—There is a slightly growing demand for cheese, and the export movement last week was a very fair one for the season, shipments aggregating 36,900 boxes, about equally divided between London, Liverpool and Bristol. We quote 8⅜ to 8½c. per lb. for fine white, and 8¾c. for fine colored. Butter is a shade easier, and 19c is about the extreme that can be realized for finest creamery; fine dairy is quoted at 15 to 16½c., and rolls 13½ to 14½c. per pound.

Dry Goods.—The general reports from jobbers in this line would indicate that country commands for spring goods are of satisfactory size and character. General remittances may be called fair. City retail trade is quiet, with attention of the dealers mainly directed to clearing out sales. There are no notable changes in values to be reported at the moment, but manufacturers of domestic woolens are evidently becoming firmer in their ideas as to prices, and an advance in underwear and some other lines, is not at all unlikely in the near future.

FISH.—Now that the holidays are well past there is rather a better enquiry for fish. We quote:—Green cod, No. 1, $3.50 to 3 75; No. 1 large, $4.25; dry cod, $3.75 to 4.00; No. 1 herrings, $4.25 to 4.75; N. S. salmon, $12 to 13.00; B. C. ditto, $10 50 to 11.00; sea trout, $6 50 to 7.50; haddies, 6 to 7c.; bloaters, 90c. to $1 per box; boneless cod, 4½ to 5c. per lb.

FURS.—Until reports are received of the London Sales, taking place next week, there will be no changes in quotations. Receipts still rule rather light. We quote: — Mink, large dark, $1.50; small, do., $1.00 to 1.25; marten, $1.75 to 2.25; fisher, $4.50 to 7.00; lynx, $1 00 to 2.00; otter, $1.00 to 12.00 for dark; pale, $5.00 to 7.00; red fox, large, $1.30 to 1.50; small, $1.00; cross fox, $3.00 to 6.00; bear, cubs, $3.00 to 7.00; medium, $7.00 to 10.00; large, $12.00 to 15.00; skunk, 15 to 70c., as to color and stripe; coon, 20 to 75c.; rats, fall, 7c. to 10c. kits, 2 to 5c. Beaver, not quoted, killing being forbidden by law.

GROCERIES. — The wholesale enquiry for sugars is not improved, and wholesale grocers are thought to be withholding orders, with the expectancy that the market may ease off another point or so, an anticipation for which there is some ground, according to the views of some who should be good authorities. Factory quotations are:—For standard granulated, 4¼c.; Austrian refined, 3 15-16c.; yellows, 3½ to 3⅝c. per lb. In teas, the conditions remain unchanged. The demand shows no signs of picking up yet, but the market holds firm, and stocks in first hands are reported really small. The agents for one large New York house report, that whereas they had some 4,000 packages of Japans in stock at this time last year, they have now barely as many hundreds. Molasses keeps very firm; it is said 26c. has been paid for some odd moderate lots of two years old Barbadoes. Canned goods keep high, and most packers' agents report their principals out of stock, except gallon apples, for which $2.45 is asked f.o.b. factory.

HIDES AND TALLOW.—The only change here in skins or hides is an advance in calfskins to 90c. to $1. Hides continue firm at former prices, dealers paying 9 to 9½c. per lb. for No. 1, and quoting 10c. to tanners, who are fair buyers. Calfskins bring 8 and 6c. per lb. for Nos. 1 and 2 respectively. Tallow in poor request; rough is quoted at 1 to 1½c., and rendered 3 to 3½c. per pound.

HOPS.—Outside markets are reported firmer, but it is difficult to work up brewers to pay any higher prices, and we quote 13 to 14c. for good Western, and 15 to 16c. for choice. Yearlings would probably not realize beyond 6 to 7c.

LEATHER. — The market retains all the strength lately noted, and considering the price of hides, it is hard to see how lower prices can be expected for some time to come. Quebec men are reported to be firmer in their quotations for splits, and it is a query if much desirable stock in this line could be got at 17c. Sole leather men report a good demand and a favorable market in England. We quote: — Spanish sole B.A. No. 1, 24 to 25c.; do. No. 2, 22 to 23c.; No. 1 ordinary Spanish, 22 to 23c.; No. 2, 19 to 20c.; No. 1 slaughter, 25 to 27c.; No. 2 do., 21 to 23c.; common, 20 to 21c.; waxed upper light and medium, 30 to 35c.; do. heavy, 27 to 30c.; grained, 32 to 35c.; Scotch grained, 30 to 35c.; western splits, 22 to 25c.; Quebec do., 17 to 20c.; juniors, 15 to 17c.; calf-splits, 30 to 35c.; calf skins (35 to 40 lbs.), 60 to 65c.; imitation French calf skins, 65 to 75c.; colored calf, American, 25 to 28c.: Canadian, 20 to 24c.; colored pebble cow, 13 to 15c.; russet sheepskin linings, 30 to 40c.; colored, 6 to 7½c.; harness, 24 to 27c.; buffed cow, 12 to 14c.; extra heavy buff, 15c.; pebbled cow, 12 to 13c.: polished buff, 11 to 13c.; glove grain, 11 to 14c.; rough, 22 to 23c.; russet and bridle, 35 to 45c.

METALS AND HARDWARE.—The demand does not improve greatly as yet, and important transactions are the exception. A few moderate sales of Hamilton pig iron are reported at $16. Of Scotch iron there is little here except some moderate lots in one or two hands. In tin plates, etc., there is not much new; a little

METALLIC CEILINGS

One of our Designs

These ceilings are made in a great variety of designs, suitable for every description of buildings, including Hospitals, Churches, Schools, Asylums, Convents, Opera Houses, Offices, Stores, Residences, etc.

The many advantages of their use as a modern substitute for wood and plaster lie in the fact that they are light in weight, will not crack nor drop off, consequently no danger of falling plaster; are unquestionably durable, have air-tight joints, are easily applied, are practically fire-proof, are highly artistic, **do not harbor vermin or the germs of disease,** and possess splendid acoustic properties, in addition to many other points of excellence over any other form of interior decoration.

business is reported in Ternes at $5.90, and some Canada plates are said to have been sold at $2, on tender to a railway company. Lead is easier at $3.60, also copper at 11¾ to 12¼c.; spelter can be bought at $4 50. We quote:—Summerlee pig iron, $18.00 to 18.50; Carron, No. 1, $18.00; No. 3, $17.25; Ayrsome, No. 1, $17.00; No. 3, $16 50; Shotts, $17.25 to 17.50; Carnbroe, $16.00 to $17.00, ex-store; Siemens pig No. 1, none; No. 2 Siemens, none; Ferrona, No. 1, $15.00 to 16.00; Hamilton No. 1, $16.00 to 16.50; No. 2, ditto, $15.50 to 16.00; machinery scrap, $1400 to 15.00; common ditto. $12.00 to 13 00; bar iron, Canadian, $1.35 to 1.45; British, $2.00 to 2.15; best refined, $2.40; Low Moor, $5; Canada plates—Pontypool, or equal, $2.10 to $2.15; 52 sheets to box; 60 sheets, $2.25; 75 sheets, $2.35; all polished Canadas, $2.40; Terne roofing plate, 20x28, $5 90 to $6.00; Black sheet iron, No. 28, $2.25; No. 26, No. $2.15; 24, $2.05; Nos. 17, $2; No. 16 and heavier, $2.15; tin plates—Bradley charcoal, $5.60 to 5.70; charcoal, I. C., Alloway, $3.15 to 3.25; do, I.X., $3.90 to 4.00; P. D. Crown, I. C., $3 60 to 3.75; do., I.X., $4.50; Coke I.C., $2 90 to 2.95 for standard, $2.75 to $2.80 for 100 lbs.; coke, wasters, $2 70; galvanized sheets, No. 28 ordinary brands, $4; No. 26, $3.75; No. 24, $3 50 in case lots; Morewood, $5.00 to 5.10, tinned sheets, coke, No. 24, 5½c.; No. 26, etc.; the usual extra for large sizes. Canadian bands, per 100 lbs., $1.75; English ditto, $2; hoops and bands, $1.90 to 2.00. Steel boiler plate, ¼-inch and upwards, $1.85 to 1.90 for Dalzell, and equal; ditto three-sixteenths inch, $2.50; tank iron, ¼ inch, $1.50; three-sixteenths do.; $2.00; tank steel, $1.75; heads, seven-sixteenths and upwards, $2.45 to 2.50; Russian sheet iron, 9c.; lead, per 100 lbs., pig, $3.60 sheet, $4 to 4.25; shot, $6 to 6.50; best cast-steel, 8 to 10c.; toe calk, $2.25; spring, $2.50; sleigh shoe, $1.85; tire, $1.90; round machinery steel $2 25; ingot tin, 15¾ to 16c. for L. & F.; Straits, 15¼ to 15½c.; bar tin, 16½ to 17c.; ingot copper, 11¾ to 12¼c.; sheet zinc, $5 to $5.25; Silesian spelter, $4.75; Veille Montagne spelter, $4.50 to 4.75; American spelter, $4.50; antimony, 8 to 9c.

Oils, Paints and Glass.—The trade as a rule report orders for spring shipment as coming in very fairly, but present deliveries are light. Last week's advance in turpentine is well held, and linseed is firm at quotations. Fish oils show increasing tendency to firmness, but the jobbing demand is light. Glass is very strong, and there is no disposition to concede in price, even for round lots. We quote:—Turpentine one to four barrels, 51c.; five to nine barrels., 50c., net thirty days. Linseed oil, raw, one to four barrels., 45c.; five to nine barrels, 44c.; boiled, one to four barrels, 48c.; five to nine brls., 47c., net 30 days; olive oil, machinery, 90c.; Nfld. cod, 35 to 37c. per gal.; Gaspe oil, 30 to 32c. per gal.; steam refined seal, 45 to 47½c. per gallon in small lots. Castor oil, 9 to 9½c. as to quantity. Leads (chemically pure and first-class brands only), $5.37½; No. 1, $5.00; No. 2, $4.67½; No. 3, $4.25; No. 4, $3.87½; dry white lead, 4¾ to 5c.; genuine red do., 4¼c.; No. 1 red lead, 4c.; putty, 1.55 to $1.60 in bulk, $1.70 to 1.75 in bladders, $2 to 2.10 in tins; London washed whiting, 40 to 45c.; Paris white, 85 to 90c.; Venetian red, $1.50 to 1.75; yellow ochre, $1.25 to 1.50; spruce ochre, $1.75 to 2.00. Paris green, 50 and 100 lb. drums 15c.; 25 lb. drums, 15½c.; 1 lb. cartons, 16c.; pound tins, 16½c.; window glass, $1.40 per 50 feet for first break; $1.50 for second break; third break, $3.10.

Millers' & Manuf'rs Ins. Co

Established 1885.

HEAD OFFICE:
Queen City Chambers, Church St., Toronto.

DIRECTORS:
AS. GOLDIE, Pres. J. L. SPINK, Vice-Pres.
Thos. Walmsley, Treas. Hugh Scott, Mgr. and Sec.
Adam Austin, Inspector.

This Company was organized in 1885, specially for the purpose of insuring manufacturing industries, warehouses and contents.

The primary object being to give protection against loss by fire at a minimum cost consistent with absolute security.

The system adopted has been to inspect all risk before acceptance and fix the rate to be exacted equitably in accordance with the hazard assumed.

Assurers with this company have made a saving, upwards of $108,000.00 on the current rates charged, in addition to which, on the rates exacted by us, dividends have been declared to policy-holders amounting to over $24,000.00, together, making the very substantial sum of over $132,000.00 that our policy-holders have saved during the eleven years we have been in operation.

As no canvassers are employed, dealing directly with the assured, those desiring to avail themselves of the advantages thus offered will please address

Millers' and Manufacturers' Insurance Co.,
32 Church Street, Toronto, Ont.

ENGLISH TIMBER TRADE OF 1897.

We subjoin a portion of the remarks made by the Liverpool firm of Farnworth & Jardine on the timber trade of that port during the year 1897. The total tonnage employed in the wood trade to Liverpool, including Garston and the Manchester canal during the past three years was as follows:

	Tons.
1895	563,800
1896	655,352
1897	765,345

The shipments to the Manchester canal are slightly in excess of last year, but the neighboring ports of Fleetwood, Barrow and Preston, show increases of from 14 per cent. to 25 per cent.

The business during the past season, as shown by the figures above, has been on a more extensive scale than for many years, but on the whole has been of a disappointing character, opening with light stocks, a good general demand and satisfactory values, prospects were favorable; but as the season advanced, and it was evident that supplies would be most excessive, coupled with the labor troubles (which still prevail), there was a reaction, resulting in a serious decline in the prices of some articles, and the year closes with heavy stocks and a dragging market. Freights during the early part of the year ruled low, but rapidly advanced in the autumn to such an extent that combined with the higher insurance, importing could only be carried on with unsatisfactory results. The building trade has been active throughout the year and promises to continue.

Canadian Woods.—*Quebec Yellow Pine Timber.*—The import of Pine timber has been in excess of recent years; there has been a fair demand with little fluctuation in value; stocks are quite ample. Of waney pine the arrivals have again chiefly consisted of first class wood imported on contract for special requirements, and for which there has been a steady demand: latterly the deliveries have been to some extent affected by the engineers' strike; values have been well maintained; second-class wood is difficult of sale. Square pine, although imported moderately, continues in limited request, and is gradually going out of use. Red pine is in slight demand; the import has been moderate, still quite adequate. *Oak.*—The import has been 437,257 feet, against 451,248 ft. last year. First-class wood, suitable for railway work, has again been in good demand, and prices have been fairly steady; the stock is moderate. Inferior quality and second-class wood is not wanted. Elm has been imported more moderately than for the past five years; there has been a fair enquiry without much change in value; the stock is light. Ash has come forward too freely, a large quantity again coming in the round log from the United States; the deliveries have been large, but the stock is ample. *Quebec Birch.*—The import has been less than last year, viz., 84,806 feet, against 100,500 feet. Large wood has been in good demand, but the smaller averages have ruled very low in value; the stock is sufficient. *Hickory.*—Square wood has not been imported. Maple, sycamore and chestnut have not been imported. *Quebec Pine Deals, &c.*—The import of pine deals, including red pine, has been much too heavy, viz., 45,027 standards, against 30,500 standards in 1896, and 24,495 standards in 1895. The deliveries have also been on a large scale, but at no time has it been easy to bring out cost of importation, and consignments have been most difficult of sale; there has not been much change in values to record, but on the close of navigation a slight advance was established for second and third quality; fourth quality are difficult to place. The business in sidings, etc., continues to increase, but with not very satisfactory results: stocks are very excessive. Red pine deals have been imported freely; there has been a fair demand, especially for such sizes as compete with Baltic redwood, and suitable for railway work. Spruce deals have again come forward much too freely. A considerable portion has been on contract, but many consignments have been sold at very low rates.

New Brunswick, Nova Scotia, Etc., Timber.—St. John pine has almost ceased to be imported; the enquiry is limited, and the stock exhausted. *Other Ports Pine.*—The import has been small: there is little demand, even at low prices, and the stock is ample. Spruce timber has almost ceased to be imported. *Birch.*—Of logs the import has been excessive, viz., 474,000 feet, against 383,000 feet last year; the deliveries have been proportionately large, but prices generally have ruled low and unremunerative to shippers; the stock is ample. Birch planks, although imported much more moderately than last year, viz., 431,000 feet, against 634,000 feet, have been in excess of the requirements, and prices have ruled very low throughout the year, latest sales being about the lowest price ever recorded; the stock is too heavy. Shippers should pay more attention to this article being shipped in the dimensions required for this country.

Spruce and Pine Deals.—*N.B. and N.S. Spruce Deals.*—Of spruce deals the import has been the largest ever recorded, viz., 124,695 standards, against 95,017 standards in 1896, and 64,422 standards in 1895, and 70 per cent. over the average of the past five years. As the season opened with a light stock and an active demand, contracting ahead was entered into on a more extensive scale than for many years, but as the season advanced and supplies came forward much beyond the requirements of the trade, values gave way, and steadily declined throughout the season, the result being unsatisfactory to both importers and shippers. The present stock, 20,053 standards, against 10,126 standards last year, is much too heavy, and does not include a large quantity stored in the Manchester canal. The arrivals have again been largely by steamers, and owing to their rapid discharge and limited dock accommodation, the business can only be carried on with difficulty and great expense, consequently more cargoes are being each year diverted to the competing ports of Fleetwood, Preston, etc. *Pine Deals.*—Miramichi, Bathurst, etc.: the import has been moderate, but the demand is limited, and the stock sufficient.

IMPROVEMENT IN FARM LANDS.

Reports from correspondents of the New York *Tribune* relative to the increase in the value of farming lands in twelve of the leading agricultural States of the Union confirm the estimate of the *Tribune* made on Sept. 6. The tillers of the soil are $1,000,000,000 richer to-day than they were on Sept. 1, 1896. Since the original table showing the acreage in each county, the present value and the increase in value appeared in the *Tribune*, correspondents in 28 more counties have made their report. They are divided as follows: Illinois, 2; Iowa, 2; Kansas, 5; Michigan, 3; Minnesota, 5; Missouri, 1; North Dakota, 2; Nebraska, 7; and Ohio, 1.

The amount of land included in these supplementary statistics is 7,605,668 acres. In every instance the figures show an increase in the value of the land in these 28 counties, ranging from 10 to 50 per cent. The aggregate increase is $28,427,877. This makes a total of 140,130,260 acres on which reports have been made, and the increased valuation during the year $502,973,117. The increase an acre is nearly $3.59, the latest reports raising the percentage of increase an acre a trifle over the figure given in the *Tribune* on Sept. 6. As there are upwards of 1,000 counties in the twelve States included in the reports, and as the increase in the valuation in the 444 counties included in the table given is $502,973,117, it is fair to assume that the total increase in the valuation of the farm lands in these twelve States is $1,000,000,000 on a conservative estimate. This increase, which has affected with few exceptions all the large producing centres, is due to the higher prices in the value of farm products, the percentage of increase varying in a general way with the nature of the crop produced. Large wheat yielding counties have invariably shown a decided increase in value, and all through the reports is seen the evidence of the return of prosperity.

The revised table of the reports received thus far is as follows:

States.	Acreage.	Inc. Value.
Illinois	18,420,265	$86,276,429
Indiana	9,670,886	43,986,431
Iowa	15,883,164	42,379,749
Kansas	16,223,396	46,519,713
Michigan	8,750,849	41,050,022
Minnesota	13,307,650	20,181,133
Missouri	9,929,271	39,667,152
Nebraska	11,368,931	58,188,300
North Dakota	8,148,633	20,909,212
Ohio	7,227,477	42,528,301
South Dakota	10,893,954	33,309,461
Wisconsin	10,305,784	27,977,214
Total	140,130,260	$502,973,117

MONTREAL TELEGRAPH COMPANY.

The annual meeting of the Montreal Telegraph Company was held in the board room of the company, in the city of Montreal, on January 13th. A considerable number of shareholders attended. The main business of the meeting was consideration of the annual report, which showed assets to the amount of $2,263,030, the capital being $2,000,000. The excess of assets over shareholders' capital is shown to be $151,823.85, and the contingent fund is $70,869.11. A matter of importance was the question whether the contingent fund should be divided among the stockholders. Mr. John Crawford moved a resolution to so divide it. This resolution was, however, amended to read that when the contingent fund reached such a figure that it would yield a yearly revenue of $5,000, then this amount should be divided among the shareholders. This motion was carried, Mr. Crawford withdrawing his.

The dividend which shareholders of the company now receive is eight per cent. per annum, paid quarterly; but when the above-mentioned $5,000 is annually divided among the shareholders it will give three additional dividends of about one-quarter of one per cent. Directors were chosen as follows: Messrs. Andrew Allan, Hector Mackenzie, Jesse Joseph, William Wainwright, Henry Archibald, William J. Withall, Hugh A. Allan, Mr. Andrew Allan was unanimously re-elected president.

A SMALL TRIBUTE TO CANADA.

A Toronto gentleman of high standing was spending a considerable time in London this summer. He greatly enjoyed the bacon they gave him morning after morning at his hotel—one of the fashionable hotels here. It was called "Danish bacon" on the bill of fare. "Tell me where I can get some to take back to Canada with me," he said to the hotel manager. He went to the city warehouse and saw a trunk packed full of the prime "Danish." "Where shall we send it?" asked the city dealer. "To Mr. ——. Toronto. Canada," was the reply. The dealer looked up amazed. "Oh, well," he said, "I may as well tell you this bacon came from your own city of Toronto. It is only 'Danish' in name; it is really Canadian, and I buy it in Toronto."—*Canadian Gazette*, London, England.

—Tobacconist—What is it, madame? Young Wife (with a dry sob)—I want to return this box of cigars I got for a holiday present for Herbert. He looked at them this morning and said he had sworn off!—*Chicago Tribune.*

HOW about your advertising? Does it produce results? Is your copy properly and effectively displayed by the printer? Have you noticed how some advertisements in the different papers appear to be carefully set up, and others alongside look as though they had been set by a "new hand." The chances are the good ones were set up in our office. We make a specialty of setting up advertisements from which plates are made. The cost is trifling.

DECISIONS IN COMMERCIAL LAW.

RITTER v. MUTUAL LIFE INSURANCE CO. OF NEW YORK.—The plaintiff's testator had increased his life insurance from $300,000 to $500,000 and within a year committed suicide. The Mutual Life of New York carried $75,000 of this amount, which it declined to pay, on the ground that the insurer was sane when he took his life. On the day before the suicide was committed the testator had written a letter declaring that he took his life in order that his creditors might realize the amount of their claims from the insurance companies. The case came before the Supreme Court of the United States, and it was held that when a contract of insurance was made, neither the insured nor the insurer could be expected to have contemplated suicide. In fixing the premium the company had considered the circumstances bearing on the duration of life, and had not taken into account the question of suicide, and, indeed, to have done so would have been against public policy.

QUEEN v. FORBES.—A sum of money was received by P. to be distributed amongst certain *cestuis que trust*, including bondholders of the Consolidated Electric Company, of which P. was solicitor. Two parties who held judgments against the company obtained orders garnishing a part of the money in P.'s hands. On motion to quash the garnishee orders, it was held that the money was trust fund, and as such was not liable to garnishment.

Re TAYLOR AND CITY OF WINNIPEG.—This case involved the validity of certain regulations in a by-law passed to regulate the sale of milk. It was held that a vendor could not be compelled to state where he obtained the milk he has sold or is about to deliver, because his answer might subject him to cancellation of his license as provided for in another section of the by-law. Held that he could not be required to permit a sample of milk intended for his customers to be taken for examination, since no provision was made for compensation. In these respects, the by-law was *ultra vires*.

STYLES v. THE SUPREME COUNCIL OF THE ROYAL ARCANUM.—There has arisen some difficulty in the interpretation of this clause from s. 148 (2) of the Ontario Insurance Act 60 Vict, c. 36, "notwithstanding any stipulation or agreement to the contrary, any action or proceeding against the insurer for the recovery of any claim under or by virtue of a contract of insurance of the person may be commenced at any time within the term of one year." It was held by Meredith, J. that this is an enabling enactment, having reference to a stipulation or an agreement giving less than one year for bringing the action.

—From different parts of the United States have come specific accounts of increased movement in business, but the most conclusive proof of the generality of this increase is found in the returns of the bank clearings. At New York city alone, an increase of clearings over 1896 is shown of five thousand million dollars, equal to nearly fourteen per cent., while the increase in clearings all over the Union exceeds six thousand millions. The exchanges of the New York Clearing House for the year last past amounted to $33,427,027,471, against $28,870,775,056 in the previous year.

—New York has 1,043,468 electric lights; Paris, 600,000.

Mercantile Summary.

A. H. Woodworth, in a small general store way at New Germany, N.S., has assigned' making preferences of some $800. He owes in all about $1,600.

A harnessmaker at Admaston, Ont., J. A. McEwan by name, has assigned, with small liabilities, and J. W. Crossley, a wagonmaker, at Almonte, has done likewise.

The amount of rolling stock reported by the Canadian Pacific Railway at the end of December, 1897, was as follows: Box cars, 12,600; stock cars, 1,065; refrigerators, 4,890; oil tanks, 6; conductors' runs, 318; ventilator cars, 46; passenger coaches, 766; boarding or living cars, 497; locomotives, 619; general cars, 270—the grand total being 20,650.

Plans have been prepared for new C.P.R. shops at Revelstoke, B.C., which are of a substantial and commodious nature and which will soon be erected for the accommodation of the Donald plant. The last engine has been jacked up at Donald, and until the Revelstoke shops are opened everything will have to go to Vancouver for repairs.

For thirty years or more C. E. Holliwell has been a periodical and stationery dealer, at Quebec. He is now obliged to assign.——In the same city, G. Gagnon, tobacconist, etc., has assigned to the court. He had previously had a meeting of creditors, at which he had offered 30 cents on liabilities of $3,500.

An assignment has been made on demand by Dame E. Maisonneuve, wife of S. Paquette, doing business as S. Paquette & Co., hotel keepers and contractors, Ahunsic, a new post office name for Sault au Recollet, Que. The liabilities reach to some $13,500.——Henry Dewitt, general dealer, at Chateauguay, Que., is reported as embarrassed and closed up, with liabilities of about $3,000.——M. Echemberg, dry goods, lately reported failed at St. Hyacinthe, Que., is offering 20 cents cash and 10 cents on time.

Very shortly after the death of Mr. Stanley Paterson, of Port Hope, and as a consequence of that event indeed, the Midland Trust Company of that town made an assignment to T. Dixon Craig. The company consisted of Stanley Paterson and John Paterson, his brother. For years they have done a large discount business with the farming community. The assignment was made to forestall the issuing of writs and a run on the bank, and to save the expenses of numerous individual lawsuits, which might have followed Mr. Paterson's death. The majority of the depositors reside in Port Hope and vicinity. It is supposed that the estate is quite able to pay, but time may be required in order to realize on the assets.

It has been decided that travelers' baggage and commercial samples shall be admitted free of duty into Canada, the decision in regard to the latter being as follows: "Cards, portfolios, pasteboard boxes or other coverings containing cut samples of cloth, edgings, textile fabrics, buttons of various patterns, and other articles, being representatives of goods and obviously intended for use only as samples to sell by, and having no commercial value, may be admitted free of duty." This exemption does not apply, however, to such portfolios, boxes or coverings used in displaying samples as are susceptible of being adapted to other use. Samples, such as are carried by commercial travelers usually, together with the trunks and other packages containing them, remain dutiable, excepting those, like the above mentioned, which are of "no commercial value."

Dog trains, sleds dragged by men and the traction engine over snow are not, it seems, the only practicable methods of travel to the Klondyke regions in winter. L. T. Watson, a member of the Indian Council at Suxman on the south-east coast of Alaska, writes the Portland *Oregonian* that the Stikine River affords a fine frozen highway, which he believes can easily be kept open all winter for horses. Mr. Watson is putting a lot of horses and sleds on the route to the gold fields.

From the activity being displayed, there is every prospect that the new town of Wabigoon, established about a year ago by the Canadian Pacific Railway land department, will become a second Rossland. A company has just been organized in London, Eng., the Rainy River and Ontario Exploration Company, with a capital of £150,000, to explore the whole country in the Wabigoon and Manitou districts with the object of securing claims and leasing desirable properties. The company has secured 630 lots in the town of Wabigoon, and will erect buildings this year of considerable proportions. Among the directors in London are J. Barker, J.P.; Col. A. Burton Brown, R.A.; Walton Lee, J.P., and J. W. Taylor, J.P., leading representatives of Finance in the world's metropolis.—*Winnipeg Free Press.*

Mr. Wm. Withall, who has been a prominent man in business circles of Quebec for forty or fifty years, and in Montreal for twelve, died in the latter city on Monday last, at the age of 84. He was born on the Island of Jersey, came to Gaspe as a boy, and as a young man began in groceries at Quebec. He was very successful, and became the largest shareholder in the Quebec Bank, of which he has been a director over thirty years. He has been also president or director of the Quebec Steamship Company, the Quebec Fire Insurance Co., the Quebec Street Railway Co., and several manufacturing enterprises. He had large interests in the Canadian Rubber Co. He held stock in nearly every bank in Montreal, and is said to have quite lately made large investments in the United States and in Yukon and British Columbia gold mines. Mr. Withall was not a pretentious or demonstrative man, on the contrary, rather retiring. But he stood well among business men, and had a good business head.

For the week, Montreal failures are as follows:—Having been served with two demands in insolvency. John Lorigan, a maker of mantels and dealing in furniture, has consented to assign.——Joseph Desautels, grocer, has made a voluntary assignment. Four years ago he failed before, and settled at 40 cents.——Charles Bazina, dealing in butter and general provisions, in the Bonsecours market, has assigned, and wants to compromise at 20 cents, cash.——E. J. Parent, formerly a clerk, started men's furnishings business six months ago, and has already assigned owing $1,880.——A voluntary assignment has been made by L. Desjardins & Co., dry goods. Mr. Desjardins failed last August, with liabilities of $30,000, and not getting a settlement, the stock was bought in for him at 52½ cents, and he resumed, under cover of his wife's name.——Another dry goods failure is that of A. J. Vallieres, who also failed as Jasmin & Vallieres in 1895, when he compromised the firm's indebtedness at 55 cents, and continued alone.——After failing in the fall of 1896, Ovila Chicoine, shoe dealer, resumed business on a compromise of 25 cents, on liabilities of $4,300. He is again in trouble, and has made a voluntary assignment.

Mercantile Summary.

COATICOOK is to have a new industry, a woven wire mattress manufactory.

THE electric lighting plant at Huntingdon, Que., is in operation again, this time as the property of the village council.

AT a meeting of the Boston Chamber of Commerce held last week a resolution in favor of reciprocity with Canada was adopted.

MR. FRANK OLIVER, member for Alberta, will address a meeting on the "Yukon" before the Board of Trade of Winnipeg on Saturday night.

THE Royal Hotel in Hamilton is to be rebuilt and modernized. Contracts for the work have been let. The cost of the alterations and improvements is estimated at $60,000.

AMERICAN manufacturers of sugar machinery are selling more machinery to Mexico this year than ever before. The amount of Mexican tobacco exported has now reached a value of more than $500,000 a month.

THE Standard Chemical Works have got to work at Fenelon Falls, Ont. They produce acetate of lime, wood alcohol and charcoal. A shipment of fifty tons of lime is going to Liverpool next week from this company, we are told.

THE Executive Committee of the London engineers issued, on Monday last, a circular advising the men to accept the employers' terms. A ballot of the men was fixed for Thursday 27th, and it is probable that work will be resumed on the following Monday.

HARTLAND, New Brunswick, between Woodstock and Grand Falls, is described as a live town, having a good weekly paper, a bank, good waterworks, good hotels. It now intends forming a Board of Trade. An exchange says, "Hartland welcomes traders who come to the town and does not try to shackle trade."

SEVERAL members of the Virden Board of Trade waited upon Commissioner McCreary of the immigration department, to discuss with him the settlement of the vacant lands in the five municipalities of which that town is the centre. The owners of the property will be asked to prepare a pamphlet describing the lands, and these will be distributed at all the Dominion agencies in the States and in Europe.

So far the iron market quotations in the United States have been in favor of buyers. Production of pig iron has reached one million tons per month, and practically all is melted as shipped, says the *R. R. Review*. What shape the market will take when the heavier demands of spring are presented is a problem. Iron trade combinations are projected in Europe which, if effected, will have some beneficial reflex action on this side.

THE recent decision of the Government to admit Liberia, Morocco, Salvador, the South African Republic, Congo and Spain to the benefits of the reciprocal tariff involves the further decision that the excess of duty paid on products imported since the 23rd April, 1897, from these countries will be refunded, if a claim therefor, with satisfactory proof of the origin and value of the products, is made at the customs port where the duty was paid.

THE annual meeting of the Brown & Wigle Company, Limited, of Kingsville, Ont., was held last week and the report approved. The same directors as last year were re-elected, viz.: — Dr. S. A. King, president; Horace Wigle, vice-president; E. A. Brown, sec.-treas.; J. E. Brown, manager; Jas. Hillis, J. E. Durand, Chatham, Geo. D. Ross, Montreal, and W. A. Smith. The company has to run overtime in order to fill large orders for the Klondyke trade.

THOMAS A. EDISON writes to a New York daily protesting against the many sensational articles appearing in New York "papers purporting to be interviews with me about wonderful inventions and discoveries made or to be made by myself. Scarcely a single one is authentic, and the statements purporting to be made by me are the inventions of the reporter—the public are led from these articles to draw conclusions just the opposite of the facts." He especially objects to the story that he has anything to do with an article advertised to appear in one of the papers about Mars.

A STATEMENT of the finances of the Hamilton civic departments shows that while the actual ($237,962) exceeded the estimated ($230,550) receipts by some $7,420, there has been a very considerable excess of expenditure over the appropriations. The amount so expended is $27,135, which, lessened by $7,421, leaves a deficit of $19,740. The principal overdrafts were $10,150 by the board of works and $10,521 by the hospital board, that amount including the cost of the Jubilee wing. The waterworks department, on the other hand, yields a good surplus, over $8,000.

RESPECTING large castings, Messrs. H. R. Ives & Co. write the Montreal *Gazette* respecting a claim made that the pipe (42 inches in diameter, and weighing nearly three tons), cast at the Londonderry, N.S., Iron Works, was the largest ever manufactured in Canada. Mr. Ives says that his firm cast and delivered for use on the Soulanges Canal, to be used as culverts, nearly 300 cast iron pipes, 120 inches, or 10 feet, in diameter. "The average weight of these pipes or sections was 6,600 lbs. each. These castings were probably the largest of the kind ever made in America.

THE report submitted by the assignee of the Carrick Financial Company, of Mildmay, is an instructive document. It will be remembered that a number of Mildmay merchants and others were conducting this concern as a sort of private bank. It came to a stop last year, to the grief of many depositors. Mr. John Schneider, the assignee, now submits an abstract of receipts and disbursements of the insolvent estate. The liabilities amount to $35,609 in amounts of from $12 up to $1,800 each; (there are 129 creditors, 32 of them women and six clergymen. The amount realized thus far upon the assets is $8,964 and a dividend to creditors is declared of fifteen per cent., which with the expenses nearly absorbs the amount received. These 129 creditors are likely to lose, in the aggregate we are told, 50 if not 70 cents in the dollar of their claims, which were largely of the nature of deposit moneys.

The INVOICE TAG ENVELOPE

should be used on all express parcels. The saving in postage pays for the envelope ten times over.

Mercantile Summary.

After being in the dry goods business for over thirty years in Simcoe, Oscar Hendry has assigned, but this is not the first time. Owing to the failure in 1875 of Moffatt Bros. & Co., wholesale dry goods dealers in Toronto, Mr. Hendry got into trouble and sold his stock to John Robertson & Co., and he successfully managed the business until he got his discharge. In 1879 he moved to Woodstock, but owing to strong competition returned thence three years later. Since 1882 he has not been able to add much to his capital. Mr. H. enjoys the reputation of being a hardworking man, anxious to do what is right. We have not heard the amount of his debts.——In October last George Giller, grocer, Berlin, assigned, now he is paying his creditors 75 per cent. of their claims and getting his discharge.

In old country financial circles there is a more hopeful tone employed in discanting upon Canadian affairs. In the opinion of *Truth* a fresh advance is to be expected both in Canadian Pacifics and in Grand Trunks. "Canadian Pacifics, more especially, should now be bought upon the certainty of a good dividend;" and the *Shareholder* says that Canada Pacifics have also been strong in sympathy with Trunks and rumors of coming heavy traffics. People over there have not yet got into the way of considering Canada by herself; we are usually bracketed with the United States. Thus, the *Journal of Finance* thinks American and Canadian railroads hopeful. "The Western Hemisphere is only just emerging from a period of great depression, and it seems ridiculous to suppose that it could have got to the top of the wave of prosperity already." But it is good enough to say that "Canada, too, shows every sign of awakening from its lethargy, and as the country has vast passibilities there is scarcely a limit to the developments which the next few years may produce."

People who use threatening or bulldozing methods of collecting acounts, sometimes overdo their work. One of them got a taste of imprisonment on Saturday last for his disgraceful conduct. A young man named Leon Easton, who sells tea and coffee in a small way on Yonge street, in Toronto, was indebted for some $31 to Steele, Hayter & Co. Application was made to collect the bill by Chas. T. Lyon, acting for a collection association on Adelaide street. Easton could not pay at once, and Lyon threatened him with imprisonment. Being frightened, Easton agreed to Lyon's demands for articles in the place, and was also foolish enough to give up the key. Going back next day with a friend named James Callaghan, he found a representative of the collecting agency at the door, who threatened to have both arrested if they went in. But they did go in and found that the place had been cleaned out, nothing being left but the fixtures. The magistrate said it was a most disgraceful case, and he ordered Lyons to be taken to the cells for a day or two, emphatically refusing to entertain any offer of bail. If any of the stolen goods are restored it will probably have an effect on the prisoner's sentence. The merchandise he got possession of so cheekily consisted of seven chests of tea, one coffee mill, one set of scales, one scoop, a number of account books, one stove and other property.

GRAND TRUNK RAILWAY SYSTEM

Are You Going To the Klondyke?

The Grand Trunk Railway is the popular route to the Yukon and gold fields of the Klondyke. The route is via Chicago, St. Paul, Seattle, and Victoria, the leading ports to Alaska.

William Ogilvie, F.R.G.S., Surveyor to the Dominion Government, says, in referring to the various routes to the Yukon:

"We now go to the Dyea route, which has been used by the Indians for generations—and they evidently knew their business. It is estimated that 95 per cent. of the traffic that has already gone into the Yukon has gone via Dyea, which is the clearest possible evidence of its superiority over all other routes'

ANNUAL MEETING

Notice is hereby given that the Annual General Meeting of the Shareholders of this Company will be held at their offices, Nos. 18 and 20 Front Street East, on Friday, the 18th day of February, at the hour of 12 o'clock noon, to receive the Annual Report, for the Election of Directors, and for all general business relating to the management of the Company.

By order of the Board.

P. H. SIMS, Secretary.

Toronto, Jan. 19, 1898.

Mercantile Summary.

W. J. ORR, a shoe dealer at Kaslo, B.C., is in trouble and has assigned. A large wholesale firm in Montreal is the principal creditor.

MR. JAMES THOMPSON of the firm of Thompson, Codville & Co., wholesale grocers, Winnipeg, died a few days ago. Owing to a partnership arrangement no change will take place in the business within six months.

THE steamer "Commonwealth," 6,000 tons, abandoned off the Pacific coast with a broken shaft, was picked up by the coaster "Willapa" of Victoria last Sunday. The prize is worth about $400,000. The captain and crew of the "Commonwealth" reached a friendly cove in safety boats.

NOTICE is given in the last Manitoba Gazette of the following business failures: John B. Henderson, general merchant, of Carberry; the Swan Lake Fur Company, Wood River; John Elie & Co., general merchants of Saltcoats' Messrs. Sparling and Messer, grocers and confectioners, of Morden.

THE Dominion Cold Storage Company was formed some time ago, with a capital of $300,000. The company failed, and now the shareholders are petitioning for the abrogation of the charter, which will relieve them from further liability. Several Montreal and Toronto counsel were in Ottawa this week, seeing the Minister of Justice about it.

THE receipts of the Manchester Ship Canal from all sources last year, show an increase of only $100,000 on those for 1896, in which year and 1895 the advance was at the rate of about $200,000. This is disappointing; the shareholders are receiving no dividends, the income not being sufficient to pay interest on the debentures. This result is blamed in part upon the engineers' strike.

A SNOWSTORM of unusual severity struck Montreal on Sunday night and Monday last. Not less than 17 inches fell, on the level. For twenty years, it is said, there has not been so severe a snowstorm in the city. Traffic was much impeded on the down town streets, but on those having car tracks, the street railway people did wonders to get most of the lines on the principal streets fairly well kept open, having 14 sweeping machines (electric cars) and 200 men at work.

THE Swan Lake Forwarding Co., Fort Pelley, which has suspended, is a branch store of J. Ely & Co, Saltcoats, N. W. T., who assigned a week ago.——An offer of 40 per cent. is made to the creditors of Wright & Co., general storekeepers at Minnedosa, Man. They have nominal assets of $1,200, but they owe $3,000.——An extension of time is asked by A. McRae & Co., general storekeepers, Elva, Man. While they have a substantial surplus they are cramped for ready cash.

AT the Lake Carriers' meeting held in Detroit last week, officers were elected as under: Vice-president, H. A. Hawgood, Cleveland; David Vance, Milwaukee; C. W. Elphicke, Chicago; A. A. Parker, Detroit; G. L. Douglas, Buffalo; G. A. Thompson, Duluth; Chas. A. Eddy, Bay City; F. J. Firth, Philadelphia; Leander Burdeck, Toledo; M. J. Cummings, Oswego; Alvin Neal, Port Huron; James McBrier, Erie; J. C. Westbrook, Ogdensburg; F. W. Gilchrist, Alpena; G. E. Tener, Fairport; secretary, C. H. Keep, of Buffalo; treasurer Geo. P. MacKay, of Cleveland; counsel, Harvey D. Goulder, Cleveland. Several committees were appointed, one with instructions to endeavor to secure better rates for unloading grain cargoes at lower Ontario ports.

OUR readers have learned from time to time of the defects of the houses in parts of the Maritime Provinces intended for the accommodation of travelers. While there are many cosy inns of the Old Country type in which one may be delightfully comfortable and at home, too, there are plenty of houses styled hotels that are execrably bad. Probably it is with a view of rectifying this evil that there has been formed in Nova Scotia the "Nova Scotia Hotel and Improvement Co., Limited," in the list of directors of which appear the names of Attorney-General Longley, J. F. Masters (Dominion Atlantic Railway), Dr. C. H. Miller, B. H. Calkin, and George W. Borden. It is said to be the intention of this company to erect several hotels in the province. The movement will be hailed with joy by many who are called by business or pleasure to travel there.

IN their monthly shipping report R. P. Rithet & Co., of Victoria, B.C., thus review the business of the last year: A quiet and rather uneventful year has been 1897, but one of steady progress all the same. And it has been marked by one episode that will become historical—the first rush to Klondyke. This occurred in the late summer and was brief, but exciting while it lasted. Availing of the experience gained through similiar incidents in years gone by, Victoria merchants met the emergency without any trouble. They are now fully prepared to deal with the vastly greater rush that will be upon us in the spring. Commenting on the staple industries of British Columbia, it may be said briefly that the lumber trade was active during the first half of the year, but fell off considerably later on, and at the close there is almost nothing doing. But this is mainly owing to the absence of tonnage. The coal industry has not been altogether satisfactory, while the same may be said of salmon. It is true the pack was the largest on record, but this has its disadvantages, and a falling market is on. However, measures are being taken to meet the situation, and almost as we write news comes of a combination of canners, designed to deal with present prices and regulate the pack for next year.

J. B. OKE & Co., produce dealers, Port Hope, succeeded Oke & Scott, in 1888, and apparently prospered until they opened a couple of retail branch stores, by which they met with some losses. Being hard pressed for cash for some years, they were aided by their banker at various times to a considerable extent. It is now stated that they owe about $17,000 for advances. As their bankers have failed, they are, at present, unable to continue business, and may assign in a few days.——In 1889, George H. Tolton, removed from Stratford to Galt, Ont., and succeeded J. W. Strickland in the tailoring business. At that time Mr. T. had a capital of about $1,500, and soon worked up a nice trade, but largely on credit, which cramped him. Now he is obliged to ask creditors for a compromise. His statement shows that he owes $6,300 and has nominal assets of $7,100.——Another offer of compromise is made by John Arthurs, general storekeeper, Ahmic Harbor, Ont. Some time ago he locked up some money in building a new store; then came dull trade last season. He has been compelled to offer creditors 50 per cent. of their claims.——After being in the crockery and fancy goods trade about a year, Chas. F. Kutzbach, Peterboro, assigns with liabilities of $6,700. To pay this sum he has nominal assets of $4,200. Certainly a very poor showing for so short a time in business.

Johnston & Haines, hardware dealers, Sandon, B.C., are in difficulty and have assigned. Formerly they were tinsmiths.

The Brantford firm of W. Paterson & Son, biscuit makers, who employ 150 hands, are said to be desirous of securing another location. St. Thomas will make an effort to get them to remove thither.

Ontario assignments include those of John McKinnon, tailor, Galt; W. N. May, grocer, Port Stanley, and J. C. Hertel, tailor, Dutton. The machinery and other assets of the Burford Canning Co. are to be sold by auction on 10th February.

The creditors of the Midland Trust Company, to the number of 300, met in Port Hope yesterday afternoon, when the assignee, T. Dixon Craig, M.P., surprised the gathering by a statement showing that while the liabilities were $235,807, the available assets were only $218,726. There are further nominal assets of $57,675 in doubtful accounts, bad debts and Consumers' Cordage Company stock, whose value is problematical.

A. Brignall, who was formerly of the firm of Brignall & Thomson, dealer in dry goods, Belleville, has been traveling for a wholesale dry goods house, and about two years ago opened a millinery store managed by his wife. Severe competition and lack of capital has rendered an assignment necessary.——A notice has been posted on the store of Jas. McCombs, dry goods dealer in Peterboro that it is closed for stock taking, and for further information apply at the office of Stratton & Hall, barristers, etc.

MONTREAL BOARD OF TRADE.

The annual meeting of the Montreal Board of Trade was held on Tuesday afternoon last, the retiring president, Mr John McKergow, in the chair, and between one and two hundred members present. The president's comparatively brief review of the year's transactions made reference to the expansion of the trade of the port of Montreal, the improvement visible among the farming, dairying, mining and other industries, and to the visit of a deputation to Ottawa for the purpose of urging upon the Government the importance of an insolvency law. The report of the Council was submitted and adopted. We regret having to pospone consideration of it today.

Mr. Edgar Judge moved a resolution impressing upon the Government the importance of enlarging the Welland Canal to 20 feet, to permit the largest vessels of the Upper lakes to pass to Lake Ontario without breaking bulk. Mr. McBean submitted statistics in support of the same motion, which he seconded.

The election of officers resulted as under:

President, James Crathern.

First vice-president, Chas. F. Smith.

Second vice-president, Robert Mackay.

Treasurer, Henry Miles.

Members of council, Thos. McDougal, banking; E. L. Bond, marine insurance; W. B. Matthewson, tea importer; James W. Pyke, hardware; David Watson, drugs; A. J. Bryce, dairy produce; H. Laporte, groceries; Wm. McMaster, iron; Thomas Harling, shipping; Fred. W. Evans, fire insurance; Arch. W. Stevenson, chartered accountant; Robert Peddie, grain.

The Board of Arbitration consists of: E. B. Greenshields, John McKergow, W. W. Ogilvie, Robert Bickerdike, Robert Archer, A. F. Gault, David Robertson, John Torrance, A. G. Thomson, Edgar Judge, Hon. A. A. Thibaudeau, David McFarlane.

TORONTO BOARD OF TRADE.

Anticipations of a contest for some of the principal offices of the board brought together a large gathering at the Board of Trade rotunda on Tuesday last. Mr. Edward Gurney, the retiring president, took the chair at 3.30 p.m., and after the adoption of the reports of the treasurer, the harbor and exhibition delegates delivered a lengthy and weighty address, to which we must refer another time. His successor, Mr. Elias Rogers, then took the chair and made a brief speech containing some suggestive points.

A ticket, known as the "Anti-Gratuity" ticket, from its resolution to wind up the gratuity scheme of the board, consisted of the following candidates: For second vice-president, Paul Campbell; for treasurer, Ald. John Hallam; for council, John Morison, Thos. Woodbridge, Charles Reid, Thomas Dunnett, F. J. Phillips, H. C. Boomer, R. L. Patterson, Henry Pellatt, James Goodall. Only two of these gentlemen were elected, for it was found when the 500 or 600 ballot votes cast were counted, that Mr. Ellis had beaten Mr. Campbell for the vice-presidency, and Mr. Ames had beaten Mr. Hallam. The officers for this year are as under:

President—Elias Rogers.

First vice-president—A. E. Kemp.

Second vice-president—M. E. Ellis.

Treasurer—A. E. Ames.

Members of Council—Edward Gurney, W. D. Matthews, E. B. Osler, H. N. Baird, Stapleton Caldecott, D. R. Wilkie, W. G. Gooderham, Peleg Howland, M. McLaughlin, J. Herbert Mason, W. C. Matthews, Thos. Dunnett, James D. Allan, George Keith, Henry Pellatt.

Board of Arbitration—John I. Davidson, J. H. G. Hagarty, Thomas Flynn, John Carrick, J. D. Laidlaw, C. W. Baird, W. K. McNaught, J. H. Sproule, D. O. Ellis, R. J. Score, C. Goode, P. R. Miller.

Harbor Board—W. A. Geddes, J. T. Matthews.

SEAT ON TORONTO STOCK EXCHANGE

Tenders will be received to Third February next for a seat on the Toronto Stock Exchange, subject to the rules, the highest or any tender not necessarily accepted. Address, in sealed envelope, marked "Tender," Lyndhurst Ogden, Secretary, Toronto Stock Exchange.

PRESIDENT,

The HON. SIR OLIVER MOWAT,
Ex-Minister of Justice of Canada, Lieutenant-Governor of Ontario.

VICE-PRESIDENT,

J. W. FLAVELLE, Esq.,
Managing Director The Wm. Davies Co.
Director Canadian Bank of Commerce.

The Toronto Globe, in referring to the first three months' business of the Company, said:

"It was generally known by those in the business that this new aspirant had secured a fair share of the new insurances taken out in the last three months, but it will be a surprise to nearly all to hear that the applications received amounted to over one million and a quarter of dollars, of which more than one million were approved and policies issued. This phenomenal record—for such it really is for a new company—compares favorably with the business of the older and progressive life insurance companies of the Dominion, and considered in the light of the character of the business, gauged by the large average amounts of premiums and policies, it is quite safe to say that the record is unparalleled in our country."

F. G. COX, Managing Director.

TORONTO, FRIDAY, JANUARY 28, 1898.

THE SITUATION.

A suggestion has been brought before the city council of Toronto to appoint a committee of citizens to consider the best means of carrying a railway to Hudson's Bay. Five citizens are named for this purpose: Messrs. George Gooderham, W. R. Brock, Robert Davies, Lyman Jones and J. Herbert Mason, all good men. The city council may suggest, but it has no power to appoint a committee of citizens. Part of the plan is that it should place $5,000 at the credit of the committee, and it is not certain that it has power to do this; probably it has not. The money it is proposed to employ as a means of obtaining information, which, if of the right kind, would be useful; the commissioners to give their services free. For its money the city would get the records of any surveys made, including plans and maps. There could be no great objection to such an expenditure provided it were certain that the city has power to make it. The idea of the proposed enterprise is that a Hudson Bay railway should be "largely controlled by the city of Toronto." The expression is somewhat dubious; if it means that individual citizens are to have the privilege of subscribing the capital, that is a liberty that might well be accorded to them; if it means that the city in its corporate capacity should undertake the work, the answer is that the project is too speculative to warrant the corporation entering on the undertaking.

In the session of the Quebec Legislature just closed, it is notable that no railway subsidies were granted. It does not follow that such subsidies will not be revived in future, the omission to grant any this session being due to the fact that the state of the provincial finances did not admit of such gratuities being made. The previous Government had agreed to guarantee $8,000,000 of the bonds of the Atlantic and Lake Superior Railway, from Levis to Sorel, but the obligation not being complete or irrevocable was disallowed, after the change of Government took place. The Marchand Government has determined, so it is announced, that no more railway subsidies will be granted till the public treasury is able to show a surplus. This means, if taken literally, that railway subsidies are not henceforth to take a foremost place in the budget of Quebec. Authority to obtain a permanent loan of $1,500,000 was obtained by the Government; and meanwhile a temporary loan was made to restore grants which had been previously diverted from their designated purpose. The Montreal loan bill was, in its progress through the Legislature, divested of some objectionable features, including a large expenditure for the alleged benefit of commerce, which commerce did not want, but on the contrary objected to. A bill was passed requiring from outside benefit societies a deposit of $5,000 each. This Act has been spoken of as a retaliation against Ontario, but it is probably rather directed against American associations, and in any case is only a reasonable precaution. A bill was passed giving effect to an agreement with the Federal Government by which the singular claim is made that 67,499,950 acres of territory has been added to Quebec by an agreement made between the province and the Dominion.
If this vast area, half as large as France, had been acquired by the province, by the agreement the Dominion must have lost what the province gained. The real fact, much more modest, is that the boundary line between the province and the Dominion has been settled.

From Brandon comes a protest against the proposal to put a duty, once more, on binder twine. This is the voice of the West, which finds an echo in the furthermost territories where wheat is grown. The payer of this duty believes, perhaps truly, that he cannot get it back, the price of his grain being fixed by the world's competition. The binder twine industry has reached the stage in which the artificial aid that it formerly received redounds to its injury. The duty unduly stimulated the production of twine; then followed the usual combination, which weighted the amalgamated company with useless properties. Its capital was so far sunk in fixtures that the company had to rely upon the banks for advances, to move its machinery. There is an undue nominal capital on which to earn dividends, and they cannot be earned without the artificial aid of duty. So the heads of the concern tell the Government, and the tale is probably true. The Western farmers object to pay a duty on twine, which they say they have no means ot recovering from the purchasers of their grain. If they would agree to pay it, the binder twine manufacturers tell us they could pay, in wages, $350,000 a year; for oil, $60,000; $52,000 a year for packages; $10,000 for paper, and $36,000 for interest; in all $633,000. All this could be done probably, as alleged, if the users of binder twine would agree to pay 20 or 25 per cent. more than they buy their twine for in the absence of a duty; but, unless the users of the twine could recoup themselves by an increased price for their grain, all this would be done at their expense, and the country would not be the richer for the operation. Should the duty not be reimposed, it is probable that most of the capital put into the binder twine industry will be lost. If there must be a loss, whichever course is taken, on whom ought it to fall; on the farmer, who is not responsible for the threatened enterprise, or on those who took upon themselves the responsibility of the venture? That is the problem which awaits solution.

It looks as if the attempts made by three different countries to obtain exclusive trading privileges in China would lead to the opening of more Chinese ports to the whole world. A fortnight ago Secretary Sherman, at Washington, expressed the opinion that the possession by Germany of the port of Kiao-Chau would prove to be the opening of one more Chinese port to the whole world; what was then a faint and uncertain prediction has now been translated into fact: Germany announces that Kiao-Chau is open to the whole world. To the urgent reclamation of Great Britain, more than to any other, or perhaps all other causes, this result is due. In any case there was less reason to fear the results of German occupation than of French or Russian; Germany carries no double tariff to her colonies; France does; and Russia is seeking to transfer to her dominion a large slice of Chinese territory. Germany, become the advocate of open ports in China, places herself by that fact on the side of Great Britain, the United States and Japan. Against the forces which make for free ports in China, Russia, with all her resources, is powerless. She cannot close a single Chinese port to the trade of the world, however great may be her anxiety to do so.

Russia not only accepts the gold standard, but she has a gold circulation far greater than that of paper, to wit., $1,092,000,000, against $737,000,000. She has also a silver circulation of $135,000,000, making her metallic circulation greater than that of paper by 131 per cent. This is an expensive currency, and as the gold tends to increase and the paper to become less, it is becoming more expensive. Though it is easy to keep an account of the gold and silver coined in any country, what is the actual amount of these metals in the channels of commerce, at any time, must, to some extent, be a matter of estimate. Since 1896, the notes of the Bank of Russia, really Government notes, have been reduced by over $100,000,000, while the gold in the Treasury has risen to $81,000,000. There is, however, a deficit nearly equal to this stock of gold of $80,000,000. If the gold in the treasury be required, as it probably is, for other purposes than to wipe out the deficit, the financial position is not quite easy. If it should be necessary to issue paper for most of the deficit, that operation might suffice to give relief, though the retrogression would take us far back towards the condition of the paper issues in 1896.

One of the most gigantic strikes in the history of industry, that of the British engineers, has practically ended in a defeat of the strikers. The direct cost in maintenance and the loss of wages reached millions of dollars; the indirect loss, in the diversion of part of the steel ship and machine business to other countries, which may not be recovered, is at present incalculable. The capitalist employers are irritated at the losses as which they have been made to bear and those which may come in the future; and there is talk of an attack upon Trades' Unions, at the thirty-eight anniversary of the Chambers of Commerce, with a demand that the Government make an enquiry into their working and tendency. It is too late in the day to hope anything from an attack on Trades' Unions; and even if it be true, as alleged, that they have largely fallen under the control of the Socialists, that fact, though it may be regretted, cannot be used for the curtailment of their liberty. The voting power of the working classes is guarantee against that. Among economists, Professor Thorold Rogers was the foremost defender of Trades' Unions. He believed that they could be depended on not to persist in demands for wages which their employers could not afford to pay. Whether the engineers or their employers are more responsible for the late strike, whichever it be, they are responsible for what may prove to be a severe blow to certain forms of British industry.

In the cotton industry of the United States, Mr. Dingley finds that protection does not protect. In a speech he made in the House of Representatives, the reporters make him say that a condition of things has arisen in which "protection can do nothing." The competition between the new South and the old East was under discussion. The South is giving the East great trouble by its competition. The advantage possessed by the South Mr. Dingley sums up in "longer hours and lower wages;" and he suggests as a remedy to equalize conditions, "an amendment of the constitution which would permit Congress to equalize hours all over the country." Here Mr. Dingley is at odds with the protectionists, who assert that high wages are the secret of the success of American manufacturers. The assertion is not wholly devoid of truth, though, as usual, too much has been made of it. One *soi disant* economist has written a book to prove the truth of this theory, which but recently looked as if it would become a fashionable, though it might be a sham, cult. If Mr. Dingley undertakes the work of equalizing conditions, he will find some nuts which he will not be able to crack. For instance, brown iron ore has been found in Alabama, which can be worked at 50 cents a ton less than any other. What impediment will he place against the supremacy of that?

A RAILWAY TO THE KLONDYKE.

A state of things has arisen in the Klondyke region which makes necessary the providing of better means of access thereto. This is shown in the fear that famine might strike the miners there, unless extraordinary means were taken to get in relief. Exaggerated as the danger probably is, a worse state of things might follow the great rush to the new Dorado which is sure to take place next season. The Government was called upon not only to take steps to prevent any such calamity, but to provide better means of reaching the new mining region; it has performed that duty in providing for the construction of a railway from either the mouth of Telegraph Creek, Glenora, or the mouth of Clear Water River to Teslin Lake, a distance of 150 miles, together with steamboat navigation, which will enable the passenger from the Pacific to reach Dawson City.

A choice of routes had to be made, and the Government, with all the available information before it, had the best means of comparison necessary to a decision. The contractors for the construction of the road, Mr. Wm. Mackenzie, of Toronto, and Mr. Donald D. Mann, of Montreal, are to receive from the Government 25,000 acres of mineral lands, per mile of railway, 3,750,000 in all, in aid of the railway and other services, embracing, besides the necessary steamboats, a sleigh road from the Stickeen to Lake Teslin, which is to be ready in six weeks. The lands are to be selected north of the 60° of N. latitude, and west of the Liard and Mackenzie rivers. These lands ought to bring a far higher price than agricultural lands in the best part of the country.

There are privileges attached to the concession which discriminate in favor of the railway company and against the Government. Miners working on Government land pay 10 per cent. royalty, while those on lands belonging to the company, or acquired from it, are to pay only one per cent. This discrimination will be fatal to mining on Government lands; at least that must be the general effect, subject only to casual exceptions, in cases of unusual richness. It will be, in this respect, to no purpose that the Government will reserve alternate blocks, if it does not leave itself at liberty to reduce the royalty on these reservations below 10 per cent. Another restriction the Government has put on public action by providing that no rival Canadian route shall receive Government aid for five years. And still more, if the Government should within ten years aid a line of railway from Stickeen to a port in British Columbia, the preference is to be given to the present contracting railway company.

Whom Messrs. Mackenzie and Mann represent we are left to guess. Does the C.P.R. stand in the shadow behind? On any reasonable calculation the Government grant may be expected to pay for the road and leave a handsome, perhaps an enormous profit. But it cannot be denied that there is an element of risk in the transaction, which is difficult to appraise. The objectionable feature is that, while the Government provides the means of building the road, the road will, when built, be the property of private parties. The alternative was not necessarily Government construction. Could not the mineral lands have been disposed of separately for a much larger sum than will suffice to build the road?

FINANCIAL REVIEW.

We give below a condensation of the figures of the statement of Canadian banks for the month of Dec. 1897. It is compared with the bank statement for the previous month, and shows capital, reserve, assets and liabilities, average holdings of specie and Dominion notes, &c.

CANADIAN BANK STATEMENT.

LIABILITIES.

	Dec., 1897.	Nov., 1897.
Capital authorized	$73,758,684	$73,258,684
Capital paid up	62,289,326	62,288,636
Reserve Funds	27,515,999	27,283,999
Notes in circulation	$37,995,123	$40,143,878
Dominion and Provincial Government deposits	7,386,908	6,232,184
Public deposits on demand	81,881,687	80,402,878
Public deposits after notice	140,120,460	139,528,801
Bank loans or deposits from other banks secured	2,000	11,000
Bank loans or deposits from other banks unsecured	3,127,781	3,581,511
Due other banks in Canada in daily balances	331,631	124,208
Due other banks in foreign countries	340 136	305,737
Due other banks in Great Britain	656,266	575,030
Other liabilities	534,006	997,621
Total liabilities	$272,376,076	$271,902,920
ASSETS.		
Specie	$8,268,023	$8,757,736
Dominion notes	17,726,048	17,437,778
Deposits to secure note circulation	1,883,067	1,883,067
Notes and cheques of other banks	11,826,314	9,526,045
Loans to other banks secured	2,000	11,000
Deposits made with other banks	4,321,539	4,914,564
Due from other banks in foreign countries	23,547,288	28,410.443
Due from other banks in Great Britain	15,519,940	16.579,039
Dominion Govt. debentures or stock	4,731,099	3,662,532
Other securities	30,743.200	29,778,402
Call loans on bonds and stock	19,859,822	18,930,378
	$138,428 340	$139,890,984
Current loans and discounts	205,931,017	205,723,909
Loans to Dominion and Provincial Governments	1,820,403	1,470,955
Due from other banks in Canada in daily exchanges	268,524	192,422
Overdue debts	3,238,285	3,391,838
Real estate	2,093,188	2,045,435
Mortgages on real estate sold	560,663	580,863
Bank premises	5,697,933	5,696,742
Other assets	2,093,550	2 139,633
Total assets	$360,133,088	$361.132,969
Average amount of specie held during the month	8,546,677	8,729,054
Average Dominion notes held during the month	17,530,208	17,033,825
Greatest amount notes in circulation during month	40,309,118	42,303,141
Loans to directors or their firms	7,689,989	7,562,652

The statement for the 31st of December, being the last statement for the year 1897, may very aptly be compared with that of the year preceding, and also with the years preceding that. Certainly the statement in itself is remarkable enough to excite attention, for it presents indisputable signs of a return to a condition of prosperity for the country as a whole, although it is possible that certain sections of the country may not be prospering; and still more, that certain individuals or interests may be really retrograding in the midst of general prosperity. For it must not be forgotten that individuals may mismanage or neglect their business in the best of times, and so bring on poverty or insolvency; and certain trades and districts may be adversely affected even by the very circumstances, or the very legislation that brings prosperity to the country as a whole. Still, it is not with individuals or sections that we have to deal in such a review as the present, but with the country as a whole. Thus, the expansion during the year in the principal items of the account is quite remarkable, as the following figures will show:

Circulation—	
31st December, 1896	$33,095,000
" 1897	37,995,000
Deposits—	
31st December, 1896	$204,880,000
" 1897	232,510,000
Discounts and Investments—	
31st December, 1896	$240,800,000
" 1897	246,400,000
Available Resources—	
31st December, 1896	$ 75,300,000
" 1897	101,900,000

The increase of circulation has already been pointed out as an undoubted index to the much larger movement of grain and other agricultural produce during the present fall season, as compared with last year.

While the increase of deposits is a most striking evidence of the increase of the savings of the people, it is certain that this large increase of deposits has not been profitable to the banks; for their ordinary loans and discounts are nearly five millions less than they were a year ago. It is evident, therefore, that the banks have not been able to employ the additional $28,000,000 of money lodged with them profitably. They have been obliged to look out for investments in bonds and other securities yielding a much lower rate of interest than commercial discounts, and they have also largely increased the amount of their call loans and cash. Altogether it is doubtful if the banks have been able to obtain more from these investments and call loans, than would pay the interest on the deposits themselves, so that it seems probable that they have had all the labor of handling nearly $30,000,000 of additional money for nothing.

The deposits of the whole country continue to mount up in an extraordinary way, as will be seen when we take not only the returns of the banks, but of government and other savings institutions. Going back only for five years, we find the increase of deposits to have been of really a phenomenal character.

Thus:—

December, 1893	$253,000,000
" 1894	267,000,000
" 1895	276,000,000
" 1896	285,000,000
" 1897	316,000,000

This exhibit is very satisfactory in itself, but it would certainly be more satisfactory if it were accompanied by a corresponding increase in bank discounts and loans. But this has not been the case, and a comparison of the discounts of 1893 with those of 1897 will reveal a condition of business depression and stagnation as having prevailed during the whole of the years named. For the increase in such discounts was only $6,000,000, while the increase in deposits was ten times as much. However, there seems a likelihood of a turn in the tide, and it is very possible that the next five years may see more of a proper proportion between the deposits and the discounts, and if a period of prosperity sets in, the losses both of merchants and banks ought to be very largely diminished. The mention of "losses" to merchants and banks very naturally leads up to the question of

AN INSOLVENCY LAW.

A very general feeling has arisen in the country that we have been without a general insolvency law long enough. The last insolvency law was repealed many years ago by universal consent, and for a considerable time with beneficial results. Failures diminished, and as debtors had not the opportunity of easily settling with their creditors by force of law, a far more healthy condition of business supervened. But for some years back the abuses connected with the absence of a law (and there are such abuses in plenty) have brought the subject again to the front. This state of things had full weight a year or two ago, when the late Government, under the lead of Sir Mackenzie Bowell, allowed a bill to be introduced into Parliament on the subject. This bill received most careful consideration in all its details, both from boards of trade and from the Association of Bankers, and in nearly every particular but one or two it was made so (by amendments here and there) as to be satisfactory to all parties concerned. If the Government intend to bring in a bill this year, they could not do better than to take the last draft of that Act as a foundation to build upon.

But there are two or three points in every Bankruptcy Act round which the whole question finally turns. By far the most important of these is as to the terms on which a debtor shall be discharged. All experience has proved that every Insolvency Bill hitherto in force has been an encouragement to insolvency. Every one of them might have been entitled "A BILL TO PROMOTE INSOLVENCY," for that was the effect of them—the last one particularly. Under its provisions it became an object with a large class of persons in the community to persuade traders to enter into insolvency, and thus settle with their creditors on much more favorable terms than paying their debts in full. These persuasions were effectual beyond all doubt, in hundreds of cases, where persons were perfectly solvent. For the law enabled any man who embraced its provisions to get a settlement with his creditors on paying them fifty cents on the dollar. The discharge clause, certainly, was hedged about with restrictions intended to prevent its abuse; but these restrictions proved to be mere cobwebs in effect. The grand tempting bait of a fifty cents in the dollar settlement, and a resulting heavy profit, was dangled before the eyes of the whole trading community, and numbers of them succumbed to the temptation who were able to pay their debts in full. As to the restrictions, they proved to be only like the clauses in an Act of Parliament through which, as it was boasted, a coach-and-four could be driven. They broke down in practice altogether. The powers of a fifty cent discharge proved irresistible, and the spectacle was witnessed all over the country, of dishonest traders who had made settlements at that figure, underselling neighboring merchants who had paid their debts in full. This was the real cause, though it has sometimes been stated differently, why the abuses of the old Act became so rampant that it was repealed by general consent.

Now the Act introduced a year or two ago contained the very same objectionable figure of fifty cents, and no one doubts who understands the position that by this time we would have had as scandalous a crop of abuses as we had under the old Act. What is required in the case is this: that the discharge shall be fixed at so high a figure that it will be *no temptation to any solvent man to avail himself of the Act.* Whether 75 cents will be high enough, or 80, or 85 cents, may be a matter on which there is difference of opinion. But the great principle must be kept in view that the Act should not be an encouragement to insolvency. It should not enable solvent men to pay their creditors less than they owe. Far better to have no Act at all than to have one that opens the door to such an abuse as a solvent man buying back his own estate at half of what it is worth.

Any Act will of course provide that no discharge at all shall be granted where there has been fraud or scandalous negligence, or preferences without due consideration, or neglect to keep proper books, etc. About these, however there is generally little differences of opinion. The English Bankruptcy Act may fairly be taken as a model with respect to these matters. The question of ranking is one on which perhaps more difference of opinion will arise than on any other. The English Act contains no section on the subject; which apparently leaves the matter to be settled by the provisions of the Common Law.

From a conflict of views some sort of a compromise may probably be effected. Of course, the preferential assignments which are the scandal of legislation in the Lower Provinces will be abolished. If no Bankruptcy Act is passed by the Dominion, the Local Legislation covering a proper distribution of insolvent estates might effect the same object.

ABSTRACT OF BANK RETURNS.

31st December, 1896. [In thousands.]

Description.	Banks in Quebec.	Banks in Ontario.	Banks in the other Prov's.	Total.

Large	16,227,300
	$24,570,309

Gold held, $12,989,984 = 52.87 per cent.

—An agreeable effect of the general prosperity of the Manitoba farmers this year is noted by the Portage la Prairie *Liberal*. This is the manner in which money is being paid into the rural municipalities for taxes. The total sum collected in that municipality last year was $34,166 02, and the payments of taxes in the month of December were fully $4,500 in excess of the aggregate collections for the corresponding month of 1896.

LENDING ON MORTGAGE.

The business of lending on mortgage is a very considerable one in Canada. So far as we are aware, no statistics have been compiled which state the aggregate so loaned by the various insurance companies, mortgage loan societies, and private lenders. But an idea may be found of the extent of the business from the circumstance that the assets of the thirty-four companies forming the Land Mortgage Loan Companies' Association of the Province of Ontario amounted at the close of 1896 to no less than $397,148,610. These thirty-four companies have an aggregate paid-up capital of $27,775,000, and their loans are scattered over the farm lands of Ontario and Manitoba, and the factories, shops, residences in the towns and cities of both.

For several years past, up to the close of 1896, through depression in general mercantile business and through depreciation in farm lands of Ontario, unusual difficulty was experienced by many lenders on mortgage in obtaining regular payment of interest and principal on their loans. In the City of Toronto and its suburbs, by reason of exaggerated land values occasioned by the "boom" of eight or ten years ago, numbers of properties had fallen into the hands of the mortgagees, which meant a large lock-up of capital in such properties, or the sale of them at a loss. This, while it affected a number of the larger Toronto loan companies, applied only indirectly, if at all, to the majority of the companies situated there and in London, Hamilton, Brantford, Guelph, and other places in Ontario.

Better conditions set in with the year 1897, when improvement in mercantile business, together with an abundant harvest and increased prices for field products, wrought a betterment in values of assets of all kinds, caused brisk remittances of interest and principal, and made a market for lands and buildings that had been for some years unrealizable. This welcome change for the better will doubtless be reflected in the statements of Ontario loan companies, whose annual meetings are now beginning to be held. That the great bulk of the four hundred millions mentioned above as loaned on Ontario and Manitoba properties, is safely loaned, is a matter upon which all well-informed financial men are agreed. And that the era of increased prosperity on which the country has now entered, will gradually effect a betterment of the comparatively small aggregate of locked-up loans, is also reasonably sure.

In a very sensible review of the mortgage lending field of Ontario and Manitoba, made on Wednesday by the president of the Canada Landed and National Investment Company, some statements are made which merit attention. In the course of this Mr. Blaikie says pointedly—and he is a man who weighs his words—that "this Company's experience with farm loans in Ontario has been extensive, long continued [nearly forty years] and most satisfactory. No better securities could be obtained than most of the farm loans this company has in Ontario." And he makes reference to the change for the better gradually taking place in the methods of farming in the province, a matter of no small amount to lenders on mortgage, as well as affecting deeply the general prosperity of the people. Further, he says, there has never been in the history of the company less past due interest than at the present time. This is very strong testimony to the improved state of things among farmers and other borrowers. We consider it likely, from enquiries we have made, that every loan company or other lender can give testimony on this point, if not as strong as the above, yet very satisfactory as to the improvement.

But why are the most of the quoted loan society shares so low, as compared with bank shares or other securities? Largely because investors have been made timid by what they hear of losses through the "boom" investments of some prominent land companies, which have reflected severely on loan companies proper, and by recent revelations of mismanagement and dishonesty in the conduct of minor lending societies. Very possibly the extent of both these defects has been exaggerated; but also, not unnaturally, in such cases, the innocent, in either respect, suffers with the guilty.

The reports of the Ontario loan companies for 1897 will be scanned with more than usual interest. Evidences of faulty book-keeping, indications of hiding losses or juggling with figures, will be sought out with great keenness—and very properly. The utmost frankness of statement and clearness of detail is the best policy in times when there is apprehension in the mind of investors. The reports of auditors, too, will be read with care, to discover whether they contain anything more than stereotyped phrases, and whether the auditors have had the courage, when they found anything questionable in policy or method, to say so. We trust it may nowhere else be found that the fatuous and fatal custom of the Farmers' Loan Company prevails, of crediting interest regularly on loans upon properties fallen into the company's hands and vacant. The policy of making an entire separation of active from dormant loans, is one alike commended by prudence and good book-keeping.

SIX MONTHS' TRADE.

The trade returns for the six months ending 31st December, 1897, indicate a very satisfactory condition of commerce in the Dominion. Not only has Canada produced a larger quantity of goods for export, shipping abroad commodities to the value of $99,673,000, as against $76,886,000 in the same period last year, but we have been able to purchase more freely of the products of foreigners, importing goods valued at $52,701,000, as against $58,102,000 in the similar six months of 1896. Of the imports, $34,350,000 were dutiable, while $25,613,000 were free, as against $31,989,000 dutiable goods and $21,634,000 free goods in 1896. The imports of coin and bullion were smaller than those of 1896, amounting to $2,732,000 in comparison with $4,478,000. The exports of the period may be classified and compared with those of 1896 as follows:

	1897.	1896.
Minerals	$7,656,000	$5,314,000
Fish	7,100,000	7,230,000
Animals and produce	32,467,000	25,950,000
Forest	19,767,000	18,762,000
Agriculture	26,771,000	14,247,000
Manufactures	5,736,000	5,132,000
Miscellaneous	174,000	248,000
Total	$99,673,000	$76,886,000
Produce of Canada	89,779,000	69,911,000
Coin and bullion	987,000	3,212,000

The principal source of increased export trade has been agriculture, while shipments of animals and their produce has also brought larger revenues into the country. Activity in mining regions has led to an increase of more than $2,300,000 in the value of our exports. Canadian manufacturers have done little more than hold their own in foreign markets. This is not wholly unsatisfactory, as in some cases a decline in the exportation of manufactured products has been caused by the improved condition of the home markets and the better prices realized here.

The record of the month of December has been in keeping with this excellent record. We give our usual comparative list of articles imported:

PRINCIPAL IMPORTS.

	Dec., 1896.	Dec., 1897.
Cottons, including cloths and thread	$352,124	$497,477
Cotton, waste and raw (free)	366,417	648,305
Fancy goods	96,831	94,697
Hats, caps and bonnets	31,375	31,826
Silk goods	102,543	135,788
Woolens, cloths, carpets, yarns, knit goods	353,910	476,440
Wool (free)	110,072	204,836
Furs and manufactures	17,287	20,482
Books and pamphlets	86,431	101,530
Breadstuffs, grain, flour and meal	83,882	85,705
Coal, bituminous	403,202	499,929
" anthracite (free)	333,059	418,436
Drugs and medicines	75,702	96,659
Earthenware	44,589	50,923
Metals and manufactures	26,832	46,393
" (free)	165,644	286,058
Iron and steel manufactures	584,387	874,786
Leather and manufactures	116,396	157,970
Oil and paints	138,021	158,479
India rubber and gutta percha	18,616	24,808
Provisions	53,613	84,297
Sugar	315,551	323,516

The exports of December, 1897, amounted to $17,022,331, and of this amount $14,977,002 was the value of produce of Canada. In December, 1896, $11,156,145 was the value of the total exports and $9,191,660 the value of the Canadian produce sent abroad. If the six months' trade in the fiscal year remaining unrecorded make as good a showing, 1896 97 will be a banner year in Canadian trade.

THE WOOLEN GOODS TRADE.

There has been an active movement in woolen goods during the past six months. The daily press asserted this week that the Almonte mills, which have been closed for some time, were again running on full time, but as a matter of fact they have been busily employed for months past. The " boom " in Canadian gold mining regions has been of considerable assistance to our woolen manufacturers. Several mills have turned their best energies to the preparation of " Mackinac " cloth, a blanket material which the lumbermen have been accustomed to use to make clothing. This cloth is being made by different mills, at Brantford, Toronto, Waterloo, and other centres of production.

The greater activity of trade does not appear to have affected Eastern Canada as it has the West. Reports from the Maritime Provinces differ in opinion as to the condition of trade, but on the whole it may be said no marked improvement has taken place. In Quebec business generally is on the mend, while Ontario conditions are much better than they were a year ago. The principal gains in the industry have been made, however, in the trade of Manitoba, the North-West Territories and British Columbia. The good wheat harvest, combined with the gold finds, has had the effect of extending the consumptive demand for manufactured products.

For the spring trade Canadian makers of tweeds have prepared an excellent range of goods. Green shades are, perhaps, first in popularity, while browns stand high in the opinion of salesmen as likely to be the " correct thing " next summer. In patterns, checks and stripes are both popular. The manufacturers have prepared different lines in the form of a single shade and three different patterns, which gives the retailer a wide range of selection. The mill agents are already beginning to talk of fall business, and are showing their samples to the wholesale houses. The patterns for the autumn are not unlike those for spring, but the shades are, as was to be expected, somewhat darker.

Whip cord cloth is as popular as ever and several new features shown this year will doubtless result in an increase in its consumption. For men's light overcoats a pattern with a herring-bone effect in brown and olive mixes has taken well with the trade. A whip cord with a fancy back, thus obviating the need for lining, has a good appearance. In several cases the more expensive goods have been brought down to a popular price by economy in the manufacture of the back of the cloth.

There has been a decided tendency in the trade of late to follow the fashion in the United States and make cloths for men's and women's use more nearly alike, the result, no doubt, of the increased attention given to athletics and out-door exercise by women. A few cloths are shown which can be used for either sex, while in numerous instances, the only difference is that the cloth for women's garments has a softer back and is more pliable than that for men.

HALIFAX BOARD OF TRADE.

The annual meeting of the Halifax Board of Trade was held on Wednesday, January 19th, when an unusually large number of members were present. The president, Mr. G. J. Troop, occupied the chair. The annual report was read by Mr. Creed, the secretary, and after the reading of each clause, an opportunity was given anyone to make remarks. There was, however, but little discussion.

Many topics were dealt with in the report, which was very lengthy. First, as to the tariff, the regret was expresssed that " the administration of the customs law, instead of being simplified, has of late become more complicated and more annoying to the importer." West India trade, the council also regretted, was most unsatisfactory and unprofitable during the past year, and the residents of those islands in a condition of despair. Canada does not do her share, it was pointed out, in supplying field produce to these islands, while the United States gets the bulk of the trade. The board had asked Government to send out Mr. J. A. Chipman, as commercial agent, but nothing had been done about it, and they think "the Upper Provinces, who would be the chief beneficiaries, have not supplemented our effort in this direction, and seem wholly indifferent to its importance." The action of Parliament in this West India trade connection is looked forward to with anxiety by the board.

Other subjects dealt with are marine insurance, the fast line service, the Provincial Exhibition, the Halifax and Guysboro Railway, the West India cable. As to the last, Mr. W. R. Pickford wanted the company asked to reduce the rate to Bermuda. The rate to Jamaica is 50 cents a word, and 75 to Bermuda. Mr. Wm. Roche spoke upon the reconstruction of Government works in the harbor, as to which the Haligonians are still living in hope. Dr. Farrell had something to say about the winter port. Then came the election of officers, which resulted as follows :

President—George Mitchell, M.P.P.

Vice-Presidents—W. A. Black and J. E. DeWolf.

Treasurer—H. G. Bauld.

Arbitrators—J. C. Mackintosh A. M. Payne, H. G. Bauld, A. E. Jones, J. E. DeWolf, L. G. Power, I. Mathers, H. L. Chipman, J. A. Chipman, George E. Boak, Geoffrey Morrow, W. A. Black.

Auditors—George E. Faulkner and E. G. Kenny.

Council—George E. Boak, Geo. S. Campbell, H. L. Chipman, J. A. Chipman, M. Dwyer, Geo. E. Faulkner, E. Farrell, James Hall, J. H. Hugill, A. E Jones, E. G. Kenney, I. H. Mathers, Jas. Morrow, A. Stephen, George Troop.

The mayor of the city, Mr. Stephen, moved, seconded by Mr. Roche, a vote of thanks to the retiring president for his untiring exertions on behalf of the commerce of the city. Mr. Mitchell, in putting the motion, paid a high tribute to the labors of Mr. Troop. The community owe him a debt of gratitude.

KENTVILLE BOARD OF TRADE.

On the evening of Monday, January 17th, the board of trade held its annual meeting at Kentville, Nova Scotia. Mr. M. G. DeWolfe was the retiring president, and his report gave a synopsis of the work done by the board in 1897. Among the subjects discussed had been sanitary matters, sewerage, tourist travel, better telegraphic accommodation, a town park, and fire insurance. The president repeated what he had said last year about the Maritime Board of Trade. That board, he thinks, is going to be a power in the Lower Provinces, and, made up as it is of the best elements of each province, and free from political influence, it can do effective work. Officers for the ensuing year were chosen as under :

President—C. S. Nixon.
Vice-President—C. L. Dodge.
Secretary—G. E. Calkin.

NORTH AMERICAN LIFE

The following synopsis of its business for the year ended December 31st, 1897, is submitted by the North American Life Assurance Company:—

New policies issued amounted to	$3,556,024 00
Cash income (interest and premiums)	699,550 49
Total assets..................................	2,773,177 22
Net surplus after providing for all liabilities ..	427,121 33
The reserve fund stands at	2,245,920 00
The total insurance in force is................	18,945,878 00

The assets of the company are in excellent shape and well looked after—indicated by the increase in cash income from interest, etc., showing an increase of $15,092, while the interest and rents due and accrued at the end of the year show, we are told, a decrease. Notwithstanding that $271,000 was paid to policyholders during the year, the company is able to show an addition of more than a quarter of a million to reserve. The annuity and reserve funds now amount to the large sum of $2,245,920, a handsome showing.

We referred last year to the company's marked earning-power as shown in the favorable results attained under its investment policies. And there is still further to be noted, the "clean" character of its assets. The table submitted in Hon. Mr. Allan's speech, showing details of the assets and the percentage of each class among them, presents this in an interesting way. The North American Life has in various respects made an enviable name for itself. As a progressive, carefully managed and sound company, it is entitled to rank high, and this year it is able to show a noteworthy share of the aggregate increase of business by Canadian companies. The company deserves congratulation on having secured, in its new premises on King St. West, offices which are difficult to surpass in beauty, modernness and convenience.

CANADA LANDED AND NATIONAL INVESTMENT COMPANY.

In calling attention to the statement of this company's business for 1897, at the annual meeting, the president asks the question: "Where did the money come from to pay all expenses, all interest on debentures, and the dividends?" and answers it thus: "Not by bringing into the balance sheet amounts of interest that may never be collected, but solely from money actually received for interest on the company's liquid, active, investments." The point is an important one, for we have seen of late what harm may come of treating dormant assets of a loan company as if they were still revenue-producing. Another point to be borne in mind is what is said by the same speaker about Ontario farm loans and the way interest is paid on them; it must be gratifying to the authorities to be able to say that they have nothing to lament in the way of "boom" loans. Mention is made in the report of pending negotiations with the Manitoba and North-West Loan Co., some particulars of which we gave last week. The business of the Canada Landed Co. appears to be in very satisfactory shape.

CENTRAL CANADA LOAN AND SAVINGS COMPANY.

The management of this company, apparently, recognizes that the present is a time when institutions of the kind do well to offer for the satisfaction of bondholders and depositors evidences of preparedness to meet obligations promptly. It is agreeable to find, therefore, that so large a sum as $961,977 of the assets of the Canada Central consists of Government and municipal bonds and call loans, realizable at a week's notice; an amount exceeding the total deposits and equal to a quarter of its liabilities to the public.

A paragraph of the president's address, referring to the apprehensions that may be caused by the unfortunate recent experience of one or two Ontario concerns, recalls the fact that there are good and bad investments in all countries; and "the experience of British investors in Canadian loan company debentures will compare favorably with their investments at home." This is a manly stand to take, and it will be well if other companies of a like kind show a similar disposition to meet the possible views of cautious investors. This company shows earnings, vouched for by five men as auditors well known in Ontario, sufficient to pay six per cent. dividend, to add $10,000 to reserve and to carry a respectable sum forward.

—Niagara Falls, Ontario, rejoices in the presence of another chartered bank, for the Bank of Hamilton has just opened a branch in that town, under the management of Mr. H. H. O'Reilly, formerly manager of the same bank at Owen Sound and at Orangeville.

FIRE AND LIFE ASSURANCE STATEMENTS.

A very satisfactory year's business is reported by the Ontario Mutual Life Company. The new business written was nearly a quarter million greater than last year, and the total in force shows a gain of nearly a million and a half. The income of 1897 was $815,299, and the reserve fund is increased from $3,177,000 last year to $3,487,000 now. This popular company has a valuable staff of agents scattered over the country, whose efforts, they may always depend, will be appreciated by head office.

Thirteen millions of dollars returned to policyholders in thirty-four years, and twenty-one millions of dollars paid on accident or death claims in the same period. This is the wonderful record of the Travelers' Insurance Company. But its business is enormous, for it had at the close of last year $91,882,000 of life business at risk, more than $14 500,000 of which was written during the year. And it has paid, since it began in 1863, no fewer than 15,611 claims under accident policies. As to the company's resources, it has assets of $22,866,000 as against liabilities of $19,146,000 so that it has $3,722,000 in what it terms "Excess security to Policyholders."

With a capital of three millions, total assets exceeding ten millions, and a net surplus of more than two and a half millions, the Insurance Company of North America presents to those desiring fire or marine insurance the inviting feature of abundant strength, while to this may be added the prestige of age and success, for it is more than a hundred years old and has built up large reserves. The result of last year's business, one of large volume, was to increase the total assets by $405,000; and the net surplus by $282,000, which ought to be considered eminently satisfactory. Under the management of Mr. Robert Hampson, the company has deservedly secured an excellent foot-hold in Canada.

An income of three and a half million dollars per month is something that appeals to the imagination, for it is difficult to grasp the fact. Yet this, or to state it precisely, $41,793,084 last year, is the figure of income shown by that remarkable company, the New York Life. The receipts from premiums were $32,980,960, and from interest, etc., $8,812,124, both items showing a gain over 1896. Assets increased from a total of $187,176,406, a year ago, to $200,694.440 now. The average rate of earning upon the company's assets is stated at 4.85 per cent., and on a 3 per cent. basis a surplus of $17,176,105, or at 4 per cent., $33,930,503. It is agreeable to find a considerable reduction in expenses announced, keen as the competition for life business is. This great company is evidently managed with uncommon energy and experienced skill.

The year 1810 seems a long time ago—that was the year of the founding of the Hartford Fire Insurance Company. During all the years since this company has gone on doing fire underwriting. It has a fine record for paying its losses, earning dividends for its shareholders, and adding to its surplus. Indeed, the name of the Hartford is synonymous with successful underwriting and honorable administration. The business of 1897 is no exception to that of a number of recent years in that it shows a gain of $814,931 in assets and of $985,404 in net surplus. Total assets now reach $10,819,620; the net surplus has gone up to $4,249,796; the reinsurance reserve is $4,809,084, and the reserve for unpaid claims $510,749. When the $1,250,000 of cash capital is added to net surplus the surplus to policy-holders amounts to $5,499,796, a sum equal to more than half the entire assets. The success of the Hartford has not been accidental, but the result of prudence and skill. For sixty years it has done business in Canada, and its history has been one of consistent growth in reputation as in strength.

DELIBERATIONS OF MINING ENGINEERS.

On Tuesday, 18th January, and the following day, the British Columbia Association of Mining Engineers held its meeting in Vancouver. There was a good attendance, both Canadian and American engineers being among those assembled. Mr. B. T. A. Bell, of the Canadian Federated Mining Institute, was present from Ottawa, and Mr. Blakemore was also present from Quebec Province. Special fare arrangements were made by the Canadian Pacific Railway in consideration of the importance of the occasion, which was a session of the Canadian Federated Institute, as well as of the British Columbia Association.

Among the papers prepared for submission on the occasion was one on the interesting subject of "Mining Law and its Application to Mines and Mining Districts," by Mr. Frank C. Loring, M.E., of Rossland. Another was upon "Mining Machinery in the Slocan," by Mr. Howard West, A.R.S.M., New Denver. A paper entitled "Notes on Some West Kootenay Ore Bodies," by Mr. J. C. Gwillim, B.A. Sc., M.E., Slocan City, was submitted; also, "Odd Notes on Mining," by Mr. A. H. Holdich, of Nelson.

A paper which attracted marked attention was one by Mr. R. R. Hedley, metallurgist, of the Hall mines smelter, whose subject was the smelting possibilities of British Columbia. In this paper Mr. Hedley remarked that no one knew what the Rossland mines were capable of producing. Wild statements had been made on this head, but he believed that a 500-ton plant could be erected, and run so economically that it could make a smelting rate of $7 per ton f.o.b. In his opinion the Rossland district would soon have to increase its capacity. If these ores will smelt a concentration of 10 to 1, using twelve and a half per cent. coke, and ten per cent. barren flux, that figure will leave a profit to the smelter. He considered, however, the possibilities for successful smelting were far greater in the Boundary Creek district, where the variety of ores was greater, and a perfectly self-fluxing ore is obtainable.

Addresses were delivered by Mr. B. T. A. Bell and Mr. E. Blakemore, representing mining associations of Eastern Canada. Both these gentlemen dwelt upon the remarkable mineral resources of British Columbia, and the necessity of making them known to the world outside.

FOR GROCERS AND PROVISION DEALERS.

There are, according to an American exchange, 1,643 wholesale grocers in the United States, of whom Greater New York has 83; Philadelphia, 59; Chicago, 21; Boston and St. Louis, 33 each; and Pittsburg 22.

Cable advices from Italy report a further advance of 29 lire per hundred kilogrammes in the price of fine grades of olive oil, supplies of which are said to be very scarce. On off grades, which are in full supply, prices are reported to be unsettled in the primary market.

An Educational Feature—"Nope," said Mr. Rockwell, as he wiped his glasses, "I'm afraid John's college education ain't goin' to do him much good, after all." "Why, Silas," his anxious wife cried, "what makes you say that?" "He admitted in the store yesterday that there was still a few things I knew more about than him."—*Cleveland Leader*.

The Buenos Ayres *Standard* of December 6th quotes the vice-president of the Central Locust Extinction Committee as expressing satisfaction with the harvest and the extermination of the locusts. A proposition to levy ten cents per quintal has been made for the purpose of carrying on the work of locust extinction. This on the harvest of 1,500,000 tons, as estimated, would give about $1,750,000.

The Lake of the Woods Milling Company is preparing a shipment of flour for the Klondyke from Portage la Prairie. The first consignment consisting of three carloads, and in view of the many transhipments en route, the flour is packed in double sacks, made especially for the trade. The shipment now in preparation will be forwarded in a few days to Vancouver, at which port it will be taken on board steamers sailing to Skagway and points from which supplies are carried into the interior.

The Canadian Canners' Association, consisting of members of the fruit and vegetable canning trade, opened their annual meeting at the Walker House, Toronto, on Tuesday last. The president's address was read and the election of officers for the coming year gone on with. Mr. W. A. Ferguson, Delhi, was re-elected president. The other officers are: Vice-president, W. I. Matthews, Lakeport; secretary-treasurer, W. C. Breckenridge, Hamilton. Executive Committee—W. B. Innes, Simcoe; H. J. Matthews; W. Coulter, Picton; A. C. Millar, Picton; H. D. Marshall, Aylmer. Auditors—Wm. Millar, Port Hope; W. H. Matthews, Clinton. The meeting was continued on Wednesday, when various matters of interest to the trade were discussed.

Mr. Derbyshire, of Brockville, says he has carefully estimated our make of butter and cheese for all of 1897 and is sure dairymen in this country will realize twenty million dollars, or four million dollars more than last year. The exports from Montreal for May 1 to Nov. 20, 1897, were 220,200 packages of butter, against 157,321 in 1896. During the same period we exported 2,100,000 boxes of cheese, or an increase of 370,000 over 1896, a gain in money of $2,500,000, and for butter and cheese together $3,250,000 more than during the same period in 1896. Not all of this quantity was made in Canada, but we must remember that there are other avenues of outlet for the products of the Canadian farmer than through the port of Montreal.

Under date of January 4th, D. Pasqua writes from Patras, Greece, regarding the situation in currants there: "We have had a very active market during December, and prices have kept strengthening all the while. The shipments of the month are as follows:

	—Season to Dec. 31— 1897-98. Tons.	1896-97. Tons.	Season to end July, 1896-7. Tons.
To England	49,305	42,400	54 700
" United States and Canada	9,910	13,185	14,065
" Australia	2,800	2,370	2,775
" Holland, Belgium, Germany and Austria	18,765	23,500	42,200
" Russia	....	19,321	19,321
" France	895	3,054	6.223
" Sundries	300	900	1,200
Total	81,975	104,730	140,484

In the above list are not included about 5,000 tons shipped per steamers "Ardmellie" for London, "Algerian" for Liverpool, "Powhatan" for New York, "Olivia" and "Roma" for Holland and Germany. The stocks in Greece on the first of January were reported not to exceed 17,000 tons. Owing to the reduced stocks, the pretensions of holders are daily accentuated. The good provincial fruit is virtually exhausted, and the 2,000 tons now left in Calamatta and district will be hardly sufficient to cover the retention quantity.

FREDERICTON BOARD OF TRADE.

There was a good attendance at the annual meeting of the Fredericton Board of Trade on January 17th. Discussion was had of the proposed transfer of the Canada Eastern Railway to the Dominion Government, and it was suggested that a delegation representing the business men of the city should proceed to Ottawa and lay the matter before the Government. A delegation was appointed, however, to see Mr. Alexander Gibson and find out how far negotiations had gone for the purchase of the road, before going to Ottawa.

The election of officers for the ensuing year resulted as follows: President, Allen H. Randolph; vice-president, C. Fred Chestnut; secretary, J. W. McCready; treasurer, M. Tennant; tourist committee, C. F. Chestnut, F. B. Edgecombe, W. Vanwart, F. B. Coleman and J. S. Neille.

CLEARING-HOUSE FIGURES.

The following are the figures of the Canadian clearing houses for the week ended with Thursday, January 27th, 1898, compared with those of the previous week:

CLEARINGS.	Jan. 27th, 1898.	Jan. 20th, 1898.
Montreal	$13,285,791	$14,681,555
Toronto	7,807,617	8,285,155
Winnipeg	1,240,440	1,434,080
Halifax	1,016,205	1,072,195
Hamilton	548,374	615,906
St. John	511,103	551,607
	$24;409,529	$26,640,498

Aggregate balances this week, $3,375,198; last week, $3,184,925.

ANSWERS TO ENQUIRERS.

T. A. LYTLE & Co., City, writes:—"What should we do with a cheque for thirteen cents (13 cts.), amount of a first and final dividend, received to-day from the assignee of an estate? The cheque is drawn on a bank in Barrie, lowest exchange on which is fifteen cents (15 cts).'

[We should say, send the cheque back. There is no sense in the assignee mailing cheques, the discount on which absorbs their face value. He could have sent you the amount in stamps, or could have bought a Post-Office order at the cost of two cents.]

ST. CATHARINES.—"We do not know in what other city that mining stock may be listed. It was not listed here. About the other company, the "Table of Stock Transactions for 1897," published in THE MONETARY TIMES of 7th January, shows how its shares dropped from 90 in August to 50 in October. Some good judges think it still worth 5

—If what a reporter of that paper learned last week be true, as he states it in the *Free Press*, Winnipeg is to be tempted by some cheap old-country money. Here is the story: "A gentleman who has long been a resident of the city, and has considerable property here, received word this week from gentlemen in the old country that they were prepared to lend $500,000 on Main street property, situated between Grahame avenue and the city hall, at 4½ per cent. interest. Two city churches have also been asked to transfer their loans, now bearing 6 per cent., to the new representatives, and on behalf of one of these—Knox church—the managers last evening decided to take prompt action in the matter." Old country people who will lend money on churches at 4½ per cent. are very likely, however, to exact security other than stone and lime. We should like to know the terms on which this 4½ per cent. money is to be had.

Meetings.

CANADA LANDED AND NATIONAL INVESTMENT COMPANY.

The annual general meeting of the shareholders of this company was held in the company's office, 23 Toronto street, Toronto, on Wednesday, 26th January, 1898, at 12 o'clock noon, the following being present:

John L. Blaikie, President; John Hoskin, Q.C., LL.D., Vice-President; J. Kerr Osborne, Hon. James Young, A. R. Creelman, Q.C., John S. Playfair, Frank Turner, C.E., Newman Silverthorn, Rev. Robert C. Moffatt, D. D., Henry Pellatt, W. J. Robertson, M. Shewan, E. J. Hobson, James Mitchell, Geo. W. Lewis, Alfred Hoskin, Q.C., James Webster, C. C. Baines, John Stark, Alex. Smith, G Tower Fergusson, E. Saunders, Geo. Robinson, Geo. W. Blaikie, Miss I. Dickson, F. W. Harcourt, Geo. Porter, B. E. Bull, Larratt W. Smith, Q.C., D.C.L.

The president, Jno. L. Blaikie, Esq., having been called to the chair, the manager, Mr. Rutherford, acting as secretary, the report and balance sheet was read.

REPORT.

The directors have much pleasure in laying before the shareholders a statement of the company's accounts for the year ending 31st December, 1897.

The gross receipts for the year amount to	$213,497 45
After deducting cost of management, interest on debenture bonds and all other charges, there remains a net profit of	$ 72,940 99
An interim dividend of three per cent. was paid in June last, and a further dividend of three per cent. on the 31st ult. (making six per cent. for the year), both free of income tax. These dividends will absorb	60,240 00
and leave a surplus of	$12,700 99

The directors recommend that this surplus be transferred to the contingent fund.

The balance at the credit of this fund, after charging up losses on properties sold during the year, is $19,926 66.

The reserve fund is $350,000.

A decided improvement has taken place during the past year in the values of farming lands, both in the Province of Ontario and Manitoba. The same remark applies to property in the city of Toronto. The company's operations are confined to the three fields mentioned.

The books and accounts, as well as the company's securities, have been duly audited by the auditors, whose certificate is appended thereto.

JOHN L. BLAIKIE,
President.

Toronto, 15th January, 1898.

ANDREW RUTHERFORD, Manager.

AUDITORS' CERTIFICATE.

We hereby certify that we have examined the several accounts of the Canada Landed and National Investment Company (Limited), for the year 1897, and have found them to be correctly stated, and that the balance sheet exhibits a correct view of the company's affairs at 31st December, 1897. We have also examined the securities and found them in perfect order.

G. TOWER FERGUSSON, } Auditors.
H. W. WILLIAMSON, }

Toronto, 14th January, 1898.

In moving the adoption of the report, the chairman said: "I have pleasure in moving that the annual report and balance sheet now submitted for your approval be adopted."

To some important and interesting particulars I avail myself of this opportunity to invite your attention.

After paying all expenses, leaving nothing to be carried forward as a charge to next year, also interest on the debentures of the company, and two half-yearly dividends of 6 per cent. per annum, $12,700 has been carried to Contingent account. The balance remaining at the credit of this fund after charging losses for the year is $19,926.66, leaving $350,000 at the credit of Reserve Fund.

Such results should be, and I believe will be, satisfactory to the shareholders.

Where did the money come from to pay all expenses, all interest on debentures, and the dividends? The answer is, not by bringing into the balance sheet amounts of interest that may never be collected, but solely from money actually received for interest on the company's liquid, active, investments. This fact I would like to emphasize, as it is all important to conduct the transactions of the company upon sound principles, and no one can dispute the soundness of the policy just mentioned.

This company, like all companies lending money over a long period of years, has of course property on its hands, but that is kept in a separate account, all income derived therefrom being credited to separate income account, and against this income is charged all taxes and disbursements of every nature connected with that property. None of the income from this source is taken into Profit and Loss account. Any surplus at the end of each year is credited, any shortage, debited to the Contingent fund.

Another extremely gratifying feature of the year's business is the way in which borrowers have paid the interest upon their loans. A widespread impression prevails that loan companies have a very large and ever-increasing amount of past due interest. So far as this company is concerned, that is not the case. On the contrary, there has never been in the whole history of the company, less past due interest than at the present time.

You will observe that at the 31st of December the amount of interest past due and accrued on the current loans of the company was $140,507.05, but since then a considerable proportion of that has been paid.

I have been led to speak of these particulars, not only because they are of interest to the shareholders of this company, and to all who are interested in its prosperity, but also because of the failure of the Farmers Loan and Savings Company, in the case of which the conduct of its affairs has been carried on with an apparent disregard of all sound business principles, and in such ways as to make failure inevitable. In contrast with that company, I can confidently affirm that your company is conducted on most conservative lines, the books and accounts are kept in a most perfect manner, and every department of the business is well and firmly kept in hand.

The Canadian loan companies have been borrowing continuously in Great Britain for nearly forty years—this company being the first to issue sterling debentures, which were placed on the London market in the year 1859—and during all these years the British investor has not lost a dollar through any such investment. If the creditors of the Farmers Loan company are not paid in full, it will be solely owing to the unique mismanagement of that concern, and not from causes likely to affect the credit of loan companies generally.

From time to time we meet with shareholders who enquire, and you permanently go on paying 6 per cent. dividends? The answer to that question is, dividends must entirely depend upon the profits of the company, and as long as our profits will warrant the payment of 6 per cent., that will be paid, but I have no hesitation in stating that no higher dividend will be declared than can be clearly earned, and no interest of a doubtful kind will be carried into a balance sheet to make things look better than they really are.

This course will, I believe, commend itself to the shareholders, as it will to debenture holders, and to all intelligent business men everywhere.

In connection with the question of dividends, this is an opportune time for me to refer to what many of you may have seen in the newspapers, viz.: that negotiations have been going on with the Manitoba and North-West Loan Company, with a view to that company being absorbed by this company. Other companies will also consider the question of absorbing the Manitoba and North-West Loan Company.

Of one thing you may rest assured, and that is, that nothing will be carried out until after a careful scrutiny of the assets of the Manitoba Company, nor until it is made plainly a safe and profitable course for this company, nor until a special meeting of our shareholders is called to consider the matter, and has voted in favor of it.

I may here say that very small companies, with lending rates for money steadily tending downwards, find profits so diminished that old-time dividends cannot long be maintained.

This company is not reckoned in the class of small ones, yet were the absorption of the Manitoba and North-West Loan Company to take place, it would materially increase our earning powers, and thereby render the continuance of the present dividend more assured.

A glance at the field of our company's operations may not be out of place. As you are all doubtless aware, our loans are made in Ontario, in Manitoba and in the city of Toronto. Higher rates of interest can be obtained in the North-West Territories, in any of the new and rougher sections of Ontario and many districts of British Columbia, but your directors have, for what appeared to them sufficient reasons, and having regard to ultimate safety, rather than an apparent present gain, preferred to confine their operations to the more settled districts of Ontario, to Manitoba proper and to this city.

The crops in Manitoba the past year

yielded a rich reward to the farmers, very many of them having realized handsome profits as a result of their industry and skill. That there is a great future for that splendid wheat growing and dairying country, no thoughtful man can doubt; and the prospects are brightened by a valuable market for all their products being opened up in British Columbia, where a large and rapidly increasing population have to be constantly supplied.

In Manitoba proper your company has some most satisfactory and profitable business.

Some people are inclined to look with disfavor on farm loans in Ontario, but experience in such matters must always count for a great deal more than mere prejudice or fancy. The company's experience with farm loans in Ontario has been extensive, has been long continued, and has been most satisfactory. No better securities could be obtained than most of the farm loans this Company has in Ontario. A great change for the better has been gradually taking place with respect to the methods of farming in Ontario. What has contributed not a little to this, is the fact, that for some years several gentlemen have, during the winter months, been employed by the Government in delivering lectures to farmers in the various sections of the country. These gentlemen being thoroughly practical and intelligent, have been successful in convincing very many, that instead of incessantly raising crops of grain or hay, and selling nearly everything grown upon the land, thus impoverishing and exhausting it; it is wiser and more profitable to convert much of what they grow into beef, mutton, bacon or dairy products. Hence very many of the farmers of this grand Province are prosperous men, and by industry and improved methods of husbandry, by skill in cattle-raising and feeding, and by means of creameries and cheese-making, are steadily bettering their position and prospects.

With respect to this city I may say that a large proportion of your company's business is excellent. The boom of some years ago was disastrous to many men, but your company fortunately was not carried away by the excitement of that period, nor induced to lend upon outside and suburban properties where much money has been lost, or locked up for long years to come.

I have great faith in the future of Toronto. Its population is again steadily on the increase, and will by reason of its large commercial and manufacturing interests, its educational and social advantages, continue to attract many families of all ranks to its borders, from all parts of the Dominion of Canada, which cannot fail to steady and increase the value of property in good situations.

It is extremely gratifying to be able to say that the credit of the company stands high in Britain and that no Canadian company borrows money there on more favorable terms.

Our agents in Edinburgh continue to represent us with their usual ability and good judgment.

CENTRAL CANADA LOAN AND SAVINGS CO., OF ONTARIO.

The fourteenth annual meeting of the shareholders of the Central Canada Loan & Saving's Company, of Ontario, was held at the Company's head office, 437 George St., Peterborough, on Wednesday, the 26th day of January, 1898, at 2 o'clock p.m.

The president, Hon. Geo. A. Cox, having taken the chair, Mr. E. R. Wood, Manager, was requested to act as secretary of the meeting.

After reading the notice convening the meeting, the secretary read the fourteenth annual report, and the accompanying financial statement.

REPORT.

The directors take pleasure in submitting herewith their fourteenth annual report and accounts for the year ending 31st December, 1897.

The gross earnings for the year amounted to $269,603.43, and after the payment of interest on debentures and deposits, and all expenses of management, there remained a net profit of $91,034.62, which has been appropriated as follows:

1st. In payment of four quarterly dividends of 1½ per cent. each (equal to 6 per cent. for the year) on the paid-up capital of $1,250,000....	$75,000 00
2nd. Transfer to the Reserve fund, increasing same to $345,000.....	10,000 00
3rd. Transfer to Contingent fund	6,034 62
	$91,034 62

The debentures, both currency and sterling, which matured during the year, were well renewed, and in all cases at a substantial reduction in the rate of interest carried. The deposits show a good increase since the last report, notwithstanding the reduced rate now paid by the company. In this connection it might be stated that the company has a large proportion of its assets in immediately convertible securities, among which are the following:

Dominion of Canada stock....	$245,219 16
Stocks and bonds of the Provinces of Canada....	350,580 55
City, township and school section securities...	51,271 33
Call loans on municipal and other bonds and stocks..	242,487 35
Cash on hand and in banks.. ..	72,418 88
	$961,977 27

The directors have great satisfaction in reporting that the cash received during the year for interest on investments was in excess of the gross earnings for the year, thus showing the satisfactory nature of the assets.

The books, accounts and securities have received the regular thorough audit and inspection by the auditors and inspection committee, as will be seen by the certificates attached to the financial statement.

Respectfully submitted,
GEO. A. COX,
President.

AUDITORS' CERTIFICATES.

I hereby certify that I have carefully audited the books and accounts of the Central Canada Loan and Savings Company, at Peterborough, for the year ending 31st December, 1897. The postings and balances of the company's ledgers have been examined and found correct, and all disbursements have been satisfactorily vouched for.

WM. MANSON.

Peterborough, 17th January, 1898.

I hereby certify that I have carefully audited the books and accounts of the Central Canada Loan and Savings Company at Winnipeg, for the year ending 31st December, 1897. The postings and balances of the company's ledgers have been examined and found correct, and all disbursements have been satisfactorily vouched for.

F. H. MATHEWSON.

Winnipeg, 31st December, 1897.

I hereby certify that I have carefully audited the books and accounts of the Central Canada Loan and Savings Company, at Toronto, for the year ending 31st December, 1897. All disbursements have been satisfactorily vouched for, and the postings and balances of the company's ledgers have been examined and found correct, and in accordance with the above statements.

HENRY M. PELLATT.

Toronto, 20th January, 1898.

INSPECTION COMMITTEE'S CERTIFICATE.

We hereby certify that we have made a careful examination of the securities of the Central Canada Loan and Savings Company of Ontario, at Peterborough, Toronto and Winnipeg, respectively, and that we have checked the same with the mortgage registers and find them correct and in accordance therewith.

RICHARD HALL,
F. C. TAYLOR,
F. H. MATHEWSON,
Inspection Committee.

Toronto, 21st January, 1898.

PROCEEDINGS OF THE FOURTEENTH ANNUAL GENERAL MEETING.

The president, in moving the adoption of the report, said:

Gentlemen,—In moving the adoption of the report that has for some days been in the hands of the shareholders, I do not think I can do better than let the figures speak for themselves. In preparing the statement for the past year the securities have been scrutinized with the usual care, and the directors have felt warranted in making an addition of $10,000 to the Reserve fund, after the payment of $75,000 in dividends to the shareholders. This I trust will be regarded as satisfactory.

I am able to repeat the statement made in our last annual report, that the actual cash payments for the year on account of interest upon investments exceeded the company's gross earnings for the year.

During the last four or five years

nearly all the financial, commercial and agricultural interests of the country have been passing through a very trying time, perhaps none more so upon the whole than our loan companies, because of their more direct interest in the agricultural productions of the country, where low prices for produce and consequent shrinkage in values of land have prevailed. It should therefore, I think, be gratifying that during this quinquennium the directors have been enabled from the net profits to pay a six per cent. dividend each year, and in addition to increase the Reserve fund from $290,000 to $345,000, equal to $11,000 per annum, and I am pleased to be able to congratulate the shareholders, depositors, and debenture-holders upon having emerged from this period of depression in a stronger position than that in which we entered it. There is now unmistakable evidence upon every hand that the country has entered upon a new era of prosperity, and we fully expect to participate in that prosperity.

The unfortunate experience of one or two of the smaller companies has caused apprehension in the minds of some as to the effect it may have upon the credit of loan companies generally who place their debentures in Great Britain. I do not anticipate any difficulty in that respect. There are good and bad investments in every country and the experience of British investors in the debentures of Canadian loan companies during the last quarter of a century will compare favorably with their investments at home.

A more perplexing problem with all our financial institutions is where best to find profitable investment for the rapid accumulation of funds in the hands of our life companies, loan companies, banks and trust companies. So far as this company is concerned it will be seen that we have been directing our attention with considerable advantage to the purchase of Dominion and provincial Government bonds, municipal and other high-class securities, trusting to the advancing value of securities of this description to compensate for the lower rate of interest they carry.

I deeply regret having to record the death, since our last annual meeting, of Mr. Wm. Finlayson, of Glasgow, the senior member of the firm of Messrs. Finlayson & Auld, who have for so many years represented the company in Great Britain with so much satisfaction to the company and with so much credit to themselves. The surviving members of the firm, Messrs. MacKechnie and Auld, continue to represent the company, and we are under renewed obligations to them for the satisfactory manner in which they have done so during the past year.

In August last, Mr. F. G. Cox resigned his position as manager of the company to accept the position of managing director of the Imperial Life Assurance Company. The vacancy thus created was filled by the appointment of Mr. E. R. Wood, as manager, who has for many years, and with much satisfaction and advantage to the company, filled the position of secretary. The company's entire staff continue to discharge their duties most satisfactorily.

Before I submit for your approval the resolution adopting the report I shall be glad to answer any questions or supply any information desired by any shareholder present. If there are no such enquiries, I beg to move, seconded by Mr. Hall, the vice-president, the adoption of the report.

In seconding the resolution, Vice-President Hall said:

Gentlemen,—The steady solid growth of the company from the date of its organization in March, 1884, down to the present time, must, I am sure, be satisfactory to the shareholders. They have received six per cent. for every day that their monies have been in the hands of the company, and in addition to paying that rate a reserve fund of $345,000 has been accumulated, of which $150,000 is represented by premium paid on capital stock issued from time to time, and $195,000 by actual earnings. This latter amount is equal to over $14,000 for every year of the company's history. It will be remembered by many present that the advisability of paying a higher dividend than six per cent. has been discussed at various times, but the directors have always refused to do so, feeling that the accumulation of substantial reserve was more in the interests of the shareholders. Most of the original shareholders still retain their stock holdings, but those who have been obliged to sell out have reaped the benefit of the reserve by the increased premium brought by the stock.

I am pleased to be able to state that while the directors have had an eye to making profits for the shareholders they have not forgotten the interests of the depositors and debenture holders. They have entrusted their funds to the company at low rates of interest, and are entitled to the best possible security. With this in view the directors have invested largely in easily convertible securities in order that they might be prepared for any and every contingency. It will be noticed on reference to the report that the company has $961,977.27 in Dominion and Provincial Government and municipal securities and call loans, which is all practically cash, inasmuch as it could be turned into cash on a week's notice. This amount is in excess of the total amount of the company's deposits, and more than 25 per cent. of the total liabilities to the public. I venture to say that this feature of the report will be satisfactory and gratifying to all concerned, but especially to the depositors and debenture holders.

I have pleasure in seconding the resolution for the adoption of the report.

The usual votes of thanks were passed.

Auditors—Messrs. Wm. Manson, H. M. Pellatt and F. H. Mathewson were appointed auditors for 1898 at Peterborough, Toronto and Winnipeg, respectively.

Inspection Committee—Messrs. F. C. Taylor, Richard Hall, and F. H. Mathewson were appointed Inspection Committee fo 1898.

Dr. J. A. Fife and Geo. M. Roger having been appointed scrutineers, reported the following gentlemen elected as directors for the ensuing year: Hon. Geo. A. Cox and Messrs. Richard Hall, F. G. Cox, E. S. Vindin, F. C. Taylor, J. J. Kenny, Rev. J. Potts, D.D., Robert Jaffray, J. H. Housser, Wm. Mackenzie, A. A. Cox and Sir Thos. W. Taylor. The meeting then adjourned.

At a subsequent meeting of the directors the following officers were elected: President, Hon. Geo. A. Cox; Vice-Presidents, Richard Hall, and F. G. Cox.

NORTH AMERICAN LIFE.

The annual meeting of this company was held at its head office in Toronto, on January 25th. Mr. John L. Blaikie, president, was appointed chairman, and Mr. Wm. McCabe, secretary. The directors' report presented at the meeting, showed marked proofs of continued progress and solid prosperity in every leading branch of the company's business. Details of the substantial gains made by the company during the past year are more particularly referred to in the remarks of the president and report of the consulting actuary.

SUMMARY OF THE FINANCIAL STATEMENT AND BALANCE SHEET FOR THE YEAR ENDED DECEMBER 31ST, 1897.

Cash income	$ 699,550 49
Expenditure (including death claims, endowments, matured investment policies, profits, and all other payments to policy-holders)..	454,367 26
Assets.....	2,773,177 22
Reserve fund	2,245,920 00
Net surplus for policy-holders.	427,121 33

WM. MCCABE,
Managing Director.

Audited and found correct.
JAS. CARLYLE, M.D.,
Auditor.

Mr. W. T. Standen, of New York, the company's consulting actuary, in his full and detailed report of the year's operations, said:

"I have very carefully examined the accounts and balance sheet of the company, as at December 31st, 1897, and beg leave to report to you as follows, upon the result of such examination:

"Your obligation for investment policies that matured in 1897 called for an outlay of over $89,500—the individual settlements not only being generally satisfactory, but, as a matter of fact, comparing more than favorably with the settlements made by other companies upon similar forms of policies.

"The covering of this obligation, together with $136,579.96 paid to beneficiaries under policies that matured by death of the insured; $28,005.10 paid for matured endowments; 4,291.46 paid to annuitants; and $13,101.08 paid for surrendered policies, gives a total of over $271,000, paid out during the year to policy-holders alone.

"These and several other items of disbursements in a life insurance company's business are practically uncontrollable—some other items involved in the cost of management being more or less under control. It is, therefore, very gratifying to me, as an evidence of very careful management, to note that those controllable expenses are less than eight per cent. of your total disbursements.

"The continued tendency to lower rates of interest, upon such strictly first-class securities as you are authorized to invest in, emphasizes the wisdom of your management in having begun two years ago to compute reserves on new business upon that high standard of value known as the Hm. 4 per cent. Table. The course now being pursued, must be of the utmost advantage, because it is year by year applying this more rigid test to a larger and larger volume of your business, without materially disturbing your current accumulation of surplus.

"This feature also enters, with other considerations, into the important question of reducing the estimates of future surplus on investment policies, which is a necessity recognized by all the life companies. I, therefore, heartily recommend that your company adopt the estimates herewith submitted by me, based as they are, upon existing conditions, and resulting in amounts as favorable as the actual settlements now being made by the best-managed companies.

"I am glad to see that the increase in your cash income in 1897—$57,762.41—is greater than the gain effected in the previous year—a most excellent result in view of the commercial and business conditions that prevailed.

"Notwithstanding the large amount paid to policy-holders, heretofore referred to, namely, $271,000—it is very satisfactory, indeed, to find that you were again able to show an increased net surplus. This gain has been effected in spite of the conservative basis of valuation, which has been applied to the assets of the company. For instance, the market value of your debentures, etc., is $21,453.15 in excess of the amount for which you have taken credit in your statement. Following the course usually pursued, you could have properly increased your surplus account over $21,000.

"The new business written in 1897 being 2,621 policies, insuring $3,556,024 (being the largest in the history of the company), is a very handsome result, in view of increased competition in such a limited field, and especially of the financial conditions that existed throughout the greater portion of the year. I regard it as specially satisfactory that the bulk of the business is upon long-term investment plans, most favorable to the policy-holder, as well as to the company, from every point of view.

"An extremely satisfactory feature of

your business is its growing persistency—a most important element, tending to the upbuilding of the company, and the increasing of its surplus-earning capacity. This indicates to me—having many years' experience in field work—that your agents must be a class of men thoroughly versed in their work, and that the company's plans are well adapted to meet the needs of the insuring public. Naturally, the unsurpassed strength of the company, coupled with such desirable plans, must continue to attract the very best men, and the most successful agents, to your field staff.

"Having examined the investment policies whose dividend periods mature or expire in 1898, I beg leave to recommend that the sum apportioned be set aside to meet the dividend obligations accruing thereon, which amount I have allocated properly to the individual policies entitled thereto."

The president, Mr. John L. Blaikie, in moving the adoption of the report, said:

"I have pleasure in moving that the reports and balance sheet be adopted.

"In doing so, permit me to invite your attention to some interesting and important facts therein contained. But before proceeding to do so, I heartily congratulate the policy-holders upon this annual meeting being held in this splendid office, the building being owned by the company, and secured on such extremely favorable terms, that at a moderate cost we occupy one of the finest business buildings in the city, beautifully lighted on all sides, with abundant vault accommodation, and with a sufficient depth of lot to admit of great addition to our space as the business continues to grow in the future.

"The securing of this property is generally regarded as a splendid stroke of business, and a profitable, solid investment, making a valuable addition to the assets of the company.

"As on many previous occasions, you will be pleased to observe that in everything that goes to make a life insurance company successful, the North American Life again shows progress, solidity, and gain for the policy-holders.

"For example, compare the business of 1897 and 1896 under the following heads:

		Increase over 1896.	Percentage of Increase.
Assets as at Dec. 31st. 1897...	$2,773,177.22	$257,343.81	10.2
Cash Income......	699,550.49	57,762.41	9.
Ins. in force......	18,945,878.00	1,451,708.00	8.3
Premium Income	582,431.96	42,670.41	7.9
Interest Income	117,118.53	15,092.00	14.8

"The assets of the company are of a high class, and after providing for every liability, there remains a net surplus of $427,121.33, the percentage of net surplus to liabilities being 18.2, and the percentage of assets to liabilities being 118.2. I shall not refer more particularly to the assets, as that will be done by Vice-President, the Hon. Mr. Allan.

"A great deal of insurance is being done now-a-days, of such a character that it may be more fairly regarded as imaginary, rather than real insurance—no tangible assets being laid up out of which claims arising under such policies may be paid. As the figures before you will conclusively prove, the North American Life is upon a very different basis, indeed—its foundation being solid rock—and its policy-holders are abundantly justified in resting easy in their minds as to the ability of the company to promptly meet every claim as it may mature.

"It is often said by those who do not understand any better, that life insurance companies make large profits by reason of so many allowing their policies to lapse, thus dropping their insurance after having paid it maybe only one or two premiums.

"This is a mistaken view of the matter. All companies regret exceedingly the very large terminations that take place every year. It costs money to place every policy on the books, the company having to pay agents' commission, medical fees, and sundry other charges, and, of course, until the next premium falls due, the company is carrying the risk, and is liable for the amount of the policy in the event of the death of the insured.

"All respectable companies are most desirous that their policy-holders should persistently keep up their policies, and not allow them to lapse or terminate.

"A year ago I submitted a table, showing the experience of eleven companies doing business in Canada, the amount of insurance issued, the total terminations each had experienced, and what the percentage was. The North American made a far better showing than any of the eleven, and official figures given in the last Dominion Government report, showing a like experience, again places the North American in the first position.

"The importance of a thorough audit of any company's affairs can scarcely be overestimated, when that audit is thorough and exhaustive. I can state that this is the case with our esteemed auditor, Dr. Carlyle.

"Besides this, however, there is a most careful and complete examination of everything relating to the company's position made every year by the Dominion Government Superintendent of Insurance, who examines every security owned by the company, and sees that every requirement of the Insurance Act is being strictly complied with.

"This examination is made entirely independent of any person connected with the company, and the result is published in the Insurance Blue Book in detail.

"I have already trespassed too much upon your time and patience, yet cannot conclude without bearing testimony to the unwearied zeal, diligence and ability of Mr. McCabe, our managing director, of Mr. Goldman, our efficient secretary, and I may add, of the office staff generally.

"And last of all, though certainly not the least of all, we are indebted to our army of agents in the field, who have to fight many battles, but having such a company as the North American Life at their back, they win many victories, and that, too, by fair and honorable means.

Mr. J. N. Lake, in moving a vote of thanks to the company's provincial managers, inspectors and agency staff, said:

"The value of our agency staff is shown by the persistency of our business. From the last Government report I find that of the total net increase in insurance of all Canadian companies for that year, this company held almost 25 per cent of such additions. I attribute this satisfactory statement of affairs to our agents being men of integrity and high standing in their profession, and who endeavor to carry out our wishes and transact their business in a fair and proper manner. No doubt the agent is very materially aided in his work by representing the North American—a company having such a large surplus in proportion to its liabilities, and its earning power being relatively so great as compared with the majority of its competitors, is a tower of strength to its agents. I most sincerely congratulate our very efficient staff of representatives on the work they accomplished last year, the number of the policies being 2,621, and the amount of insurance thereon, $3,556,024—a truly grand year's work.

"It will be gratifying to everyone interested in the company, and speaks volumes for the energy displayed by our agents, that our new business this month is the best business for January in the history of the company.

"Another satisfactory point in the company, which reflects credit on the whole of our agency staff, including our local agents, is the small amount of outstanding and deferred premiums at the close of the year. The best test on this point is a comparison with our business and that of the other home companies in that respect. From an examination of the last Dominion Government report, it will be found that the North American is the lowest, namely, 18 per cent., while the highest is 35.56, and the best evidence that this company's business is brought down to a hard-pan basis, is shown by the outstanding and deferred premiums at the end of 1897, showing the slight increase of $3,280.15.

"It is interesting to note the great progress this company has made during the last ten years, as shown by the following table:

Yr.	Cash Income.	Assets.	Insurance in force.	Net Surplus.
7th	$228,282.64	$ 542,318 99	$ 6,974,390	$ 54,895.94
12th	434,626 42	1,413,978.00	12,060,081	225,635 80
17th	699,550 49	2,773,177.00	18,945 878	427,121.33

"You will see that the interest income increased over three-fold; assets over five times; insurance in force, nearly three-fold; and net surplus nearly eight-fold—the latter indicating that the company is a good one for the policy-holders.

"This company has always closed its books promptly at December 31st, and never includes in its statement applications or receipts, or business of any kind received at the office after that date. We discourage our agents from forcing business, and the practice of making special concessions to agents to enable them to rebate for the purpose of securing business during the last month of the year, is entirely opposed by us, as injurious to the business generallly, decidedly unfair to the older policy-holders, and cannot but result in a loss to the company conducting its business on such an improper basis."

The Hon. G. W. Allan, vice-president, said:

The president has stated that he would like me, as vice-president of the company, to make some reference to the assets, which now total the large sum of $2,773,177.22. I think the very best evidence of the excellent character of the assets of the company, and the care shown by the directors in the investment of the funds, is the large increase in our interest income for the year, namely, $15,092, and the fact that our interest and rents, due and accrued, at the end of the year should show a decrease of $1,119.57. Now, here is the position of our assets. We have invested in:

	Amount.	Percentage of Total Assets
Mortgages, etc...	$1,108,563 93	40
Debentures*... ..	635,197 89	22.9
Real estate**.. ..	292,263 83	10.5
Stocks and bonds	203,331 44	7.3
Loans on policies.	176,381 61	6.4
Loans on stocks..	157,780 00	5.7
Outstanding premiums in course of collection, and quarterly and half-yearly premiums, being balance of year's premiums not yet paid..	100,460 37	3.6
Cash in banks. ..	57,743 07	
Cash on hand.. ..	31.78	2.1
Interest and rents, due and accrued.	38,376.95	1.4
Reversions.	3,046 35	.1
	$2,778,177 22	100.

*Market value exceeds this by $21,425.15.
**Including the company's building.

I think you will agree with me, this shows a highly satisfactory state of affairs, and must be doubly reassuring to all the policy-holders of the company, as well as its excellent agency staff, as to the high standard this company has attained among the life companies in this country. So far as I can judge, it stands at the head.

"Our real estate, as compared with last year, shows but a slight addition in amount, except that we have now added thereto our own home, this handsome building, in which we are holding this meeting. It was an excellent stroke of business on the part of the company in securing this property, as we have now every accommodation for the proper conduct of the business; in fact, one of the best-equipped offices in the city, and the cost to the company will be but a moderate one. Already the space we have to rent is well tenanted, and the one office at present vacant is already bespoken. All the properties in possession of the company are well rented, and giving the company a fair return.

"From the figures taken from the last Dominion Government report, I find that our company receives a net return on its real estate largely in excess of any of its competitors."

Mr. McCabe, managing director, said he could heartily endorse all that had been said as to the efficiency of our agency staff, and the energetic and satisfactory manner result has never been accomplished since during the year just closed. He knew that the agents had unusual competition during the latter part of the year, owing to four new companies having commenced operations during 1897. Our field of operations is somewhat limited. Although the territory of the Dominion is very large, the population is small, and the competition is therefore exceedingly keen and sometimes exceedingly injurious, from the extraordinary and improper business methods adopted by those anxious to place business on the books, irrespective of the cost. In this connection I would remind you that of all the companies starting about the same time as the North American or subsequently, not one of them outside of our own has met with but moderate success

The following figures will show the profits earned by these companies since 1882:

Company.	Earnings since 1882.	Percentage of Total Earnings to Total Assets since 1882.
1. North American	$600,081 89	23.85
2.	101,881 00	8.48
3.	63,480 27	10.56
4.	51,637 71	10.18
5.	36,346 99	5.98
6.	No net surplus.	Nil.

These figures are taken from the official Government reports, and I refer to the companies by number and not by name. The experience of one company in particular, securing over two and a-half millions of new business within a few months after commencing operations, and such a result has never been accomplished since by any other company, will show you the difficulties that a new company has to contend with in commencing business. The company I refer to secured a phenomenal amount of business together with a large premium income, having at its head, as president, the most prominent man in the Dominion of Canada. Notwithstanding all these advantages the first few years' business resulted in a loss of almost the entire amount of the paid-up capital, which was over $100,000.

I mention this to show those present and our agency staff in particular that the mere fact of a company having a large capital and rushing a large amount of business on its books in a short time, means a very large liability by way of the reserve required by the Dominion Government, and must result in a loss to the company.

I trust my few remarks on this subject will not be taken as an attack on any particular company, as I have not not named any, but will explain to you that certain methods of conducting business may, on the face of it, have the appearance of success, but ultimately can have but one result. The course we have adopted has been a conservative one in every way, and we propose to follow that course, believing that our first interests must be those of our policy-holders, and that ultimately the test of the business between the different companies is "What are you doing, and what are you likely to do for your policy-holders?"

Mr. Galley, in referring to the company's loans and real estate, said:

"The mortgage list sent by this company to the Insurance Department gives every detail as to the position of the mortgage loans from year to year, showing the amount of the mortgage, the amount of the fire insurance, the details of the security held, and also, against each mortgage, the interest due thereon and accrued, so that at a glance one is able to see just the position of each mortgage.

In looking over this mortgage list, I was pleased to find the satisfactory manner in which the interest had been paid during 1897. The interest due and accrued on all loans held by the company showing a decrease, as compared with 1896, of $2,201.73. From an examination of the real estate, I consider that the company must sooner or later realize a handsome profit from these properties, when it is deemed advisable to sell them, and in view of the difficulty experienced by all companies in finding satisfactory investments for money at the present time, the company cannot do better than retain its real estate holdings.

"I certainly join with Vice-President Allan in congratulating my fellow-policy-holders and all those interested in the company, on the splendid building the company has secured. From my extended knowledge of real estate—and I have probably had more experience in that line than anyone present—I can heartily endorse everything he has said with respect to this building. * * The position of the company is highly satisfactory, and as one of its earliest and large policy-holders, I feel very pleased at the splendid position that the company has attained, and only regret that when insuring in the company I did not do so to the extent of $25,000, as I am quite satisfied it would have proved one of the best investments I could have made. Life insurance is not a temporary matter.

"It is therefore the imperative duty of those in charge of a company to see that everything in connection with it is made certain, and in this respect the energetic and yet conservative policy adopted by the North American is to be highly commended. The great progress the company has made and the strong position it has attained, make it a good company for the policy-holder."

James Thorburn, M.D., medical director, presented a full and interesting report of the mortality experienced by the company during the past year, showing that the actual loss was favorable when compared with the mortality table.

After the usual vote of thanks had been passed, the election of directors took place, after which the newly-elected board met and Mr. John L. Blaikie was unanimously elected president, the Hon. G. W. Allan and Sir Frank Smith, vice-presidents.

IN THE DRY GOODS STORE.

The trial in connection with the John Eaton Company reveals the fact that departmental store merchants, as well as others, may make glittering promises in the advertising columns of the newspapers which are not realized in the store.

Reports from different points in the Dominion indicate a good trade. The recent cold weather is having the effect of clearing up stocks of heavy goods. The advent of a few days of warm weather should not tempt the retailer to display his spring fabrics. In past years the competition to be the first in this direction has closed the winter season prematurely and proved a source of loss to the trade. Remittances to the wholesale trade are at present fairly satisfactory.

It is reported that in French manufacturing centres fancy dress goods have done much better than plain woolens and worsteds. Small diamond patterns, spotted effects, silk, threads, tartans in many combinations, have all been in good demand: upholstery goods again have been well favored throughout the year, and the goods in this branch have been brought to astonishing perfection. Cottons are being finished so perfectly as to almost defy detection when put side by side with the richest silks.

The leno and lace grounds, also the lappet weaves, are prominent among the new wash fabrics, and many novel effects are produced in these weaves, their beauty heightened by the artistic effect produced in the printing. Open work styles on the order of grenadines are also prominent in these displays, they being printed chiefly in dark colored grounds in combination with delicate-colored printings. Printers have exercised more than usual care in applying their colors, thus producing many rich and harmonious effects.

At no season of the year, perhaps, are bargains more freely advertised than at present. The dry goods stores, as a rule, take January as a month in which to reduce their stocks preparatory to the arrival of spring goods.

—Teacher—Sammy Sassafrass, you may give a definition of the word "farm." Sammy—A farm is a body of land entirely covered by a mortgage.—*New York World.*

MR. A. C. FRASER, M.P.P., North Brandon, and Mr. Chas. Adams, M.P.P., Brandon city, are on their way to Montreal, where they will have an interview with the C.P.R. authorities in regard to freight rates, their contention being that Brandon is being discriminated against.

A LETTER from St. John, of Monday last, speaks of the activity of freighting in the harbor of that city. "On Saturday when I was down I was told there were 150 cars of freight on the wharves, so rapidly has the C.P.R. brought in export freight, especially perishable freight, of which many car loads are for the 'Lake Ontario.' There are several steamers loading here to-day for Europe."

—Stories of enormous fortunes seem to shrink up miserably under the examination of the Probate judge. A short time ago the Fair estate in California was placed at from thirty to sixty millions: it has been reduced to $12,000,000. The Pullman estate in Illinois, which was variously estimated at twenty to forty millions, shrinks to about $9,000,000.

—There was a time when the Government of India had to import annually $250,000 worth of quinine and did not get enough of it even then. After a great many experiments the cultivation of the cinchona tree was made successful in India, and now there are 4,000,000 trees in Bengal, and every rural post-office in India sells a five-grain packet of the drug for half a cent, while the Government makes from $2,000 to $3,500 a year out of the profits.

J. M. COURTNEY, *Dep'y Min. of Fin.*

Correspondence.

LET HIDES BE INSPECTED.

Editor MONETARY TIMES :

SIR,—I read, with interest, your article, "Compulsory Hide Inspection," in a recent issue, and would venture to assert that the sooner the Government will compel all hides to be scrutinized by a shrewd inspector, the more all among us concerned in this line of business, as well as our national reputation, will be greatly benefited.

In the first place I would say—and think all will agree with me—that if the farmer and butcher realized this all-important factor [the good quality of hides—ED.] they would produce a cleaner and more substantial hide or skin, and thereby reap a higher margin of profit; the tanner would secure a better material, and as most Canadian leather ultimately finds a customer in European markets, not only would the consumer derive a benefit, but our national reputation for a clear, strong, and durable product would be promoted to an extent beyond comprehension.

Relative to the American market, I know of numberless instances where American purchasers insist on inspected hides; in fact, would have nothing else. In France, this is not only a custom, but a strictly enforced law, and is so systematically and uniformly performed, that no hide or skin, however slightly damaged or mutilated, is manufactured, but is promptly sold in a foreign market; consequently France enjoys the coveted renown for the highest standard leather in the world to-day.

Being an interested observer I cannot but earnestly advocate the necessity of such steps on the part of Parliament, and especially so when the tanner is compelled to pay inspection toll, as it is in no way a partial benefit, but is a protection against any and all frauds and "sharpers" and cannot but be mutually advantageous. Bring Canada to the front.

PATRIOT.

—An American paper of 15th instant, says that a railway-building race, involving the expenditure of $16,000,000, has been commenced by two wealthy corporations, each of which desires to own the first railroad in the Yukon country. Each road will be about 400 miles long, running from Pyramid Harbor, near the head of Lynn canal, to points on Lewis River, below Five Finger Rapids. "The companies back of the projects are the London Exploration Company and the Yukon Company, the principal stockholders of which are Philadelphia and New York men. The projectors of both roads figure on an average cost of over $20,000 a mile, requiring an outlay of over $8,000,000 for each road. The equipment for each will cost about $1,000,000 more. Both companies have secured rights of way from the Canadian Government, and are now working to secure from Congress necessary rights of way through the 80 miles of American territory."

—Not long ago a distinguished European scholar was lecturing in a western American city, and in the course of his lecture he remarked that Goethe was, perhaps, the greatest man intellectually who has appeared since the days of the Apostles. He was at once interrupted by a woman in the audience, who declared that Dr. Talmage was as great a man as Goethe ever was.—*New York Tribune.*

—The *Manufacturers' Record* has compiled its yearly summary of the railroad construction in the Southern States of the Union, which shows a total of 734 miles of standard gauge railroads for 1897. The estimated amount spent in construction is $11,500,000 during the year. Commenting upon 1898 prospects, it is estimated fully 3,000 miles of new lines are now under construction or contract. This is the largest estimate reported from the South for a number of years.

—Honest Dealing—"The finest example of honesty," said the returned liar, "was a sign I saw on a little shop window in London. It read: 'A drunken lady can buy here with no fear of being cheated.'"—Cincinnati *Enquirer.*

THE GOLD STANDARD IN THE STATES.

Before the Convention of the National League of Commission Merchants of the United States, at Buffalo, N.Y., on Friday last, Mr. W. C. Cornwell, president of the City Bank of Buffalo, criticized Congress, in his earnest, outspoken way, for what he termed its failure to carry out the declarations of the platform upon which McKinley was elected:

"In the Presidential election of 1896 we passed through a period of great danger. You all know how, in those dreadful weeks of suspense before the ballot was cast, we were enveloped in the gloom of doubt and distrust, and the pall of business stagnation overshadowed us.

"Why was this?

"It was because we were close to the brink of doom—the doom of a ruined commerce—the destruction which invariably sweeps out whole communities as well as individuals, whenever the attempt is made to force upon the unwilling creditor a miserable percentage of his debt—a debt into which he has put 100 per cent.. and has a right to expect to get the full amount back.

"Well, disaster, in 1896, was avoided only by a persistent, intelligent, courageous fight for the right, and victory was won for National integrity and honesty. Now, this victory was a declaration to the world that the Nation intended to remain on the gold standard and to pay as heretofore 100 cents on the dollar, but, gentlemen, since that declaration of intention by the people of this great country, what have we done? We haven't done a thing to fulfil our promise. The intention has been declared and it was a good one, but you business men, better, perhaps, than others, know what sorrowful place is paved with good intentions, and I say to you here to-night, that if this country is ever swept into the hell of anarchy, and repudiation and National dishonesty, the hell of business ruin and commercial destruction, the biggest red-hot paving stone in that street of flaming fire, over which we will walk with scorched feet and tongues parched, will be that milestone of this history-making time, the intention to make sure the gold standard, declared in the great election of 1896, but never carried out."

—Klondyke Currency Statistics.—"What is the circulation per capita up in this part of the country?" asked a new arrival of a Klondyke official. "Well, sir, the latest statistics, compiled this morning after breakfast, indicate two quarts of beans and eight crackers to each inhabitant."

—Mr E. E. Rittenhouse, who has made many friends in railway and railway supply circles during the past year, and formerly a Colorado railway man, sails for Korea early next week He goes to take charge of the setting up of the big Brookes engines which are going over for the Chemulpo-Seoul Railway, says the *Railway Review*.

—The Bureau of American Republics publishes a monthly bulletin which gets very extensive advertising patronage. As it is printed at the Government printing office at Washington, and distributed free under the official business stamp, it seems to have a "cinch" in the advertising field that is not enjoyed by the regular trade journal. This riles the Boston *Journal of Commerce*, which regards such a thing as an interference of Government with private enterprise. "This publication as it is conducted is certainly an abuse of Government power, and if not checked there is no telling where it may end."

TORONTO MARKETS.

TORONTO, Jan. 27th, 1898.

DAIRY PRODUCTS.—Receipts of butter, while not large, are fully equal to the requirements of the market. Prices remain steady and all choice grades of dairy butter sell readily at outside quotations. Dairy tubs are quoted at 15c. to 16c., and large rolls 14½c. to 15½c. per lb., while pound prints are quoted 15c. to 16c. per lb. Creamery is in fairly good supply. We quote: tubs 19c. to 20c., and prints 20c. to 21c. per lb. There is nothing new in the local cheese market. There is moderately good demand, values remain steady. Advices from the United Kingdom this week are not of more than ordinary interest. Supplies of eggs are scarce. Receipts of all kinds are light If cold weather be long continued there must be a material advance in prices

FLOUR AND MEAL.—Trading in flour last week was very quiet, but some improvement has been shown during the present week. Orders are being received more freely. Manitoba patents are quoted: patents, $5.50, and strong bakers, $5, or 10c. advance over last quotations. Mill feed remains strong, with shorts quoted $12 and bran $9 per ton.

GRAIN.—Deliveries of wheat are being made more freely, and the movement is one of activity. Barley remains steady, with 33c. quoted for No. 2. There is a firm market in rye at 45 to 46c. per bushel. Buckwheat holds steady at previous quotations. Corn is nominal and unchanged. There is a somewhat better feeling in peas with 55c. asked.

GROCERIES.—Trade is only fairly good, and the movement in general staples is but moderate. The sugar trade remains unchanged. Cable advices from Smyrna are to the effect that stocks of Sultana raisins there have been further reduced by a good demand from England and the continent. The supply in Smyrna at last reports consisted of only 1,000 tons. From Greece we now have mail advices to the 7th inst., and it appears that the statistical position is not as favorable as importers were led to believe by cables received the beginning of the month, giving the available stock in Greece at 18,000 tons, which it now appears only comprised the stock in producers' hands, to which should be added about 5,000 tons held by exporters; this makes the correct figures 23,000 tons, instead of 18,000, as cabled. The canned goods' market attracts considerable interest in grocery circles. A Toronto firm has control of the bulk of available supplies, and is dictating the terms on which the pack of several leading canners can be obtained. Prices for both fruit and vegetables are advanced and dealers quote: Tomatoes, 3 lbs. (1897), $1.25 per doz.; corn, 2 lbs., 85c. per doz.; peas, 85c. per doz.; beans, 85c. per doz.; asparagus, $2.25 per doz.; pine apple, standard, $2 per doz.; strawberries, $1.50 per doz.; citrons, flat tins, $1 per doz.; peaches, 3 lbs., $2 per doz.; ditto, 2 lbs, $1.30 per doz.; plums, greengages, 2 lbs., $1.15 per doz.; ditto, Lombards, $1 per doz.; ditto, Lombards, 3 lbs., $1.40 per doz. It is a question how far prices can be advanced. There is little doubt that consumption must be seriously affected if prices go any higher, and even at the present basis there is some danger that the demand will fall off.
